GENERAL

This report presents detailed statistics for the United States and regions on school enrollment of the population 3 to 49 years old classified by various demographic, social, and economic characteristics. The statistics are based on the 1970 Census of Population. Legal provision for this census, which was conducted as of April 1, 1970, was made in the Act of Congress of August 31, 1954 (amended August 1957), which codified Title 13, United States Code.

A major portion of the information compiled from the 1970 Census of Population appears in Volume I, **Characteristics of the Population**, which focuses on the presentation of data for States, counties, places, and other areas of the United States. The present report is part of Volume II, **Subject Reports**, wherein most reports concentrate on the presentation of national and regional data for a particular subject. For a description of Volumes I and II, as well as other elements of the data dissemination program of the 1970 Population and

Housing Census, see Appendix E, "Publication and Computer Summary Tape Program."

The content and procedures of the 1970 census were determined after evaluation of the results of the 1960 census, consultation with a wide variety of users of census data, and extensive field pretesting. A number of changes were introduced in 1970 to improve the usefulness of the census results. For the characteristics shown in this report, the changes do not, however, affect to any appreciable extent the comparability of the 1970 data with those for 1960.

More detailed information on the technical and procedural matters covered in the text of this report can be obtained by writing to the Director, Bureau of the Census, Washington, D.C. 20233. Such information will also appear in later reports of the 1970 census.

Organization of the text.—The text consists of this introduction and Appendixes A through E, which appear after the tables. The introduction contains information relating specifically to the principal subject of this report, such as definitions of terms and editing procedures. Appendix A provides general information concerning the presentation of data in this series of reports and the collection and processing procedures of the 1970 census. Appendix B describes the various area classifications (e.g., urban and rural residence, urbanized areas, etc.) and also explains the residence rules used in counting the population. Appendix C provides brief definitions and explanations of subjects covered in cross-classifications in this report and other reports in this series. Appendix D presents information on sources of error in the data,

sampling variability, ratio estimation, and editing procedures. Appendix E summarizes the data dissemination program.

Content of the tables.—The tables in this report provide information on three major topics of school enrollment: relative progress in school (tables 1 through 9 and table 12), characteristics of college students (tables 10, 11, and 13), and characteristics of persons 16 to 24 years old not enrolled in school (tables 14 through 17). Tables A-1 through A-8 present information on the number and percent of allocations for nonresponse on year of enrollment and enrollment status (see Appendix D for information on allocation procedures). National figures are shown in all of the tables, and statistics for regions and for urban and rural areas are included in many of the tables.

Sample size.—The statistics in this report are based on a sample inflated to represent the total population. All tables are based on the 15-percent sample except table 13 which is based on the 5-percent sample (see "Data Collection Procedures" in Appendix A for a description of the samples). An explanation of the ratio estimation procedure and information on the sampling variability associated with the data are contained in Appendix D.

RELATED MATERIALS

1970 census reports.—Statistics on school enrollment of persons 3 years old and over are presented for the United States, regions, divisions, States, standard metropolitan statistical areas, urbanized areas, places of 2,500 or more, and counties in chapter C of the 1970 Census of Population,

Volume I, **Characteristics of the Population**. Chapter D of Volume I presents statistics on level of school enrollment for persons 3 to 34 years old by age, sex, race, Spanish heritage, poverty status, and employment status for urban and rural areas and standard metropolitan statistical areas of 250,000 or more. Part 1 of Volume I includes chapters C and D for the United States as a whole; the remaining parts of Volume I are for each State, the District of Columbia, Puerto Rico, and selected outlying areas. Chapters C and D were originally published as paperbound Series PC(1)-C reports, **General Social and Economic Characteristics**, and Series PC(1)-D reports, **Detailed Characteristics**. Statistics on school enrollment of the population 3 to 34 years old are also shown for census tracts of 241 standard metropolitan statistical areas and selected adjacent areas in the 1970 Census of Population and Housing, **Census Tracts**, Series PHC(1).

Reports from earlier censuses.—In 1960, data on school enrollment of persons 5 to 34 years old from a 5-percent sample, cross-classified by most of the characteristics shown in this report, were published in 1960 Census of Population, Volume II, **Subject Reports**, PC(2)-5A, "School Enrollment." Data on school enrollment, based on a 25-percent sample of the population, for regions, divisions, States, standard metropolitan statistical areas, cities, and counties were published in 1960 Census of Population, Volume I, **Characteristics of the Population**. Statistics on school enrollment of the population 5 to 34 years old are also shown in the reports for census tracts of large cities and adjacent areas. These data are presented, for 180 areas, in the 1960 Censuses of

Population and Housing, **Census Tracts**, Series PHC(1).

In the 1950 reports, data on school enrollment, based on a 20-percent sample of the population, for the United States, regions, divisions, States, standard metropolitan areas, urbanized areas, cities, and counties were published in 1950 Census of Population, Volume II, **Characteristics of the Population**, and for census tracts in Volume III, **Census Tract Statistics**. Statistics on school enrollment of persons 5 to 13 years old, based on a 3 1/3-percent sample cross-classified by some of the characteristics shown in this report, were published in a report entitled "Education," which was Part 5B of Volume IV, **Special Reports**, of the 1950 Census of Population.

Current Population Survey.—Data on school enrollment at all levels from nursery school through graduate school are collected for the United States as a whole each October by the Bureau of the Census through its Current Population Survey (CPS). The CPS is a nationwide survey, covering a sample of about 50,000 households. These annual data are published in **Current Population Reports**, Series P-20. Statistics on enrollment of nursery and kindergarten students are tabulated annually from the October school enrollment supplement to the Current Population Survey and are published by the United States Office of Education, National Center for Education Statistics in their report, "Preprimary Enrollment of Children Under 6." Statistics on school enrollment by labor force status are published in **Special Labor Force Reports** issued by the Bureau of Labor Statistics, U.S. Department of Labor. Projections of school enrollment for

future years are prepared at intervals by the Bureau of the Census staff and are published in the Series P-25 reports.

Unpublished data.—For most of the Volume II reports, statistics in addition to those published in the report are available on a reimbursable basis from computer tape files. Data shown for the United States as a whole are available for regions, divisions, and States, and, in a number of instances, the data for some characteristics were tabulated in greater detail than shown in the reports. Requests for unpublished data, giving a specific description of the figures desired, may be made by writing to the Director, Bureau of the Census, Washington, D.C. 20233. Inquiries concerning unpublished data should be transmitted to the Bureau as soon as possible because tape files are not maintained indefinitely.

DEFINITIONS AND EXPLANATIONS OF PRINCIPAL SUBJECT

The definitions and explanations below relate only to the principal subject of this report. Brief definitions of other items that appear in cross-classifications in the tables of this report are presented in Appendix C.

School Enrollment

The data on school enrollment were derived from answers to question 20 or question 22. The data on year of school in which enrolled were obtained from responses, for those who were enrolled, to the question on highest grade attended, question 21. Question 20 was asked of persons in the 15-percent sample, and questions 21 and 22, of persons in the 20-per-

cent sample (see facsimiles of questionnaire items below).

Schooling included.—Persons were included as enrolled in school if they reported attending a "regular" school or college at any time between February 1, 1970, and the time of enumeration. According to the census definition, "regular" schooling refers to formal education obtained in public and private (denominational or non-denominational) nursery schools, kindergartens, elementary and secondary schools, colleges, universities, or professional schools, whether day or night school, and whether attendance was full time or part time. That is, "regular" schooling is that which may advance a person toward an elementary school certificate or high school diploma, or a college, university, or professional degree. Schooling that was not obtained in a regular school and schooling from a tutor or through

correspondence courses were counted only if the credits obtained were regarded as transferable to a school in the regular school system. Persons were included as enrolled in nursery school only if the school included instruction as an important and integral phase of its program. Children enrolled in "Head Start" programs, or similar programs sponsored by local agencies to provide preschool education to young children, are included as enrolled in school. Persons who had been enrolled in a regular school since February 1, 1970, but who had not actually attended, for example, because of illness, were counted as enrolled in school.

Schooling excluded.—Persons were excluded from the enrollment figures if the only schools they had been attending at any time since February 1, 1970, were *not* "regular" (unless courses taken at such schools could

have been counted for credit at a regular school). Schooling which is generally regarded as *not* "regular" includes that given in nursery schools which simply provide custodial day care; in specialized vocational, trade, or business schools; in on-the-job training; and through correspondence courses.

Level and year of school in which enrolled.—Persons who were enrolled in school were classified according to the level and year of school in which they were enrolled. The levels which are separately identified in this report are nursery school, kindergarten, elementary school, high school, and college. Children in "Head Start" or similar programs are counted under "nursery" or "kindergarten," as appropriate. Elementary school, as defined here, includes grades 1 to 8, and high school includes grades 9 to 12. If a person was attending a junior high school, the equivalent in terms of 8 years of elementary school and 4 years of high school was obtained. The term "college" includes junior or community colleges, regular 4-year colleges, and graduate or professional schools.

Control of school.—Persons who were enrolled in school were also classified as attending a public or private school. In general, a "public" school is defined as any school which is controlled and supported primarily by a local, State, or Federal government agency. "Private" schools are defined here as schools which are controlled and supported by individuals and private organizations, including those supported by a religious organization, and, therefore, include students classified as enrolled in either a parochial or other private school.

<p>20. Since February 1, 1970, has this person attended regular school or college at any time? <i>Count nursery school, kindergarten, and schooling which leads to an elementary school certificate, high school diploma, or college degree.</i></p> <p> <input type="radio"/> No <input checked="" type="checkbox"/> <input checked="" type="checkbox"/> <input type="radio"/> Yes, public <input type="radio"/> Yes, parochial <input type="radio"/> Yes, other private </p>
<p>21. What is the highest grade (or year) of regular school he has ever attended?</p> <p><i>Fill one circle. If now attending, mark grade he is in.</i></p> <p> <input type="radio"/> Never attended school— Skip to 23 <input type="radio"/> Nursery school <input checked="" type="checkbox"/> <input type="radio"/> Kindergarten </p> <p>Elementary through high school (grade or year)</p> <p>1 2 3 4 5 6 7 8 9 10 11 12</p> <p><input type="radio"/> <input type="radio"/> <input type="radio"/> <input type="radio"/> <input type="radio"/> <input type="radio"/> <input type="radio"/> <input type="radio"/> <input type="radio"/> <input type="radio"/> <input type="radio"/> <input type="radio"/> <input type="radio"/> <input type="radio"/> <input type="radio"/> <input type="radio"/></p> <p>College (academic year)</p> <p>1 2 3 4 5 6 or more</p> <p><input type="radio"/> <input type="radio"/> <input type="radio"/> <input type="radio"/> <input type="radio"/> <input type="radio"/></p>
<p>22. Did he finish the highest grade (or year) he attended?</p> <p> <input type="radio"/> Now attending this grade (or year) <input type="radio"/> Finished this grade (or year) <input type="radio"/> Did not finish this grade (or year) </p>

Enumeration of college students.—In the 1970 census, as in 1960 and 1950, college students were enumerated where they lived while attending college. In most earlier censuses they were enumerated at their parental home.

Age on October 1, 1969.—In most tables of this report, the person's age is that as of the census date, April 1, 1970. However, in the tabulations of relative progress in school, the person's age is shown as of October 1, 1969. Since most school systems accept students for enrollment on the basis of their age in the fall, many students will have had another birthday by April 1, making them older than some others in the same grade. Consequently, for nearly all ages, two consecutive grades are equally represented. By adjusting the age of persons to two quarters earlier to represent their age as of October 1, 1969, which is nearer to the month of entering school, the concentration of age groups into single school years becomes pronounced and

thus is a more precise measure of relative progress in school. Differences in age-grade patterns with age determined at the two dates are illustrated in table 5 of this report.

Relative progress in school.—In tables 1 through 9 and table 12, enrolled persons are classified according to their relative progress in school, that is, according to whether the grade or year in which they were enrolled was below, at, or above the modal, or typical, grade for persons of their age at the beginning of the school term. Tabulations of the categories "2+ years below the mode for age," "1 year below mode for age," "at mode for age," and "above mode for age" were made for single ages and then combined for publication into the age groupings shown in the tables. Table I below shows the basis for classifying combinations of age on October 1, 1969, and year in which enrolled into the categories of modal grade of enrollment. For all tables in this report, these categories of modal grade

of enrollment depict relative progress in school.

The procedures for defining the relative progress in school in this report differ from those used in tables 4 through 7 in the 1960 subject report, PC(2)-5A, on "School Enrollment." In that report, age was not adjusted to October 1, and two grades were considered "normal" for each year of age. Although the definition of relative progress in school in this report is not strictly comparable with that in 1960, the difference should not affect studies which compare relative progress in school with other characteristics such as education and income of parents.

Uses of the Data

The data in this report may be used to study social and economic factors associated with enrollment status of persons of school and college age, and factors associated with relative progress in school as measured by age and school grade. One can analyze, for example, the importance of region of birth, education, income and occupation of parents, and family size on enrollment status and relative progress in school of persons classified by age, sex, race, and type of residence. Tables 3, and 6 through 12, present data on the enrollment of persons of Spanish language; thus, the school progress of this population group can be examined. Tables 14 through 17 permit analysis of the ethnic origin, type of residence, occupation, and family status of school dropouts.

Comparability With Other Data

Earlier censuses.—The corresponding question on schooling in the 1930 census applied to a somewhat longer

Table I.—Year of Enrollment by Age for Classification of Relative Progress in School

Age	2+ years below mode for age	1 year below mode for age	At mode for age	Above mode for age
6	nursery	kindergarten	1	2 or higher
7	nursery or kind.	1	2	3 or higher
8	1 or lower	2	3	4 or higher
9	2 or lower	3	4	5 or higher
10	3 or lower	4	5	6 or higher
11	4 or lower	5	6	7 or higher
12	5 or lower	6	7	8 or higher
13	6 or lower	7	8	9 or higher
14	7 or lower	8	9	10 or higher
15	8 or lower	9	10	11 or higher
16	9 or lower	10	11	12 or higher
17	10 or lower	11	12	13 or higher

period, the period since the preceding September 1. Furthermore, in that census the question was not restricted as to the type of school the person was attending. In 1940 the question referred to the period since the preceding March 1. In 1950 the reference period was changed to that between February 1 (the usual date for beginning the second semester) and the time of enumeration. The same reference period was used in 1960 and 1970.

In 1950, kindergarten enrollment was separately identified, but the number of children enrolled in kindergarten was not included with the 1950 statistics on enrollment. In 1960, kindergarten enrollment was separately identified and included with the regular enrollment figures. In 1970, both kindergarten and nursery school enrollment were separately identified and included with the regular enrollment figures.

The age range for which enrollment data have been obtained has varied for the several censuses. Information on enrollment was recorded for persons of all ages in 1930 and 1940, for persons 5 to 29 years old in 1950, for those 5 to 34 years old in 1960, and for those 3 years old and over in 1970. Most of the published enrollment figures relate, however, to ages 5 to 20 in 1930, 5 to 24 in 1940, 5 to 29 in 1950, 5 to 34 in 1960, and 3 to 49 in 1970. The extended age coverage for the published enrollment data in the recent censuses reflects the increasing number of persons in their thirties and forties who are attending regular colleges and universities.

Current Population Survey.—As noted above, statistics on school enrollment are also collected in the Current Population Survey. The estimating proce-

dure used in this survey involves the inflation of the weighted sample results to independent estimates of the civilian noninstitutional population of the United States by age, race, and sex. The information on school enrollment is collected in October. Table II presents a comparison of the estimates of school enrollment from the October 1969 CPS with the census results as of April 1, 1970.

Other sources.—Data on school enrollment are also collected and published by other Federal, State, and local governmental agencies. This information is generally obtained from reports of school systems and institutions of higher learning and from other surveys and censuses. These data are only roughly comparable with data collected by the Bureau of the Census, however, because of differences in definitions, subject matter covered, time references, and enumeration methods.

Quality of the Data

Information on the quality of data on school enrollment and year in which enrolled for 1970 is available from rates of allocation for nonresponse

shown in tables A-1 through A-8 of this report.

The method of computing the allocation rates shown in these tables differs somewhat from that used for similar rates in tables C-1 to C-4 in the Volume I reports. In tables C-1 to C-4, all characteristics of persons in substituted households are counted as allocations for the nonresponse household. In tables A-1 and A-2 of this report, characteristics of such persons are not counted as allocations except when the person in the substituted household had a nonresponse on the given characteristic. The effect of this difference in computation is minor because, in both sets of tables, the substitutions involved are only those that occurred when a housing unit was reported as occupied but no persons were enumerated.

About 5 percent of the population 3 to 34 years old did not report their enrollment status in the 1970 census. This figure was lower than the 8 percent not reporting their enrollment status in the 1960 census. The decline may reflect a change in the method of counting allocations and a reordering of questions on the schedule. In 1970,

Table II.—Number of Persons 3 to 34 Years Old Enrolled in School

(Numbers in thousands)

	April 1970 census	October 1969 CPS ¹	Difference (census minus CPS)
Total enrolled	58,632	59,913	-1,281
Nursery or kind	3,975	4,136	-161
Elementary	33,210	33,788	-578
High school	14,481	14,553	-73
College	6,966	7,435	-469

¹ Civilian noninstitutional population.

the question on current enrollment was asked before the question on year of enrollment to provide a more direct approach. Nonreporting of enrollment status was highest at the ages in which enrollment rates are normally low: at the preschool ages of 3 to 6 years old, and over age 19. The highest non-response rate, 9 percent, was for persons 20 and 21 years old. Nonresponse

was higher among Negroes than whites, but there was little variation in nonresponse rates by type of residence, region of residence, or family income.

About 3 percent of persons enrolled in school had allocated responses for year in which enrolled. This was about the same as in the

1960 census.

Although school enrollment status was determined for persons of all ages, the information collected for those under 3 years of age and 50 years old and over are not shown in this report. In tables 1 through 4, the number of 3- and 4-year-olds enrolled in school includes those enrolled in the first grade not shown separately.

Table 1. Enrollment Status and Year in Which Enrolled of Persons 3 to 49 Years Old by Ethnic Characteristics, Type of Residence, Age, and Sex: 1970
