CORRECTION NOTE

The tables in this chapter do not reflect corrections in the population and bousing unit counts for certain areas as shown in the correction note on page 6, chapter A.

The classification by farm-nonfarm residence shown in chapter B is incorrect. The error consists of a misclassification between the farm-nonfarm components and is compensating between the two components. Therefore, data for the rural area as a whole are not affected; similarly not affected are data for urban areas and for the State as a whole. (Also not affected are the data for vacant housing units.) The table below provides corrected farm-nonfarm figures for the State and counties.

Table 8-2. Computer Allocation Rates for Nonresponse or Inconsistency for Standard Metropolitan Statistical Areas, Places of 2,500 Inhabitants or More, and Counties: 1970—Continued

[The term "allocation" means that a characteristic was assigned in the absence of a machine-readable entry or changed to make consistent with other entries during the computer editing. For minimum base for derived figures (percent, median, etc.) and meaning of symbols, see text]

Table B-3. Computer Allocation Rates for Nonresponse or Inconsistency for Standard Metropolitan Statistical Areas, Places of 10,000 Inhabitants or More, and Counties: 1970—Continued

[The term "allocation" means that a characteristic was assigned in the obsence of a machine-readable entry or changed to make consistent with other entries during the computer editing. For minimum base for derived figures (percent, median, etc.) and meaning of symbols, see text]
