POPULATION DIVISION

Meyer Zitter, Chief

ACKNOWLEDGMENTS—Many persons participated in the various activities of the 1970 census. Primary direction of the program was performed by **Conrad Taeuber**, former Associate Director for Demographic Fields, assisted by **David L. Kaplan**, 1970 Census Coordinator, and in conjunction with **Paul R. Squires**, Associate Director for Data Collection and Processing, and **Joseph Waksberg**, Associate Director for Statistical Standards and Methodology.

This report was planned and its content developed in the Population Division by **Henry D. Sheldon**, Special Assistant, in consultation with **Paul C. Glick**, Senior Demographer. Professional and technical assistance was provided by **Patricia A. Berman** and **Patricia Johnson**. **Elizabeth A. Larmon** and **Karen M. Mills** assisted in the preparation of the textual materials. The work was under the general supervision of **Meyer Zitter**, Division Chief, and **Herman P. Miller** (Chief to April 1972). Important contributions to the determination of the content of the PC(2) series of reports were made by a number of advisory groups and individuals representing or affiliated with universities, research organizations, professional associations, government agencies, and other groups.

The procedures for sample selection, sample weighting, and computation of sampling variances were developed in the Statistical Methods Division, under the supervision of **Morton Boisen**, Chief, and **Robert H. Hanson**, Assistant Division Chief, assisted by **William T. Alsbrooks**, **Peter A. Bounpane**, **Barbara A. Boyes**, and **Carlton W. Pruden**.

Geographic plans and procedures were developed in the Geography Division under the supervision of **William T. Fay**, then

Chief, and **Robert C. Klove** and **Gerald J. Post**, Assistant Division Chiefs.

Data collection activities were administered by the Field Division, **Richard C. Burt**, Chief, and **Dean H. Weber**, Assistant Division Chief, with the assistance of the directors of the Bureau's data collection centers.

Systems and processing procedures were developed under the direction of **Morris Gorinson**, Assistant Chief, Demographic Census Staff. **Florence Wright**, assisted by **John F. Powell** and **Orville M. Snye**, was responsible for the clerical procedures and **Roger O. Lepage**, assisted by **William R. Ball**, **Margaret P. Brooks**, **Stephen E. Goldman**, and **Dan E. Philipp**, was responsible for the computer programming. **Donald R. Dalzell** was responsible for the computer procedures and programs used for the electronic preparation of tables in this report.

The manual processing and microfilming of the questionnaires and the review of tabulation controls were performed in the Data Preparation Division (formerly Jeffersonville Census Operations Division), under the direction of **Robert L. Hagan**, then Chief, with the assistance of **Rex L. Pullin**. The manual coding operations were supervised by **John C. Campbell**, assisted by **Herbert J. Hough**, **Joe D. Kolb**, and **Leo C. Schilling**. **William L. Pangburn** supervised the microfilming operation. **Dan N. Harding**, assisted by **Nora H. Shouse**, was responsible for the tabulation review work.

FOSDIC and computer processing were performed in the Computer Services Division under the supervision of **James R. Pepal**,

Chief, and **E. Richard Bourdo**, **DiNenna**, and **James W. Sho**, Division Chiefs. Development of FOSDIC equipment was directed by **M. Gaines**, Assistant Division Chief, and **McRae Anderson**. Development of automatic microfilming equipment was by **Anthony A. Berlinsky**.

Publications planning, editing, and printing procurement were in the Publications Services Division under the direction of **Raymond J. Mann**, Chief, by **Milton S. Anderson**, **Mann**, and **Wayne H. Massey**.

Important contributions were made by **Robert B. Voight** and **Sherry I. Voight** in the planning and coordination of the 1970 census program; by **Lucille M. Spence** in the planning of the tabulation and by **John W.H. Spencer**, **Soledad M. Douglas Fahey** in the system operations for processing the census data.

GENERAL

This report presents statistics for the United States and selected standard metropolitan statistical areas (SMSA's) on the social and economic characteristics of immigrants and their children for selected countries of origin. The statistics are based on the 1970 Census of Population. Legal provision for this census, which was conducted as of April 1, 1970, was made in the Act of Congress of August 31, 1954 (amended August 1957), which codified Title 13, United States Code.

A major portion of the information compiled from the 1970 Census of Population appears in Volume I, **Characteristics of the Population**, which focuses on the presentation of data for States, counties, places, and other areas of the United States. The present report is part of Volume II, **Subject Reports**, wherein most reports concentrate on the presentation of national and regional data for a particular subject. A list of Volume II subject reports from the 1970 census is presented on page II. For a description

of Volumes I and II, as well as other elements of the data dissemination program of the 1970 Population and Housing Census, see Appendix E, "Publication and Computer Summary Tape Program."

The content and procedures of the 1970 census were determined after evaluation of the results of the 1960 census, consultation with a wide variety of users of census data, and extensive field pretesting. A number of changes were introduced in 1970 to improve the usefulness of the census results.

More detailed information on the technical and procedural matters covered in the text of this report can be obtained by writing to the Director, Bureau of the Census, Washington, D.C. 20233. Such information will also appear in later reports of the 1970 census.

Organization of the text.—The text consists of this introduction and Appendixes A through E, which appear after the tables. The introduction contains information relating specifically to the principal subject of this report, such as definitions of terms and editing procedures. Appendix A provides general information concerning the presentation of data in this series of reports and the collection and processing procedures of the 1970 census. Appendix B describes the various area classifications (e.g., urban and rural residence, urbanized areas, etc.) and also explains the residence rules used in counting the population. Appendix C provides brief definitions and explanations of subjects covered in cross-classifications in this report and other reports in this series. Appendix D presents information on sources of error in the data, sampling variability, ratio estimation, and editing

procedures. Appendix E summarizes the data dissemination program.

Content of the tables.—Tables 1 through 9 present data on the social and economic characteristics of the native population of native parentage, cross-classified by race, the native population of foreign or mixed parentage, and the foreign-born population for the United States and regions. Tables 10 through 14 present similar characteristics, by country of origin, for the native of foreign or mixed parentage and the foreign born for the United States. The countries of origin for which separate statistics are presented are those represented in the total population by a foreign stock population of 300,000 or more. Tables 15 and 16 present similar data for SMSA's with a total foreign stock population of 250,000 or more. Tables 17 and 18 present, at the United States level, information on the social and economic characteristics of the foreign-born population by year of immigration. Table 19 presents detailed statistics on mother tongue for the United States. Table 20 presents, for persons in families in which the head or wife are of foreign stock, the nativity and parentage classification of family members—head, wife, child, and other relative. The families are classified by the nativity, parentage, and country of origin of the head (or wife in families in which the head is native of native parentage and the wife of foreign stock). Persons of foreign stock living in families in which both the head and wife are native of native parentage do not appear in this table. Persons of foreign stock not in families—unrelated individuals and inmates—are classified by their own nativity, parentage, and country of origin.

Sample size.—The statistics in this report are based in part on the 15-percent sample and in part on the 5-percent sample adjusted to represent the total population (see "Data Collection Procedures" in Appendix A). An explanation of the ratio estimation procedure and information on the sampling variability associated with the data are contained in Appendix D.

RELATED MATERIALS

1970 census reports.—Statistics on the origin of the foreign stock and mother tongue, based on the 15-percent sample, are presented for the United States, regions, divisions, States, SMSA's, and places of 50,000 or more in chapter C of the 1970 Census of Population, Volume I, **Characteristics of the Population**. More detailed statistics on country of origin and mother tongue, based on the 15-percent sample, and statistics on citizenship and year of immigration, based on the 5-percent sample, are presented in chapter D in the same publication. Part 1 of Volume I includes chapters C and D for the United States as a whole; the remaining parts of Volume I are for each State, the District of Columbia, Puerto Rico, and selected outlying areas. Chapters C and D were originally published separately in paperbound Series PC(1)-C reports, **General Social and Economic Characteristics**, and Series PC(1)-D reports, **Detailed Characteristics**.

Statistics on the foreign stock by country of origin are also shown in the reports for census tracts of 241 standard metropolitan statistical areas and selected adjacent areas in the 1970 Census of Population and Housing, Series PHC(1), **Census Tracts**.

In addition to the present report, several Volume II reports on other

subjects include data on nativity, parentage, and country of origin.

Reports from earlier censuses.—In the 1960 census reports, data on nativity, parentage, country of origin, and mother tongue were published in the 1960 Census of Population, Volume II, PC(2)-1A, **Nativity and Parentage**, and in PC(2)-1E, **Mother Tongue of the Foreign Born**. Information on these subjects also appears in 1960 Census of Population, Volume I, **Characteristics of the Population**, and for census tracts in 1960 Censuses of Population and Housing, Series PHC(1), **Census Tracts**.

In the 1950 Census of Population, data on nativity, parentage, and country of origin appear in Volume IV, Part 3A, **Nativity and Parentage**. Data in this subject area also appear in Volume II, **Characteristics of the Population**, and in Volume III, **Census Tract Statistics**.

Current Population Survey.—Data on ethnic origin or descent are collected and published for the United States by the Bureau of the Census through its Current Population Survey (CPS). The CPS is a nationwide survey, covering a sample of about 50,000 households. The data are published in Series P-20, **Current Population Reports**.

Unpublished data.—For most of the Volume II reports, statistics in addition to those published in the report are available on a reimbursable basis from computer tape files. Data shown for the United States as a whole are available for regions, divisions, and States, and, in a number of instances, the data for some characteristics were tabulated in greater detail than shown in the reports. Requests for unpublished data, giving a specific description of the figures desired, may be

made by writing to the Director, Bureau of the Census, Washington, D.C. 20233. Inquiries concerning unpublished data should be transmitted to the Bureau as soon as possible because tape files are not maintained indefinitely.

DEFINITIONS AND EXPLANATIONS OF PRINCIPAL SUBJECTS

The definitions and explanations below relate only to the principal subjects of this report. Brief definitions of other items that appear in cross-classifications in the tables of this report are presented in Appendix C.

Nativity, Place of Birth, Parentage, and Foreign Stock

The data on nativity, place of birth, and parentage were derived from answers to questions 13a, 14, and 15 (see facsimile of questionnaire items on page IX).

Nativity.—Information on place of birth is used to classify the population of the United States into two major categories: native and foreign born. The category "native" comprises persons born in the United States, in the Commonwealth of Puerto Rico, in an outlying area of the United States, or at sea. Also included in this category is the small number of persons who, although they were born in a foreign country, have at least one native American parent. When information on place of birth was missing, nativity was assigned on the basis of related information. In previous censuses persons for whom nativity was not reported were generally classified as native. Persons not classified as native are classified as "foreign born." The population of the United States

has been classified as native or foreign born in every census since 1850.

Statistics on nativity obtained from the 15-percent and the 5-percent samples may differ for reasons other than sampling variability. Persons born in a foreign country were classified as native if they had at least one native parent. On the 15-percent sample, nativity of parents was determined by the entry for birthplace of parents (questions 14 and 15). On the 5-percent sample, where there was no question on birthplace of parents, nativity of persons born in a foreign country was determined by the entry in question 16a; that is, those with an entry of "Born abroad of American parents" were counted as native and all others as foreign born.

Place of birth.—Foreign-born persons were asked to report their country of birth according to international boundaries as recognized by the United States government on April 1,

1970. Since numerous changes in boundaries of foreign countries have occurred in the last century, some foreign-born persons may have reported their country of birth in terms of boundaries that existed at the time of their birth or emigration, or in accordance with their own national preference.

Parentage.—Information on birthplace of parents is used to classify the native population into two categories: native of native parentage and native of foreign or mixed parentage. The category native of native parentage comprises native persons with both parents born in the United States. The category native of foreign or mixed parentage includes native persons with one or both parents foreign born. The rules for determining the nativity of parents are generally the same as those for determining the nativity of the person himself.

Foreign stock.—The category "foreign stock" includes the foreign-born population and the native population of foreign or mixed parentage. Persons of foreign stock thus comprise all first- and second-generation Americans. In this report, persons of foreign stock are classified according to their country of origin, with separate distributions shown for the foreign born and the native of foreign or mixed parentage. Native persons of foreign parentage whose parents were born in different foreign countries are classified according to the country of birth of the father. Natives of mixed parentage are classified according to the country of birth of the foreign-born parent.

Citizenship and Year of Immigration

The data on citizenship and year of immigration were derived from answers to questions 16a and 16b (see facsimile of questionnaire items at left).

The questions were asked of persons in the 5-percent sample who reported being born in a foreign country. Persons born abroad or at sea who had at least one American parent were to report themselves as "Born abroad of American parents."

Citizenship.—Information on citizenship was used to classify the population into two major categories: citizens and aliens. Citizens are further classified as native or naturalized. "Native" includes all persons born in the United States, Puerto Rico, the Canal Zone, Guam, American Samoa, or the Virgin Islands and persons born abroad of American parents or at sea. It was assumed that all natives were citizens. Similar questions on citizenship were asked in the censuses of

<p>13a. Where was this person born? <i>If born in hospital, give State or country where mother lived. 1820, 1830, 1870, and 1890 through 1950.

Year of immigration.—The question was asked of foreign-born persons in the 5-percent sample. The respondent was to indicate the period which covered the year he came to stay permanently in the United States. Information on year of immigration permits the classification of the foreign-born population as long-term residents or recent arrivals. A question on year of immigration was previously asked in every census from 1890 to 1930.

Mother Tongue

The data on mother tongue were derived from answers to question 17 (see facsimile of questionnaire item below).

The question was asked of all persons in the 15-percent sample. Information on mother tongue is used to assist in identification of the various ethnic groups in the population. In particular, the Spanish language population is defined primarily on this basis. The data on mother tongue may not reflect a person's current language skills since the vast majority of persons reporting a mother tongue other than English have learned to speak English during or after their childhood.

Before the 1960 census a question on mother tongue was asked in the censuses of 1910, 1920, 1930, and 1940. The comparability of these data is limited to some extent by changes in

question wording, in the categories of the population to whom the question was addressed, and in the detail that was published. In the 1910 and 1920 censuses, statistics on mother tongue were published for the foreign white stock; in 1930, they were published for the foreign-born white population; and in 1940, they were published for the native white of native parentage as well as the foreign white stock. In 1960, the data on mother tongue were shown for the foreign-born population of all races combined. In 1970, they are shown for all persons and according to various subgroups. In 1960 and 1970, if both English and another mother tongue were reported, preference was always given to the language other than English. This procedure may reduce somewhat the proportion of the foreign-born population classified as having English as their mother tongue.

Uses and Limitations of the Data

Data on the characteristics of the foreign stock from various countries make it possible to place them in the overall social and economic structure of American society. Comparisons of these ethnic groups with each other and with the various racial segments of the native population of native parentage serve to highlight their unique contributions and the nature of their adjustment. Information of this general character has been used extensively in the consideration of immigration legislation, in the study of voting behavior, in market research, and in

academic and journalistic analyses of our diverse ethnic background and its implications.

The information presented in this report on ethnic groups is, of course, limited to immigrants and their children—the foreign born and the native of foreign or mixed parentage. This means that no information on ethnic identity, in terms of country of origin, is available for the descendants of immigrant groups beyond the first and second generations. The information on mother tongue insofar as it indicates the persistence of the use of languages other than English among native persons of native parentage is, of course, relevant, and there are clear-cut examples among the descendants of the initial Spanish settlers of the Southwest, the French-speaking Acadian population of Louisiana, and the Pennsylvania "Dutch." There is, however, a need for more comprehensive and systematic information on ethnic origin, and efforts in this direction are described in the section on "Comparability With Other Data," below.

Comparability With Other Data

In the decennial censuses prior to 1970, information on ethnic background was limited to that derived from questions on birthplace and country of origin for immigrants and their children. In the 1970 census, however, in an effort to identify minorities of Spanish origin who are not adequately identified in terms of foreign stock, a question (13b) on origin or descent was asked of a 5-percent sample of the population. The respondent indicated the particular Spanish group with which he identified himself. For persons of Cuban and Puerto Rican origin whose

17. What language, other than English, was spoken in this person's home when he was a child? Fill one circle.

Spanish Other—
 French Specify _____
 German None, English only

INTRODUCTION—Continued

immigration has been relatively recent, the total counts were not materially different from total born in those areas and their children. On the other hand, the number of persons identifying themselves as of Mexican or Spanish origin was considerably greater than the corresponding foreign stock total.

Similar questions have been asked in the Current Population Survey, covering not only Spanish origin, but other major ethnic elements of immigrant origin. The tabulations of the results of responses to this question indicate that for immigrant origin groups such as German or Italian the totals were considerably larger than

those for the foreign stock of German or Italian origin from the 1970 census. There is, of course, no indication in the response to the origin question of the intensity of ethnic affiliation, and the data make it clear that an appreciable segment of the population remains uncommitted to any specific origin group.
