GENERAL

This report presents statistics on geographical mobility of persons 5 years old and over during the period 1965 to 1970. The data were obtained from a question on residence on April 1, 1965, asked in the 1970 Census of Population and Housing. Legal provision for this census, which was conducted as of April 1, 1970, was made in the Act of Congress of August 31, 1954 (amended August 1957), which codified Title 13, United States Code.

A major portion of the information compiled from the 1970 Census of Population appears in Volume I, **Characteristics of the Population**, which focuses on the presentation of data for States, counties, places, and other areas of the United States. The present report is part of Volume II, **Subject Reports**, which concentrates on the presentation of national and regional data for a particular subject. For a description of Volumes I and II, as well as other elements of the data dissemination program of the 1970 Population and Housing Census, see

Appendix E, "Publication and Computer Summary Tape Program."

The content and procedures of the 1970 census were determined after evaluation of the results of the 1960 census, consultation with a wide variety of users of census data, and extensive field pretesting. A number of changes were introduced in 1970 to improve the usefulness of the census results. For the characteristics shown in this report, the changes do not, however, affect to any appreciable extent the comparability of the 1970 data with those for 1960.

More detailed information on the technical and procedural matters covered in the text of this report can be obtained by writing to the Director, Bureau of the Census, Washington, D.C. 20233. Such information will also appear in later reports of the 1970 census.

Organization of the text.—The text consists of this introduction and Appendixes A through E, which appear after the tables. The introduction contains information relating specifically to the principal subject of this report, such as definitions of terms and editing procedures. Appendix A provides general information concerning the presentation of data in this series of reports and the collection and processing procedures of the 1970 census. Appendix B describes the various area classifications (e.g., urban and rural residence, urbanized areas, etc.) and also explains the residence rules used in counting the population. Appendix C provides brief definitions and explanations of subjects covered in cross-classifications in this report and other reports in this series. Appendix D presents information on sources of error in the data, sampling variability, ratio estimation, and editing

procedures. Appendix E summarizes the data dissemination program.

Content of the tables.—Tables 1 through 22 show general mobility status of persons according to social, economic, and housing characteristics. These tables most often divide residential mobility into moves within counties, between counties within a State, between contiguous States, and between noncontiguous States. The contiguous States for each State are shown in the list at the end of this introduction. This classification of residential movement is one that has been used in past censuses and thus allows comparability from census to census. Some of the characteristics shown for these tables include marital status, years of school completed, employment status, occupation, and family income in 1969.

Tables 23 through 41 give statistics on selected social and economic characteristics of persons in terms of region of birth and residence in 1965. Tables 42 through 49 present information on area-to-area flows of various population subgroups, with areas defined in terms of regions, divisions, or individual States. Tables 50 through 59 show inmigrants or outmigrants for individual States.

Sample size.—The statistics presented in this report are based on a 15-percent sample adjusted to represent the total population. An explanation of the ratio estimation procedure and information on the sampling variability associated with the data are contained in Appendix D.

RELATED MATERIALS

1970 census reports.—The reports in Volume I of the 1970 Census of

Population, **Characteristics of the Population**, contain statistics on residence in 1965, State of birth, and year moved into present house for each State. Residence in 1965 and State of birth are also shown for the urban and rural parts of each State, for standard metropolitan statistical areas, urbanized areas, places, and counties. These data are summed to national and regional totals in the Volume I, "United States Summary" report.

Volume II report PC(2)-2E, **Migration Between State Economic Areas**, presents data on immigrants and out-migrants by age and sex for each of the 510 State economic areas (SEA's) into which the country is divided and a 510-by-510 matrix of SEA of residence in 1965 by SEA of residence in 1970. Other Volume II reports on migration include PC(2)-2A, **State of Birth**; PC(2)-2C, **Mobility for Metropolitan Areas**; and PC(2)-2D, **Lifetime and Recent Migration**.

Additional data on residence 5 years ago are given for census tracts in the PHC(1) series, **Census Tracts**, issued for individual SMSA's. Data on year moved into present house according to various housing characteristics are presented for individual SMSA's in the HC(2) series, **Metropolitan Housing Characteristics**, issued for individual SMSA's.

Reports from earlier censuses.—Like the 1970 census, the 1960 census contains questions on place of birth and residence 5 years prior to the census date. An approach similar to that used in 1970 was followed in the publication of migration data from the 1960 census. The Volume I State reports present data on mobility status, place of birth, and year moved into present house for States, by urban and rural residence, standard metro-

politan statistical areas (SMSA's), urban places of 10,000 or more, and counties. More detailed data are given in the Volume II reports PC(2)-2A, **State of Birth**; PC(2)-2B, **Mobility for States and State Economic Areas**; PC(2)-2C, **Mobility for Metropolitan Areas**; PC(2)-2D, **Lifetime and Recent Migration**; and PC(2)-2E, **Migration Between State Economic Areas**. Additional statistics on the mobility of the population are included in a few other 1960 PC(2) and PC(3) reports.

In both the 1950 and 1940 censuses, a number of special reports on mobility of the population were published. The statistics for 1950 relate to residence 1 year earlier, rather than 5 years earlier; those for 1940 relate to a 5-year period but differ in other respects from the 1960 and 1970 statistics.

Current Population Survey.—Sample data on mobility during the preceding year have been collected annually since 1948 in the Current Population Survey and have been published mostly in Series P-20, **Current Population Reports**. Earlier surveys at irregular intervals covered other periods back to 1940.

Estimates of net migration.—For each State and county, the Census Bureau published estimates of net migration over the 1960-70 decade. These estimates were prepared by the "residual method"; specifically, population change due to natural increase (the difference between births and deaths) was subtracted from total population change over the decade as implied by the two censuses, leaving population change due to net migration as a residual. The estimates obtained by residual method, therefore, include net immigration from abroad as well as

migrants who were born or died during the decade. The data in the present report include persons who lived abroad 5 years earlier but do not include persons who left the United States during the 5-year period from 1965 to 1970 or migrants who were born (ages under 5) or died during this period. The estimates of 1960-70 net migration for States and counties were published in Series P-25, **Current Population Reports**, No. 461, "Components of Population Change by County: 1960 to 1970."

The residual method was also used to estimate the net migration component of population change in the central cities and in the area outside central cities for each standard metropolitan statistical area of the country. The estimates of net migration for metropolitan areas were published in 1970 Census of Population and Housing, **General Demographic Trends for Metropolitan Areas, 1960 to 1970**, PHC(2)-1, "United States Summary."

Although estimates of net migration, as residual values, provide useful approximations, they reflect the net effects of any errors in the data used such as differences in the completeness of enumeration between censuses, boundary changes, improper allocation of births and deaths by place of residence, and others.

Unpublished data.—For most of the Volume II reports, statistics in addition to those published in the report are available on a reimbursable basis from computer tape files. Data shown for the United States as a whole are available for regions, divisions, and States, and, in a number of instances, the data for some characteristics were tabulated in greater detail than shown in the reports. Requests for unpublished data, giving a specific descrip-

tion of the figures desired, should be made in writing to the Director, Bureau of the Census, Washington, D.C. 20233. Inquiries concerning unpublished data should be transmitted to the Bureau as soon as possible since tape files are not maintained indefinitely.

DEFINITIONS AND EXPLANATIONS OF PRINCIPAL SUBJECTS

The definitions and explanations below relate only to the principal subjects of this report. Brief definitions of other items that appear in cross-classifications in the tables of this report are presented in Appendix C.

Place of Birth

The statistics on place of birth were derived from answers to question 13 which was asked of all persons in the 15-percent and 5-percent samples (see facsimile of questionnaire item below).

Data on the State of birth of the native population have been collected in each census beginning with that of 1850. For the more recent censuses, State of birth has been published for the native population of the urban, rural-nonfarm, and rural-farm parts of States, and of individual cities above a specified minimum size. In this report, the native population is classified into the following groups: persons born in the State in which they were residing at the time of the census; persons born

in a different State; and persons born in Puerto Rico, in an outlying area of the United States, abroad of at least one native American parent or at sea, and persons whose State of birth was not reported. Respondents were instructed to report place of birth in terms of the mother's usual State of residence at the time of the birth rather than in terms of the location of the hospital if the birth occurred in a hospital.

Foreign-born persons were asked to report their country of birth according to international boundaries as recognized by the United States government on April 1, 1970. Since numerous changes in boundaries of foreign countries have occurred in the last century, some foreign-born persons may have reported their country of birth in terms of boundaries that existed at the time of their birth or emigration, or in accordance with their own national preference.

13. Where was this person born?
If born in hospital, give State or country where mother lived, not location of hospital.
If born outside U.S., see instruction sheet; distinguish Northern Ireland from Ireland (Eire).
 This State
 OR

(Name of State or foreign country; or Puerto Rico, Guam, etc.)

19a. Did he live in this house on April 1, 1965? *If in college or Armed Forces in April 1965, report place of residence there.*
 Born April 1965 or later } *Skip to 20*
 Yes, this house }
 No, different house }
b. Where did he live on April 1, 1965?
 (1) State, foreign country, U.S. possession, etc. _____
 (2) County _____
 (3) Inside the limits of a city, town, village, etc.?
 Yes No
 (4) *If "Yes," name of city, town, village, etc.* _____

Residence in 1965

The data on residence in 1965 were derived from answers to question 19 which was asked of all persons in the 15-percent sample of the population (see facsimile of questionnaire item at left).

Respondents who reported that they lived in a different house on April 1, 1965, were instructed to report their usual place of residence on that date. In accordance with the census concept of usual residence, persons in college or in the Armed Forces in 1965 were instructed to report as their 1965 residence the place where they were attending college or where they were stationed.

Residence in 1965 was used in conjunction with residence in 1970 to

determine the extent of residential mobility of the population. In some of the tables of this report, nonmovers and intrastate movers are combined into the category "same State." Interstate migrants, i.e., "different State," are classified in some tables according to their geographic division of residence in 1965.

The category "abroad" includes those with residence in a foreign country, Puerto Rico, or an outlying area of the United States in 1965, including Armed Forces stationed overseas. Persons 5 years old and over who indicated that they had moved into their present residence after April 1, 1965, but for whom sufficiently complete and consistent information regarding residence on April 1, 1965, was not collected, are included in the group "moved, place of residence in 1965 not reported." When no information was reported for the person himself, information for other members of the family was used, if available. The category "moved, place of residence in 1965 not reported" also includes persons who gave no

information on residence on April 1, 1965, but were classified as having moved into their present house since that date on the basis of the final edited information reported for question 18, "When did this person move into this house (or apartment)?" (All nonresponses on the latter question were allocated.)

In tables 23 through 37, 40, 41, 44 through 54, and 56 through 59 of the present report, persons reporting State but not county or city of residence in 1965 were classified according to the information available on State of residence. In the remaining tables of this report, in the Volume I reports, and in most other Volume II reports, where the tabulations required complete information on county or city of residence in 1965, persons reporting only State of residence were assigned to the category "moved, place of residence in 1965 not reported."

The number of persons who were living in a different State in 1965 is considerably less than the total number of moves during the 5 years. Some persons in the same house at the

two dates had moved during the 5-year period but by the time of enumeration had returned to their 1965 residence. Other persons who were living in a different State had made two or more intermediate moves.

Inmigrants and Outmigrants

The terms "inmigrants" and "outmigrants" have been used with reference to migrants into or out of particular areas. Inmigrants to an area are migrants who moved into that area from elsewhere in the United States between 1965 and 1970 and were still living there in 1970. Outmigrants from an area are migrants who were living in the area in 1965 and moved to some other area in the United States where they were living in 1970. Inmigrants and outmigrants for an area exclude migrants within that area. For example, inmigrants and outmigrants for a particular State do not include migrants between its counties. Thus, the sum of the inmigrants to all counties in any State will be greater than the number of inmigrants to that State.

INTRODUCTION—Continued

List of Contiguous States

For a given State, contiguous States are those with which it shares a common boundary. The contiguous States for each State are given below.

Alabama	Fla., Ga., Miss., Tenn.	Louisiana	Ark., Miss., Tex.	Ohio	Ind., Ky., Mich., Pa., W. Va.
Alaska	None	Maine	N.H.	Oklahoma	Ark., Colo., Kans., Mo., N. Mex., Tex.
Arizona	Calif., Colo., Nev., N. Mex., Utah	Maryland	Del., D.C., Pa., Va., W. Va.	Oregon	Calif., Idaho, Nev., Wash.
Arkansas	La., Miss., Mo., Okla., Tenn., Tex.	Massachusetts	Conn., N.H., N.Y., R.I., Vt.	Pennsylvania	Del., Md., N.J., N.Y., Ohio, W. Va.

4 Table 7. Mobility Status of Employed Males 25 to 64 Years Old by Selected Detailed Occupations: 1970—Continued

United States

45 to 64 years old—Continued

Professional, technical, and kindred workers—Continued

Teachers, college and university—Continued

Economists—

History

Sociology

Social science, n.e.c.

Art, drama, and music

Coaches and physical education

Education

English

Foreign language

Law

Other college and university teachers

Teachers, except college and university

Elementary, prekindergarten, and kindergarten

Secondary school

Other teachers, except college and university

Engineering and science technicians

Technicians, except health, and engineering and science

Airplane pilots

Air traffic controllers

Other technicians, except health, and engineering and science

Writers, artists, and entertainers

Actors, dancers, musicians, and composers

Editors and reporters

Public relations men and publicity writers

Radio and television announcers

Other writers, artists, and entertainers

Other professional, technical, and kindred workers

Professional, technical, and kindred workers—allocated

Managers and administrators, except farm

Assessors, controllers, and treasurers; local public administration

Bank officers and financial managers

Buyers, wholesale and retail trade

Funeral directors

Health administrators

Inspectors; inspectors; public administration

Construction inspectors; public administration

Managers and superintendents; building

Managers and administrators; building

Officials and administrators; public administration, n.e.c.

Officials of lodges, societies, and unions

Postmasters and mail superintendents

Purchasing agents and buyers, n.e.c.

Restaurant, cafeteria, and bar managers

Sales managers and department heads, retail trade

Sales managers, except retail trade

School administrators, college

School administrators, elementary and secondary

Other specified managers and administrators, except farm

Managers and administrators, n.e.c.

Managers and administrators, except farm—allocated

Data based on 15-percent sample, see text. For meaning of symbols, see text.
