

# 1970 CENSUS OF POPULATION

U.S. DEPARTMENT OF COMMERCE / Bureau of the Census

PC(S1)-105

Issued December 1975

## SUPPLEMENTARY REPORT

### **Poverty Status in 1969 and 1959 of Persons and Families, for States, SMSA's, Central Cities, and Counties: 1970 and 1960**

This report presents selected data on the poverty status in 1969 and 1959 of persons and families for the United States and for each of the States, counties, standard metropolitan statistical areas (SMSA's), and central cities of large SMSA's. The tables which follow bring together the most frequently requested comparable data for geographical areas from the 1970 and 1960 censuses. The report also includes previously unpublished 1970 census data on school-age children in poverty families and on the aged poor; comparable data are not available from the 1960 census. This report was prepared at the request and expense of the Office of Assistant Secretary for Planning and Evaluation, Department of Health, Education, and Welfare.

This is the first time that data on poverty have been brought together which permit easy comparisons over time for many local areas. Data on the low-income status in 1969 and 1959 of persons and families are summarized for States in tables 1 and 2, for SMSA's in tables 5 and 6, and for counties in table 10. Additional characteristics of the population residing in large SMSA's (those with a population of 250,000 or more) are presented in tables 7, 8, and 9. Previously unpublished 1969 poverty data on school-age children and the aged by State are presented in tables 3 and 4, respectively. Most of the tables include data for Negro and other races by poverty status in 1969 and 1959. Data for the Spanish population are not included in this report since no information on poverty is available from the 1960 census for this group.

The major sources of data on poverty status in 1969 presented in this report are the **1970 Census of Population, Volume I, Characteristics of the Population, Parts 1-52**, chapter C and a series of special tabulations prepared for the Office of Economic Opportunity (OEO) and the Department of Health, Education, and Welfare. The data on poverty status in 1959 were derived from a variety of special tabulations prepared for other government agencies from the basic 1960 census files but were never published. For further details on the availability of poverty data from the 1970 and 1960 censuses, see "Related Materials."

## RELATED MATERIALS

### 1970 Census

*Published reports.* Poverty statistics for the United States, regions, divisions, States, SMSA's, places having a population of 2,500 or more, and counties were published in chapter C of **1970 Census of Population, Volume I, Characteristics of the Population**. More detailed poverty data cross-classified by such variables as education, employment status, occupation, and income were published in chapter D of volume I for the United States, regions, States, SMSA's of 250,000 population or more, and central cities of these SMSA's. The statistics shown in each of the State parts of volume I are summarized for the United States in Volume I, Part 1, "United States Summary." Chapters C and D were originally published as separate paperbound reports in series PC(1)-C, "General Social and Economic Characteristics," and PC(1)-D, "Detailed Characteristics."

Poverty statistics are also shown for census tracts of 241 SMSA's and selected adjacent areas in **1970 Census of Population and Housing, Census Tracts, Series PHC(1)**. A description of poverty data contained in volume I and census tract reports can be found in **Data Access Descriptions No. 29, "Low-Income Data From the 1970 Census."**

Data on the social, economic, and housing characteristics of the low-income population residing in poverty areas in the 50 largest cities can be found in **1970 Census of Population, Volume II, PC(2)-9B, "Low-Income Areas in Large Cities;"** Supplementary Report, PC(S1)-56, "Selected Characteristics of the Population in Low-Income Areas of Large Cities;" and Supplementary Reports, PC(S1)-65 to PC(S1)-103, "Low-Income Neighborhoods in Large Cities: 1970."

Data for poverty areas as defined for the Census Employment Survey (CES) are available for 60 urban and 7 rural areas in **1970 Census of Population and Housing, Employment Profiles of Selected Low-Income Areas, Series PHC(3)**. Most of the data in the PHC(3) reports consist of detailed information not available from the 1970 census questionnaire on such subjects as employment, unemployment, training for work, job-seeking methods, job tenure, sources and level of income, residential mobility, transportation to work, and selected factors considered deterrents to employment.

*Unpublished materials.* Several sets of data showing poverty status from the 1970 census for geographic areas are available from the Community Services Administration (formerly OEO) as follows:

- (1) A printout prepared by OEO from the Fourth Count Summary Tapes,<sup>1</sup> which shows selected characteristics of the low-income population for the United States, regions, States, and

<sup>1</sup> For a detailed description of 1970 census summary tapes, see **Data Access Descriptions, No. 29, "Low-Income Data From the 1970 Census."**

counties cross-classified by urban-rural residence and race.

- (2) A special tabulation of 1970 census data prepared by the Bureau of the Census for OEO which covers each of the 97 SMSA's in which one or more of the central cities had at least one group of contiguous low-income area tracts with a population of 20,000 or more; for each of these 97 SMSA's, the OEO tabulation shows data for the entire SMSA, each component county, and each central city, including the neighborhood subdivisions of the central city low-income area.
- (3) A set of 10 tables for each State and county showing data on poverty status in 1969, urban-rural residence, detailed race, and persons of Spanish language cross-classified by a variety of social and economic characteristics, most of which are not found in published reports prepared by the Bureau of the Census.

Further information on the data described in item (1) can be obtained from the Library, Community Services Administration, 1200 Nineteenth St., N.W., Washington, D.C. 20506. Further information on the data described in items (2) and (3) are available from the Machine Readable Archives Branch, National Archives, Pennsylvania Ave., N.W., Washington, D.C. 20408.

Another source of unpublished poverty data for geographic areas is the special tabulation prepared by the Bureau of the Census for the Office of Education for use in allocating funds under Title I of the Educational Amendments of 1974. This special tabulation shows poverty data for children 5 to 17 years old by family income for States, counties, minor civil divisions (MCD's) or census county divisions (CCD's) and places with a population of 300 or more.

### 1960 Census

In general, poverty statistics from the 1960 census are not available in a published format. A limited amount of data was published for metropolitan areas and their central cities in **1960 Census of Population, Supplementary Report, PC(S1)-54, "Poverty Areas in the 100 Largest Metropolitan Areas."** The PC(S1)-54 report contains information on persons and families by age, race, family status, poverty status in 1959 and sex and age of family head.

Most of the 1960 census data on poverty are available in the form of computer printouts, the major sources of which are (1) a special tabulation prepared by the Bureau of the Census for OEO which shows poverty data by selected characteristics for the United States, regions, States, and counties, and (2) a special tabulation prepared by the Bureau of the Census providing data for the 100 largest SMSA's and their central cities. The data in the above-mentioned PC(S1)-54 report were extracted from the latter tabulation.

## Special Censuses

Two reports based on special censuses conducted by the Bureau of the Census during the 1960's provide survey data and comparable 1960 census data for what are essentially neighborhood subdivisions of the 1960 census low-income areas. **Current Population Reports, Series P-23, No. 18, "Characteristics of the South and East Los Angeles Areas: November 1965,"** presents social, economic, and housing data for seven neighborhoods in South Los Angeles and three neighborhoods in East Los Angeles. **Current Population Reports, Series P-23, No. 21, "Characteristics of Selected Neighborhoods in Cleveland, Ohio: April 1965,"** presents population characteristics for nine neighborhoods in Cleveland and for the balance of the city, with totals for the city as a whole.

## Current Population Survey

Data on the population are collected and published regularly by the Bureau of the Census through its Current Population Survey (CPS), a nationwide survey covering a sample of about 47,000 households. Detailed social and economic characteristics for the population of the United States by poverty status are published annually in **Current Population Reports, Series P-60.**

## DEFINITIONS AND EXPLANATIONS

### Population Coverage

The 1970 census data shown in this report exclude specified types of group quarters, i.e. inmates of institutions, members of the Armed Forces living in barracks, and college students in dormitories; all unrelated individuals under 14 years are also excluded from the 1970 data. The data from the 1960 census exclude all persons in group quarters but include unrelated individuals under 14 years. It is unlikely that this difference in population universe would have a significant impact on comparing the poverty data for persons from the 1970 and 1960 censuses.

### Counties

The primary divisions of the States are, in general, called counties, but in Louisiana these divisions are known as parishes. In four States (Maryland, Missouri, Nevada, and Virginia), there are one or more cities which are independent of any county organization and thus constitute primary divisions of their States. The data shown in this report by county refer to boundaries as of the time of the respective census. Exceptions are footnoted in the tables where appropriate.

There are no counties in Alaska. In this State, census divisions were developed for general statistical purposes through the cooperation of the State and the Census Bureau and are treated as county equivalents. Data from the 1960 census are not available for these 1970 census divisions, but are available for the earlier statistical areas

known as census districts. Comparability between the 1960 and 1970 areas was achieved by combining the 1970 census divisions in such a way as to constitute areas similar to the 1960 census districts. The data shown for the Alaskan areas for both censuses utilize the census district areas and names.

## Standard Metropolitan Statistical Areas

In this report, statistics are shown for SMSA's as recognized in the 1970 and 1960 censuses. The Bureau of the Census recognized 243 SMSA's in the 1970 census and 212 SMSA's in the 1960 census. The same criteria were used for defining SMSA's for both the 1960 and 1970 censuses; however, changes in the SMSA definition have occurred as a result of the addition of new areas or changes in boundaries of SMSA's. The tables in this report show 1960 and 1970 data according to either the 1960 census SMSA definition or the 1970 census definition of SMSA's, depending on the availability of data for 1960.

Except in the New England States, an SMSA is a county or group of contiguous counties which contains at least one city of 50,000 inhabitants or more, or twin cities with a combined population of at least 50,000. In addition to the county or counties containing such a city or cities, contiguous counties are included in an SMSA if, according to certain criteria, they are socially and economically integrated with the central city. In the New England States, SMSA's consist of towns and cities instead of counties. Each SMSA must include at least one central city, and the complete title of an SMSA identifies the central city or cities. For a detailed description of the criteria used in defining SMSA's, see the Office of Management and Budget (formerly Bureau of the Budget) publication, **Standard Metropolitan Statistical Areas: 1967**, U.S. Government Printing Office, Washington, D.C. 20402.

The population living in SMSA's is designated as the metropolitan population. The population is subdivided as inside central city or cities and outside central city or cities. The population living outside SMSA's constitutes the nonmetropolitan population.

In tables 5 and 6 of this report, the data are shown for SMSA's as defined for the 1970 census; the 1960 data have been adjusted to conform to the 1970 SMSA definition. Conversely, in tables 7 to 9, the data are shown for SMSA boundaries as defined for the 1960 census. The 1970 data have been adjusted to conform to this earlier census definition of SMSA's because the necessary data were not available from the 1960 census tabulations for the component parts of SMSA's.

### Central City Boundaries

The boundaries of central cities shown in this report refer to their corporate boundaries as of the respective census. A problem or definition exists with respect to some of the central cities. This problem arises as a

consequence of annexations of territory made by cities during the 1960-70 decade. Most often, detailed population and housing characteristics from the 1960 census could not be reproduced for the annexed areas. The 1960 data shown for central cities in the tables of this report thus relate to those cities as defined at the time of that census, and 1970 data refer to cities as they were defined for the 1970 census.

To clarify the impact of annexation on population change for central cities, see the 1970 Census of Population, Volume I, Characteristics of the Population, "U.S. Summary," table 40.

Between 1960 and 1970, two cities annexed the entire county in which they were located: Jacksonville, Fla. (whose boundaries in 1970 are coterminous with Duval County) and Nashville-Davidson, Tenn. (whose boundaries are now coterminous with Davidson County). Indianapolis, Ind. annexed all parts of Marion County except for Beech Grove, Lawrence, Speedway, and Southport, whose combined 1960 population amounted to 31,600 out of a county total of 698,000.

### Race

In both 1970 and 1960, information on race was obtained primarily through self-enumeration, and the data represent essentially self-classification by people according to the race with which they identify themselves. In 1970, for persons of mixed parentage who were in doubt as to their classification, the race of the person's father was to be used. In 1960, persons who reported mixed parentage of white and any other race were classified according to the other race; mixtures of races other than white were classified according to the race of the father.

The category white includes persons who indicated their race as white as well as persons who did not classify themselves in one of the specific race categories on the questionnaire but entered Mexican, Puerto Rican, or a response suggesting Indo-European stock.

The category Negro includes persons who indicated their race as Negro or black, as well as persons who did not classify themselves in one of the specific race categories on the questionnaire but had such entries as Jamaican, Trinidadian, West Indian, Haitian, and Ethiopian. The term Negro and other races includes persons of all races other than white.

In this report, data for Negro and other races are shown for both 1970 and 1960 because comparable poverty data for Negro separately are not available from the 1960 census.

### Poverty Status in 1969

The 1969 poverty statistics presented are based on a definition originally developed by the Social Security Administration (SSA) in 1964 and revised by a Federal interagency committee in 1969. The SSA poverty index provided a range of income cutoffs adjusted by such factors as family size (from one person to a family of seven persons or more), sex of the family head, number of children under 18 years old, and farm-nonfarm residence (see table A). At the core of this definition of poverty was a nutritionally adequate food plan (economy plan) designed by the Department of Agriculture for emergency or temporary use when funds are low. The SSA poverty cutoffs also took into account differences in the cost of living between farm and nonfarm families. Annual revisions of these cutoffs were based on price changes of the items in the economy food budget.

Table A. WEIGHTED AVERAGE THRESHOLDS AT THE POVERTY LEVEL IN 1969 BY SIZE OF FAMILY AND SEX OF HEAD, BY FARM-NONFARM RESIDENCE

Size of family unit	Total	Nonfarm			Farm		
		Total	Male head	Female head	Total	Male head	Female head
1 person (unrelated individual)....	\$1,834	\$1,810	\$1,923	\$1,792	\$1,569	\$1,607	\$1,512
Under 65 years.....	1,888	1,893	1,974	1,826	1,641	1,678	1,552
65 years and over.....	1,749	1,757	1,773	1,751	1,498	1,508	1,487
2 persons.....	2,364	2,383	2,394	2,320	2,012	2,017	1,931
Head under 65 years.....	2,441	2,458	2,473	2,373	2,093	2,100	1,984
Head 65 years and over.....	2,194	2,215	2,217	2,202	1,882	1,883	1,861
3 persons.....	2,905	2,924	2,937	2,830	2,480	2,485	2,395
4 persons.....	3,721	3,743	3,745	3,725	3,195	3,197	3,159
5 persons.....	4,386	4,415	4,418	4,377	3,769	3,770	3,761
6 persons.....	4,921	4,958	4,962	4,917	4,244	4,245	4,205
7 persons or more.....	6,034	6,101	6,116	5,952	5,182	5,185	5,129

**Table B. WEIGHTED AVERAGE THRESHOLDS AT THE POVERTY LEVEL IN 1959 BY SIZE OF FAMILY AND FARM-NONFARM RESIDENCE**

Size of family unit	Nonfarm	Farm
1 person (unrelated indiv.)	\$1,510	\$1,065
2 persons.....	1,950	1,360
3 persons.....	2,390	1,670
4 persons.....	3,060	2,150
5 persons.....	3,605	2,530
6 persons.....	4,055	2,840
7 persons.....	4,505	3,150
8 persons.....	4,955	3,460
9 persons.....	5,405	3,780
10 persons.....	5,855	4,100
11 persons.....	6,250	4,380
12 persons.....	6,650	4,660
13 persons.....	7,050	4,940
14 persons.....	7,450	5,220
15 persons or more.....	7,850	5,500

As a result of deliberations of a Federal interagency committee in 1969, the following two modifications to the original SSA definition of poverty were recommended: (1) that the SSA thresholds for nonfarm families be retained for the base year 1963, but that annual adjustments in the levels be based on changes in the Consumer Price Index (CPI) rather than on changes in the cost of food included in the economy food plan; and (2) that the farm thresholds be raised from 70 to 85 percent of the corresponding nonfarm levels. The combined impact of these two modifications resulted in an increase of 360,000 poor families and 1.6 million poor persons in 1967. For a more detailed explanation of the reasons for making these changes, see *Current Population Reports, Series P-23, No. 28, "Revisions in Poverty Statistics: 1959 to 1968."*

#### Poverty Status in 1959

The 1959 poverty statistics presented are based on the original SSA definition as described above. The SSA poverty index was modified somewhat to simplify the tabulation of 1960 census data so that the poverty cutoffs varied only by farm-nonfarm residence and were extended to families of 15 persons or more.<sup>2</sup> The modifications made to the original poverty definition have only a minor impact on comparability of the data from 1970 and 1960 censuses presented in this report.

#### Limitations of Income Data

Income data collected in the census are limited to money income received before payments for personal

<sup>2</sup> Office of Economic Opportunity, "Poverty in 1959-60 by County and State," Supplement 1 to *Dimensions of Poverty in 1965*.

income taxes and deductions for social security, union dues, medicare, etc. Money income is the sum of the amounts received from earnings; social security and public assistance payments; dividends, interest, and rent; unemployment and workmen's compensation; government and private employee pensions; and other periodic income. (Certain money receipts such as capital gains are not included.) Therefore, money income does not reflect the fact that many families receive part of their income in the form of nonmoney transfers such as food stamps, health benefits, and subsidized housing; that many farm families receive nonmoney income in the form of rent-free housing and goods produced and consumed on the farm; or that nonmoney incomes also are received by some nonfarm residents which often take the form of the use of business transportation and facilities, full or partial payments by business for retirement programs, medical and educational expenses, etc. These elements should be considered when comparing income levels.

Since the reporting of income frequently is based on memory rather than on records, there is a tendency to underreport or fail to report some elements of income. Underreporting is especially pronounced for income sources that are not derived from earnings, such as social security and public assistance payments, interest and dividends, etc. For example, in the Current Population Survey it has been determined that income earned from wages or salary tends to be much better reported than other sources of income and is nearly equal to independently derived benchmark estimates. By contrast, recent CPS income data on social security and public assistance payments to beneficiaries have averaged approximately 80 and 75 percent, respectively, of their benchmark estimates. In the census the underreporting of these specified types of income and the number of recipients of such income compared with administrative records reflects, for the most part, the failure of some respondents to report them accurately, rather than the failure to enumerate persons receiving them.

#### SAMPLE SIZE

The statistics in this report were derived from the 20- and 15-percent samples in 1970 and the 25-percent sample in 1960 and are, therefore, subject to sampling variability. More detailed definitions of the terms used in this report as well as a description of the sample design and information on sampling variability may be found in the *1970 Census of Population, Volume I, Characteristics of the Population, Parts 1-52*, and in the *1960 Census of Population, Volume I, Characteristics of the Population, Parts 1-52*.

#### DERIVED FIGURES AND SYMBOLS

##### Derived Figures

Percents, medians, and means, as well as certain rates and ratios, are used in this report. For all types of

derived figures shown, the figures are not presented if the base is smaller than 100.

Although figures are shown for all areas, except when the base is less than the specified minimum, the reader should exercise caution in the use and interpretation of data for very small areas or subgroups of the population because these data are especially subject to the effects

of sampling variability, misreporting, and processing errors.

#### Symbols

A dash “—” signifies zero. NA indicates data not available. Three dots “...” mean that the base for the derived figure is too small for it to be shown, or that the data are being withheld to avoid disclosure of information for individuals.

### LIST OF TABLES

- Table 1. Persons Below the Poverty Level in 1969 and 1959 by Race, for States: 1970 and 1960
- Table 2. Selected Characteristics of Families Below the Poverty Level in 1969 and 1959, for States: 1970 and 1960
- Table 3. Related Children Under 18 Years Old in Families Below the Poverty Level in 1969 by Age, for States: 1970
- Table 4. Persons 60 Years Old and Over Below the Poverty Level in 1969 by Sex and Age, for States: 1970
- Table 5. Persons Below the Poverty Level in 1969 and 1959 by Race, for Standard Metropolitan Statistical Areas: 1970 and 1960
- Table 6. Families Below the Poverty Level in 1969 and 1959 by Race of Head, for Standard Metropolitan Statistical Areas: 1970 and 1960
- Table 7. Selected Characteristics of Families Below the Poverty Level in 1969 and 1959, for Standard Metropolitan Statistical Areas With a 1960 Population of 250,000 or More: 1970 and 1960
- Table 8. Selected Characteristics of Families Below the Poverty Level in 1969 and 1959 by Central City Status, for Standard Metropolitan Statistical Areas With a 1960 Population of 250,000 or More: 1970 and 1960
- Table 9. Poverty Status of Related Children 5 to 17 Years Old in 1969 and 1959 by Central City Status, for Standard Metropolitan Statistical Areas With a 1960 Population of 250,000 or More: 1970 and 1960
- Table 10. Poverty Status of Persons and Families in 1969 and 1959 by County, for States: 1970 and 1960

<sup>1</sup>Alaska was reorganized from election districts to census divisions as county equivalents between 1960 and 1970. Most areas with boundary changes experienced only minor changes in population. To facilitate data comparability, some 1970 census divisions have been combined to approximate 1960 election districts. <sup>2</sup>Boundary change, 1960 to 1970; see text for explanation. <sup>3</sup>To obtain comparability with 1960 election districts, 1970 census divisions were combined; see text for explanation.

TABLE 10. Poverty Status of Persons and Families in 1969 and 1959 by County, for States: 1970 and 1960—Continued
