Census
of
Population

ADVANCE REPORTS

GENERAL SOCIAL AND ECONOMIC
CHARACTERISTICS

February 26, 1962

PC(A3)-32

New Jersey

(This series consists of 52 reports--one each for the United States, 50 States, and the District of Columbia--which are numbered in alphabetical order rather than in the order of publication)

This report presents statistics from the 1960 Census of Population on social and economic characteristics of the inhabitants of the State and of selected subdivisions of the State. The data presented here are being issued in advance of their publication in the Final Report PC(1)-32C, which will provide additional information on the same characteristics of the population for this State, as well as definitions of terms and explanations of collection and processing procedures. The final report will be published within the next month or two.

The statistics in this advance report are presented in the form of preprints of three tables (32, 33, and 70) from the final report. Tables 32 and 33 present summary statistics on nativity, parentage, migration, education, families, employment status, occupation, industry, and income for persons in each of the standard metropolitan statistical areas, urbanized areas, and urban places of 10,000 or more in the State. Distributions by social and economic characteristics are shown in

table 70 for the State by type of residence (central cities of urbanized areas, urban fringes, urban places of 10,000 or more outside urbanized areas, the remaining urban places, and rural areas).

All of the data in this advance report, and in the final report on which it is based, were tabulated from a 25-percent sample of the population, consisting of one household out of every four (and of one person out of every four persons not in households). Since the statistics shown here are based on a sample, they are subject to sampling variability, as will be explained in the final report. There may be differences between comparable distributions in this report and in other reports of the 1960 Census of Population because of sampling variability or errors in processing.

An outline of the publication program for the 1960 Census of Population may be obtained free of charge from the Bureau of the Census, Washington 25, D.C., or any U.S. Department of Commerce Field Office.

U.S. DEPARTMENT OF COMMERCE, Luther H. Hodges, *Secretary*
BUREAU OF THE CENSUS, Richard M. Scammon, *Director*

For sale by the Bureau of the Census, Washington 25, D.C., and U.S. Department of
Commerce Field Offices, 10 cents. Complete set of 52 reports, \$4.

ADVANCE REPORTS

GENERAL SOCIAL AND ECONOMIC
CHARACTERISTICS

October 2, 1961

PC(A3)-33

New Mexico

(This series consists of 52 reports--one each for the United States, 50 States, and the District of Columbia--which are numbered in alphabetical order rather than in the order of publication)

This report presents statistics from the 1960 Census of Population on social and economic characteristics of the inhabitants of the State and of selected subdivisions of the State. The data presented here are being issued in advance of their publication in the Final Report PC(1)-33C, which will provide additional information on the same characteristics of the population for this State, as well as definitions of terms and explanations of collection and processing procedures. The final report will be published within the next month or two.

The statistics in this advance report are presented in the form of preprints of three tables (32, 33, and 70) from the final report. Tables 32 and 33 present summary statistics on nativity, parentage, migration, education, families, employment status, occupation, industry, and income for persons in each of the standard metropolitan statistical areas, urbanized areas, and urban places of 10,000 or more in the State. Distributions by social and economic characteristics are shown in

table 70 for the State by type of residence (central cities of urbanized areas, urban fringes, urban places of 10,000 or more outside urbanized areas, the remaining urban places, and rural areas).

All of the data in this advance report, and in the final report on which it is based, were tabulated from a 25-percent sample of the population, consisting of one household out of every four (and of one person out of every four persons not in households). Since the statistics shown here are based on a sample, they are subject to sampling variability, as will be explained in the final report. There may be differences between comparable distributions in this report and in other reports of the 1960 Census of Population because of sampling variability or errors in processing.

An outline of the publication program for the 1960 Census of Population may be obtained free of charge from the Bureau of the Census, Washington 25, D.C., or any U.S. Department of Commerce Field Office.

U.S. DEPARTMENT OF COMMERCE, Luther H. Hodges, *Secretary*
BUREAU OF THE CENSUS, Richard M. Scammon, *Director*

For sale by the Bureau of the Census, Washington 25, D.C., and U.S. Department of
Commerce Field Offices, 10 cents. Complete set of 52 reports, \$4.

PC(A3)-34

New York

(This series consists of 52 reports--one each for the United States, 50 States, and the District of Columbia--which are numbered in alphabetical order rather than in the order of publication)

This report presents statistics from the 1960 Census of Population on social and economic characteristics of the inhabitants of the State and of selected subdivisions of the State. The data presented here are being issued in advance of their publication in the Final Report PC(1)-34C, which will provide additional information on the same characteristics of the population for this State, as well as definitions of terms and explanations of collection and processing procedures. The final report will be published within the next month or two.

The statistics in this advance report are presented in the form of preprints of three tables (32, 33, and 70) from the final report. Tables 32 and 33 present summary statistics on nativity, parentage, migration, education, families, employment status, occupation, industry, and income for persons in each of the standard metropolitan statistical areas, urbanized areas, and urban places of 10,000 or more in the State. Distributions by social and economic characteristics are shown in

table 70 for the State by type of residence (central cities of urbanized areas, urban fringes, urban places of 10,000 or more outside urbanized areas, the remaining urban places, and rural areas).

All of the data in this advance report, and in the final report on which it is based, were tabulated from a 25-percent sample of the population, consisting of one household out of every four (and of one person out of every four persons not in households). Since the statistics shown here are based on a sample, they are subject to sampling variability, as will be explained in the final report. There may be differences between comparable distributions in this report and in other reports of the 1960 Census of Population because of sampling variability or errors in processing.

An outline of the publication program for the 1960 Census of Population may be obtained free of charge from the Bureau of the Census, Washington 25, D.C., or any U.S. Department of Commerce Field Office.

U.S. DEPARTMENT OF COMMERCE, Luther H. Hodges, *Secretary*
BUREAU OF THE CENSUS, Richard M. Scammon, *Director*

For sale by the Bureau of the Census, Washington 25, D.C., and U.S. Department of
Commerce Field Offices, 10 cents. Complete set of 52 reports, \$4.

ADVANCE REPORTS
GENERAL SOCIAL AND ECONOMIC
CHARACTERISTICS

November 9, 1961

PC(A3)-35

North Carolina

(This series consists of 52 reports--one each for the United States, 50 States, and the District of Columbia--which are numbered in alphabetical order rather than in the order of publication)

This report presents statistics from the 1960 Census of Population on social and economic characteristics of the inhabitants of the State and of selected subdivisions of the State. The data presented here are being issued in advance of their publication in the Final Report PC(1)-35C, which will provide additional information on the same characteristics of the population for this State, as well as definitions of terms and explanations of collection and processing procedures. The final report will be published within the next month or two.

The statistics in this advance report are presented in the form of preprints of three tables (32, 33, and 70) from the final report. Tables 32 and 33 present summary statistics on nativity, parentage, migration, education, families, employment status, occupation, industry, and income for persons in each of the standard metropolitan statistical areas, urbanized areas, and urban places of 10,000 or more in the State. Distributions by social and economic characteristics are shown in

table 70 for the State by type of residence (central cities of urbanized areas, urban fringes, urban places of 10,000 or more outside urbanized areas, the remaining urban places, and rural areas).

All of the data in this advance report, and in the final report on which it is based, were tabulated from a 25-percent sample of the population, consisting of one household out of every four (and of one person out of every four persons not in households). Since the statistics shown here are based on a sample, they are subject to sampling variability, as will be explained in the final report. There may be differences between comparable distributions in this report and in other reports of the 1960 Census of Population because of sampling variability or errors in processing.

An outline of the publication program for the 1960 Census of Population may be obtained free of charge from the Bureau of the Census, Washington 25, D.C., or any U.S. Department of Commerce Field Office.

U.S. DEPARTMENT OF COMMERCE, Luther H. Hodges, *Secretary*
BUREAU OF THE CENSUS, Richard M. Scammon, *Director*

For sale by the Bureau of the Census, Washington 25, D.C., and U.S. Department of
Commerce Field Offices, 10 cents. Complete set of 52 reports, \$4.

Table 32.—SUMMARY OF SOCIAL CHARACTERISTICS, FOR STANDARD METROPOLITAN STATISTICAL AREAS, URBANIZED AREAS, AND URBAN PLACES OF 10,000 OR MORE: 1960

[See text for source of data. Percent not shown where less than 0.1; percent, median, and rate not shown where base is less than 200]

ADVANCE REPORTS

GENERAL SOCIAL AND ECONOMIC
CHARACTERISTICS

November 30, 1961

PC(A3)-36

North Dakota

(This series consists of 52 reports--one each for the United States, 50 States, and the District of Columbia--which are numbered in alphabetical order rather than in the order of publication)

This report presents statistics from the 1960 Census of Population on social and economic characteristics of the inhabitants of the State and of selected subdivisions of the State. The data presented here are being issued in advance of their publication in the Final Report PC(1)-36C, which will provide additional information on the same characteristics of the population for this State, as well as definitions of terms and explanations of collection and processing procedures. The final report will be published within the next month or two.

The statistics in this advance report are presented in the form of preprints of three tables (32, 33, and 70) from the final report. Tables 32 and 33 present summary statistics on nativity, parentage, migration, education, families, employment status, occupation, industry, and income for persons in each of the standard metropolitan statistical areas, urbanized areas, and urban places of 10,000 or more in the State. Distributions by social and economic characteristics are shown in

table 70 for the State by type of residence (central cities of urbanized areas, urban fringes, urban places of 10,000 or more outside urbanized areas, the remaining urban places, and rural areas).

All of the data in this advance report, and in the final report on which it is based, were tabulated from a 25-percent sample of the population, consisting of one household out of every four (and of one person out of every four persons not in households). Since the statistics shown here are based on a sample, they are subject to sampling variability, as will be explained in the final report. There may be differences between comparable distributions in this report and in other reports of the 1960 Census of Population because of sampling variability or errors in processing.

An outline of the publication program for the 1960 Census of Population may be obtained free of charge from the Bureau of the Census, Washington 25, D.C., or any U.S. Department of Commerce Field Office.

U.S. DEPARTMENT OF COMMERCE, Luther H. Hodges, *Secretary*

ADVANCE REPORTS
GENERAL SOCIAL AND ECONOMIC
CHARACTERISTICS

February 2, 1962

PC(A3)-37

Ohio

(This series consists of 52 reports--one each for the United States, 50 States, and the District of Columbia--which are numbered in alphabetical order rather than in the order of publication)

This report presents statistics from the 1960 Census of Population on social and economic characteristics of the inhabitants of the State and of selected subdivisions of the State. The data presented here are being issued in advance of their publication in the Final Report PC(1)-37C, which will provide additional information on the same characteristics of the population for this State, as well as definitions of terms and explanations of collection and processing procedures. The final report will be published within the next month or two.

The statistics in this advance report are presented in the form of preprints of three tables (32, 33, and 70) from the final report. Tables 32 and 33 present summary statistics on nativity, parentage, migration, education, families, employment status, occupation, industry, and income for persons in each of the standard metropolitan statistical areas, urbanized areas, and urban places of 10,000 or more in the State. Distributions by social and economic characteristics are shown in

table 70 for the State by type of residence (central cities of urbanized areas, urban fringes, urban places of 10,000 or more outside urbanized areas, the remaining urban places, and rural areas).

All of the data in this advance report, and in the final report on which it is based, were tabulated from a 25-percent sample of the population, consisting of one household out of every four (and of one person out of every four persons not in households). Since the statistics shown here are based on a sample, they are subject to sampling variability, as will be explained in the final report. There may be differences between comparable distributions in this report and in other reports of the 1960 Census of Population because of sampling variability or errors in processing.

An outline of the publication program for the 1960 Census of Population may be obtained free of charge from the Bureau of the Census, Washington 25, D.C., or any U.S. Department of Commerce Field Office.

U.S. DEPARTMENT OF COMMERCE, Luther H. Hodges, *Secretary*
BUREAU OF THE CENSUS, Richard M. Scammon, *Director*

For sale by the Bureau of the Census, Washington 25, D.C., and U.S. Department of
Commerce Field Offices, 10 cents. Complete set of 52 reports, \$4.

Table 32.—SUMMARY OF SOCIAL CHARACTERISTICS, FOR STANDARD METROPOLITAN STATISTICAL AREAS, URBANIZED AREAS, AND URBAN PLACES OF 10,000 OR MORE: 1960

[See text for source of data. Percent not shown where less than 0.1; percent, median, and rate not shown where base is less than 200]

AREA	TOTAL POPULATION			FOREIGN BORN	NATIVE POPULATION	TOTAL POPULATION	PER-SONS 5 YEARS OLD AND OVER	CHIL-DREN IN ELE-MENTARY SCHOOL	PER-SONS 14 TO 17 YEARS OLD	PERSONS 25 YEARS OLD AND OVER		MARRIED COUPLES WITHOUT OWN-HOUSE-HOLD	FAMI-LIES WITH OWN CHIL-DREN UNDER 6 YEARS OLD	CUMU-LATIVE FER-TILITY RATE ²
	NUMBER	PER-CENT FOREIGN BORN	PERCENT OF FOREIGN OR MIXED PARENT-AGE							PERCENT RESID-ING IN STATE OF BIRTH	PERCENT MOVED INTO HOUSE AFTER 1958

ADVANCE REPORTS

GENERAL SOCIAL AND ECONOMIC
CHARACTERISTICS

December 14, 1961

PC(A3)-38

Oklahoma

(This series consists of 52 reports--one each for the United States, 50 States, and the District of Columbia--which are numbered in alphabetical order rather than in the order of publication)

This report presents statistics from the 1960 Census of Population on social and economic characteristics of the inhabitants of the State and of selected subdivisions of the State. The data presented here are being issued in advance of their publication in the Final Report PC(1)-38C, which will provide additional information on the same characteristics of the population for this State, as well as definitions of terms and explanations of collection and processing procedures. The final report will be published within the next month or two.

The statistics in this advance report are presented in the form of preprints of three tables (32, 33, and 70) from the final report. Tables 32 and 33 present summary statistics on nativity, parentage, migration, education, families, employment status, occupation, industry, and income for persons in each of the standard metropolitan statistical areas, urbanized areas, and urban places of 10,000 or more in the State. Distributions by social and economic characteristics are shown in

table 70 for the State by type of residence (central cities of urbanized areas, urban fringes, urban places of 10,000 or more outside urbanized areas, the remaining urban places, and rural areas).

All of the data in this advance report, and in the final report on which it is based, were tabulated from a 25-percent sample of the population, consisting of one household out of every four (and of one person out of every four persons not in households). Since the statistics shown here are based on a sample, they are subject to sampling variability, as will be explained in the final report. There may be differences between comparable distributions in this report and in other reports of the 1960 Census of Population because of sampling variability or errors in processing.

An outline of the publication program for the 1960 Census of Population may be obtained free of charge from the Bureau of the Census, Washington 25, D.C., or any U.S. Department of Commerce Field Office.

U.S. DEPARTMENT OF COMMERCE, Luther H. Hodges, *Secretary*
BUREAU OF THE CENSUS, Richard M. Scammon, *Director*

For sale by the Bureau of the Census, Washington 25, D.C., and U.S. Department of
Commerce Field Offices, 10 cents. Complete set of 52 reports, \$4.

Census
of
Population

ADVANCE REPORTS
GENERAL SOCIAL AND ECONOMIC
CHARACTERISTICS

January 3, 1962

PC(A3)-39

Oregon

(This series consists of 52 reports--one each for the United States, 50 States, and the District of Columbia--which are numbered in alphabetical order rather than in the order of publication)

This report presents statistics from the 1960 Census of Population on social and economic characteristics of the inhabitants of the State and of selected subdivisions of the State. The data presented here are being issued in advance of their publication in the Final Report PC(1)-39C, which will provide additional information on the same characteristics of the population for this State, as well as definitions of terms and explanations of collection and processing procedures. The final report will be published within the next month or two.

The statistics in this advance report are presented in the form of preprints of three tables (32, 33, and 70) from the final report. Tables 32 and 33 present summary statistics on nativity, parentage, migration, education, families, employment status, occupation, industry, and income for persons in each of the standard metropolitan statistical areas, urbanized areas, and urban places of 10,000 or more in the State. Distributions by social and economic characteristics are shown in

table 70 for the State by type of residence (central cities of urbanized areas, urban fringes, urban places of 10,000 or more outside urbanized areas, the remaining urban places, and rural areas).

All of the data in this advance report, and in the final report on which it is based, were tabulated from a 25-percent sample of the population, consisting of one household out of every four (and of one person out of every four persons not in households). Since the statistics shown here are based on a sample, they are subject to sampling variability, as will be explained in the final report. There may be differences between comparable distributions in this report and in other reports of the 1960 Census of Population because of sampling variability or errors in processing.

An outline of the publication program for the 1960 Census of Population may be obtained free of charge from the Bureau of the Census, Washington 25, D.C., or any U.S. Department of Commerce Field Office.

U.S. DEPARTMENT OF COMMERCE, Luther H. Hodges, *Secretary*
BUREAU OF THE CENSUS, Richard M. Scammon, *Director*

For sale by the Bureau of the Census, Washington 25, D.C., and U.S. Department of
Commerce Field Offices, 10 cents. Complete set of 52 reports, \$4.

¹ INCLUDES STATISTICS FOR MEMBERS OF THE ARMED FORCES.

1960 Census of Population

ADVANCE REPORTS

GENERAL SOCIAL AND ECONOMIC CHARACTERISTICS

January 25, 1962

PC(A3)-40

Pennsylvania

(This series consists of 52 reports--one each for the United States, 50 States, and the District of Columbia--which are numbered in alphabetical order rather than in the order of publication)

This report presents statistics from the 1960 Census of Population on social and economic characteristics of the inhabitants of the State and of selected subdivisions of the State. The data presented here are being issued in advance of their publication in the Final Report PC(1)-40C, which will provide additional information on the same characteristics of the population for this State, as well as definitions of terms and explanations of collection and processing procedures. The final report will be published within the next month or two.

The statistics in this advance report are presented in the form of preprints of three tables (32, 33, and 70) from the final report. Tables 32 and 33 present summary statistics on nativity, parentage, migration, education, families, employment status, occupation, industry, and income for persons in each of the standard metropolitan statistical areas, urbanized areas, and urban places of 10,000 or more in the State. Distributions by social and economic characteristics are shown in

table 70 for the State by type of residence (central cities of urbanized areas, urban fringes, urban places of 10,000 or more outside urbanized areas, the remaining urban places, and rural areas).

All of the data in this advance report, and in the final report on which it is based, were tabulated from a 25-percent sample of the population, consisting of one household out of every four (and of one person out of every four persons not in households). Since the statistics shown here are based on a sample, they are subject to sampling variability, as will be explained in the final report. There may be differences between comparable distributions in this report and in other reports of the 1960 Census of Population because of sampling variability or errors in processing.

An outline of the publication program for the 1960 Census of Population may be obtained free of charge from the Bureau of the Census, Washington 25, D.C., or any U.S. Department of Commerce Field Office.

U.S. DEPARTMENT OF COMMERCE, Luther H. Hodges, *Secretary*
BUREAU OF THE CENSUS, Richard M. Scammon, *Director*

For sale by the Bureau of the Census, Washington 25, D.C., and U.S. Department of
Commerce Field Offices, 10 cents. Complete set of 52 reports, \$4.

ADVANCE REPORTS
GENERAL SOCIAL AND ECONOMIC
CHARACTERISTICS

December 13, 1961

PC(A3)-41

Rhode Island

(This series consists of 52 reports--one each for the United States, 50 States, and the District of Columbia--which are numbered in alphabetical order rather than in the order of publication)

This report presents statistics from the 1960 Census of Population on social and economic characteristics of the inhabitants of the State and of selected subdivisions of the State. The data presented here are being issued in advance of their publication in the Final Report PC(1)-41C, which will provide additional information on the same characteristics of the population for this State, as well as definitions of terms and explanations of collection and processing procedures. The final report will be published within the next month or two.

The statistics in this advance report are presented in the form of preprints of three tables (32, 33, and 70) from the final report. Tables 32 and 33 present summary statistics on nativity, parentage, migration, education, families, employment status, occupation, industry, and income for persons in each of the standard metropolitan statistical areas, urbanized areas, and urban places of 10,000 or more in the State. Distributions by social and economic characteristics are shown in

table 70 for the State by type of residence (central cities of urbanized areas, urban fringes, urban places of 10,000 or more outside urbanized areas, the remaining urban places, and rural areas).

All of the data in this advance report, and in the final report on which it is based, were tabulated from a 25-percent sample of the population, consisting of one household out of every four (and of one person out of every four persons not in households). Since the statistics shown here are based on a sample, they are subject to sampling variability, as will be explained in the final report. There may be differences between comparable distributions in this report and in other reports of the 1960 Census of Population because of sampling variability or errors in processing.

An outline of the publication program for the 1960 Census of Population may be obtained free of charge from the Bureau of the Census, Washington 25, D.C., or any U.S. Department of Commerce Field Office.

U.S. DEPARTMENT OF COMMERCE, Luther H. Hodges, *Secretary*
BUREAU OF THE CENSUS, Richard M. Scammon, *Director*

For sale by the Bureau of the Census, Washington 25, D.C., and U.S. Department of
Commerce Field Offices, 10 cents. Complete set of 52 reports, \$4.

Census
of
Population

ADVANCE REPORTS

GENERAL SOCIAL AND ECONOMIC
CHARACTERISTICS

November 17, 1961

PC(A3)-42

South Carolina

(This series consists of 52 reports--one each for the United States, 50 States, and the District of Columbia--which are numbered in alphabetical order rather than in the order of publication)

This report presents statistics from the 1960 Census of Population on social and economic characteristics of the inhabitants of the State and of selected subdivisions of the State. The data presented here are being issued in advance of their publication in the Final Report PC(1)-42C, which will provide additional information on the same characteristics of the population for this State, as well as definitions of terms and explanations of collection and processing procedures. The final report will be published within the next month or two.

The statistics in this advance report are presented in the form of preprints of three tables (32, 33, and 70) from the final report. Tables 32 and 33 present summary statistics on nativity, parentage, migration, education, families, employment status, occupation, industry, and income for persons in each of the standard metropolitan statistical areas, urbanized areas, and urban places of 10,000 or more in the State. Distributions by social and economic characteristics are shown in

table 70 for the State by type of residence (central cities of urbanized areas, urban fringes, urban places of 10,000 or more outside urbanized areas, the remaining urban places, and rural areas).

All of the data in this advance report, and in the final report on which it is based, were tabulated from a 25-percent sample of the population, consisting of one household out of every four (and of one person out of every four persons not in households). Since the statistics shown here are based on a sample, they are subject to sampling variability, as will be explained in the final report. There may be differences between comparable distributions in this report and in other reports of the 1960 Census of Population because of sampling variability or errors in processing.

An outline of the publication program for the 1960 Census of Population may be obtained free of charge from the Bureau of the Census, Washington 25, D.C., or any U.S. Department of Commerce Field Office.

U.S. DEPARTMENT OF COMMERCE, Luther H. Hodges, *Secretary*
BUREAU OF THE CENSUS, Richard M. Scammon, *Director*

For sale by the Bureau of the Census, Washington 25, D.C., and U.S. Department of
Commerce Field Offices, 10 cents. Complete set of 52 reports, \$4.

Population

ADVANCE REPORTS
GENERAL SOCIAL AND ECONOMIC
CHARACTERISTICS

October 2, 1961

PC(A3)-43

South Dakota

(This series consists of 52 reports--one each for the United States, 50 States, and the District of Columbia--which are numbered in alphabetical order rather than in the order of publication)

This report presents statistics from the 1960 Census of Population on social and economic characteristics of the inhabitants of the State and of selected subdivisions of the State. The data presented here are being issued in advance of their publication in the Final Report PC(1)-43C, which will provide additional information on the same characteristics of the population for this State, as well as definitions of terms and explanations of collection and processing procedures. The final report will be published within the next month or two.

The statistics in this advance report are presented in the form of preprints of three tables (32, 33, and 70) from the final report. Tables 32 and 33 present summary statistics on nativity, parentage, migration, education, families, employment status, occupation, industry, and income for persons in each of the standard metropolitan statistical areas, urbanized areas, and urban places of 10,000 or more in the State. Distributions by social and economic characteristics are shown in

table 70 for the State by type of residence (central cities of urbanized areas, urban fringes, urban places of 10,000 or more outside urbanized areas, the remaining urban places, and rural areas).

All of the data in this advance report, and in the final report on which it is based, were tabulated from a 25-percent sample of the population, consisting of one household out of every four (and of one person out of every four persons not in households). Since the statistics shown here are based on a sample, they are subject to sampling variability, as will be explained in the final report. There may be differences between comparable distributions in this report and in other reports of the 1960 Census of Population because of sampling variability or errors in processing.

An outline of the publication program for the 1960 Census of Population may be obtained free of charge from the Bureau of the Census, Washington 25, D.C., or any U.S. Department of Commerce Field Office.

U.S. DEPARTMENT OF COMMERCE, Luther H. Hodges, *Secretary*
BUREAU OF THE CENSUS, Richard M. Scammon, *Director*

For sale by the Bureau of the Census, Washington 25, D.C., and U.S. Department of
Commerce Field Offices, 10 cents. Complete set of 52 reports, \$4.

ADVANCE REPORTS
GENERAL SOCIAL AND ECONOMIC
CHARACTERISTICS

November 28, 1961

PC(A3)-44

Tennessee

(This series consists of 52 reports--one each for the United States, 50 States, and the District of Columbia--which are numbered in alphabetical order rather than in the order of publication)

This report presents statistics from the 1960 Census of Population on social and economic characteristics of the inhabitants of the State and of selected subdivisions of the State. The data presented here are being issued in advance of their publication in the Final Report PC(1)-44C, which will provide additional information on the same characteristics of the population for this State, as well as definitions of terms and explanations of collection and processing procedures. The final report will be published within the next month or two.

The statistics in this advance report are presented in the form of preprints of three tables (32, 33, and 70) from the final report. Tables 32 and 33 present summary statistics on nativity, parentage, migration, education, families, employment status, occupation, industry, and income for persons in each of the standard metropolitan statistical areas, urbanized areas, and urban places of 10,000 or more in the State. Distributions by social and economic characteristics are shown in

table 70 for the State by type of residence (central cities of urbanized areas, urban fringes, urban places of 10,000 or more outside urbanized areas, the remaining urban places, and rural areas).

All of the data in this advance report, and in the final report on which it is based, were tabulated from a 25-percent sample of the population, consisting of one household out of every four (and of one person out of every four persons not in households). Since the statistics shown here are based on a sample, they are subject to sampling variability, as will be explained in the final report. There may be differences between comparable distributions in this report and in other reports of the 1960 Census of Population because of sampling variability or errors in processing.

An outline of the publication program for the 1960 Census of Population may be obtained free of charge from the Bureau of the Census, Washington 25, D.C., or any U.S. Department of Commerce Field Office.

U.S. DEPARTMENT OF COMMERCE, Luther H. Hodges, *Secretary*
BUREAU OF THE CENSUS, Richard M. Scammon, *Director*

For sale by the Bureau of the Census, Washington 25, D.C., and U.S. Department of
Commerce Field Offices, 10 cents. Complete set of 52 reports, \$4.

Population

ADVANCE REPORTS
GENERAL SOCIAL AND ECONOMIC
CHARACTERISTICS

January 18, 1962

PC(A3)-45

Texas

(This series consists of 52 reports--one each for the United States, 50 States, and the District of Columbia--which are numbered in alphabetical order rather than in the order of publication)

This report presents statistics from the 1960 Census of Population on social and economic characteristics of the inhabitants of the State and of selected subdivisions of the State. The data presented here are being issued in advance of their publication in the Final Report PC(1)-45C, which will provide additional information on the same characteristics of the population for this State, as well as definitions of terms and explanations of collection and processing procedures. The final report will be published within the next month or two.

The statistics in this advance report are presented in the form of preprints of three tables (32, 33, and 70) from the final report. Tables 32 and 33 present summary statistics on nativity, parentage, migration, education, families, employment status, occupation, industry, and income for persons in each of the standard metropolitan statistical areas, urbanized areas, and urban places of 10,000 or more in the State. Distributions by social and economic characteristics are shown in

table 70 for the State by type of residence (central cities of urbanized areas, urban fringes, urban places of 10,000 or more outside urbanized areas, the remaining urban places, and rural areas).

All of the data in this advance report, and in the final report on which it is based, were tabulated from a 25-percent sample of the population, consisting of one household out of every four (and of one person out of every four persons not in households). Since the statistics shown here are based on a sample, they are subject to sampling variability, as will be explained in the final report. There may be differences between comparable distributions in this report and in other reports of the 1960 Census of Population because of sampling variability or errors in processing.

An outline of the publication program for the 1960 Census of Population may be obtained free of charge from the Bureau of the Census, Washington 25, D.C., or any U.S. Department of Commerce Field Office.

U.S. DEPARTMENT OF COMMERCE, Luther H. Hodges, *Secretary*
BUREAU OF THE CENSUS, Richard M. Scammon, *Director*

For sale by the Bureau of the Census, Washington 25, D.C., and U.S. Department of
Commerce Field Offices, 10 cents. Complete set of 52 reports, \$4.

Table 32.—SUMMARY OF SOCIAL CHARACTERISTICS, FOR STANDARD METROPOLITAN STATISTICAL AREAS, URBANIZED AREAS, AND URBAN PLACES OF 10,000 OR MORE: 1960

ADVANCE REPORTS
GENERAL SOCIAL AND ECONOMIC
CHARACTERISTICS

September 22, 1961

PC(A3)-46C

Utah

(This series consists of 52 reports--one each for the United States, 50 States, and the District of Columbia--which are numbered in alphabetical order rather than in the order of publication)

This report presents statistics from the 1960 Census of Population on social and economic characteristics of the inhabitants of the State and of selected subdivisions of the State. The data presented here are being issued in advance of their publication in the Final Report PC(1)-46C, which will provide additional information on the same characteristics of the population for this State, as well as definitions of terms and explanations of collection and processing procedures. The final report will be published within the next month or two.

The statistics in this advance report are presented in the form of preprints of three tables (32, 33, and 70) from the final report. Tables 32 and 33 present summary statistics on nativity, parentage, migration, education, families, employment status, occupation, industry, and income for persons in each of the standard metropolitan statistical areas, urbanized areas, and urban places of 10,000 or more in the State. Distributions by social and economic characteristics are shown in

table 70 for the State by type of residence (central cities of urbanized areas, urban fringes, urban places of 10,000 or more outside urbanized areas, the remaining urban places, and rural areas).

All of the data in this advance report, and in the final report on which it is based, were tabulated from a 25-percent sample of the population, consisting of one household out of every four (and of one person out of every four persons not in households). Since the statistics shown here are based on a sample, they are subject to sampling variability, as will be explained in the final report. There may be differences between comparable distributions in this report and in other reports of the 1960 Census of Population because of sampling variability or errors in processing.

An outline of the publication program for the 1960 Census of Population may be obtained free of charge from the Bureau of the Census, Washington 25, D.C., or any U.S. Department of Commerce Field Office.

U.S. DEPARTMENT OF COMMERCE, Luther H. Hodges, *Secretary*
BUREAU OF THE CENSUS, Richard M. Scammon, *Director*

For sale by the Bureau of the Census, Washington 25, D.C., and U.S. Department of
Commerce Field Offices, 10 cents. Complete set of 52 reports, \$4.

ADVANCE REPORTS
GENERAL SOCIAL AND ECONOMIC
CHARACTERISTICS

July 14, 1961

PC(A3)-47

Vermont

(This series consists of 52 reports--one each for the United States, 50 States, and the District of Columbia--which are numbered in alphabetical order rather than in the order of publication)

This report presents statistics from the 1960 Census of Population on social and economic characteristics of the inhabitants of the State and of selected subdivisions of the State. The data presented here are being issued in advance of their publication in the Final Report PC(1)-47C, which will provide additional information on the same characteristics of the population for this State, as well as definitions of terms and explanations of collection and processing procedures. The final report will be published within the next month or two.

The statistics in this advance report are presented in the form of preprints of three tables (32, 33, and 70) from the final report. Tables 32 and 33 present summary statistics on nativity, parentage, migration, education, families, employment status, occupation, industry, and income for persons in each of the standard metropolitan statistical areas, urbanized areas, and urban places of 10,000 or more in the State. Distributions by social and economic characteristics are shown in

table 70 for the State by type of residence (central cities of urbanized areas, urban fringes, urban places of 10,000 or more outside urbanized areas, the remaining urban places, and rural areas).

All of the data in this advance report, and in the final report on which it is based, were tabulated from a 25-percent sample of the population, consisting of one household out of every four (and of one person out of every four persons not in households). Since the statistics shown here are based on a sample, they are subject to sampling variability, as will be explained in the final report. There may be differences between comparable distributions in this report and in other reports of the 1960 Census of Population because of sampling variability or errors in processing.

An outline of the publication program for the 1960 Census of Population may be obtained free of charge from the Bureau of the Census, Washington 25, D.C., or any U.S. Department of Commerce Field Office.

ADVANCE REPORTS
GENERAL SOCIAL AND ECONOMIC
CHARACTERISTICS

December 29, 1961

PC(A3)-48

Virginia

(This series consists of 52 reports--one each for the United States, 50 States, and the District of Columbia--which are numbered in alphabetical order rather than in the order of publication)

This report presents statistics from the 1960 Census of Population on social and economic characteristics of the inhabitants of the State and of selected subdivisions of the State. The data presented here are being issued in advance of their publication in the Final Report PC(1)-48C, which will provide additional information on the same characteristics of the population for this State, as well as definitions of terms and explanations of collection and processing procedures. The final report will be published within the next month or two.

The statistics in this advance report are presented in the form of preprints of three tables (32, 33, and 70) from the final report. Tables 32 and 33 present summary statistics on nativity, parentage, migration, education, families, employment status, occupation, industry, and income for persons in each of the standard metropolitan statistical areas, urbanized areas, and urban places of 10,000 or more in the State. Distributions by social and economic characteristics are shown in

table 70 for the State by type of residence (central cities of urbanized areas, urban fringes, urban places of 10,000 or more outside urbanized areas, the remaining urban places, and rural areas).

All of the data in this advance report, and in the final report on which it is based, were tabulated from a 25-percent sample of the population, consisting of one household out of every four (and of one person out of every four persons not in households). Since the statistics shown here are based on a sample, they are subject to sampling variability, as will be explained in the final report. There may be differences between comparable distributions in this report and in other reports of the 1960 Census of Population because of sampling variability or errors in processing.

An outline of the publication program for the 1960 Census of Population may be obtained free of charge from the Bureau of the Census, Washington 25, D.C., or any U.S. Department of Commerce Field Office.

U.S. DEPARTMENT OF COMMERCE, Luther H. Hodges, *Secretary*
BUREAU OF THE CENSUS, Richard M. Scammon, *Director*

For sale by the Bureau of the Census, Washington 25, D.C., and U.S. Department of
Commerce Field Offices, 10 cents. Complete set of 52 reports, \$4.

ADVANCE REPORTS
GENERAL SOCIAL AND ECONOMIC
CHARACTERISTICS

January 25, 1962

PC(A3)-49

Washington

(This series consists of 52 reports--one each for the United States, 50 States, and the District of Columbia--which are numbered in alphabetical order rather than in the order of publication)

This report presents statistics from the 1960 Census of Population on social and economic characteristics of the inhabitants of the State and of selected subdivisions of the State. The data presented here are being issued in advance of their publication in the Final Report PC(1)-49C, which will provide additional information on the same characteristics of the population for this State, as well as definitions of terms and explanations of collection and processing procedures. The final report will be published within the next month or two.

The statistics in this advance report are presented in the form of preprints of three tables (32, 33, and 70) from the final report. Tables 32 and 33 present summary statistics on nativity, parentage, migration, education, families, employment status, occupation, industry, and income for persons in each of the standard metropolitan statistical areas, urbanized areas, and urban places of 10,000 or more in the State. Distributions by social and economic characteristics are shown in

table 70 for the State by type of residence (central cities of urbanized areas, urban fringes, urban places of 10,000 or more outside urbanized areas, the remaining urban places, and rural areas).

All of the data in this advance report, and in the final report on which it is based, were tabulated from a 25-percent sample of the population, consisting of one household out of every four (and of one person out of every four persons not in households). Since the statistics shown here are based on a sample, they are subject to sampling variability, as will be explained in the final report. There may be differences between comparable distributions in this report and in other reports of the 1960 Census of Population because of sampling variability or errors in processing.

An outline of the publication program for the 1960 Census of Population may be obtained free of charge from the Bureau of the Census, Washington 25, D.C., or any U.S. Department of Commerce Field Office.

U.S. DEPARTMENT OF COMMERCE, Luther H. Hodges, *Secretary*
BUREAU OF THE CENSUS, Richard M. Scammon, *Director*

For sale by the Bureau of the Census, Washington 25, D.C., and U.S. Department of
Commerce Field Offices, 10 cents. Complete set of 52 reports, \$4.

ADVANCE REPORTS
GENERAL SOCIAL AND ECONOMIC
CHARACTERISTICS

January 26, 1962

PC(A3)-50

West Virginia

(This series consists of 52 reports--one each for the United States, 50 States, and the District of Columbia--which are numbered in alphabetical order rather than in the order of publication)

This report presents statistics from the 1960 Census of Population on social and economic characteristics of the inhabitants of the State and of selected subdivisions of the State. The data presented here are being issued in advance of their publication in the Final Report PC(1)-50C, which will provide additional information on the same characteristics of the population for this State, as well as definitions of terms and explanations of collection and processing procedures. The final report will be published within the next month or two.

The statistics in this advance report are presented in the form of preprints of three tables (32, 33, and 70) from the final report. Tables 32 and 33 present summary statistics on nativity, parentage, migration, education, families, employment status, occupation, industry, and income for persons in each of the standard metropolitan statistical areas, urbanized areas, and urban places of 10,000 or more in the State. Distributions by social and economic characteristics are shown in

table 70 for the State by type of residence (central cities of urbanized areas, urban fringes, urban places of 10,000 or more outside urbanized areas, the remaining urban places, and rural areas).

All of the data in this advance report, and in the final report on which it is based, were tabulated from a 25-percent sample of the population, consisting of one household out of every four (and of one person out of every four persons not in households). Since the statistics shown here are based on a sample, they are subject to sampling variability, as will be explained in the final report. There may be differences between comparable distributions in this report and in other reports of the 1960 Census of Population because of sampling variability or errors in processing.

An outline of the publication program for the 1960 Census of Population may be obtained free of charge from the Bureau of the Census, Washington 25, D.C., or any U.S. Department of Commerce Field Office.

U.S. DEPARTMENT OF COMMERCE, Luther H. Hodges, *Secretary*
BUREAU OF THE CENSUS, Richard M. Scammon, *Director*

For sale by the Bureau of the Census, Washington 25, D.C., and U.S. Department of
Commerce Field Offices, 10 cents. Complete set of 52 reports, \$4.

ADVANCE REPORTS
GENERAL SOCIAL AND ECONOMIC
CHARACTERISTICS

December 4, 1961

PC(A3)-51

Wisconsin

(This series consists of 52 reports--one each for the United States, 50 States, and the District of Columbia--which are numbered in alphabetical order rather than in the order of publication)

This report presents statistics from the 1960 Census of Population on social and economic characteristics of the inhabitants of the State and of selected subdivisions of the State. The data presented here are being issued in advance of their publication in the Final Report PC(1)-51C, which will provide additional information on the same characteristics of the population for this State, as well as definitions of terms and explanations of collection and processing procedures. The final report will be published within the next month or two.

The statistics in this advance report are presented in the form of preprints of three tables (32, 33, and 70) from the final report. Tables 32 and 33 present summary statistics on nativity, parentage, migration, education, families, employment status, occupation, industry, and income for persons in each of the standard metropolitan statistical areas, urbanized areas, and urban places of 10,000 or more in the State. Distributions by social and economic characteristics are shown in

table 70 for the State by type of residence (central cities of urbanized areas, urban fringes, urban places of 10,000 or more outside urbanized areas, the remaining urban places, and rural areas).

All of the data in this advance report, and in the final report on which it is based, were tabulated from a 25-percent sample of the population, consisting of one household out of every four (and of one person out of every four persons not in households). Since the statistics shown here are based on a sample, they are subject to sampling variability, as will be explained in the final report. There may be differences between comparable distributions in this report and in other reports of the 1960 Census of Population because of sampling variability or errors in processing.

An outline of the publication program for the 1960 Census of Population may be obtained free of charge from the Bureau of the Census, Washington 25, D.C., or any U.S. Department of Commerce Field Office.

U.S. DEPARTMENT OF COMMERCE, Luther H. Hodges, *Secretary*
BUREAU OF THE CENSUS, Richard M. Scammon, *Director*

For sale by the Bureau of the Census, Washington 25, D.C., and U.S. Department of
Commerce Field Offices, 10 cents. Complete set of 52 reports, \$4.

Population

ADVANCE REPORTS
GENERAL SOCIAL AND ECONOMIC
CHARACTERISTICS

October 31, 1961

PC(A3)-52

Wyoming

(This series consists of 52 reports--one each for the United States, 50 States, and the District of Columbia--which are numbered in alphabetical order rather than in the order of publication)

This report presents statistics from the 1960 Census of Population on social and economic characteristics of the inhabitants of the State and of selected subdivisions of the State. The data presented here are being issued in advance of their publication in the Final Report PC(1)-52C, which will provide additional information on the same characteristics of the population for this State, as well as definitions of terms and explanations of collection and processing procedures. The final report will be published within the next month or two.

The statistics in this advance report are presented in the form of preprints of three tables (32, 33, and 70) from the final report. Tables 32 and 33 present summary statistics on nativity, parentage, migration, education, families, employment status, occupation, industry, and income for persons in each of the standard metropolitan statistical areas, urbanized areas, and urban places of 10,000 or more in the State. Distributions by social and economic characteristics are shown in

table 70 for the State by type of residence (central cities of urbanized areas, urban fringes, urban places of 10,000 or more outside urbanized areas, the remaining urban places, and rural areas).

All of the data in this advance report, and in the final report on which it is based, were tabulated from a 25-percent sample of the population, consisting of one household out of every four (and of one person out of every four persons not in households). Since the statistics shown here are based on a sample, they are subject to sampling variability, as will be explained in the final report. There may be differences between comparable distributions in this report and in other reports of the 1960 Census of Population because of sampling variability or errors in processing.

An outline of the publication program for the 1960 Census of Population may be obtained free of charge from the Bureau of the Census, Washington 25, D.C., or any U.S. Department of Commerce Field Office.

U.S. DEPARTMENT OF COMMERCE, Luther H. Hodges, *Secretary*
BUREAU OF THE CENSUS, Richard M. Scammon, *Director*

For sale by the Bureau of the Census, Washington 25, D.C., and U.S. Department of
Commerce Field Offices, 10 cents. Complete set of 52 reports, \$4.
