GENERAL

This report presents detailed statistics for the United States on the characteristics of the population under care or custody in institutions and on the characteristics of the noninstitutional population residing in group quarters. The statistics are based on the 1970 Census of Population. Legal provision for this census, which was conducted as of April 1, 1970, was made in the Act of Congress of August 31, 1954 (amended August 1957), which codified Title 13, United States Code.

A major portion of the information compiled from the 1970 Census of Population appears in Volume I, **Characteristics of the Population**, which focuses on the presentation of data for States, counties, places, and other areas of the United States. The present report is part of Volume II, **Subject Reports**, wherein most reports concentrate on the presentation of national and regional data for a particular subject. A list of Volume II subject reports from the 1970 census is presented on page II. For a description of

Volumes I and II, as well as other elements of the data dissemination program of the 1970 Population and Housing Census, see Appendix E, "Publication and Computer Summary Tape Program."

The content and procedures of the 1970 census were determined after evaluation of the results of the 1960 census, consultation with a wide variety of users of census data, and extensive field pretesting. A number of changes were introduced in 1970 to improve the usefulness of the census results. For the characteristics shown in this report, the changes do not, however, affect to any appreciable extent the comparability of the 1970 data with those for 1960.

More detailed information on the technical and procedural matters covered in the text of this report can be obtained by writing to the Director, Bureau of the Census, Washington, D.C. 20233. Such information will also appear in later reports of the 1970 census.

Organization of the text.—The text consists of this introduction and Appendixes A through E, which appear after the tables. The introduction contains information relating specifically to the principal subject of this report, including definitions of terms and a discussion of editing procedures. Appendix A provides general information concerning the presentation of data in this series of reports and the collection and processing procedures of the 1970 census. Appendix B describes the various area classifications (e.g., urban and rural residence, urbanized areas, etc.) and also explains the residence rules used in counting the population. Appendix C provides brief definitions and explanations of subjects covered in cross-classifications in this report and

other reports in this series. Appendix D presents information on sources of error in the data, sampling variability, ratio estimation, and editing procedures. Appendix E summarizes the data dissemination program.

Content of the tables.—The tables present data on the characteristics of inmates of institutions and the noninstitutional population residing in group quarters in 1970. Data on age, sex, and race of persons under care or custody in several types of institutions are shown for the United States, States, and standard metropolitan statistical areas (SMSA's) of 500,000 or more, and on sex and race of inmates by type of institution for counties and places with 1,000 or more inmates. For the United States, data are also shown on the number and size of institutions of each type and for other characteristics of inmates such as year moved into institution, marital status, marital history, race and Spanish origin, nativity and parentage, residence in 1965, school enrollment, years of school completed, last major occupation group of those employed in 1960 or later, veteran status of civilian male inmates by period of military service, vocational training, income in 1969, type of income in 1969, work disability, location of institution, and type of control of institution. Data for the noninstitutional population in group quarters are presented by sex, race, and Spanish origin for regions, divisions, and States, and by age, sex, race, and Spanish origin for the United States by urban and rural nonfarm. Data are also presented for the United States for the noninstitutional population in group quarters by type of quarters and by selected social and economic characteristics.

Data for inmates of institutions are presented for the United States in

tables 1 through 31; for States in tables 32 through 40; for SMSA's of 500,000 or more in tables 41 through 50; and for selected counties and places in table 51. Data for the noninstitutional population in group quarters are presented in tables 52 through 54. Tables A-1 and A-2 present allocation rates for selected characteristics of inmates of institutions and noninmates in group quarters, respectively.

Sample size.—The statistics in this report are based on samples adjusted to represent the total population. The following tables are based on the 20-percent sample only: 11 through 13, 20, 21, 33, 35 through 47, and 51. The following tables are based on the 15-percent sample only: 14, 17 through 19, 22, and 23. Table 16 is based on the 5-percent sample only. The following tables are based on more than one sample: 1 through 10, 15, 24 through 32, 34, 48 through 50, and 52 through 54. For the sample rates of characteristics in these tables, see table C in Appendix D. For subjects shown in table C with more than one sample rate, the larger sample rate was used in the detailed tables of this report. In tables based on more than one sample, a figure for a given universe in a particular section of the table may differ from the figure for the comparable universe in another section of the same table because of sampling variability. An explanation of the ratio estimation procedure and information on the sampling variability associated with the data are contained in Appendix D.

RELATED MATERIALS

1970 census reports.—Complete-count statistics on the total population in group quarters (institutional and noninstitutional) are presented for the

United States, regions, divisions, and States in chapter B of Volume I, **Characteristics of the Population**, Part 1, "United States Summary." Similar complete-count data are shown in chapter B for each State, the District of Columbia, and Puerto Rico. Data for persons in group quarters by selected types of quarters based on the 20-percent sample appear in chapter C of Volume I. Area detail presented in chapter C is similar to that presented in chapter B. Chapter D of Volume I presents 20-percent sample statistics on inmates and on the noninstitutional population in group quarters by age, sex, race, and selected types of institutions and quarters for the United States and States by urban and rural parts and SMSA's of 250,000 or more. Several other reports in the Volume II series present additional information on inmates of institutions and the noninstitutional population in group quarters, in particular, PC(2)-4B, **Persons by Family Characteristics**.

Reports from earlier censuses.—In the 1960 census reports, data on inmates of institutions from a 25-percent sample, cross-classified by type of institution and most of the other characteristics shown in this report, were published in 1960 Census of Population, Volume II, PC(2)-8A, **Inmates of Institutions**. Data from a 5-percent sample on the noninstitutional population in group quarters were published in 1960 Census of Population, Volume II, PC(2)-4B, **Persons by Family Characteristics**.

In the 1950 census reports, data on inmates of institutions are shown in 1950 Census of Population, Volume IV, Part 2C, **Institutional Population**. Data on the noninstitutional population in group quarters are shown in Volume IV, Part 2D, **Marital Status**.

Unpublished data.—For most of the Volume II reports, statistics in addition to those published in the report are available on a reimbursable basis from computer tape files. Data shown for the United States as a whole are available for regions, divisions, and States, and, in a number of instances, the data for some characteristics were tabulated in greater detail than shown in the reports. Requests for unpublished data, giving a specific description of the figures desired, should be made in writing to the Director, Bureau of the Census, Washington, D.C. 20233. Inquiries concerning unpublished data should be transmitted to the Bureau as soon as possible since tape files are not maintained indefinitely.

DEFINITIONS AND EXPLANATIONS OF PRINCIPAL SUBJECTS

The definitions and explanations below relate only to the principal subjects of this report. Brief definitions of other items that appear in cross-classifications in the tables of this report are presented in Appendix C.

Inmates of Institutions

Persons under care or custody in institutions at the time of enumeration are classified as "inmate of institution" regardless of their length of stay in that place and regardless of the number of people in that place.

Institutions

Institutions are a subcategory of group quarters. All persons not living in households are classified by the Bureau of the Census as living in group quarters. The nature of the service provided by an institution was the

determinant for classifying inmates by type of institution. For institutions which specialize in only one specific type of service, all inmates were given the same classification. For those institutions which have multiple types of major service, usually general hospitals and Veterans' Administration hospitals, inmates were classified according to selected types of wards. For example, patients in psychiatric wards were classified as inmates of mental hospitals and those in chronic disease wards as inmates of chronic disease hospitals.

Each inmate has been classified in only one type of institution. For data on number of institutions of each type, however, a multifunction institution is counted in each of the types for which it is qualified.

Data for the following types of institutions are shown in this report.

Correctional institutions.—This major category includes prisons and reformatories and also local jails and workhouses.

Prisons and reformatories are places in which persons convicted of relatively serious crimes serve their sentences. The prisons and reformatories are shown by two types of control: Federal institutions operated by the Bureau of Prisons of the Department of Justice, and State institutions.

A problem in classification has to do with inmates classified as criminally insane and delinquent. They might be housed in either prisons or mental hospitals. They have been classified on the basis of where they were at the time of enumeration—those in institutions (or wards) operated by departments of correction or similar agencies have been classified as prisoners, and those in institutions operated

by departments of mental health or similar agencies have been classified as mental patients.

Local jails and workhouses, in general, are operated by counties and cities and are places in which persons are awaiting trial or serving time on relatively short-term sentences.

Mental hospitals.—Patients in mental hospitals comprise not only those receiving care in mental hospitals as such but also patients in psychiatric wards or services of general hospitals and of veterans hospitals, and in alcoholic treatment and drug addiction centers. Mental hospitals are classified by type of control into Federal hospitals, comprising the psychiatric facilities in hospitals operated by the Veterans' Administration and also the United States Public Health Service Hospital at Lexington, Kentucky; State, county, and city hospitals; and private hospitals, comprising proprietary and nonprofit establishments providing care for psychiatric patients.

Institutions combining psychiatric care with care for the mentally handicapped were defined as mental hospitals. However, the neurological services of the Veterans' Administration hospitals were defined as belonging in the category of chronic disease hospitals (except tuberculosis and mental), and psychiatric facilities for prisoners under the control of State departments of corrections were classified as prisons.

Residential treatment centers.—This classification is intended to include those institutions which primarily serve children who, by clinical diagnosis, are moderately or seriously disturbed emotionally and which provide treatment services usually supervised or directed by a psychiatrist.

Tuberculosis hospitals.—Patients in tuberculosis hospitals comprise not only those receiving care in hospitals primarily devoted to treatment of this disease but also those patients in tuberculosis wards or services of general hospitals and veterans hospitals. Tuberculosis hospitals are classified by type of control into Federal hospitals; State, county, and city hospitals; and private hospitals.

Chronic disease hospitals (except tuberculosis and mental).—This category covers both (1) hospitals for chronic disease and (2) chronic disease wards or services of general hospitals and veterans hospitals. The neurological services of Veterans' Administration hospitals are also included in this category.

Homes for the aged and dependent.—This category comprises a somewhat heterogeneous group of places in which the great majority of the inmates are older persons. However, persons who are economically dependent or who require nursing care because of chronic physical conditions may be found in these homes regardless of their age. Because of the heterogeneity of the classification, an attempt has been made to subclassify these places according to the presence of nursing care. Two subcategories of the broader group were established—homes known to have nursing care and homes not known to have nursing care. Skilled nursing care is defined as nursing services and procedures which require training, judgment, technical knowledge, and skills beyond those which the untrained person possesses. It involves administering medications and carrying out procedures in accordance with the orders, instructions, and prescriptions of the attending physician or surgeon.

Skilled nursing care is not usually involved in providing purely personal services, such as help in walking and getting in and out of bed; help with bathing, dressing, and normal feeding; supervision over medications which can be self-administered; and other items of personal assistance of this order. Homes not known to have nursing care are a residual category consisting of those homes enumerated in the census but not included in the inventory of nursing homes known to have professional nursing staffs. For the most part these homes offer only domiciliary or personal care.

Homes for the aged and dependent have also been distinguished by type of control. For the most part, the Federal and State homes comprise the Federal domiciliary facilities operated by the Veterans' Administration. County and city homes continue the functions of the traditional county home or county poor farm. In some States they are in a period of transition from the traditional county home to the county hospital. The category "private nonprofit homes" comprises homes for the aged operated by religious, fraternal, and nationality groups, and other types of nonprofit organizations. Private proprietary homes represent all homes operated by private persons on a profit-making basis.

Homes and schools for the mentally handicapped.—This category comprises those institutions which provide care primarily for the mentally handicapped but in many instances also for epileptics. Hospitals known to provide treatment both for psychiatric patients and for the mentally handicapped are excluded from the present classification and considered to be mental hospitals. Homes and schools which

combine treatment of the physically handicapped with treatment of the mentally handicapped are considered to fall in the latter category.

Homes and schools for the mentally handicapped are divided by type of control into public homes and schools, the vast majority of which are operated by State agencies; and private homes and schools.

Homes and schools for the physically handicapped.—This major category includes *homes and schools for the blind, homes and schools for the deaf, and other homes and schools for the physically handicapped*. Schools for persons with speech problems are classified with homes and schools for the deaf. The category of other homes and schools includes those providing relatively long-term care to the crippled, such as those suffering from poliomyelitis, cerebral palsy, or muscular dystrophy, and homes and schools that admit the crippled and also the blind or the deaf. The data are classified by type of control as *public* or *private*.

Homes for dependent and neglected children.—This class of homes covers orphanages and other institutions which provide long-term care for children; it also covers institutions generally known as receiving homes or shelters which provide temporary care primarily to dependent and neglected children whose homes have been broken by illness, desertion, death, or other social crises. The data are classified by type of control as public or private homes.

If a home providing care to dependent and neglected children was known to provide care to adults as well as children, all the residents were allocated to the category of "homes for the aged and dependent."

Homes for unwed mothers.—This category includes institutions which provide domiciliary care for unwed mothers and their children. These institutions may provide social services and medical care which include prenatal care, delivery, and postnatal care within the institution or may make arrangements for women to receive such services in the community. Nursing services are usually available in the institution.

Training schools for juvenile delinquents.—These institutions (including forestry camps for juveniles) are classified by the nature of their control into public or private institutions.

Public training schools for juvenile delinquents are readily identifiable institutions. The majority of them are State institutions operated by a State agency (i.e., departments of welfare, corrections, or institutions, or a youth authority). Some are operated by county and city governments. These public training schools are specialized institutions serving delinquent children, generally between the ages of 10 and 17, all of whom are committed to them by the courts.

Private training schools are those operated under private auspices. Some of the children they serve are committed to them by the courts as delinquents; others are referred by parents or social agencies because of delinquent behavior. A distinguishing factor between private and public training schools is that, by their administrative policy, the former can control their selection and intake.

Detention homes.—These are institutions providing temporary care primarily for delinquent children pending disposition of their cases by a court. In

practice, such institutions may be caring for both delinquent and neglected children pending court disposition.

Noninstitutional Population in Group Quarters

This group comprises all persons not living in housing units or under care or custody in institutions. Noninstitutional group quarters are located most frequently in rooming houses, military barracks, college dormitories, fraternity and sorority houses, general hospitals, monasteries, convents, and ships. A house or apartment is classified as a group quarters if there are five or more persons unrelated to the head; or, when no head is designated, if six or more unrelated persons share the unit. Certain types of living quarters, e.g., college dormitories and military barracks, are classified as group quarters regardless of the number of persons in the unit.

Types of Group Quarters

The classification of noninstitutional group quarters used in this report recognizes the following types.

Rooming house.—In addition to residents in rooming houses and in living quarters with 5 or more persons not related to the head, this category includes the small number of persons temporarily residing in hotels, motels, Y's, communes, and residential clubs at the time of enumeration who had no permanent residence elsewhere.

Military barracks.—Military personnel living in barracks or on ships are included in this category. Residents of housing units on military bases are included with the population in households.

College dormitory.—As used here, this category includes college students in

dormitories, in fraternity and sorority houses, and in rooming houses in which most occupants are college students.

Religious group quarters, not elsewhere classified.—This classification comprises principally group quarters for nuns teaching in parochial schools and for priests living in rectories; it also includes other convents and monasteries except those associated with a general hospital or an institution.

Workers' dormitory.—This classification includes persons in bunkhouses in migratory workers' camps, logging camps, and other labor camps.

Low-cost transient quarters.—As used here, this category includes persons in flophouses and missions.

Commercial ship.—This category includes crews of vessels except those occupied by military personnel.

General hospital or nurses' dormitory.—This category refers mainly to group quarters for nurses and other staff members. It excludes most patients. Patients under short-term care for surgical treatment, observation, or convalescence were included only if they had no usual place of residence elsewhere; other short-term patients were enumerated at their usual place of residence. Patients receiving certain specialized types of care on a relatively long-term basis, such as psychiatric treatment and treatment for chronic diseases, were enumerated as inmates of institutions.

Institution (staff).—This classification includes staff personnel residing in group quarters on institutional grounds who provide care or custody for the inmates.

Special Place Enumeration

Facilities such as large boarding houses, hotels, motels, college dormitories, bunkhouses, hospitals, and prisons were referred to as "special places" for census purposes. They were not enumerated by mail because (a) there was no way of knowing in advance how many people would be residing at these places at a given time, making it impossible for the Bureau of the Census to ascertain the number of questionnaires to send or to be received from them, and (b) housing questions were not asked at most special places. Each of these facilities received a form letter (D-22) explaining that an enumerator would visit to obtain the census information and that the occupants would therefore not receive the mail questionnaires mentioned in the news media.

Enumerators visited each special place and conducted the enumeration by interviewing occupants directly, leaving Individual Census Reports (ICR's), or by transcribing information from institution records. Questionnaires used to enumerate special places were the same as those employed at other housing units in the district in which the special place was located. Special place enumerators used "sample selection books" (similar to the address registers utilized in conventional areas) to determine when a long questionnaire should be used.

Housing questions were not asked of units at special places categorized as "group quarters" (see definition above) or "institutional quarters" (see definition above). Housing questions were asked, however, when separate housing units were located at special places (such as a superintendent's house on the grounds of a hospital).

Transients.—On March 31 (referred to as T-night), a special enumeration was conducted at hotels, motels, and other establishments with 50 or more units for transient guests. Packets containing two ICR's and a postage-paid return envelope were left in advance for each room occupied by transients at every establishment scheduled for enumeration on T-night. On March 31, the desk clerk, manager, or other responsible party placed one of these packets in each transient room. Guests were asked to complete the ICR's and mail them to the local census district office in the envelope provided. If the respondent indicated that there was no one at his usual residence to report for him, his ICR was forwarded to the district office of his home community to be checked against the records there. Transients who reported that they had no fixed addresses were allocated to the enumeration district in which the establishment was located. Nontransient guests and resident employees of these establishments were enumerated as occupants of housing units. Other places with fewer than 50 units for transients were enumerated during the regular enumeration, using the rules of residence described for T-night.

Another special enumeration (called M-night), covering missions, flophouses, and similar habitations with accommodations renting for \$2 per night or less, was conducted on the night of April 6. It also included local jails and similar places at which the average length of stay was 30 days or less, and places such as all-night movies, railroad stations, and bus depots, known to have persons staying overnight. Persons were enumerated on a regular long or short household questionnaire, depending on whether the particular place was designated for the sample or not and coded as a

group quarters. ICR's were left with the management with instructions that they be given to persons who arrived after the enumerator departed. The enumerator returned to collect any ICR's completed by late arrivals.

Military and maritime personnel.—Personnel residing on military installations in the United States were enumerated by military personnel or civilian employees of the Armed Forces who were sworn in as special census representatives. Questionnaires were shipped directly to the military installations. At each post, camp, or station, the commanding officer designated a senior commissioned officer to assume duties as census project officer responsible for the administration and supervision of the enumeration. Assistant project officers, barracks census supervisors, and clerks were appointed as requirements dictated, and a Bureau of the Census representative visited each installation before Census Day to coordinate necessary arrangements. (Coast Guard installations with 40 or fewer residents were enumerated as "special places.")

A special form, "Report for Military and Maritime Personnel," was completed by personnel living in barracks and other bachelor-type military housing. Those whose social security numbers ended in "00" through "79" answered only the 100-percent questions, and their answers were later transcribed to regular nonsample census forms by military personnel. Personnel with social security numbers ending in "80" through "99" completed the entire military form, sample questions as well as 100-percent items, and their answers were later transcribed to the appropriate sample questionnaires by census district office personnel.

The Bureau of the Census, with the

cooperation of the Departments of Defense and Transportation, mailed supplies of the military and maritime census forms to commanders of U.S. Navy and Coast Guard vessels in harbor or at sea but assigned to a U.S. home port. Questionnaires for nonmilitary American flag vessels were shipped to the masters of these vessels through shipowners, with the cooperation of the Maritime Administration of the U.S. Department of Commerce. The forms were distributed by ship commanders or masters to the officers and crews of their vessels on Census Day, completed, collected, and returned directly to the Census Operations Division in Jeffersonville, Ind., where they were transcribed to regular census questionnaires and assigned to enumeration districts in their home port.

Comparability With Other Data

Earlier censuses.—In the 1960 census the definition of "inmate of institution" was similar to that used in this report with the exception of the use of "length of stay" as a criterion for defining inmates in 1960. In 1970 persons under care or custody in institutions were classified as "inmates" regardless of their length of stay in that place. In addition, the 1960 census category of institutions, "diagnostic and reception centers," was not used in 1970. The definitions for the 1970 noninstitutional population in group quarters are basically the same as those for 1960 but are more specific.

Other 1970 census reports.—There is minor variation in the wording used to identify certain types of institutions in the Volume I and Volume II reports, but the categories of persons in these types of institutions are the same in both sets of reports.

Table 1. Inmates of Institutions by Sex, Race, and Spanish Origin: 1970

[Data based on sample, see text. For meaning of symbols, see text]

United States Regions Divisions States	Total			White			Negro			Persons of Spanish origin
