of
Population

ADVANCE REPORTS

FINAL POPULATION COUNTS

September 1960

PC(A1)-43

South Dakota

(These figures supersede the preliminary counts for the same areas published in the PC(P1) and PC(P2) series of reports. The present series consists of 52 reports--one each for the United States, 50 States, and the District of Columbia--which are numbered in alphabetical order rather than in order of publication)

The official population count of the State as of April 1, 1960, was 680,514. This is a gain of 27,774, or 4.3 percent, over the 652,740 inhabitants of the State in 1950.

This report presents final 1960 Population Census statistics on the number of inhabitants of the State and its counties or comparable areas. In addition, figures are given for minor civil divisions, incorporated or unincorporated places, and for the population of the State and its counties classified by urban-rural residence. Comparable figures from earlier censuses appear in Volume I of the reports of the 1950 Census of Population.

The figures shown here are being issued in advance of their publication in Final Report PC(1)-43A, which will provide additional information on the number and geographic distribution of the inhabitants of this State. The final report will be issued within the next few months.

An outline of the 1960 Population Census publication program may be obtained free of charge from the Bureau of the Census, Washington 25, D.C., or any U.S. Department of Commerce Field Office.

Urban-rural residence.--According to the definition adopted for use in the 1960 Census, the urban population comprises all persons living in (a) places of 2,500 inhabitants or more incorporated as cities, boroughs, villages, and towns (except towns in New England, New York, and Wisconsin); (b) the densely settled urban fringe, whether incorporated or unincorporated, of urbanized areas (see next paragraph); (c) towns in New England and townships in New Jersey and Pennsylvania which contain no incorporated municipalities as subdivisions and have either 25,000 inhabitants or more or a population of 2,500 to 25,000 and a density of 1,500 persons or more per square mile; (d) counties in States other than the New England States, New Jersey, and Pennsylvania that have no incorporated municipalities within their boundaries and have a density of 1,500 persons or more per square mile; and (e) unincorporated places of 2,500 inhabitants or more. The population not classified as urban constitutes the rural population.

Urbanized areas.--An urbanized area contains at least one city of 50,000 inhabitants or more and the surrounding closely settled area, whether incorporated or unincorporated, that meets specified criteria relating to land

U.S. DEPARTMENT OF COMMERCE, Frederick H. Mueller, *Secretary*
BUREAU OF THE CENSUS, Robert W. Burgess, *Director*

For sale by the Bureau of the Census, Washington 25, D.C., and U.S. Department of Commerce Field Offices, 15 cents. Complete set of 52 reports, \$6.25.

use or population density. There are a few urbanized areas where there are "twin central cities" that have a combined population of at least 50,000.

Minor civil divisions.--To the primary political divisions into which counties or comparable areas are divided, the Bureau applies the general term "minor civil divisions." From State to State they are known variously as townships, towns, judicial districts, election precincts, and the like. In some States, incorporated places are minor civil divisions in their own right and in other States they are subordinate to the minor civil division in which they are located, or the pattern is mixed--some incorporated places are independent minor civil divisions, and others are subordinate to the minor civil division.

Places.--The term "place" as used in reports of the population censuses refers to a concentration of population, regardless of the

existence of legally prescribed limits, powers, or functions. Most of the places listed are incorporated as cities, towns, villages, or boroughs, however. In addition, unincorporated places of 1,000 inhabitants or more are also presented. The towns in New England and townships in New Jersey and Pennsylvania recognized as urban are also counted as places.

Incorporated places.--Political units recognized as incorporated places in the reports of the census are those which are incorporated as cities, boroughs, towns, and villages with the exception that towns are not recognized as incorporated places in the New England States, New York, and Wisconsin.

Unincorporated places.--As in the 1950 Census, the Bureau has delineated boundaries for densely settled population centers without corporate limits. All such places of 1,000 inhabitants or more are shown in tables 2 and 3.

ADVANCE REPORTS

FINAL POPULATION COUNTS

November 29, 1960

PC(A1)-44

Tennessee

(These figures supersede the preliminary counts for the same areas published in the PC(P1) and PC(P2) series of reports. The present series consists of 52 reports--one each for the United States, 50 States, and the District of Columbia--which are numbered in alphabetical order rather than in order of publication)

The official population count of the State as of April 1, 1960, was 3,567,089. This is a gain of 275,371, or 8.4 percent, over the 3,291,718 inhabitants of the State in 1950.

This report presents final 1960 Population Census statistics on the number of inhabitants of the State and its counties or comparable areas. In addition, figures are given for census county divisions, incorporated or unincorporated places, and for the population of the State and its counties classified by urban-rural residence. Comparable figures from earlier censuses appear in Volume I of the reports of the 1950 Census of Population.

The figures shown here are being issued in advance of their publication in Final Report PC(1)-44A, which will provide additional information on the number and geographic distribution of the inhabitants of this State. The final report will be issued within the next few months.

An outline of the 1960 Population Census publication program may be obtained free of charge from the Bureau of the Census, Washington 25, D.C., or any U.S. Department of Commerce Field Office.

Urban-rural residence.--According to the definition adopted for use in the 1960 Census, the urban population comprises all persons living in (a) places of 2,500 inhabitants or more incorporated as cities, boroughs, villages, and towns (except towns in New England, New York, and Wisconsin); (b) the densely settled urban fringe, whether incorporated or unincorporated, of urbanized areas (see next paragraph); (c) towns in New England and townships in New Jersey and Pennsylvania which contain no incorporated municipalities as subdivisions and have either 25,000 inhabitants or more or a population of 2,500 to 25,000 and a density of 1,500 persons or more per square mile; (d) counties in States other than the New England States, New Jersey, and Pennsylvania that have no incorporated municipalities within their boundaries and have a density of 1,500 persons or more per square mile; and (e) unincorporated places of 2,500 inhabitants or more. The population not classified as urban constitutes the rural population.

Urbanized areas.--An urbanized area contains at least one city of 50,000 inhabitants or more and the surrounding closely settled area, whether incorporated or unincorporated, that meets specified criteria relating to land

U.S. DEPARTMENT OF COMMERCE, Frederick H. Mueller, *Secretary*
BUREAU OF THE CENSUS, Robert W. Burgess, *Director*

For sale by the Bureau of the Census, Washington 25, D.C., and U.S. Department of
Commerce Field Offices, 15 cents. Complete set of 52 reports, \$6.25.

use or population density. There are a few urbanized areas where there are "twin central cities" that have a combined population of at least 50,000.

Census county divisions.--For purposes of presenting census statistics, counties in 18 States have been subdivided into statistical areas, which are called census county divisions (CCD's). These divisions are used instead of the election precincts, townships, and other minor civil divisions for which population statistics were previously reported. The CCD's were established because the boundaries of the minor civil divisions in these States, which were observed in previous censuses, changed frequently or were difficult to identify. CCD's were defined with boundaries that will seldom require changes and that can be easily located.

Places.--The term "place" as used in reports of the population censuses refers to a concentration of population, regardless of

the existence of legally prescribed limits, powers, or functions. Most of the places listed are incorporated as cities, towns, villages, or boroughs, however. In addition, unincorporated places of 1,000 inhabitants or more are also presented. The towns in New England and townships in New Jersey and Pennsylvania recognized as urban are also counted as places.

Incorporated places.--Political units recognized as incorporated places in the reports of the census are those which are incorporated as cities, boroughs, towns, and villages with the exception that towns are not recognized as incorporated places in the New England States, New York, and Wisconsin.

Unincorporated places.--As in the 1950 Census, the Bureau has delineated boundaries for densely settled population centers without corporate limits. All such places of 1,000 inhabitants or more are shown in tables 2 and 3.

ADVANCE REPORTS

FINAL POPULATION COUNTS

November 30, 1960

PC(A1)-45

Texas

(These figures supersede the preliminary counts for the same areas published in the PC(P1) and PC(P2) series of reports. The present series consists of 52 reports--one each for the United States, 50 States, and the District of Columbia--which are numbered in alphabetical order rather than in order of publication)

The official population count of the State as of April 1, 1960, was 9,579,677. This is a gain of 1,868,483, or 24.2 percent, over the 7,711,194 inhabitants of the State in 1950.

This report presents final 1960 Population Census statistics on the number of inhabitants of the State and its counties or comparable areas. In addition, figures are given for census county divisions, incorporated or unincorporated places, and for the population of the State and its counties classified by urban-rural residence. Comparable figures from earlier censuses appear in Volume I of the reports of the 1950 Census of Population.

The figures shown here are being issued in advance of their publication in Final Report PC(1)-45A, which will provide additional information on the number and geographic distribution of the inhabitants of this State. The final report will be issued within the next few months.

An outline of the 1960 Population Census publication program may be obtained free of charge from the Bureau of the Census, Washington 25, D.C., or any U.S. Department of Commerce Field Office.

Urban-rural residence.---According to the definition adopted for use in the 1960 Census, the urban population comprises all persons living in (a) places of 2,500 inhabitants or more incorporated as cities, boroughs, villages, and towns (except towns in New England, New York, and Wisconsin); (b) the densely settled urban fringe, whether incorporated or unincorporated, of urbanized areas (see next paragraph); (c) towns in New England and townships in New Jersey and Pennsylvania which contain no incorporated municipalities as subdivisions and have either 25,000 inhabitants or more or a population of 2,500 to 25,000 and a density of 1,500 persons or more per square mile; (d) counties in States other than the New England States, New Jersey, and Pennsylvania that have no incorporated municipalities within their boundaries and have a density of 1,500 persons or more per square mile; and (e) unincorporated places of 2,500 inhabitants or more. The population not classified as urban constitutes the rural population.

Urbanized areas.---An urbanized area contains at least one city of 50,000 inhabitants or more and the surrounding closely settled area, whether incorporated or unincorporated, that meets specified criteria relating to land

U.S. DEPARTMENT OF COMMERCE, Frederick H. Mueller, *Secretary*
BUREAU OF THE CENSUS, Robert W. Burgess, *Director*

For sale by the Bureau of the Census, Washington 25, D.C., and U.S. Department of
Commerce Field Offices, 15 cents. Complete set of 52 reports, \$6.25.

use or population density. There are a few urbanized areas where there are "twin central cities" that have a combined population of at least 50,000.

Census county divisions.--For purposes of presenting census statistics, counties in 18 States have been subdivided into statistical areas, which are called census county divisions (CCD's). These divisions are used instead of the election precincts, townships, and other minor civil divisions for which population statistics were previously reported. The CCD's were established because the boundaries of the minor civil divisions in these States, which were observed in previous censuses, changed frequently or were difficult to identify. CCD's were defined with boundaries that will seldom require changes and that can be easily located.

Places.--The term "place" as used in reports of the population censuses refers to a concentration of population, regardless of

the existence of legally prescribed limits, powers, or functions. Most of the places listed are incorporated as cities, towns, villages, or boroughs, however. In addition, unincorporated places of 1,000 inhabitants or more are also presented. The towns in New England and townships in New Jersey and Pennsylvania recognized as urban are also counted as places.

Incorporated places.--Political units recognized as incorporated places in the reports of the census are those which are incorporated as cities, boroughs, towns, and villages with the exception that towns are not recognized as incorporated places in the New England States, New York, and Wisconsin.

Unincorporated places.--As in the 1950 Census, the Bureau has delineated boundaries for densely settled population centers without corporate limits. All such places of 1,000 inhabitants or more are shown in tables 2 and 3.

Population

ADVANCE REPORTS

FINAL POPULATION COUNTS

September 1960

PC(A1)-46

Utah

(These figures supersede the preliminary counts for the same areas published in the PC(P1) and PC(P2) series of reports. The present series consists of 52 reports--one each for the United States, 50 States, and the District of Columbia--which are numbered in alphabetical order rather than in order of publication)

The official population count of the State as of April 1, 1960, was 890,627. This is a gain of 201,765, or 29.3 percent, over the 688,862 inhabitants of the State in 1950.

This report presents final 1960 Population Census statistics on the number of inhabitants of the State and its counties or comparable areas. In addition, figures are given for census county divisions, incorporated or unincorporated places, and for the population of the State and its counties classified by urban-rural residence. Comparable figures from earlier censuses appear in Volume I of the reports of the 1950 Census of Population.

The figures shown here are being issued in advance of their publication in Final Report PC(1)-46A, which will provide additional information on the number and geographic distribution of the inhabitants of this State. The final report will be issued within the next few months.

An outline of the 1960 Population Census publication program may be obtained free of charge from the Bureau of the Census, Washington 25, D.C., or any U.S. Department of Commerce Field Office.

Urban-rural residence.---According to the definition adopted for use in the 1960 Census, the urban population comprises all persons living in (a) places of 2,500 inhabitants or more incorporated as cities, boroughs, villages, and towns (except towns in New England, New York, and Wisconsin); (b) the densely settled urban fringe, whether incorporated or unincorporated, of urbanized areas (see next paragraph); (c) towns in New England and townships in New Jersey and Pennsylvania which contain no incorporated municipalities as subdivisions and have either 25,000 inhabitants or more or a population of 2,500 to 25,000 and a density of 1,500 persons or more per square mile; (d) counties in States other than the New England States, New Jersey, and Pennsylvania that have no incorporated municipalities within their boundaries and have a density of 1,500 persons or more per square mile; and (e) unincorporated places of 2,500 inhabitants or more. The population not classified as urban constitutes the rural population.

Urbanized areas.---An urbanized area contains at least one city of 50,000 inhabitants or more and the surrounding closely settled area, whether incorporated or unincorporated, that meets specified criteria relating to land

U.S. DEPARTMENT OF COMMERCE, Frederick H. Mueller, *Secretary*
BUREAU OF THE CENSUS, Robert W. Burgess, *Director*

For sale by the Bureau of the Census, Washington 25, D.C., and U.S. Department of Commerce Field Offices, 15 cents. Complete set of 52 reports, \$6.25.

use or population density. There are a few urbanized areas where there are "twin central cities" that have a combined population of at least 50,000.

Census county divisions.--For purposes of presenting census statistics, counties in 18 States have been subdivided into statistical areas, which are called census county divisions (CCD's). These divisions are used instead of the election precincts, townships, and other minor civil divisions for which population statistics were previously reported. The CCD's were established because the boundaries of the minor civil divisions in these States, which were observed in previous censuses, changed frequently or were difficult to identify. CCD's were defined with boundaries that will seldom require changes and that can be easily located.

Places.--The term "place" as used in reports of the population censuses refers to a concentration of population, regardless of

the existence of legally prescribed limits, powers, or functions. Most of the places listed are incorporated as cities, towns, villages, or boroughs, however. In addition, unincorporated places of 1,000 inhabitants or more are also presented. The towns in New England and townships in New Jersey and Pennsylvania recognized as urban are also counted as places.

Incorporated places.--Political units recognized as incorporated places in the reports of the census are those which are incorporated as cities, boroughs, towns, and villages with the exception that towns are not recognized as incorporated places in the New England States, New York, and Wisconsin.

Unincorporated places.--As in the 1950 Census, the Bureau has delineated boundaries for densely settled population centers without corporate limits. All such places of 1,000 inhabitants or more are shown in tables 2 and 3.

ADVANCE REPORTS

FINAL POPULATION COUNTS

August 1960

PC(A1)-47

Vermont

(These figures supersede the preliminary counts for the same areas published in the PC(P1) and PC(P2) series of reports. The present series consists of 52 reports--one each for the United States, 50 States, and the District of Columbia--which are numbered in alphabetical order rather than in order of publication)

The official population count of the State as of April 1, 1960, was 389,881. This is a gain of 12,134, or 3.2 percent, over the 377,747 inhabitants of the State in 1950.

This report presents final 1960 Population Census statistics on the number of inhabitants of the State and its counties or comparable areas. In addition, figures are given for minor civil divisions, incorporated or unincorporated places, and for the population of the State and its counties classified by urban-rural residence. Comparable figures from earlier censuses appear in Volume I of the reports of the 1950 Census of Population.

The figures shown here are being issued in advance of their publication in Final Report PC(1)-47A, which will provide additional information on the number and geographic distribution of the inhabitants of this State. The final report will be issued within the next few months.

An outline of the 1960 Population Census publication program may be obtained free of charge from the Bureau of the Census, Washington 25, D.C., or any U.S. Department of Commerce Field Office.

Urban-rural residence.--According to the definition adopted for use in the 1960 Census, the urban population comprises all persons living in (a) places of 2,500 inhabitants or more incorporated as cities, boroughs, villages, and towns (except towns in New England, New York, and Wisconsin); (b) the densely settled urban fringe, whether incorporated or unincorporated, of urbanized areas (see next paragraph); (c) towns in New England and townships in New Jersey and Pennsylvania which contain no incorporated municipalities as subdivisions and have either 25,000 inhabitants or more or a population of 2,500 to 25,000 and a density of 1,500 persons or more per square mile; (d) counties in States other than the New England States, New Jersey, and Pennsylvania that have no incorporated municipalities within their boundaries and have a density of 1,500 persons or more per square mile; and (e) unincorporated places of 2,500 inhabitants or more. The population not classified as urban constitutes the rural population.

Urbanized areas.--An urbanized area contains at least one city of 50,000 inhabitants or more and the surrounding closely settled area, whether incorporated or unincorporated, that meets specified criteria relating to land

U.S. DEPARTMENT OF COMMERCE, Frederick H. Mueller, *Secretary*
BUREAU OF THE CENSUS, Robert W. Burgess, *Director*

For sale by the Bureau of the Census, Washington 25, D.C., and U.S. Department of Commerce Field Offices, 15 cents. Complete set of 52 reports, \$6.25.

use or population density. There are a few urbanized areas where there are "twin central cities" that have a combined population of at least 50,000.

Minor civil divisions.--To the primary political divisions into which counties or comparable areas are divided, the Bureau applies the general term "minor civil divisions." From State to State they are known variously as townships, towns, judicial districts, election precincts, and the like. In some States, incorporated places are minor civil divisions in their own right and in other States they are subordinate to the minor civil division in which they are located, or the pattern is mixed--some incorporated places are independent minor civil divisions, and others are subordinate to the minor civil division.

Places.--The term "place" as used in reports of the population censuses refers to a concentration of population, regardless of the

existence of legally prescribed limits, powers, or functions. Most of the places listed are incorporated as cities, towns, villages, or boroughs, however. In addition, unincorporated places of 1,000 inhabitants or more are also presented. The towns in New England and townships in New Jersey and Pennsylvania recognized as urban are also counted as places.

Incorporated places.--Political units recognized as incorporated places in the reports of the census are those which are incorporated as cities, boroughs, towns, and villages with the exception that towns are not recognized as incorporated places in the New England States, New York, and Wisconsin.

Unincorporated places.--As in the 1950 Census, the Bureau has delineated boundaries for densely settled population centers without corporate limits. All such places of 1,000 inhabitants or more are shown in tables 2 and 3.

ADVANCE REPORTS

FINAL POPULATION COUNTS

November 30, 1960

PC(A1)-48

Virginia

(These figures supersede the preliminary counts for the same areas published in the PC(P1) and PC(P2) series of reports. The present series consists of 52 reports--one each for the United States, 50 States, and the District of Columbia--which are numbered in alphabetical order rather than in order of publication)

The official population count of the State as of April 1, 1960, was 3,966,949. This is a gain of 648,269, or 19.5 percent, over the 3,318,680 inhabitants of the State in 1950.

This report presents final 1960 Population Census statistics on the number of inhabitants of the State and its counties or comparable areas. In addition, figures are given for minor civil divisions, incorporated or unincorporated places, and for the population of the State and its counties classified by urban-rural residence. Comparable figures from earlier censuses appear in Volume I of the reports of the 1950 Census of Population.

The figures shown here are being issued in advance of their publication in Final Report PC(1)-48A, which will provide additional information on the number and geographic distribution of the inhabitants of this State. The final report will be issued within the next few months.

An outline of the 1960 Population Census publication program may be obtained free of charge from the Bureau of the Census, Washington 25, D.C., or any U.S. Department of Commerce Field Office.

Urban-rural residence.--According to the definition adopted for use in the 1960 Census, the urban population comprises all persons living in (a) places of 2,500 inhabitants or more incorporated as cities, boroughs, villages, and towns (except towns in New England, New York, and Wisconsin); (b) the densely settled urban fringe, whether incorporated or unincorporated, of urbanized areas (see next paragraph); (c) towns in New England and townships in New Jersey and Pennsylvania which contain no incorporated municipalities as subdivisions and have either 25,000 inhabitants or more or a population of 2,500 to 25,000 and a density of 1,500 persons or more per square mile; (d) counties in States other than the New England States, New Jersey, and Pennsylvania that have no incorporated municipalities within their boundaries and have a density of 1,500 persons or more per square mile; and (e) unincorporated places of 2,500 inhabitants or more. The population not classified as urban constitutes the rural population.

Urbanized areas.--An urbanized area contains at least one city of 50,000 inhabitants or more and the surrounding closely settled area, whether incorporated or unincorporated, that meets specified criteria relating to land

U.S. DEPARTMENT OF COMMERCE, Frederick H. Mueller, *Secretary*
BUREAU OF THE CENSUS, Robert W. Burgess, *Director*

Commerce Field Offices, 15 cents. Complete set of 52 reports, \$6.25.

use or population density. There are a few urbanized areas where there are "twin central cities" that have a combined population of at least 50,000.

Minor civil divisions.--To the primary political divisions into which counties or comparable areas are divided, the Bureau applies the general term "minor civil divisions." From State to State they are known variously as townships, towns, judicial districts, election precincts, and the like. In some States, incorporated places are minor civil divisions in their own right and in other States they are subordinate to the minor civil division in which they are located, or the pattern is mixed--some incorporated places are independent minor civil divisions, and others are subordinate to the minor civil division.

Places.--The term "place" as used in reports of the population censuses refers to a concentration of population, regardless of the

existence of legally prescribed limits, powers, or functions. Most of the places listed are incorporated as cities, towns, villages, or boroughs, however. In addition, unincorporated places of 1,000 inhabitants or more are also presented. The towns in New England and townships in New Jersey and Pennsylvania recognized as urban are also counted as places.

Incorporated places.--Political units recognized as incorporated places in the reports of the census are those which are incorporated as cities, boroughs, towns, and villages with the exception that towns are not recognized as incorporated places in the New England States, New York, and Wisconsin.

Unincorporated places.--As in the 1950 Census, the Bureau has delineated boundaries for densely settled population centers without corporate limits. All such places of 1,000 inhabitants or more are shown in tables 2 and 3.

ADVANCE REPORTS

FINAL POPULATION COUNTS

November 30, 1960

PC(A1)-49

Washington

(These figures supersede the preliminary counts for the same areas published in the PC(F1) and PC(F2) series of reports. The present series consists of 52 reports--one each for the United States, 50 States, and the District of Columbia--which are numbered in alphabetical order rather than in order of publication)

The official population count of the State as of April 1, 1960, was 2,853,214. This is a gain of 474,251, or 19.9 percent, over the 2,378,963 inhabitants of the State in 1950.

This report presents final 1960 Population Census statistics on the number of inhabitants of the State and its counties or comparable areas. In addition, figures are given for census county divisions, incorporated or unincorporated places, and for the population of the State and its counties classified by urban-rural residence. Comparable figures from earlier censuses appear in Volume I of the reports of the 1950 Census of Population.

The figures shown here are being issued in advance of their publication in Final Report PC(1)-49A, which will provide additional information on the number and geographic distribution of the inhabitants of this State. The final report will be issued within the next few months.

An outline of the 1960 Population Census publication program may be obtained free of charge from the Bureau of the Census, Washington 25, D.C., or any U.S. Department of Commerce Field Office.

Urban-rural residence.--According to the definition adopted for use in the 1960 Census, the urban population comprises all persons living in (a) places of 2,500 inhabitants or more incorporated as cities, boroughs, villages, and towns (except towns in New England, New York, and Wisconsin); (b) the densely settled urban fringe, whether incorporated or unincorporated, of urbanized areas (see next paragraph); (c) towns in New England and townships in New Jersey and Pennsylvania which contain no incorporated municipalities as subdivisions and have either 25,000 inhabitants or more or a population of 2,500 to 25,000 and a density of 1,500 persons or more per square mile; (d) counties in States other than the New England States, New Jersey, and Pennsylvania that have no incorporated municipalities within their boundaries and have a density of 1,500 persons or more per square mile; and (e) unincorporated places of 2,500 inhabitants or more. The population not classified as urban constitutes the rural population.

Urbanized areas.--An urbanized area contains at least one city of 50,000 inhabitants or more and the surrounding closely settled area, whether incorporated or unincorporated, that meets specified criteria relating to land

U.S. DEPARTMENT OF COMMERCE, Frederick H. Mueller, *Secretary*
BUREAU OF THE CENSUS, Robert W. Burgess, *Director*

For sale by the Bureau of the Census, Washington 25, D.C., and U.S. Department of
Commerce Field Offices, 15 cents. Complete set of 52 reports, \$6.25.

use or population density. There are a few urbanized areas where there are "twin central cities" that have a combined population of at least 50,000.

Census county divisions.--For purposes of presenting census statistics, counties in 18 States have been subdivided into statistical areas, which are called census county divisions (CCD's). These divisions are used instead of the election precincts, townships, and other minor civil divisions for which population statistics were previously reported. The CCD's were established because the boundaries of the minor civil divisions in these States, which were observed in previous censuses, changed frequently or were difficult to identify. CCD's were defined with boundaries that will seldom require changes and that can be easily located.

Places.--The term "place" as used in reports of the population censuses refers to a concentration of population, regardless of

the existence of legally prescribed limits, powers, or functions. Most of the places listed are incorporated as cities, towns, villages, or boroughs, however. In addition, unincorporated places of 1,000 inhabitants or more are also presented. The towns in New England and townships in New Jersey and Pennsylvania recognized as urban are also counted as places.

Incorporated places.--Political units recognized as incorporated places in the reports of the census are those which are incorporated as cities, boroughs, towns, and villages with the exception that towns are not recognized as incorporated places in the New England States, New York, and Wisconsin.

Unincorporated places.--As in the 1950 Census, the Bureau has delineated boundaries for densely settled population centers without corporate limits. All such places of 1,000 inhabitants or more are shown in tables 2 and 3.

ADVANCE REPORTS

FINAL POPULATION COUNTS

November 9, 1960

PC(A1)-50

West Virginia

(These figures supersede the preliminary counts for the same areas published in the PC(P1) and PC(P2) series of reports. The present series consists of 52 reports--one each for the United States, 50 States, and the District of Columbia--which are numbered in alphabetical order rather than in order of publication)

The official population count of the State as of April 1, 1960, was 1,860,421. This is a loss of 145,131, or -7.2 percent, from the 2,005,552 inhabitants of the State in 1950.

This report presents final 1960 Population Census statistics on the number of inhabitants of the State and its counties or comparable areas. In addition, figures are given for minor civil divisions, incorporated or unincorporated places, and for the population of the State and its counties classified by urban-rural residence. Comparable figures from earlier censuses appear in Volume I of the reports of the 1950 Census of Population.

The figures shown here are being issued in advance of their publication in Final Report PC(1)-50A, which will provide additional information on the number and geographic distribution of the inhabitants of this State. The final report will be issued within the next few months.

An outline of the 1960 Population Census publication program may be obtained free of charge from the Bureau of the Census, Washington 25, D.C., or any U.S. Department of Commerce Field Office.

Urban-rural residence.---According to the definition adopted for use in the 1960 Census, the urban population comprises all persons living in (a) places of 2,500 inhabitants or more incorporated as cities, boroughs, villages, and towns (except towns in New England, New York, and Wisconsin); (b) the densely settled urban fringe, whether incorporated or unincorporated, of urbanized areas (see next paragraph); (c) towns in New England and townships in New Jersey and Pennsylvania which contain no incorporated municipalities as subdivisions and have either 25,000 inhabitants or more or a population of 2,500 to 25,000 and a density of 1,500 persons or more per square mile; (d) counties in States other than the New England States, New Jersey, and Pennsylvania that have no incorporated municipalities within their boundaries and have a density of 1,500 persons or more per square mile; and (e) unincorporated places of 2,500 inhabitants or more. The population not classified as urban constitutes the rural population.

Urbanized areas.---An urbanized area contains at least one city of 50,000 inhabitants or more and the surrounding closely settled area, whether incorporated or unincorporated, that meets specified criteria relating to land

U.S. DEPARTMENT OF COMMERCE, Frederick H. Mueller, *Secretary*
BUREAU OF THE CENSUS, Robert W. Burgess, *Director*

For sale by the Bureau of the Census, Washington 25, D.C., and U.S. Department of
Commerce Field Offices, 15 cents. Complete set of 52 reports, \$6.25.

use or population density. There are a few urbanized areas where there are "twin central cities" that have a combined population of at least 50,000.

Minor civil divisions.--To the primary political divisions into which counties or comparable areas are divided, the Bureau applies the general term "minor civil divisions." From State to State they are known variously as townships, towns, judicial districts, election precincts, and the like. In some States, incorporated places are minor civil divisions in their own right and in other States they are subordinate to the minor civil division in which they are located, or the pattern is mixed--some incorporated places are independent minor civil divisions, and others are subordinate to the minor civil division.

Places.--The term "place" as used in reports of the population censuses refers to a concentration of population, regardless of the

existence of legally prescribed limits, powers, or functions. Most of the places listed are incorporated as cities, towns, villages, or boroughs, however. In addition, unincorporated places of 1,000 inhabitants or more are also presented. The towns in New England and townships in New Jersey and Pennsylvania recognized as urban are also counted as places.

Incorporated places.--Political units recognized as incorporated places in the reports of the census are those which are incorporated as cities, boroughs, towns, and villages with the exception that towns are not recognized as incorporated places in the New England States, New York, and Wisconsin.

Unincorporated places.--As in the 1950 Census, the Bureau has delineated boundaries for densely settled population centers without corporate limits. All such places of 1,000 inhabitants or more are shown in tables 2 and 3.

ADVANCE REPORTS

FINAL POPULATION COUNTS

November 28, 1960

PC(A1)-51

Wisconsin

(These figures supersede the preliminary counts for the same areas published in the PC(P1) and PC(P2) series of reports. The present series consists of 52 reports--one each for the United States, 50 States, and the District of Columbia--which are numbered in alphabetical order rather than in order of publication)

The official population count of the State as of April 1, 1960, was 3,951,777. This is a gain of 517,202, or 15.1 percent, over the 3,434,575 inhabitants of the State in 1950.

This report presents final 1960 Population Census statistics on the number of inhabitants of the State and its counties or comparable areas. In addition, figures are given for minor civil divisions, incorporated or unincorporated places, and for the population of the State and its counties classified by urban-rural residence. Comparable figures from earlier censuses appear in Volume I of the reports of the 1950 Census of Population.

The figures shown here are being issued, in advance of their publication in Final Report PC(1)-51A, which will provide additional information on the number and geographic distribution of the inhabitants of this State. The final report will be issued within the next few months.

An outline of the 1960 Population Census publication program may be obtained free of charge from the Bureau of the Census, Washington 25, D.C., or any U.S. Department of Commerce Field Office.

Urban-rural residence.--According to the definition adopted for use in the 1960 Census, the urban population comprises all persons living in (a) places of 2,500 inhabitants or more incorporated as cities, boroughs, villages, and towns (except towns in New England, New York, and Wisconsin); (b) the densely settled urban fringe, whether incorporated or unincorporated, of urbanized areas (see next paragraph); (c) towns in New England and townships in New Jersey and Pennsylvania which contain no incorporated municipalities as subdivisions and have either 25,000 inhabitants or more or a population of 2,500 to 25,000 and a density of 1,500 persons or more per square mile; (d) counties in States other than the New England States, New Jersey, and Pennsylvania that have no incorporated municipalities within their boundaries and have a density of 1,500 persons or more per square mile; and (e) unincorporated places of 2,500 inhabitants or more. The population not classified as urban constitutes the rural population.

Urbanized areas.--An urbanized area contains at least one city of 50,000 inhabitants or more and the surrounding closely settled area, whether incorporated or unincorporated, that meets specified criteria relating to land

U.S. DEPARTMENT OF COMMERCE, Frederick H. Mueller, *Secretary*
BUREAU OF THE CENSUS, Robert W. Burgess, *Director*

Commerce Field Offices, 15 cents. Complete set of 52 reports, \$6.25.

use or population density. There are a few urbanized areas where there are "twin central cities" that have a combined population of at least 50,000.

Minor civil divisions.--To the primary political divisions into which counties or comparable areas are divided, the Bureau applies the general term "minor civil divisions." From State to State they are known variously as townships, towns, judicial districts, election precincts, and the like. In some States, incorporated places are minor civil divisions in their own right and in other States they are subordinate to the minor civil division in which they are located, or the pattern is mixed--some incorporated places are independent minor civil divisions, and others are subordinate to the minor civil division.

Places.--The term "place" as used in reports of the population censuses refers to a concentration of population, regardless of the

existence of legally prescribed limits, powers, or functions. Most of the places listed are incorporated as cities, towns, villages, or boroughs, however. In addition, unincorporated places of 1,000 inhabitants or more are also presented. The towns in New England and townships in New Jersey and Pennsylvania recognized as urban are also counted as places.

Incorporated places.--Political units recognized as incorporated places in the reports of the census are those which are incorporated as cities, boroughs, towns, and villages with the exception that towns are not recognized as incorporated places in the New England States, New York, and Wisconsin.

Unincorporated places.--As in the 1950 Census, the Bureau has delineated boundaries for densely settled population centers without corporate limits. All such places of 1,000 inhabitants or more are shown in tables 2 and 3.

ADVANCE REPORTS

FINAL POPULATION COUNTS

October 1960

PC(A1)-52

Wyoming

(These figures supersede the preliminary counts for the same areas published in the PC(F1) and PC(F2) series of reports. The present series consists of 52 reports--one each for the United States, 50 States, and the District of Columbia--which are numbered in alphabetical order rather than in order of publication)

The official population count of the State as of April 1, 1960, was 330,066. This is a gain of 39,537, or 13.6 percent, over the 290,529 inhabitants of the State in 1950.

This report presents final 1960 Population Census statistics on the number of inhabitants of the State and its counties or comparable areas. In addition, figures are given for census county divisions, incorporated or unincorporated places, and for the population of the State and its counties classified by urban-rural residence. Comparable figures from earlier censuses appear in Volume I of the reports of the 1950 Census of Population.

The figures shown here are being issued in advance of their publication in Final Report PC(1)-52A, which will provide additional information on the number and geographic distribution of the inhabitants of this State. The final report will be issued within the next few months.

An outline of the 1960 Population Census publication program may be obtained free of charge from the Bureau of the Census, Washington 25, D.C., or any U.S. Department of Commerce Field Office.

Urban-rural residence.--According to the definition adopted for use in the 1960 Census, the urban population comprises all persons living in (a) places of 2,500 inhabitants or more incorporated as cities, boroughs, villages, and towns (except towns in New England, New York, and Wisconsin); (b) the densely settled urban fringe, whether incorporated or unincorporated, of urbanized areas (see next paragraph); (c) towns in New England and townships in New Jersey and Pennsylvania which contain no incorporated municipalities as subdivisions and have either 25,000 inhabitants or more or a population of 2,500 to 25,000 and a density of 1,500 persons or more per square mile; (d) counties in States other than the New England States, New Jersey, and Pennsylvania that have no incorporated municipalities within their boundaries and have a density of 1,500 persons or more per square mile; and (e) unincorporated places of 2,500 inhabitants or more. The population not classified as urban constitutes the rural population.

Urbanized areas.--An urbanized area contains at least one city of 50,000 inhabitants or more and the surrounding closely settled area, whether incorporated or unincorporated, that meets specified criteria relating to land

U.S. DEPARTMENT OF COMMERCE, Frederick H. Mueller, *Secretary*
BUREAU OF THE CENSUS, Robert W. Burgess, *Director*

For sale by the Bureau of the Census, Washington 25, D.C., and U.S. Department of
Commerce Field Offices, 15 cents. Complete set of 52 reports, \$6.25.

use or population density. There are a few urbanized areas where there are "twin central cities" that have a combined population of at least 50,000.

Census county divisions.--For purposes of presenting census statistics, counties in 18 States have been subdivided into statistical areas, which are called census county divisions (CCD's). These divisions are used instead of the election precincts, townships, and other minor civil divisions for which population statistics were previously reported. The CCD's were established because the boundaries of the minor civil divisions in these States, which were observed in previous censuses, changed frequently or were difficult to identify. CCD's were defined with boundaries that will seldom require changes and that can be easily located.

Places.--The term "place" as used in reports of the population censuses refers to a concentration of population, regardless of

the existence of legally prescribed limits, powers, or functions. Most of the places listed are incorporated as cities, towns, villages, or boroughs, however. In addition, unincorporated places of 1,000 inhabitants or more are also presented. The towns in New England and townships in New Jersey and Pennsylvania recognized as urban are also counted as places.

Incorporated places.--Political units recognized as incorporated places in the reports of the census are those which are incorporated as cities, boroughs, towns, and villages with the exception that towns are not recognized as incorporated places in the New England States, New York, and Wisconsin.

Unincorporated places.--As in the 1950 Census, the Bureau has delineated boundaries for densely settled population centers without corporate limits. All such places of 1,000 inhabitants or more are shown in tables 2 and 3.
