

Table 70. Averaged Annual Births Per 1,000 Women by Years of School Completed, Age, Marital Status, and Race, for Births From 1955 to 1969: 1970

[For numbers of women, age and marital status are as of July 1 of each year in the period. Data tallied for each calendar year separately and averaged within specified 5-year periods. For birth rates, births are tabulated by age and marital status of mother at occurrence. Data based on 1-percent sample, see text. For minimum base for derived figures (percent, median, etc.) and meaning of symbols, see text.]

¹Excludes ages 40 to 44 for 1955 to 1959.

Table 70. Averaged Annual Births Per 1,000 Women by Years of School Completed, Age, Marital Status, and Race, for Births From 1955 to 1969: 1970—Con.

[For numbers of women, age and marital status are as of July 1 of each year in the period. Data tallied for each calendar year separately and averaged within specified 5-year periods. For birth rates, births are tabulated by age and marital status of mother at occurrence. Data based on 1-percent sample, see text. For minimum base for derived figures (percent, median, etc.) and meaning of symbols, see text.]

United States	Average annual midyear numbers of women						Average annual births per 1,000 women

¹Excludes ages 40 to 44 for 1955 to 1959.

Table 70. **Averaged Annual Births Per 1,000 Women by Years of School Completed, Age, Marital Status, and Race, for Births From 1955 to 1969: 1970—Con.**

(For numbers of women, age and marital status are as of July 1 of each year in the period. Data tallied for each calendar year separately and averaged within specified 5-year periods. For birth rates, births are tabulated by age and marital status of mother at occurrence. Data based on 1-percent sample, see text. For minimum base for derived figures (percent, median, etc.) and meaning of symbols, see text)

¹Twins, triplets, etc. ²Median interval in calendar quarters multiplied by 3 months per quarter.

Table 73. Averaged Annual Probabilities of First-Child Births for Women Who at the Start of the Calendar Year Were Ever Married and Childless, by Age, Race, and Interval Since the First Marriage Began, for Births From 1955 to 1969: 1970

(Numbers of women and births are tallied for each calendar year separately and averaged within specified 5-year periods. Ages of women and spacing intervals are as of January 1 of the specified calendar year. Data based on 1-percent sample, see text. For minimum base for derived figures (percent, median, etc.) and meaning of symbols, see text)

Table 74. Averaged Annual Probabilities of Second-Child Births for Women Who at the Start of the Calendar Year Were Ever Married and Already Had One Child, by Age, Race, and Interval Since Birth of First Child, for Births From 1955 to 1969: 1970—Con.

(Numbers of women and births are tallied for each calendar year separately and averaged within specified 5-year periods. Ages of women and spacing intervals are as of January 1 of the specified calendar year. Data based on 1-percent sample, see text. For minimum base for derived figures (percent, median, etc.) and meaning of symbols, see text.)

Table 76. **Averaged Annual Probabilities of Fourth-Child Births for Women Who at the Start of the Calendar Year Were Ever Married and Already Had Three Children, by Age, Race, and Interval Since Birth of Third Child, for Births From 1955 to 1969: 1970—Con.**

[Numbers of women and births are tallied for each calendar year separately and averaged within specified 5-year periods. Ages of women and spacing intervals are as of January 1 of the specified calendar year. Data based on 1-percent sample, see text. For minimum base for derived figures (percent, median, etc.) and meaning of symbols, see text]

United States	Total	Interval from birth of third child to January 1 of specified calendar year

Table 77. Averaged Annual Probabilities of Fifth and Higher Order Births for Women Who at the Start of the Calendar Year Were Ever Married and Already Had Four or More Children, by Age, Race, and Interval Since Birth of Previous Child, for Births From 1955 to 1969: 1970—Con.

[Numbers of women and births are tallied for each calendar year separately and averaged within specified 5-year periods. Ages of women and spacing intervals are as of January 1 of the specified calendar year. Data based on 1-percent sample, see text. For minimum base for derived figures (percent, median, etc.) and meaning of symbols, see text]

Table 78. Averaged Annual Probabilities of First-Child Births for Women Who at the Start of the Calendar Year Were Ever Married and Childless, by Urban-Rural Residence, Age, Race, and Interval Since the First Marriage Began, for Births From 1965 to 1969: 1970-Con.

(Numbers of women and births are tallied for each calendar year separately and averaged within specified 5-year periods. Ages of women and spacing intervals are as of January 1 of the specified calendar year. Data based on 1-percent sample, see text. For minimum base for derived figures (percent, median, etc.) and meaning of symbols, see text)

Table 79. Averaged Annual Probabilities of Second-Child Births for Women Who at the Start of the Calendar Year Were Ever Married and Already Had One Child, by Urban-Rural Residence, Age, Race, and Interval Since Birth of First Child, for Births From 1965 to 1969: 1970—Con.

[Numbers of women and births are tallied for each calendar year separately and averaged within specified 5-year periods. Ages of women and spacing intervals are as of January 1 of the specified calendar year. Data based on 1-percent sample, see text. For minimum base for derived figures (percent, median, etc.) and meaning of symbols, see text]

Table 80. Averaged Annual Probabilities of Third-Child Births for Women Who at the Start of the Calendar Year Were Ever Married and Already Had Two Children, by Urban-Rural Residence, Age, Race, and Interval Since Birth of Second Child, for Births From 1965 to 1969: 1970

(Numbers of women and births are tallied for each calendar year separately and averaged within specified 5-year periods. Ages of women and spacing intervals are as of January 1 of the specified calendar year. Data based on 1-percent sample, see text. For minimum base for derived figures (percent, median, etc.) and meaning of symbols, see text)

Table 80. Averaged Annual Probabilities of Third-Child Births for Women Who at the Start of the Calendar Year Were Ever Married and Already Had Two Children, by Urban-Rural Residence, Age, Race, and Interval Since Birth of Second Child, for Births From 1965 to 1969: 1970—Con.

(Numbers of women and births are tallied for each calendar year separately and averaged within specified 5-year periods. Ages of women and spacing intervals are as of January 1 of the specified calendar year. Data based on 1-percent sample, see text. For minimum base for derived figures (percent, median, etc.) and meaning of symbols, see text.)

Table 81. Averaged Annual Probabilities of Fourth-Child Births for Women Who at the Start of the Calendar Year Were Ever Married and Already Had Three Children, by Urban-Rural Residence, Age, Race, and Interval Since Birth of Third Child, for Births From 1965 to 1969: 1970—Con.

[Numbers of women and births are tallied for each calendar year separately and averaged within specified 5-year periods. Ages of women and spacing intervals are as of January 1 of the specified calendar year. Data based on 1-percent sample, see text. For minimum base for derived figures (percent, median, etc.) and meaning of symbols, see text]

Table 83. Averaged Annual Probabilities of First-Child Births for Women Who at the Start of the Calendar Year Were Ever Married and Childless, by Years of School Completed, Age, Race, and Interval Since the First Marriage Began, for Births From 1965 to 1969: 1970—Con.

(Numbers of women and births are tallied for each calendar year separately and averaged within specified 5-year periods. Ages of women and spacing intervals are as of January 1 of the specified calendar year. Data based on 1-percent sample, see text. For minimum base for derived figures (percent, median, etc.) and meaning of symbols, see text)

Table 85. Averaged Annual Probabilities of Third-Child Births for Women Who at the Start of the Calendar Year Were Ever Married and Already Had Two Children, by Years of School Completed, Age, Race, and Interval Since Birth of Second Child, for Births From 1965 to 1969: 1970—Con.

(Numbers of women and births are tallied for each calendar year separately and averaged within specified 5-year periods. Ages of women and spacing intervals are as of January 1 of the specified calendar year. Data based on 1-percent sample, see text. For minimum base for derived figures (percent, median, etc.) and meaning of symbols, see text)

Table 86. Averaged Annual Probabilities of Fourth-Child Births for Women Who at the Start of the Calendar Year Were Ever Married and Already Had Three Children, by Years of School Completed, Age, Race, and Interval Since Birth of Third Child, for Births From 1965 to 1969: 1970

[Numbers of women and births are tallied for each calendar year separately and averaged within specified 5-year periods. Ages of women and spacing intervals are as of January 1 of the specified calendar year. Data based on 1-percent sample, see text. For minimum base for derived figures (percent, median, etc.) and meaning of symbols, see text]

Table 86. Averaged Annual Probabilities of Fourth-Child Births for Women Who at the Start of the Calendar Year Were Ever Married and Already Had Three Children, by Years of School Completed, Age, Race, and Interval Since Birth of Third Child, for Births From 1965 to 1969: 1970—Con.

[Numbers of women and births are tallied for each calendar year separately and averaged within specified 5-year periods. Ages of women and spacing intervals are as of January 1 of the specified calendar year. Data based on 1-percent sample, see text. For minimum base for derived figures (percent, median, etc.) and meaning of symbols, see text]

Table 86. Averaged Annual Probabilities of Fourth-Child Births for Women Who at the Start of the Calendar Year Were Ever Married and Already Had Three Children, by Years of School Completed, Age, Race, and Interval Since Birth of Third Child, for Births From 1965 to 1969: 1970—Con.

[Numbers of women and births are tallied for each calendar year separately and averaged within specified 5-year periods. Ages of women and spacing intervals are as of January 1 of the specified calendar year. Data based on 1-percent sample, see text. For minimum base for derived figures (percent, median, etc.) and meaning of symbols, see text]

¹A "birth event" means the occasion when a woman gives birth to one or more children; e.g., the birth of twins is one birth event. ²Birth dates were allocated to those of a woman's children who were not present in her household at the time of the 1970 Census. See text for method of allocation.
