POPULATION DIVISION

Meyer Zitter, Chief

ACKNOWLEDGMENTS—Many persons participated in the various activities of the 1970 census. Primary direction of the program was performed by **Conrad Taeuber**, former Associate Director for Demographic Fields, assisted by **David L. Kaplan**, 1970 Census Coordinator, and in conjunction with **Paul R. Squires**, Associate Director for Data Collection and Processing, and **Joseph Waksberg**, Associate Director for Statistical Standards and Methodology.

This report was planned and its content developed in the Population Division by **Tobia Bressler**, **Charles E. Johnson, Jr.**, and **Elmore J. Seraile**, under the direction of **Paul C. Glick**, Senior Demographer. Professional assistance was provided by **Karen A. Crook**, **Elizabeth A. Larmon** and **Karen M. Mills** assisted in the preparation of textual materials. The work was under the general supervision of **Meyer Zitter**, Division Chief, and **Herman P. Miller** (Chief to April 1972). Important contributions to the determination of the content of the PC(2) series of reports were made by a number of advisory groups and individuals representing or affiliated with universities, research organizations, professional associations, government agencies, and other groups.

The procedures for sample selection, sample weighting, and computation of sampling variances were developed in the Statistical Methods Division, under the supervision of **Morton Boisen**, Chief, and **Robert H. Hanson**, Assistant Division Chief, assisted by **William T. Alsbrooks**, **Peter A. Bounpane**, **Barbara A. Boyes**, and **Carlton W. Pruden**.

Geographic plans and procedures were developed in the Geography Division under the supervision of **William T. Fay**, then

Chief, and **Robert C. Klove** and **Gerald J. Post**, Assistant Division Chiefs.

Data collection activities were administered by the Field Division, **Richard C. Burt**, Chief, and **Dean H. Weber**, Assistant Division Chief, with the assistance of the directors of the Bureau's data collection centers.

Systems and processing procedures were developed under the direction of **Morris Gorinson**, Assistant Chief, Demographic Census Staff. **Florence Wright**, assisted by **John F. Powell** and **Orville M. Slye**, was responsible for the clerical procedures and **Roger O. Lepage**, assisted by **Margaret P. Brooks**, **Stephen E. Goldman**, **Carol T. Schlechten**, and **Richard R. Warren**, was responsible for the computer programming. **Donald R. Dalzell** was responsible for the computer procedures and programs used for the electronic preparation of tables in this report.

The manual processing and microfilming of the questionnaires and the review of tabulation controls were performed in the Data Preparation Division (formerly Jeffersonville Census Operations Division), under the direction of **Robert L. Hagan**, then Chief, with the assistance of **Rex L. Pullin**. The manual coding operations were supervised by **John C. Campbell**, assisted by **Herbert J. Hough**, **Joe D. Kolb**, and **Leo C. Schilling**. **William L. Pangburn** supervised the microfilming operation. **Dan N. Harding**, assisted by **Nora H. Shouse**, was responsible for the tabulation review work.

FOSDIC and computer processing were performed in the Computer Services Division under the supervision of **James R. Pepal**,

Chief, and **E. Richard Bourdon**, **C. Thomas DiNenna**, and **James W. Shores**, Assistant Division Chiefs. Development of the FOSDIC equipment was directed by **William M. Gaines**, Assistant Division Chief, and **McRae Anderson**. Development of the automatic microfilming equipment was directed by **Anthony A. Berlinsky**.

Publications planning, editing, composition, and printing procurement were performed in the Publications Services Division, under the direction of **Raymond J. Koski**, Acting Chief, by **Milton S. Andersen**, **Gerald A. Mann**, and **Wayne H. Massey**.

Important contributions were made by **Robert B. Voight** and **Sherry L. Courtland** in the planning and coordination of the 1970 census program; by **Lucille D. Catterton** in the planning of the tabular materials; and by **John W.H. Spencer**, **Sol Dolleck**, and **M. Douglas Fahey** in the systems design and operations for processing the census data.

GENERAL

This report presents statistics for persons of Spanish origin, cross-classified by various social and economic characteristics for the United States, regions, selected States, standard metropolitan statistical areas (SMSA's), and places. Selected housing characteristics are also given. The data are based on the 1970 Census of Population. Legal provision for this census, which was conducted as of April 1, 1970, was made in the Act of Congress of August 31, 1954 (amended August 1957), which codified Title 13, United States Code.

A major portion of the information compiled from the 1970 Census of Population appears in Volume I, *Characteristics of the Population*, which focuses on the presentation of data for States, counties, places, and other areas of the United States. The present report is part of Volume II, *Subject Reports*, wherein most reports concentrate on the presentation of national and regional data for a particular subject. A list of Volume II subject reports from the 1970 census is presented on page II. For a

description of Volumes I and II, as well as other elements of the data dissemination program of the 1970 Population and Housing Census, see Appendix E, "Publication and Computer Summary Tape Program."

The content and procedures of the 1970 census were determined after evaluation of the results of the 1960 census, consultation with a wide variety of users of census data, and extensive field pretesting. A number of changes were introduced in 1970 to improve the usefulness of the census results.

More detailed information on the technical and procedural matters covered in the text of this report can be obtained by writing to the Director, Bureau of the Census, Washington, D.C. 20233. Such information will also appear in later reports of the 1970 census.

Organization of the text.—The text consists of this introduction and Appendixes A through E, which appear after the tables. The introduction contains information relating specifically to the principal subject of this report, including definitions of terms and a discussion of editing procedures. Appendix A provides general information concerning the presentation of data in this series of reports and the collection and processing procedures of the 1970 census. Appendix B describes the various area classifications (e.g., urban and rural residence, urbanized areas, etc.) and also explains the residence rules used in counting the population. Appendix C provides brief definitions and explanations of subjects covered in cross-classifications in this report and other reports in this series. Appendix D presents information on sources of error in the data, sampling variability,

ratio estimation, and editing procedures. Appendix E summarizes the data dissemination program.

Content of the tables.—Table 1 presents data for the Spanish origin population by type of origin cross-classified by sex and urban-rural residence for the United States, regions, divisions, and States. Table 2 shows data by race for the total Spanish origin population with the same area detail as table 1, excluding urban-rural residence. Tables 3 through 12 contain data on characteristics such as age, race, household relationship, marital status, education, employment status, occupation, income in 1969, and housing. Most of these tables include data by urban-rural residence for the United States and selected States. In tables 13 through 17, statistics on social, economic, and housing characteristics are given for 29 SMSA's with 50,000 or more persons of Spanish origin and 31 places with 25,000 or more persons of Spanish origin. In these tables, all places are incorporated, except East Los Angeles (U), which is unincorporated. For each of the selected SMSA's and places, data are shown separately for the Spanish origin group or groups (Mexican, Puerto Rican, or Cuban) with 25,000 or more persons.

Sample size.—The statistics in this report are based on a 5-percent sample adjusted to represent the total population. (See "Data Collection Procedures" in Appendix A.) An explanation of the ratio estimation procedure and information on the sampling variability associated with the data are contained in Appendix D.

RELATED MATERIALS

1970 census reports.—The geographic distribution of the total population of Spanish origin is published in chapters C and D of 1970 Census of Population, Volume I, **Characteristics of the Population**. The classification "Spanish origin" in this report is the same as the classification "Spanish origin or descent" shown in chapters C and D. Data are presented in chapter C for the United States, States, SMSA's, urbanized areas, places, and counties. Chapter D, which contains data for larger geographic areas, shows selected types of social and economic statistics from the 5-percent sample for the total Spanish origin population. Chapters C and D also include selected types of social and economic statistics from the 15-percent sample for persons of Spanish heritage. (See Appendix C for a definition of Spanish heritage.) Chapters C and D were originally published as paperbound Series PC(1)-C reports, **General Social and Economic Characteristics**, and Series PC(1)-D reports, **Detailed Characteristics**, respectively.

A geographic distribution of persons of Spanish origin, persons of Spanish language, and persons by birthplace and birthplace of parents is presented in the 1970 Census of Population, **Supplementary Reports**, PC(S1)-30, "Persons of Spanish Ancestry" (and the Spanish translation, PC(S1)-30S). These data are shown for regions, divisions, States, and selected SMSA's. Data are also shown for persons of Spanish surname for the five Southwestern States where this Spanish indicator was used.

In addition to the present report, statistics on the Spanish origin population are found in several other

Volume II subject reports of the 1970 Census of Population. Similar data are being published for racial and other ethnic groups in the following Volume II subject reports: PC(2)-1A, **National Origin and Language**; PC(2)-1B, **Negro Population**; PC(2)-1D, **Persons of Spanish Surname**; PC(2)-1E, **Puerto Ricans in the United States**; PC(2)-1F, **American Indians**; and PC(2)-1G, **Japanese, Chinese, and Filipinos in the United States**. Statistics on the Korean and Hawaiian populations are included in the PC(2)-1G report; data on Aleuts and Eskimos in Alaska will be presented in a 1970 Census of Population, **Supplementary Reports**, Series PC(S1) report.

Current Population Survey.—Data on social and economic characteristics of the Spanish origin population for the United States as a whole are collected and published annually by the Bureau of the Census through its Current Population Survey (CPS). The CPS is a nationwide survey covering a sample of about 50,000 households. These data appear in Series P-20 and P-60, **Current Population Reports**. (For a statement on the comparability of CPS and census data on the Spanish origin population, see the section on "Comparability With Other Data.")

Unpublished data.—For most of the Volume II reports, statistics in addition to those published in the report are available on a reimbursable basis

from computer tape files. Data shown for the United States as a whole are available for regions, divisions, and States, and, in a number of instances, the data for some characteristics were tabulated in greater detail than shown in the reports. Requests for unpublished data, giving a specific description of the figures desired, should be made in writing to the Director, Bureau of the Census, Washington, D.C. 20233. Inquiries concerning unpublished data should be transmitted to the Bureau as soon as possible since tape files are not maintained indefinitely.

DEFINITIONS AND EXPLANATIONS OF PRINCIPAL SUBJECT

The definitions and explanations below relate only to the principal subject of this report. Brief definitions of other items that appear in cross-classifications in the tables of this report are presented in Appendix C.

Spanish Origin

The question identifying the Spanish origin population was question 13b, on origin or descent, which was asked in the 5-percent sample of the population. (See facsimile of questionnaire item below.)

Persons of Spanish origin in this report are those persons who indicated that their origin was Mexican, Puerto Rican, Cuban, Central or South American, or other Spanish origin. As table 1 indicates, 93.3

13b. Is this person's origin or descent— (Fill one circle)

Other	1.3	1.0	2.0	0.8

¹ Includes Central or South American and other Spanish origin not shown separately.

percent of all persons of Spanish origin were reported as white.

Special Edit and Allocation Procedures

On the 1970 census questionnaire, the respondent (in self-enumeration areas) or the enumerator (in direct interview areas) indicated Spanish origin identification by marking one of the circles in question 13b. If the reply to the question was missing for the person marked as head of household, the origin of the wife, if any, was assigned, or vice versa. If the reply was missing for a son or daughter, the origin of the head was assigned. In the five Southwestern States, if the entry in 13b was

missing, but the person had a Spanish surname, Mexican origin was assigned.

Limitations of the Data

For certain areas, the number of persons of Spanish origin is overstated because some respondents apparently misunderstood the question and interpreted the category "Central or South American" to mean central or southern United States. Available evidence suggests that this misinterpretation resulted in a substantial percentage of overstatement in some Southern States and may have occurred, to a lesser degree, in States in the central area of the country. Also, a minority of the persons of Brazilian (largely Portuguese) origin enumer-

ated in the census may have reported Central or South American origin, and therefore, have been counted as of Spanish origin.

Comparability With Other Data

1970 census.—The 1970 census used four different identifiers of the population of Spanish ancestry living in the United States. Each of these identifiers provides useful information about the people frequently referred to as "Spanish speaking."

The oldest identifier is one which asks for the birthplace of the individual and of his parents. From these questions, information is available concerning the number of first- and second-generation immigrants from such countries as Mexico and Cuba, as well as persons from Puerto Rico. (See Appendix C for a definition of Puerto Rican birth or parentage.) About 5.2 million persons in the United States were reported as of Spanish birth or parentage using this identifier.

The second is the identification in terms of Spanish surname. In the five Southwestern States—Arizona, California, Colorado, New Mexico, and Texas—all persons of Spanish surname have been separately identified. About 4.7 million persons living in these States were identified as having a Spanish surname.

The third measure used in 1970 asked for the language spoken in the person's home in early childhood (mother tongue). Nearly 8 million persons reported Spanish as that language. For purposes of the census reports, all other persons living in families in which the head or wife reported Spanish as the mother tongue were added to give a total which is designated "persons of

Spanish language." The total number of these persons is about 9.6 million.

The fourth measure, and the one used in this report, asked persons whether they considered themselves to be of Mexican, Puerto Rican, Cuban, Central or South American, or other Spanish origin. More than 9 million persons answered that they belonged to one of these groups.

The four measures provide different approaches to the identification of this minority group. To a large extent they overlap. Most persons of Spanish surname also report Spanish as their mother tongue; most persons identifying themselves as of Puerto Rican or Cuban origin came from those areas or were born to parents who came from those areas; most of these persons also live in homes in which the head or wife

reported Spanish as their mother tongue, and so forth.

Earlier censuses.—The identification of persons of Spanish origin was used for the first time in a decennial census in 1970. Prior to 1970 persons of Spanish ancestry were identified by the use of birthplace and birthplace of parents, Spanish surname, and mother tongue. The one with the longest history of census use was the place-of-birth question, which was first used in 1850. In 1890, birthplace of parents was added. Spanish surname has been used as an identifier since the 1950 census to classify separately the large concentration of Spanish surname persons in the Southwest. (See Appendix C for a definition of Spanish surname.) Using Spanish surname to identify an ethnic

group proves to be efficient only in areas where such persons are found in great concentration. Spanish language was used for the first time in the 1970 census; however, the basic component, mother tongue, was introduced in the 1910 census and has been used intermittently since then. (See Appendix C for definition of Spanish language.)

Current Population Survey.—Although Spanish origin was based on self-identification in both the 1970 census and the Current Population Survey (CPS), data on Spanish origin from the census are not strictly comparable with those from CPS. Among the reasons are differing sample sizes and estimation procedures, sampling variability, and differences in survey procedures.
