CORRECTION NOTE

As stated on page III, chapter C corresponds to the PC(1)-C individual State reports. After completion of the computer tabulation on which the PC(1)-C reports were based, a misclassification was discovered between the farm and nonfarm components of the rural population. This misclassification did not affect the data for the rural area as a whole, or for urban areas or the State as a whole. Certain portions of the tabulations were reprocessed for presentation in chapter C and corrected farm-nonfarm figures are presented here. As a result of this reprocessing, however, the distributions by certain characteristics for the total rural population implicit in the farm-nonfarm data presented in tables 48 to 58, 70 to 80, and 134 to 137 may not always be consistent with the area-wide totals shown in chapter C; these differences, which are relatively minor, may occur in the data on school enrollment, residence in 1965, occupation, income, and poverty.
