Daniel B. Levine, Associate Director for Demographic Operations

David L. Kaplan, 1970 Census Coordinator

### POPULATION DIVISION

Meyer Zitter, Chief

**ACKNOWLEDGMENTS**—Many persons participated in the various activities of the 1970 census. Primary direction of the program was performed by Conrad Tauuber, former Associate Director for Demographic Fields, assisted by David L. Kaplan, 1970 Census Coordinator, and in conjunction with Paul R. Squires, Associate Director for Data Collection and Processing, and Joseph Waksberg, Associate Director for Statistical Standards and Methodology.

This report was planned and its content developed in the Population Division by Nampo R. McKenney, Ethnic and Race Statistics Staff, assisted by Olga V. Fonville. Important contributions were provided by Elmore J. Serralle in the planning and coordination of the report. The work was directed by Paul C. Glick, Senior Demographer, and professional guidance was provided by Tobia Bressler. Elizabeth A. Larmon and Karen M. Mills assisted in the preparation of textual materials. The work was under the general supervision of Meyer Zitter, Division Chief, and Herman P. Miller (Chief to April 1972). Important contributions to the determination of the content of the PC(2) series of reports were made by a number of advisory groups and individuals representing or affiliated with universities, research organizations, professional associations, government agencies, and other groups.

The procedures for sample selection, sample weighting, and computation of sampling variances were developed in the Statistical Methods Division, under the supervision of Morton Boisen, Chief, and Robert H. Hanson, Assistant Division Chief, assisted by William T. Alsbrooks, Peter A. Bounpane, Barbara A. Boyes, and Carlton W. Pruden.

Geographic plans and procedures were developed in the Geography Division under

the supervision of William T. Fay, then Chief, and Robert C. Klove and Gerald J. Post, Assistant Division Chiefs.

Data collection activities were administered by the Field Division, Richard C. Burt, Chief, and Dean H. Weber, Assistant Division Chief, with the assistance of the directors of the Bureau's data collection centers.

Systems and processing procedures were developed under the direction of Morris Gorinson, Assistant Chief, Demographic Census Staff. Florence Wright, assisted by John F. Powell and Orville M. Snye, was responsible for the clerical procedures and Roger O. Lepage, assisted by Margaret P. Brooks, Stephen E. Goldman, William E. Norfolk and Carol T. Schlichten, was responsible for the computer programming. Donald R. Dalzell was responsible for the computer procedures and programs used for the electronic preparation of tables in this report.

The manual processing and microfilming of the questionnaires and the review of tabulation controls were performed in the Data Preparation Division (formerly Jeffersonville Census Operations Division), under the direction of Robert L. Hagan, then Chief, with the assistance of Rex L. Pullin. The manual coding operations were supervised by John C. Campbell, assisted by Herbert J. Hough, Joe D. Kolb, and Leo C. Schilling. William L. Pangburn supervised the microfilming operation. Dan N. Harding, assisted by Nora H. Shouse, was responsible for the tabulation review work.

FOSDIC and computer processing were performed in the Computer Services Division under the supervision of James R. Pepal,

Chief, and E. Richard Bourdon, C. Thomas DiNenna, and James W. Shores, Assistant Division Chiefs. Development of the FOSDIC equipment was directed by William M. Gaines, Assistant Division Chief, and McRae Anderson. Development of the automatic microfilming equipment was directed by Anthony A. Berlinsky.

Publications planning, editing, composition, and printing procurement were performed in the Publications Services Division, under the direction of Raymond J. Koski, Acting Chief, by Milton S. Andersen, Gerald A. Mann, and Wayne H. Massey.

Important contributions were made by Robert B. Voight and Sherry L. Courtland in the planning and coordination of the 1970 census program; by Lucille D. Catterton in the planning of the tabular materials; and by John W.H. Spencer, Sol Dolleck, and M. Douglas Fahey in the systems design and operations for processing the census data.

### GENERAL

This report presents statistics on the Negro population, cross-classified by various social and economic characteristics for the United States, regions, selected States, standard metropolitan statistical areas, and cities. Selected housing characteristics also are given. The data are based on the 1970 Census of Population and Housing. Legal provision for this census, which was conducted as of April 1, 1970, was made in the Act of Congress of August 31, 1954 (amended August 1957), which codified Title 13, United States Code.

A major portion of the information compiled from the 1970 Census of Population appears in Volume I, **Characteristics of the Population**, which focuses on the presentation of data for States, counties, places, and other areas of the United States. The present report is part of Volume II, **Subject Reports**, wherein most reports concentrate on the presentation of national and regional data for a particular subject. A list of Volume II subject reports from the 1970 census is presented on page II. For a description

of Volumes I and II, as well as other elements of the data dissemination program of the 1970 Population and Housing Census, see Appendix E, "Publication and Computer Summary Tape Program."

The content and procedures of the 1970 census were determined after evaluation of the results of the 1960 census, consultation with a wide variety of users of census data, and extensive field pretesting. A number of changes were introduced in 1970 to improve the usefulness of the census results. For the characteristics shown in this report, the changes do not, however, affect to any appreciable extent the comparability of the 1970 data with those for 1960.

More detailed information on the technical and procedural matters covered in the text of this report can be obtained by writing to the Director, Bureau of the Census, Washington, D.C. 20233. Such information will also appear in later reports of the 1970 census.

**Organization of the text.**—The text consists of this introduction and Appendixes A through E, which appear after the tables. The introduction contains information relating specifically to the principal subject of this report, such as definitions of terms and editing procedures. Appendix A provides general information concerning the presentation of data in this series of reports and the collection and processing procedures of the 1970 census. Appendix B describes the various area classifications (e.g., urban and rural residence, urbanized areas, etc.) and also explains the residence rules used in counting the population. Appendix C provides brief definitions and explanations of subjects covered in cross-classifications in this report and other reports in this

series. Appendix D presents information on sources of error in the data, sampling variability, ratio estimation, and editing procedures. Appendix E summarizes the data dissemination program.

**Content of the tables.**—Table 1 presents data for the Negro population classified by sex and urban-rural residence for the United States, regions, divisions, and States. Tables 2 through 10 contain data on characteristics such as age, family relationship, marital status, school enrollment, employment status, occupation, income in 1969, and housing, for the United States, regions, and selected States by urban-rural residence. In tables 11 through 15, statistics on social, economic, and housing characteristics are given for selected standard metropolitan statistical areas and cities.

**Sample size.**—The statistics in this report are based on a sample adjusted to represent the total population. Most data are based on a 20-percent sample of the population; data on place of birth, school enrollment, residence in 1965, selected items on housing equipment, and number of automobiles available are based on a 15-percent sample. (See "Data Collection Procedures" in Appendix A.) An explanation of the ratio estimation procedure and information on the sampling variability associated with the data are contained in Appendix D.

### RELATED MATERIALS

**1970 census reports.**—Statistics on the Negro population are published in chapters B, C, and D of 1970 Census of Population, Volume I, **Characteristics of the Population**. General characteristics, based on complete-count

data, are presented in chapter B for the United States, its regions, divisions, and States, standard metropolitan statistical areas (SMSA's), urbanized areas, places, and counties. Social and economic statistics are shown in chapters C and D. The area detail in chapter C is similar to that presented in chapter B; however, data on the Negro population are presented for SMSA's, places, and counties with at least 400 Negroes. Chapter D contains data for larger geographic areas. The data in both chapters C and D are based on 20-, 15-, or 5-percent sample information. Chapters B, C, and D were originally published as paper-bound reports in Series PC(1)-B, **General Population Characteristics**; Series PC(1)-C, **General Social and Economic Characteristics**; and Series PC(1)-D, **Detailed Characteristics**, respectively.

Population and housing statistics on the Negro are also shown for census tracts of 241 standard metropolitan statistical areas and selected adjacent areas in the 1970 Census of Population and Housing, Series PHC(1), **Census Tracts**. Data on metropolitan-nonmetropolitan residence are presented for the Negro population by age and population change inside and outside central cities of SMSA's for the United States and each of the States in Series PHC(2), **General Demographic Trends for Metropolitan Areas, 1960 to 1970**, United States Summary. Rates of natural increase and net migration are shown for Negroes and other races combined. In addition, the 1970 Census of Housing, Volume I, **Housing Characteristics for States, Cities, and Counties**, presents data on the characteristics of housing units with Negro head of household for the following areas: States (by urban and rural residence), standard metropolitan statistical areas, urbanized areas, places

of 50,000 or more, and those places of 2,500 to 50,000 and counties with 400 or more Negroes.

The division of the population by race is a basic classification in the presentation of census statistics, and, therefore, statistics on the Negro population are found in most other Volume II subject reports of the 1970 Census of Population.

**Other related 1970 census subject reports.**—Data similar to those published in this report are also being published for other racial and ethnic groups in the following Volume II subject reports: PC(2)-1C, **Persons of Spanish Origin**; PC(2)-1D, **Persons of Spanish Surname**; PC(2)-1E, **Puerto Ricans in the United States**; PC(2)-1F, **American Indians**; and PC(2)-1G, **Japanese, Chinese, and Filipinos in the United States**. Statistics on the Korean and Hawaiian populations will be included in the PC(2)-1G report; data on Aleuts and Eskimos in Alaska will be presented in a 1970 Census of Population Supplementary Report, Series PC(S1).

**Reports from earlier censuses.**—Information for 1960 on racial composition of the United States, regions, divisions, States, SMSA's, urbanized areas, cities, and counties were published in 1960 Census of Population, Volume I, **Characteristics of the Population**. Similar data are given in the reports for census tracts of large cities and adjacent areas. These data are presented for 180 areas in 1960 Censuses of Population and Housing, Series PHC(1), **Census Tracts**. Data on the social and economic characteristics of the Negro population, based on a 25-percent sample, were published in 1960 Census of Population, Volume II, PC(2)-1C, **Nonwhite Population by Race**. Additional characteristics by race

are included in most of the other Volume II reports of the 1960 Census of Population.

In the 1950 census, data on Negroes for regions, divisions, and States, standard metropolitan areas, urbanized areas, cities, and counties were published in 1950 Census of Population, Volume II, **Characteristics of the Population**, and for census tracts in Volume III, **Census Tract Statistics**. Data on this racial group are also contained in 1950 Census of Population, Volume IV, Part 3B, **Nonwhite Population by Race**. Additional data on the Negro population are part of other special reports in Volume IV.

**Current Population Survey.**—Data on social and economic characteristics of the black population for the United States as a whole are collected and published annually by the Bureau of the Census through its Current Population Survey (CPS). The CPS is a nationwide survey covering a sample of about 50,000 occupied housing units and the households residing in them. These data appear in Series P-20 and P-60 of **Current Population Reports**. A special report on the Negro population, based on the CPS, is published annually in the P-23 series and is entitled "The Social and Economic Status of the Black Population in the United States." (For a statement on the comparability of CPS and census data on Negro population, see the paragraphs on "Comparability With Other Data.")

**Unpublished data.**—For most of the Volume II reports, statistics in addition to those published in the report are available on a reimbursable basis from computer tape files. Data shown for the United States as a whole are available for regions, divisions, and

States, and, in a number of instances, the data for some characteristics were tabulated in greater detail than shown in the reports. Requests for unpublished data, giving a specific description of the figures desired, should be made in writing to the Director, Bureau of the Census, Washington, D.C. 20233. Inquiries concerning unpublished data should be transmitted to the Bureau as soon as possible since tape files are not maintained indefinitely.

#### DEFINITIONS AND EXPLANATIONS OF PRINCIPAL SUBJECT

The definitions and explanations below relate only to the principal subject of this report, namely, race. Brief definitions of other items that appear in cross-classifications in the tables of this report are presented in Appendix C.

##### Race

The data on the Negro population were derived from question 4, on color or race, which was asked of all persons (see facsimile of questionnaire item below). In Alaska, "Aleut" and "Eskimo" were substituted for the categories "Korean" and "Hawaiian."

#### 4. COLOR OR RACE

Fill one circle.

If "Indian (American)," also give tribe.

If "Other," also give race.

- |   |                                |  |
|---|--------------------------------|--|
| <input type="radio"/> White                     | <input type="radio"/> Japanese | <input type="radio"/> Hawaiian         |
| <input type="radio"/> Negro or Black            | <input type="radio"/> Chinese  | <input type="radio"/> Korean           |
| <input type="radio"/> Indian (Amer.)            | <input type="radio"/> Filipino | <input type="radio"/> Other—Print race |
| <input checked="" type="checkbox"/> Print tribe |                                |  |

The concept of race as used by the Bureau of the Census does not denote any scientific definition of biological stock. Rather it reflects self-identification by respondents. Since the 1970 census obtained information on race primarily through self-enumeration, the data represent essentially self-classification by people according to the race with which they identify themselves. For persons of mixed parentage who were in doubt as to their classification, the race of the person's father was to be used. The population of the United States is classified by race into several categories listed in question 4. The "Other" category includes Malayan, Polynesian, Thai, etc.

The category "Negro" includes persons who indicated their race as "Negro or Black," as well as persons who did not classify themselves in one of the specific race categories on the questionnaire but who had such entries as Jamaican, Trinidadian, West Indian, Haitian, and Ethiopian. In this report, the terms "Negro population" and "black population" are used with the same meaning.

#### Special Edit and Allocation Procedures for Race

On the 1970 census questionnaire, the respondent had the opportunity of indicating his racial identification by marking one of eight circles indicating specific racial groups—White, Negro, American Indian, Japanese, Chinese, Filipino, Hawaiian, Korean—or by marking an "Other" circle and writing in his race. A considerable proportion of the respondents who marked the "Other" circle supplied specific write-in entries such as Mexican, Puerto Rican, Jamaican, and the like. In the sample processing, entries of this type were edited into the specific

racial categories. The statistics presented in this report reflect the effects of this editing.

In the processing of the complete-count data, the editing procedure described above was performed only for those enumeration districts in which the proportion of "Other" marks exceeded certain tolerances which led to a large overstatement of the size of the residual "Other races" category in the PC(1)-B publications. A comparison of the complete-count and the sample distributions of the population by race are presented in table I. The differences indicate that the additional corrective editing shifted a substantial number of persons from the residual "All other" to the "White" category. The differences also reflect the effects of sampling variability.

If the race entry was missing on the questionnaire for a member of a household, an answer was assigned in the computer according to the race of other household members using specific rules of precedence of relationship. If race was not entered for anyone in the household, the race of the head of the preceding household was assigned. This procedure is a variation of the general allocation process described in Appendix D, "Accuracy of the Data."

#### Comparability With Other Data

Earlier censuses.—Data were collected and published on the black population in each census since 1790. In the 1970 census, as in the 1960 census, information on race was obtained principally through self-enumeration. Respondents had the opportunity to classify themselves with respect to race, but nonrespondents were interviewed by

INTRODUCTION—Continued

telephone or direct visit. In censuses prior to 1960, the racial classification was made, for the most part, by the enumerators on the basis of observation.

There is little evidence that self-identification has had a major effect on the count of the Negro population. The increase in the Negro population

during the decades 1960-70 and 1950-60 has been consistent with statistics on population change (natural increase and net immigration).

**Current Population Survey.**—Data on the Negro population from the census are not strictly comparable with those from the Current Population Survey

(CPS). The CPS excludes members of the Armed Forces in barracks. Also, there are differences between the census and the CPS in enumeration procedures. In the 1970 census, information on race was based on self-identification, with field followup as needed; in the CPS, race is determined by observation.

TABLE I. Comparison of Complete-Count and 20- and 15-Percent Sample Data on the Population by Race, for the United States: 1970
