August 1960

PC(P1)-23

Massachusetts

(This report is based on preliminary counts of the population compiled in the 1960 Census field offices. The series contains 57 reports which are numbered in alphabetical order rather than in order of publication)

The population of the State as of April 1, 1960, was 5,115,295, according to a preliminary count of the returns of the 1960 Census of Population. This figure represents a gain of 424,781, or 9.1 percent, over the 4,690,514 inhabitants of the State enumerated in the 1950 Census.

This report presents preliminary counts for the State, each county, each incorporated place of 1,000 or more, and each minor civil division. The preliminary figures will be

superseded by the final counts to be shown in Advance Report PC(A1)-23, which will be issued between August 1960 and December 1960. The final population totals may differ from the preliminary counts for a number of reasons.

An outline of the 1960 Population Census publication program can be obtained free of charge from the Bureau of the Census, Washington 25, D.C., or any U.S. Department of Commerce Field Office.

Michigan

(This report is based on preliminary counts of the population compiled in the 1960 Census field offices. The series contains 57 reports which are numbered in alphabetical order rather than in order of publication)

The population of the State as of April 1, 1960, was 7,778,220, according to a preliminary count of the returns of the 1960 Census of Population. This figure represents a gain of 1,406,454, or 22.1 percent, over the 6,371,766 inhabitants of the State enumerated in the 1950 Census.

This report presents preliminary counts for the State, each county, and each incorporated place of 1,000 or more. The preliminary figures will be superseded by the final counts

to be shown in Advance Report PC(A1)-24, which will be issued between August and November 1960. The final population totals may differ from the preliminary counts for a number of reasons.

An outline of the 1960 Population Census publication program can be obtained free of charge from the Bureau of the Census, Washington 25, D.C., or any U.S. Department of Commerce Field Office.

(This report is based on preliminary counts of the population compiled in the 1960 Census field offices. The series contains 57 reports which are numbered in alphabetical order rather than in order of publication)

The population of the State as of April 1, 1960, was 3,391,348, according to a preliminary count of the returns of the 1960 Census of Population. This figure represents a gain of 408,865, or 13.7 percent, over the 2,982,483 inhabitants of the State enumerated in the 1950 Census.

This report presents preliminary counts for the State, each county, and each incorporated place of 1,000 or more. The preliminary figures will be superseded by the final counts

to be shown in Advance Report PC(A1)-25, which will be issued between August 1960 and November 1960. The final population totals may differ from the preliminary counts for a number of reasons.

An outline of the 1960 Population Census publication program can be obtained free of charge from the Bureau of the Census, Washington 25, D.C., or any U.S. Department of Commerce Field Office.

(This report is based on preliminary counts of the population compiled in the 1960 Census field offices. The series contains 57 reports which are numbered in alphabetical order rather than in order of publication)

The population of the State as of April 1, 1960, was 2,165,064, according to a preliminary count of the returns of the 1960 Census of Population. This figure represents a loss of 13,850, or 0.6 percent, from the 2,178,914 inhabitants of the State enumerated in the 1950 Census.

This report presents preliminary counts for the State, each county, and each incorporated place of 1,000 or more. The preliminary figures will be superseded by the final counts

to be shown in Advance Report PC(A1)-26, which will be issued between August and November 1960. The final population totals may differ from the preliminary counts for a number of reasons.

An outline of the 1960 Population Census publication program can be obtained free of charge from the Bureau of the Census, Washington 25, D.C., or any U.S. Department of Commerce Field Office.

The population of the State as of April 1, 1960, was 4,292,982, according to a preliminary count of the returns of the 1960 Census of Population. This figure represents a gain of 338,329, or 8.6 percent over the 3,954,653 inhabitants of the State enumerated in the 1950 Census.

This report presents preliminary counts for the State, each county, and each incorporated place of 1,000 or more. The preliminary figures will be superseded by the final counts

to be shown in Advance Report PC(A1)-27, which will be issued between August and November 1960. The final population totals may differ from the preliminary counts for a number of reasons.

An outline of the 1960 Population Census publication program can be obtained free of charge from the Bureau of the Census, Washington 25, D.C., or any U.S. Department of Commerce Field Office.

POPULATION COUNTS FOR STATES
LIBRARY

August 1960

PC(Pl)-32

New Jersey

(This report is based on preliminary counts of the population compiled in the 1960 Census field offices. The series contains 57 reports which are numbered in alphabetical order rather than in order of publication)

The population of the State as of April 1, 1960, was 6,039,594, according to a preliminary count of the returns of the 1960 Census of Population. This figure represents a gain of 1,204,265, or 24.9 percent, over the 4,835,329 inhabitants of the State enumerated in the 1950 Census.

This report presents preliminary counts for the State, each county, each incorporated place of 1,000 or more, and each minor civil division. The preliminary figures will be

superseded by the final counts to be shown in Advance Report PC(A1)-32, which will be issued between August 1960 and November 1960. The final population totals may differ from the preliminary counts for a number of reasons.

An outline of the 1960 Population Census publication program can be obtained free of charge from the Bureau of the Census, Washington 25, D.C., or any U.S. Department of Commerce Field Office.

August 1960

PC(PL)-35

North Carolina

(This report is based on preliminary counts of the population compiled in the 1960 Census field offices. The series contains 57 reports which are numbered in alphabetical order rather than in order of publication)

The population of the State as of April 1, 1960, was 4,531,834, according to a preliminary count of the returns of the 1960 Census of Population. This figure represents a gain of 469,905, or 11.6 percent, over the 4,061,929 inhabitants of the State enumerated in the 1950 Census.

This report presents preliminary counts for the State, each county, and each incorporated place of 1,000 or more. The preliminary figures will be superseded by the final counts

to be shown in Advance Report PC(A1)-35, which will be issued between August and November 1960. The final population totals may differ from the preliminary counts for a number of reasons.

An outline of the 1960 Population Census publication program can be obtained free of charge from the Bureau of the Census, Washington 25, D.C., or any U.S. Department of Commerce Field Office.

PRELIMINARY REPORTS

BUREAU OF THE CENSUS
POPULATION COUNTS FOR STATES

LIBRARY

August 1960

PC(Pl.)-38

Oklahoma

(This report is based on preliminary counts of the population compiled in the 1960 Census field offices. The series contains 57 reports which are numbered in alphabetical order rather than in order of publication)

The population of the State as of April 1, 1960, was 2,303,408, according to a preliminary count of the returns of the 1960 Census of Population. This figure represents a gain of 70,057, or 3.1 percent, over the 2,233,351 inhabitants of the State enumerated in the 1950 Census.

This report presents preliminary counts for the State, each county, and each incorporated place of 1,000 or more. The preliminary figures will be superseded by the final counts

to be shown in Advance Report PC(Al)-38, which will be issued between August and November 1960. The final population totals may differ from the preliminary counts for a number of reasons.

An outline of the 1960 Population Census publication program can be obtained free of charge from the Bureau of the Census, Washington 25, D.C., or any U.S. Department of Commerce Field Office.

POPULATION COUNTS FOR STATES

August 1960

PG(P1)-39

Oregon

(This report is based on preliminary counts of the population compiled in the 1960 Census field offices. The series contains 57 reports which are numbered in alphabetical order rather than in order of publication)

The population of the State as of April 1, 1960, was 1,757,691, according to a preliminary count of the returns of the 1960 Census of Population. This figure represents a gain of 236,350, or 15.5 percent, over the 1,521,341 inhabitants of the State enumerated in the 1950 Census.

This report presents preliminary counts for the State, each county, and each incorporated place of 1,000 or more. The preliminary figures will be superseded by the final counts

to be shown in Advance Report PC(A1)-39, which will be issued between August and November 1960. The final population totals may differ from the preliminary counts for a number of reasons.

An outline of the 1960 Population Census publication program can be obtained free of charge from the Bureau of the Census, Washington 25, D.C., or any U.S. Department of Commerce Field Office.
