ADVANCE REPORTS

HOUSING CHARACTERISTICS BUREAU OF THE CENSUS
STANDARD METROPOLITAN STATISTICAL AREAS
MAY 20 11 57 AM '62

March 1962

LIBRARY

HC(A2)-24

Michigan

(The statistics in this series are issued in advance of publication in final reports. The series consists of 49 reports, one for the United States, and one for each of the 46 States containing standard metropolitan statistical areas, the District of Columbia, and Puerto Rico. The reports are numbered in alphabetical order rather than in order of publication)

This report presents statistics on housing characteristics for each standard metropolitan statistical area (SMSA) in the State. Data are shown for the SMSA as a whole, the constituent counties, each place of 50,000 inhabitants or more, the remaining urban area, and the rural area of the SMSA. The constituent counties of each SMSA are listed on page 2. The data represent final tabulations from the 1960 Census of Housing.

With a few exceptions, data presented in this report were tabulated from a 25-, 20-, or 5-percent sample of housing units and, therefore, are subject to sampling variability. Data on vacant units (except duration of vacancy, and rent and value outside large urban places) were tabulated from the 100-percent counts.

For occupied units, the counts by tenure and color, as byproducts of the ratio estimation procedure, are essentially in agreement with the 100-percent counts. These figures are presented in table 12 under the subject "Tenure, color, and vacancy status" and appear as control totals in subsequent tables. For subjects tabulated at different sample rates, the distributions may not add precisely to

these totals. In the case of financial characteristics, however, certain types of units were excluded from the tabulations and differences between counts may reflect the exclusion of these units (rural-farm units were excluded from the rent tabulations; trailers, units in multiunit structures or with business, and rural units on farms or on places of 10 acres or more were excluded from the value tabulations).

The statistics in this report and the definitions and explanations of the items will appear in the 1960 Census of Housing, Volume I, States and Small Areas. The individual State reports of Volume I provide these same data for each SMSA as well as each urbanized area. Similar data but in less detail will be provided in the State reports for each county outside SMSA's and each place of 1,000 inhabitants or more. A summary of all the SMSA's in the United States and places of 100,000 inhabitants or more will be included in the United States Summary part of Volume I.

An outline of the 1960 Housing Census publication program may be obtained free of charge from the Bureau of the Census, Washington 25, D.C., or any U.S. Department of Commerce Field Office.

U.S. DEPARTMENT OF COMMERCE, Luther H. Hodges, *Secretary*
BUREAU OF THE CENSUS, Richard M. Scammon, *Director*

For sale by the Bureau of the Census, Washington 25, D.C., and U.S. Department of
Commerce Field Offices, 25 cents. Complete set of 49 reports, \$10.

STANDARD METROPOLITAN STATISTICAL AREAS AND THEIR CONSTITUENT PARTS

Ann Arbor, Mich.: Washtenaw County, Mich.

Bay City, Mich.: Bay County, Mich.

Detroit, Mich.: Macomb, Oakland, and Wayne Counties, Mich.

Flint, Mich.: Genesee County, Mich.

Grand Rapids, Mich.: Kent County, Mich.

Jackson, Mich.: Jackson County, Mich.

Kalamazoo, Mich.: Kalamazoo County, Mich.

Lansing, Mich.: Clinton, Eaton, and Ingham Counties, Mich.

Muskegon-Muskegon Heights, Mich.: Muskegon County, Mich.

Saginaw, Mich.: Saginaw County, Mich.

ADVANCE REPORTS

BUREAU OF THE CENSUS
HOUSING CHARACTERISTICS
STANDARD METROPOLITAN STATISTICAL AREAS
LIBRARY

December 1961

HC(A2)-25

Minnesota

(The statistics in this series are issued in advance of publication in final reports. The series consists of 49 reports, one for the United States, and one for each of the 46 States containing standard metropolitan statistical areas, the District of Columbia, and Puerto Rico. The reports are numbered in alphabetical order rather than in order of publication)

This report presents statistics on housing characteristics for each standard metropolitan statistical area (SMSA) in the State. Data are shown for the SMSA as a whole, the constituent counties, each place of 50,000 inhabitants or more, the remaining urban area, and the rural area of the SMSA. The constituent counties of each SMSA are listed on page 2. The data represent final tabulations from the 1960 Census of Housing.

With a few exceptions, data presented in this report were tabulated from a 25-, 20-, or 5-percent sample of housing units and, therefore, are subject to sampling variability. Data on vacant units (except duration of vacancy, and rent and value outside large urban places) were tabulated from the 100-percent counts.

For occupied units, the counts by tenure and color, as byproducts of the ratio estimation procedure, are essentially in agreement with the 100-percent counts. These figures are presented in table 12 under the subject "Tenure, color, and vacancy status" and appear as control totals in subsequent tables. For subjects tabulated at different sample rates, the distributions may not add precisely to

these totals. In the case of financial characteristics, however, certain types of units were excluded from the tabulations and differences between counts may reflect the exclusion of these units (rural-farm units were excluded from the rent tabulations; trailers, units in multiunit structures or with business, and rural units on farms or on places of 10 acres or more were excluded from the value tabulations).

The statistics in this report and the definitions and explanations of the items will appear in the 1960 Census of Housing, Volume I, States and Small Areas. The individual State reports of Volume I provide these same data for each SMSA as well as each urbanized area. Similar data but in less detail will be provided in the State reports for each county outside SMSA's and each place of 1,000 inhabitants or more. A summary of all the SMSA's in the United States and places of 100,000 inhabitants or more will be included in the United States Summary part of Volume I.

An outline of the 1960 Housing Census publication program may be obtained free of charge from the Bureau of the Census, Washington 25, D.C., or any U.S. Department of Commerce Field Office.

U.S. DEPARTMENT OF COMMERCE, Luther H. Hodges, *Secretary*
BUREAU OF THE CENSUS, Richard M. Scammon, *Director*

For sale by the Bureau of the Census, Washington 25, D.C., and U.S. Department of Commerce Field Offices, 25 cents. Complete set of 49 reports, \$10.

ADVANCE REPORTS

BUREAU OF THE CENSUS
HOUSING CHARACTERISTICS
STANDARD METROPOLITAN STATISTICAL AREAS

DEC 13 9 09 AM '61
LIBRARY

December 1961

HC(A2)-26

Mississippi

(The statistics in this series are issued in advance of publication in final reports. The series consists of 49 reports, one for the United States, and one for each of the 46 States containing standard metropolitan statistical areas, the District of Columbia, and Puerto Rico. The reports are numbered in alphabetical order rather than in order of publication.)

This report presents statistics on housing characteristics for each standard metropolitan statistical area (SMSA) in the State. Data are shown for the SMSA as a whole, the constituent counties, each place of 50,000 inhabitants or more, the remaining urban area, and the rural area of the SMSA. The constituent counties of each SMSA are listed on page 2. The data represent final tabulations from the 1960 Census of Housing.

With a few exceptions, data presented in this report were tabulated from a 25-, 20-, or 5-percent sample of housing units and, therefore, are subject to sampling variability. Data on vacant units (except duration of vacancy, and rent and value outside large urban places) were tabulated from the 100-percent counts.

For occupied units, the counts by tenure and color, as byproducts of the ratio estimation procedure, are essentially in agreement with the 100-percent counts. These figures are presented in table 12 under the subject "Tenure, color, and vacancy status" and appear as control totals in subsequent tables. For subjects tabulated at different sample rates, the distributions may not add precisely to

these totals. In the case of financial characteristics, however, certain types of units were excluded from the tabulations and differences between counts may reflect the exclusion of these units (rural-farm units were excluded from the rent tabulations; trailers, units in multiunit structures or with business, and rural units on farms or on places of 10 acres or more were excluded from the value tabulations).

The statistics in this report and the definitions and explanations of the items will appear in the 1960 Census of Housing, Volume I, States and Small Areas. The individual State reports of Volume I provide these same data for each SMSA as well as each urbanized area. Similar data but in less detail will be provided in the State reports for each county outside SMSA's and each place of 1,000 inhabitants or more. A summary of all the SMSA's in the United States and places of 100,000 inhabitants or more will be included in the United States Summary part of Volume I.

An outline of the 1960 Housing Census publication program may be obtained free of charge from the Bureau of the Census, Washington 25, D.C., or any U.S. Department of Commerce Field Office.

U.S. DEPARTMENT OF COMMERCE, Luther H. Hodges, *Secretary*
BUREAU OF THE CENSUS, Richard M. Scammon, *Director*

For sale by the Bureau of the Census, Washington 25, D.C., and U.S. Department of Commerce Field Offices, 25 cents. Complete set of 49 reports, \$10.

ADVANCE REPORTS

HOUSING CHARACTERISTICS
STANDARD METROPOLITAN STATISTICAL AREAS

BUREAU OF THE CENSUS
MAR 22 1 17 PM '62

LIBRARY

March 1962

HC(A2)-27

Missouri

(The statistics in this series are issued in advance of publication in final reports. The series consists of 49 reports, one for the United States, and one for each of the 46 States containing standard metropolitan statistical areas, the District of Columbia, and Puerto Rico. The reports are numbered in alphabetical order rather than in order of publication)

This report presents statistics on housing characteristics for each standard metropolitan statistical area (SMSA) in the State. Data are shown for the SMSA as a whole, the constituent counties, each place of 50,000 inhabitants or more, the remaining urban area, and the rural area of the SMSA. The constituent counties of each SMSA are listed on page 2. The data represent final tabulations from the 1960 Census of Housing.

With a few exceptions, data presented in this report were tabulated from a 25-, 20-, or 5-percent sample of housing units and, therefore, are subject to sampling variability. Data on vacant units (except duration of vacancy, and rent and value outside large urban places) were tabulated from the 100-percent counts.

For occupied units, the counts by tenure and color, as byproducts of the ratio estimation procedure, are essentially in agreement with the 100-percent counts. These figures are presented in table 12 under the subject "Tenure, color, and vacancy status" and appear as control totals in subsequent tables. For subjects tabulated at different sample rates, the distributions may not add precisely to

these totals. In the case of financial characteristics, however, certain types of units were excluded from the tabulations and differences between counts may reflect the exclusion of these units (rural-farm units were excluded from the rent tabulations; trailers, units in multiunit structures or with business, and rural units on farms or on places of 10 acres or more were excluded from the value tabulations).

The statistics in this report and the definitions and explanations of the items will appear in the 1960 Census of Housing, Volume I, States and Small Areas. The individual State reports of Volume I provide these same data for each SMSA as well as each urbanized area. Similar data but in less detail will be provided in the State reports for each county outside SMSA's and each place of 1,000 inhabitants or more. A summary of all the SMSA's in the United States and places of 100,000 inhabitants or more will be included in the United States Summary part of Volume I.

An outline of the 1960 Housing Census publication program may be obtained free of charge from the Bureau of the Census, Washington 25, D.C., or any U.S. Department of Commerce Field Office.

Census
of
Housing

ADVANCE REPORTS
HOUSING CHARACTERISTICS
STANDARD METROPOLITAN STATISTICAL AREAS

November 1961

HC(A2)-28

Montana

(The statistics in this series are issued in advance of publication in final reports. The series consists of 49 reports, one for the United States, and one for each of the 46 States containing standard metropolitan statistical areas, the District of Columbia, and Puerto Rico. The reports are numbered in alphabetical order rather than in order of publication)

This report presents statistics on housing characteristics for each standard metropolitan statistical area (SMSA) in the State. Data are shown for the SMSA as a whole, the constituent counties, each place of 50,000 inhabitants or more, the remaining urban area, and the rural area of the SMSA. The constituent counties of each SMSA are listed on page 2. The data represent final tabulations from the 1960 Census of Housing.

With a few exceptions, data presented in this report were tabulated from a 25-, 20-, or 5-percent sample of housing units and, therefore, are subject to sampling variability. Data on vacant units (except duration of vacancy, and rent and value outside large urban places) were tabulated from the 100-percent counts.

For occupied units, the counts by tenure and color, as byproducts of the ratio estimation procedure, are essentially in agreement with the 100-percent counts. These figures are presented in table 12 under the subject "Tenure, color, and vacancy status" and appear as control totals in subsequent tables. For subjects tabulated at different sample rates, the distributions may not add precisely to

these totals. In the case of financial characteristics, however, certain types of units were excluded from the tabulations and differences between counts may reflect the exclusion of these units (rural-farm units were excluded from the rent tabulations; trailers, units in multiunit structures or with business, and rural units on farms or on places of 10 acres or more were excluded from the value tabulations).

The statistics in this report and the definitions and explanations of the items will appear in the 1960 Census of Housing, Volume I, States and Small Areas. The individual State reports of Volume I provide these same data for each SMSA as well as each urbanized area. Similar data but in less detail will be provided in the State reports for each county outside SMSA's and each place of 1,000 inhabitants or more. A summary of all the SMSA's in the United States and places of 100,000 inhabitants or more will be included in the United States Summary part of Volume I.

An outline of the 1960 Housing Census publication program may be obtained free of charge from the Bureau of the Census, Washington 25, D.C., or any U.S. Department of Commerce Field Office.

U.S. DEPARTMENT OF COMMERCE, Luther H. Hodges, *Secretary*
BUREAU OF THE CENSUS, Richard M. Scammon, *Director*

For sale by the Bureau of the Census, Washington 25, D.C., and U.S. Department of
Commerce Field Offices, 25 cents. Complete set of 49 reports, \$10.

Housing

ADVANCE REPORTS
HOUSING CHARACTERISTICS
STANDARD METROPOLITAN STATISTICAL AREAS

December 1961

HC(A2)-29

Nebraska

(The statistics in this series are issued in advance of publication in final reports. The series consists of 49 reports, one for the United States, and one for each of the 46 States containing standard metropolitan statistical areas, the District of Columbia, and Puerto Rico. The reports are numbered in alphabetical order rather than in order of publication)

This report presents statistics on housing characteristics for each standard metropolitan statistical area (SMSA) in the State. Data are shown for the SMSA as a whole, the constituent counties, each place of 50,000 inhabitants or more, the remaining urban area, and the rural area of the SMSA. The constituent counties of each SMSA are listed on page 2. The data represent final tabulations from the 1960 Census of Housing.

With a few exceptions, data presented in this report were tabulated from a 25-, 20-, or 5-percent sample of housing units and, therefore, are subject to sampling variability. Data on vacant units (except duration of vacancy, and rent and value outside large urban places) were tabulated from the 100-percent counts.

For occupied units, the counts by tenure and color, as byproducts of the ratio estimation procedure, are essentially in agreement with the 100-percent counts. These figures are presented in table 12 under the subject "Tenure, color, and vacancy status" and appear as control totals in subsequent tables. For subjects tabulated at different sample rates, the distributions may not add precisely to

these totals. In the case of financial characteristics, however, certain types of units were excluded from the tabulations and differences between counts may reflect the exclusion of these units (rural-farm units were excluded from the rent tabulations; trailers, units in multiunit structures or with business, and rural units on farms or on places of 10 acres or more were excluded from the value tabulations).

The statistics in this report and the definitions and explanations of the items will appear in the 1960 Census of Housing, Volume I, States and Small Areas. The individual State reports of Volume I provide these same data for each SMSA as well as each urbanized area. Similar data but in less detail will be provided in the State reports for each county outside SMSA's and each place of 1,000 inhabitants or more. A summary of all the SMSA's in the United States and places of 100,000 inhabitants or more will be included in the United States Summary part of Volume I.

An outline of the 1960 Housing Census publication program may be obtained free of charge from the Bureau of the Census, Washington 25, D.C., or any U.S. Department of Commerce Field Office.

U.S. DEPARTMENT OF COMMERCE, Luther H. Hodges, *Secretary*
BUREAU OF THE CENSUS, Richard M. Scammon, *Director*

For sale by the Bureau of the Census, Washington 25, D.C., and U.S. Department of
Commerce Field Offices, 25 cents. Complete set of 49 reports, \$10.

1960
Census
of
Housing

ADVANCE REPORTS
HOUSING CHARACTERISTICS
STANDARD METROPOLITAN STATISTICAL AREAS

November 1961

HC(A2)-30

Nevada

(The statistics in this series are issued in advance of publication in final reports. The series consists of 49 reports, one for the United States, and one for each of the 46 States containing standard metropolitan statistical areas, the District of Columbia, and Puerto Rico. The reports are numbered in alphabetical order rather than in order of publication)

This report presents statistics on housing characteristics for each standard metropolitan statistical area (SMSA) in the State. Data are shown for the SMSA as a whole, the constituent counties, each place of 50,000 inhabitants or more, the remaining urban area, and the rural area of the SMSA. The constituent counties of each SMSA are listed on page 2. The data represent final tabulations from the 1960 Census of Housing.

With a few exceptions, data presented in this report were tabulated from a 25-, 20-, or 5-percent sample of housing units and, therefore, are subject to sampling variability. Data on vacant units (except duration of vacancy, and rent and value outside large urban places) were tabulated from the 100-percent counts.

For occupied units, the counts by tenure and color, as byproducts of the ratio estimation procedure, are essentially in agreement with the 100-percent counts. These figures are presented in table 12 under the subject "Tenure, color, and vacancy status" and appear as control totals in subsequent tables. For subjects tabulated at different sample rates, the distributions may not add precisely to

these totals. In the case of financial characteristics, however, certain types of units were excluded from the tabulations and differences between counts may reflect the exclusion of these units (rural-farm units were excluded from the rent tabulations; trailers, units in multiunit structures or with business, and rural units on farms or on places of 10 acres or more were excluded from the value tabulations).

The statistics in this report and the definitions and explanations of the items will appear in the 1960 Census of Housing, Volume I, States and Small Areas. The individual State reports of Volume I provide these same data for each SMSA as well as each urbanized area. Similar data but in less detail will be provided in the State reports for each county outside SMSA's and each place of 1,000 inhabitants or more. A summary of all the SMSA's in the United States and places of 100,000 inhabitants or more will be included in the United States Summary part of Volume I.

An outline of the 1960 Housing Census publication program may be obtained free of charge from the Bureau of the Census, Washington 25, D.C., or any U.S. Department of Commerce Field Office.

U.S. DEPARTMENT OF COMMERCE, Luther H. Hodges, *Secretary*
BUREAU OF THE CENSUS, Richard M. Scammon, *Director*

For sale by the Bureau of the Census, Washington 25, D.C., and U.S. Department of
Commerce Field Offices, 25 cents. Complete set of 49 reports, \$10.

ADVANCE REPORTS

BUREAU OF THE CENSUS
HOUSING CHARACTERISTICS
STANDARD METROPOLITAN STATISTICAL AREAS

January 1962

HC(A2)-31

New Hampshire

(The statistics in this series are issued in advance of publication in final reports. The series consists of 49 reports, one for the United States, and one for each of the 46 States containing standard metropolitan statistical areas, the District of Columbia, and Puerto Rico. The reports are numbered in alphabetical order rather than in order of publication)

This report presents statistics on housing characteristics for each standard metropolitan statistical area (SMSA) in the State. Data are shown for the SMSA as a whole, the constituent counties, each place of 50,000 inhabitants or more, the remaining urban area, and the rural area of the SMSA. The constituent counties of each SMSA are listed on page 2. The data represent final tabulations from the 1960 Census of Housing.

With a few exceptions, data presented in this report were tabulated from a 25-, 20-, or 5-percent sample of housing units and, therefore, are subject to sampling variability. Data on vacant units (except duration of vacancy, and rent and value outside large urban places) were tabulated from the 100-percent counts.

For occupied units, the counts by tenure and color, as byproducts of the ratio estimation procedure, are essentially in agreement with the 100-percent counts. These figures are presented in table 12 under the subject "Tenure, color, and vacancy status" and appear as control totals in subsequent tables. For subjects tabulated at different sample rates, the distributions may not add precisely to

these totals. In the case of financial characteristics, however, certain types of units were excluded from the tabulations and differences between counts may reflect the exclusion of these units (rural-farm units were excluded from the rent tabulations; trailers, units in multiunit structures or with business, and rural units on farms or on places of 10 acres or more were excluded from the value tabulations).

The statistics in this report and the definitions and explanations of the items will appear in the 1960 Census of Housing, Volume I, States and Small Areas. The individual State reports of Volume I provide these same data for each SMSA as well as each urbanized area. Similar data but in less detail will be provided in the State reports for each county outside SMSA's and each place of 1,000 inhabitants or more. A summary of all the SMSA's in the United States and places of 100,000 inhabitants or more will be included in the United States Summary part of Volume I.

An outline of the 1960 Housing Census publication program may be obtained free of charge from the Bureau of the Census, Washington 25, D.C., or any U.S. Department of Commerce Field Office.

U.S. DEPARTMENT OF COMMERCE, Luther H. Hodges, *Secretary*
BUREAU OF THE CENSUS, Richard M. Scammon, *Director*

For sale by the Bureau of the Census, Washington 25, D.C., and U.S. Department of
Commerce Field Offices, 25 cents. Complete set of 49 reports, \$10.

STANDARD METROPOLITAN STATISTICAL AREAS AND THEIR CONSTITUENT PARTS

Lawrence-Haverhill, Mass.-N.H.: Lawrence and Haverhill cities; Andover, Groveland, Methuen, and North Andover towns in Essex County, Mass.; Plaistow and Salem towns in Rockingham County, N.H.

Manchester, N.H.: Manchester city and Goffstown town in Hillsborough County, N.H.

Census
of
Housing

ADVANCE REPORTS
HOUSING CHARACTERISTICS
STANDARD METROPOLITAN STATISTICAL AREAS

April 1962

HC(A2)-32

New Jersey

(The statistics in this series are issued in advance of publication in final reports. The series consists of 49 reports, one for the United States, and one for each of the 46 States containing standard metropolitan statistical areas, the District of Columbia, and Puerto Rico. The reports are numbered in alphabetical order rather than in order of publication)

This report presents statistics on housing characteristics for each standard metropolitan statistical area (SMSA) in the State. Data are shown for the SMSA as a whole, the constituent counties, each place of 50,000 inhabitants or more, the remaining urban area, and the rural area of the SMSA. The constituent counties of each SMSA are listed on page 2. The data represent final tabulations from the 1960 Census of Housing.

With a few exceptions, data presented in this report were tabulated from a 25-, 20-, or 5-percent sample of housing units and, therefore, are subject to sampling variability. Data on vacant units (except duration of vacancy, and rent and value outside large urban places) were tabulated from the 100-percent counts.

For occupied units, the counts by tenure and color, as byproducts of the ratio estimation procedure, are essentially in agreement with the 100-percent counts. These figures are presented in table 12 under the subject "Tenure, color, and vacancy status" and appear as control totals in subsequent tables. For subjects tabulated at different sample rates, the distributions may not add precisely to

these totals. In the case of financial characteristics, however, certain types of units were excluded from the tabulations and differences between counts may reflect the exclusion of these units (rural-farm units were excluded from the rent tabulations; trailers, units in multiunit structures or with business, and rural units on farms or on places of 10 acres or more were excluded from the value tabulations).

The statistics in this report and the definitions and explanations of the items will appear in the 1960 Census of Housing, Volume I, States and Small Areas. The individual State reports of Volume I provide these same data for each SMSA as well as each urbanized area. Similar data but in less detail will be provided in the State reports for each county outside SMSA's and each place of 1,000 inhabitants or more. A summary of all the SMSA's in the United States and places of 100,000 inhabitants or more will be included in the United States Summary part of Volume I.

An outline of the 1960 Housing Census publication program may be obtained free of charge from the Bureau of the Census, Washington 25, D.C., or any U.S. Department of Commerce Field Office.

U.S. DEPARTMENT OF COMMERCE, Luther H. Hodges, *Secretary*
BUREAU OF THE CENSUS, Richard M. Scammon, *Director*

For sale by the Bureau of the Census, Washington 25, D.C., and U.S. Department of
Commerce Field Offices, 25 cents. Complete set of 49 reports, \$10.
