## CORRECTION NOTE

As stated on page ILI, shapter ce corionponde to the Fet L-tindividual State reports. After completion of the computer tablation on which the pe(1)-C reports were hawed, a misclasmifitalom was digcovered hetween the farm and nonfarm components of the rural popalation. Thts misclassification did not aftert the data for the rural area as a whole, or for urhan areas or the stake an a whole. Cortatn portions of the tabulations were reprocessed for presmation in whapter $C$ and corrected farmmonfarm figares are presented hern, As a result of this reprocessing, however, the distributions by certain characterdsthes for the total rural population inplicit in the farmonomarm data presented in tables 48 to 85,70 to 60, and 134 to 137 may not always be consigtent with the area-wide totals shown in thaptar c; thege differences, which are relatively minor, may occur in the data on sinool enrollgent, residence in 1965, orcupation, income, and poverty.

Some responients minumderstood the question on wisch the data for "Persong of Spanish origin or dercent" are based isee page App, 10 for definitions of the "Spanish herltage" population). As a result of this misinterpretation, there is a substantial overstatement in this report in the number of such personts shown in tables $49,60,71,81$, 102, and 119 and in the statistics on votational tralnint, marital history, and disahility shown for such persons in taklem 51, 52, and 53. The data presented in this repore for the various other "Spanish heritage" groups are not affected.
