## Wisconsin

(The statistics in this series are issued in advance of publication in final reports. The series consists of 49 reports, one for the United States, and one for each of the 46 States containing standard metropolitan statistical areas, the District of Columbia, and Puerto Rico. The reports are numbered in alphabetical order rather than in order of publication)

This report presents statistics on housing characteristics for each standard metropolitan statistical area (SMSA) in the State. Data are shown for the SMSA as a whole, the constituent counties, each place of 50,000 inhabitants or more, the remaining urban area, and the rural area of the SMSA. The constituent counties of each SMSA are listed on page 2. The data represent final tabulations from the 1960 Census of Housing.

With a few exceptions, data presented in this report were tabulated from a 25-, 20-, or 5-percent sample of housing units and, therefore, are subject to sampling variability. Data on vacant units (except duration of vacancy, and rent and value outside large urban places) were tabulated from the 100-percent counts.

For occupied units, the counts by tenure and color, as byproducts of the ratio estimation procedure, are essentially in agreement with the 100-percent counts. These figures are presented in table 12 under the subject "Tenure, color, and vacancy status" and appear as control totals in subsequent tables. For subjects tabulated at different sample rates, the distributions may not add precisely to

these totals. In the case of financial characteristics, however, certain types of units were excluded from the tabulations and differences between counts may reflect the exclusion of these units (rural-farm units were excluded from the rent tabulations; trailers, units in multiunit structures or with business, and rural units on farms or on places of 10 acres or more were excluded from the value tabulations).

The statistics in this report and the definitions and explanations of the items will appear in the 1960 Census of Housing, Volume I, States and Small Areas. The individual State reports of Volume I provide these same data for each SMSA as well as each urbanized area. Similar data but in less detail will be provided in the State reports for each county outside SMSA's and each place of 1,000 inhabitants or more. A summary of all the SMSA's in the United States and places of 100,000 inhabitants or more will be included in the United States Summary part of Volume I.

An outline of the 1960 Housing Census publication program may be obtained free of charge from the Bureau of the Census, Washington 25, D.C., or any U.S. Department of Commerce Field Office.

HOUSING CHARACTERISTICS BY AREA

LIBRARY

July 1962

HC(A2)-53

Puerto Rico

(The statistics in this series are issued in advance of publication in final reports. The series consists of 49 reports, one for the United States, and one for each of the 46 States containing standard metropolitan statistical areas, the District of Columbia, and Puerto Rico. The reports are numbered in alphabetical order rather than in order of publication)

This report presents statistics on housing characteristics for the Commonwealth of Puerto Rico and for each standard metropolitan statistical area (SMSA) in the Commonwealth. Data are shown for the Commonwealth as a whole, inside and outside SMSA's, and for urban and rural housing; for SMSA's, data are shown for the SMSA as a whole, the constituent municipalities, places of 50,000 inhabitants or more, the remaining urban area, and rural area of the SMSA. The report presents final tabulations from the 1960 Census of Housing.

Data for most of the items presented in this report were tabulated from a 25-percent sample of housing units and are subject to sampling variability. The distribution of a sample item may not add precisely to the same total as the distribution for an item tabulated on a 100-percent basis.

With respect to value of property, the data reflect the exclusion of certain owner-occupied units, namely, units in multiunit structures, units with business, and units having more than one housing unit on the property.

Este informe presenta datos estadísticos sobre las características de las viviendas en el Estado Libre Asociado de Puerto Rico y para cada área estadística metropolitana estándar (AEME) en Puerto Rico. Se presentan datos para el total del Estado Libre Asociado, dentro y fuera de AEMEs, y para viviendas urbanas y rurales; para los AEMEs, los datos se refieren al total del AEME, a los municipios que lo integran, a lugares de 50,000 habitantes o más, al balance del área urbana y al área rural del AEME. Este informe presenta tabulaciones finales del Censo de Viviendas de 1960.

Los datos para la mayoría de los temas que se incluyen en este informe fueron tabulados de una muestra del 25 por ciento de las unidades de vivienda y están sujetos a variabilidad de muestreo. El desglose para un tema de muestra puede no sumar exactamente igual al desglose del mismo tema tabulado sobre una base de 100 por ciento.

Con respecto al valor de la propiedad, los datos reflejan la exclusión de ciertas unidades en estructuras de múltiples unidades, unidades con locales comerciales y unidades donde hay más de una unidad de vivienda en la propiedad.
