Commerce - Price 25 cents.

Preface

This report is one of a series of evaluation and research reports providing measures of quality of the 1960 Censuses of Population and Housing. The evaluation and research reports are designed to serve three principal purposes: 1) to provide users of census statistics with measures of the accuracy of the data; 2) to guide the Bureau of the Census in improving future censuses and surveys; and 3) to provide information on problems of measurement in social and economic surveys to research workers in other organizations.

Presented in this report are the results of a study on the accuracy of data on occupation, industry and place of work, as reported in the 1960 Census of Population. The report does not include any analysis of the data presented. Analytic studies of the results of the 1960 census evaluation and research program will be presented in later reports in this series.

Many persons participated in the planning, direction, coordination, collection, and processing of the data, and preparation of the report. Particular acknowledgment is made here of those persons who had a major role in this study. Leon Pritzker, Chief, Response Research Branch, Statistical Research Division, and Joseph Steinberg, Chief of Statistical Methods Division until August 1963, planned the study under the general direction of William N. Hurwitz, Chief of the Statistical Research Division. William J. Milligan and G. Marie Dodd of the Population Division, Marie Wann, Elaine Davidson, Barbara Powell, Charlie Jo Jackson, Kathleen R. Mullaney, and William Taylor of the Statistical Methods Division, and Barbara Boyes of the Statistical Research Division participated in the design of the forms, sample selection and processing of the data. The report was written in the Statistical Methods Division by Elaine Davidson under the direction of Joseph Waksberg.

Contents

	Page
Introduction.....	1
Data presented.....	1
Indexes of response variance and bias.....	4
ERC survey methods and design.....	6
Limitations of data.....	7
Related reports.....	8

Text tables

A. Major occupation group according to employer primary job title and primary job description for conterminous United States.....	2
B. Persons in major occupation and industry groups as reported in 1960 census, for restricted population covered in employer record check and for total population.....	3
C. Representation of results of census and ERC for identical persons.....	4
D. Approximate standard errors of ERC estimates.....	7

Detailed tables

1. Major occupation group according to primary job title reported by employer and 1960 census; for conterminous United States, by type of enumeration area....	9
2. Major occupation group according to primary job description reported by employer and 1960 census; for conterminous United States, by type of enumeration area.....	10
3. Major occupation group according to composite report of employer and 1960 census; for conterminous United States, by type of enumeration area.....	11
4. Major industry group according to Social Security Administration and 1960 census; for conterminous United States, by type of enumeration area.....	12
5. Place of work according to employer and 1960 census; for conterminous United States.....	13
6. 1960 employer record check indexes of response variance and bias; for conterminous United States, by type of enumeration area.....	14
