GENERAL

This report presents national statistics on the social, economic, and housing characteristics of the population by low-income (poverty) status in 1969. The data are based on the 1970 Census of Population. Legal provision for this census, which was conducted as of April 1, 1970, was made in the Act of Congress of August 31, 1954 (amended August 1957), which codified Title 13, United States Code.

A major portion of the information compiled from the 1970 Census of Population appears in Volume I, **Characteristics of the Population,** which focuses on the presentation of data for States, counties, places, and other areas of the United States. The present report is part of Volume II, **Subject Reports,** wherein most reports concentrate on the presentation of national and regional data for a particular subject. For a description of Volumes I and II, as well as other elements of the data dissemination program of the 1970 Population and Housing Census, see Appendix E, "Publication and Computer Summary Tape Program."

The content and procedures of the 1970 census were determined after evaluation of the results of the 1960 census, consultation with a wide variety of users of census data, and extensive field pretesting. A number of changes were introduced in 1970 to improve the usefulness of the census results.

More detailed information on the technical and procedural matters covered in the text of this report can be obtained by writing to the Director, Bureau of the Census, Washington, D.C. 20233. Such information will also appear in later reports of the 1970 census.

Organization of the text.—The text consists of this introduction and Appendixes A through E, which appear after the tables. The introduction contains information relating specifically to the principal subject of this report, such as definitions of terms and editing procedures. Appendix A provides general information concerning the presentation of data in this series of reports and the collection and processing procedures of the 1970 census. Appendix B describes the various area classifications (e.g., urban and rural residence, urbanized areas, etc.) and also explains the residence rules used in counting the population. Appendix C provides brief definitions and explanations of subjects covered in cross-classifications in this report and other reports in this series. Appendix D presents information on sources of error in the data, sampling variability, ratio estimation, and editing procedures. Appendix E summarizes the data dissemination program.

Content of the tables.—The tables in this report consist of data on the poverty status of the population cross-classified by such characteristics as geographic distribution, race, ethnic origin, migration, fertility, size of family and number of children, education, employment status, occupation, source of income, amount of income, income deficit, and selected housing characteristics. Although the majority of tables pertain to families and unrelated individuals, selected tables also present data for persons. In addition to data for the poverty population, most tables contain comparable data for the total population, for analytical purposes. Table A-1 presents the complete matrix of income thresholds at the poverty level in 1969 used for this report. Table A-2 presents selected characteristics of families and unrelated individuals with income allocated.

Sample size.—The statistics in this report are based on a sample adjusted to represent the total population. The majority of the tables are based on the 5-percent sample. Data presented in tables 5, 7, 14, 26, and the "Country of Origin of Family Heads of Foreign Stock" data block in table 34 are based on the 15-percent sample, because the subject matter was not collected in the 5-percent sample. (See "Data Collection Procedures" in Appendix A.) Figures presented in the tables based on the 15-percent sample may differ from the corresponding figures in tables based on the 5-percent sample because of sampling variability. An explanation of the ratio estimation procedure and information on the sampling variability associated with the data are contained in Appendix D.

RELATED MATERIALS

1970 census reports.—Poverty statistics based on the 20-percent sample for the United States, regions, divisions, States, standard metropolitan statistical areas, places of 2,500 or more, and counties were published in chapter C of the 1970 Census of Population, Volume I, **Characteristics of the Population.** More detailed poverty data cross-classified by such variables as education, employment status, occupation, and income were published in chapter D of Volume I for the United States, regions, States, standard metropolitan statistical areas of 250,000 or more, and central cities of these standard metropolitan statistical areas. The statistics shown in each of the State parts of Volume I are summarized for the United States in Volume I, Part 1, "United States Summary." Chapters C and D were originally published as separate paperbound reports in Series PC(1)-C, **General Social and Economic Characteristics,** and PC(1)-D, **Detailed Characteristics.**

Poverty statistics are also shown for census tracts of 241 standard metropolitan statistical areas and selected adjacent areas in Series PHC(1), **Census Tracts.** A description of poverty data contained in Volume I and census tract reports can be found in **Data Access Description,** No. 29, "Low-Income Data from the 1970 Census."

In addition to this report, several other Volume II reports are planned which contain limited amounts of specialized poverty data. In Volume II report, PC(2)-9B, **Low-Income Areas in Large Cities,** data are presented for the 50 largest cities, by selected characteristics of the population, for the total city and for aggregates of census tracts with a 1970 census low-income rate (for persons) of 20 percent or more.

Current Population Survey.—Poverty statistics have not been published from previous decennial censuses. However, they have been published annually since 1959 from data collected by the Bureau of the Census each March in the Current Population Survey (CPS). The CPS is a nationwide survey covering a sample of about 50,000 occupied housing units and the households residing in them. These data are published in **Current Population Reports,** Series P-60. The intercensal statistics provided by the Current Population Survey are, in general, designed to be comparable with the decennial census statistics. There are, however, certain differences, as explained in the section on "Comparability With the Current Population Survey."

Unpublished data.—For most of the Volume II reports, statistics in addition to those published in the report are available on a reimbursable basis from computer tape files. Data shown for the United States as a whole are available for regions, divisions, and States, and, in a number of instances, the data for some characteristics were tabulated in greater detail than shown in the reports. Requests for unpublished data, giving a specific description of the figures desired, should be made in writing to the Director, Bureau of the Census, Washington, D.C. 20233. Inquiries concerning unpublished data should be transmitted to the Bureau as soon as possible since tape files are not maintained indefinitely.

DEFINITIONS AND EXPLANATIONS OF PRINCIPAL SUBJECTS

The definitions and explanations below relate only to the principal subjects of this report. Brief definitions of other items that appear in cross-classifications in the tables of this report are presented in Appendix C.

Income in 1969

The data on income were derived from answers to questions 40 and 41 (see facsimiles of questionnaire items on page VIII). Data on income collected in the census are limited to money income only, and all references to income exclude nonmoney payments.

Information on money income received in the calendar year 1969 was requested from all persons 14 years old and over in the 20-percent sample. "Total income" is the algebraic sum of the amounts reported in item 40a (wage or salary income), item 40b (nonfarm net self-employment income), item 40c (farm net self-employment income), item 41a (Social Security or railroad retirement income), item 41b (public assistance or welfare income), and item 41c (all other income). "Earnings" is the algebraic sum of the amounts reported as wage or salary income and nonfarm and farm net self-employment income. The figures represent the amount of income received before deductions for personal income taxes, Social Security, bond purchases, union dues, medicare deductions, etc.

Receipts from the following sources were not included as income: money received from the sale of property (unless the recipient was engaged in the business of selling such property, in which case, the net proceeds would be counted as income from self-

employment); the value of income "in kind" such as food produced and consumed in the home or free living quarters; withdrawal of bank deposits; money borrowed; tax refunds; exchange of money between relatives living in the same household; gifts and lump-sum inheritances, insurance payments, and other types of lump-sum receipts.

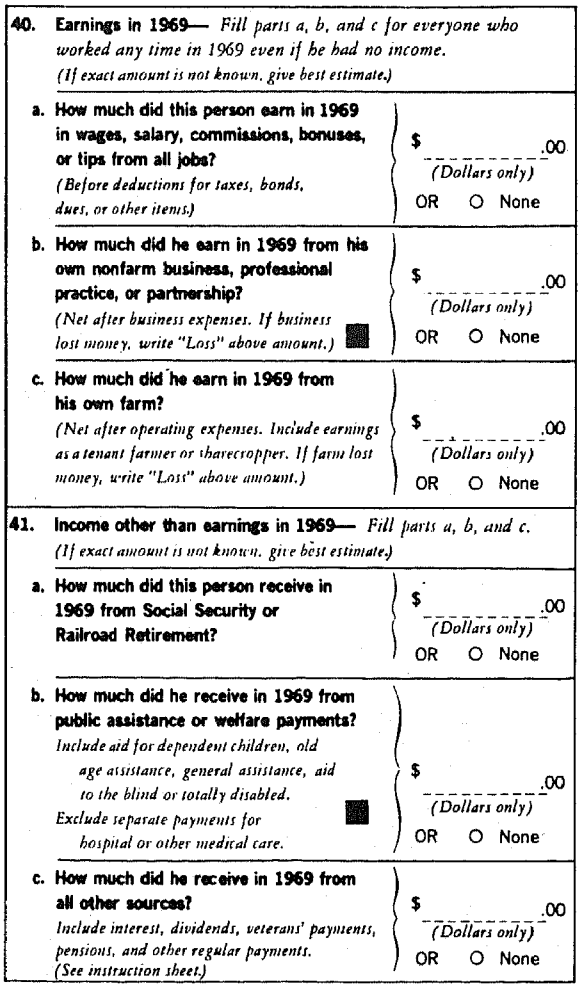
Type of income.—The six types of income reported in the census are defined as follows:

Wage or salary income.—Total money earnings received for work performed as an employee at any time during the calendar year 1969. It includes wages, salary, pay from Armed Forces, commissions, tips, piece-rate payments, and cash bonuses earned.

Nonfarm net self-employment income.—Net money income (gross receipts minus business expenses) received from a business, professional enterprise, or partnership in which the person was engaged on his own account. Gross receipts include the value of all goods sold and services rendered. Business expenses include cost of goods purchased, rent, heat, light, power, depreciation charges, wages and salaries paid, business taxes (not personal income taxes), etc.

Farm net self-employment income.—Net money income (gross receipts minus operating expenses) received from the operation of a farm by a person on his own account, as an owner, renter, or sharecropper. Gross receipts include the value of all products sold, governmental subsidies, money received from the rental of farm equipment to others, and incidental receipts from the sale of wood, sand, gravel, etc. Operating expenses include the cost of fuel, fertilizer, seed, and other farming supplies, cash wages paid to farmhands, depreciation charges, cash rent, interest on farm mortgages, farm building repairs, farm taxes (not Federal, State, and local income taxes), etc. The value of fuel, food, and other farm products used for family living is not included as part of net income.

Social Security or railroad retirement income.—Cash receipts of Social Security pensions, survivors' benefits, permanent disability insurance payments, and special benefit payments made by the Social Security Administration (under the national old-age, survivors, disability, and health insurance programs) before deductions of health insurance premiums. Medicare reimbursements are not included. Cash receipts of retirement, disability, and survivors' benefit payments made by the U.S. Government under the Railroad Retirement Act are also included.



40. Earnings in 1969— *Fill parts a, b, and c for everyone who worked any time in 1969 even if he had no income. (If exact amount is not known, give best estimate.)*

a. How much did this person earn in 1969 in wages, salary, commissions, bonuses, or tips from all jobs? *(Before deductions for taxes, bonds, dues, or other items.)*
$ _____ .00 *(Dollars only)*
OR ○ None

b. How much did he earn in 1969 from his own nonfarm business, professional practice, or partnership? *(Net after business expenses. If business lost money, write "Loss" above amount.)*
$ _____ .00 *(Dollars only)*
OR ○ None

c. How much did he earn in 1969 from his own farm? *(Net after operating expenses. Include earnings as a tenant farmer or sharecropper. If farm lost money, write "Loss" above amount.)*
$ _____ .00 *(Dollars only)*
OR ○ None

41. Income other than earnings in 1969— *Fill parts a, b, and c. (If exact amount is not known, give best estimate.)*

a. How much did this person receive in 1969 from Social Security or Railroad Retirement?
$ _____ .00 *(Dollars only)*
OR ○ None

b. How much did he receive in 1969 from public assistance or welfare payments? *Include aid for dependent children, old age assistance, general assistance, aid to the blind or totally disabled. Exclude separate payments for hospital or other medical care.*
$ _____ .00 *(Dollars only)*
OR ○ None

c. How much did he receive in 1969 from all other sources? *Include interest, dividends, veterans' payments, pensions, and other regular payments. (See instruction sheet.)*
$ _____ .00 *(Dollars only)*
OR ○ None

Public assistance income.—Cash receipts of payments made under the following public assistance programs: aid to families with dependent children, old-age assistance, general assistance, aid to the blind, and aid to the permanently and totally disabled. Separate payments received for hospital or other medical care are excluded from this item. Also excluded are nonmoney benefits from such social service programs as food stamp plans, subsidized housing, medicaid, and school lunch programs.

Income from all other sources.—Money income received from sources such as interest; dividends; net income (or loss) from property rentals; net receipts from roomers or boarders; veterans' payments; public or private pensions; periodic receipts from insurance policies or annuities; unemployment insurance benefits; workmen's compensation cash benefits; net royalties; periodic payments from estates and trust funds; alimony or child support from persons who are not members of the household; net gambling gains; nonservice scholarships and fellowships; and money received for transportation and/or subsistence by persons participating in special governmental training programs, e.g., under the Manpower Development and Training Act.

Income of families and unrelated individuals.—This report includes information on income of families and unrelated individuals 14 years old and over. In compiling statistics on family income, the incomes of all members 14 years old and over in each family are summed and treated as a single amount. However, in compiling the income data for unrelated individuals, the total amount of their own income is used. Although the income statistics cover the calendar year 1969, the characteristics of persons and the composition of families refer to the time of enumeration (April 1970). Thus, the income of the family does not include amounts received by persons who were members of the family during all or part of the calendar year 1969 if these persons no longer resided with the family at the time of enumeration. On the other hand, family income amounts reported by related persons who did not reside with the family during 1969 but who were members of the family at the time of enumeration were included. For most families, however, the income reported was received by persons who were members of the family throughout 1969.

Poverty Status in 1969

The data on poverty status were derived from answers to the same questions as the income data (see income definitions, above). The population covered in the statistics presented in this report excludes inmates of institutions, members of the Armed Forces living in barracks, college students living in dormitories, and unrelated individuals under 14 years old.

Definition.—The poverty statistics presented in this report are based on a definition originated by the Social Security Administration in 1964 and subsequently modified by a Federal Interagency Committee.[1] The index provides a range of poverty income cutoffs established according to family size, sex of head, number of children under 18 years old, and farm and nonfarm residence. At the core of this definition of poverty is a nutritionally adequate food plan ("economy" plan) designed by the Department of Agriculture for "emergency or temporary use when funds are low." The index allows for differences in the cost of living between farm and nonfarm families by setting the poverty thresholds for farm families at 85 percent of the corresponding levels for nonfarm families. The poverty income cutoffs are revised annually to allow for changes in the cost of living as reflected in the Consumer Price Index.

In 1969, the poverty thresholds ranged from about $1,490 for a female unrelated individual 65 years old and over living on a farm to approximately $6,120 for a nonfarm family with a male head and with seven or more persons. The average poverty threshold for a nonfarm family of four headed by a male was about $3,750.

Poverty thresholds are computed on a national basis only. No attempt has been made to adjust these thresholds for regional, State, or other local variations in the cost of living (except for the farm-nonfarm differential described above).

Poverty thresholds.—The poverty cutoffs used by the Bureau of the Census to determine the poverty status of families and unrelated individuals consist of a set of 124 thresholds arranged in a 4-dimensional matrix consisting of family size (from one person, i.e., unrelated individual, to seven or more persons) cross-classified by presence and number of family members under 18 years old (from no children present

[1] For a detailed explanation of the poverty definition, see U.S. Bureau of the Census, **Current Population Reports,** Series P-23, No. 28, "Revision in Poverty Statistics, 1959 to 1968."

to six or more children present), sex of head, and farm and nonfarm residence. Unrelated individuals and two-person families are further differentiated by age of head (under 65 years and 65 years and over). The total income of each family in the sample is tested against the appropriate poverty threshold to determine the poverty status of that family. If the family's total income is less than its corresponding poverty cutoff, the family is classified as poor.

The complete matrix of thresholds used can be found in table A-1 of this report. The thresholds shown for families in unique categories of this table (e.g., three-person nonfarm families with male head and one related child under 18 years old) are the actual cutoffs used to determine the poverty status of such families. The thresholds shown for subtotal categories (e.g., all three-person nonfarm families with a male head) and total categories (e.g., all families in the U.S.) are weighted averages and are provided as convenient summary measures of the actual cutoffs shown for the unique categories contained within the subtotal or total categories.

Since the basic thresholds used to determine the poverty status of families and unrelated individuals are applied to all families and unrelated individuals, the weighted poverty thresholds are derived using all families and unrelated individuals rather than just those families and unrelated individuals classified as below the poverty level.

Poverty status of persons.—The poverty status of a person who is a family member is determined by the family income and its relation to the appropriate poverty threshold for that family. The poverty status of a person who is an unrelated individual is determined by his or her own income in relation to the appropriate poverty threshold.

Ratio of family income to poverty level.—This ratio is obtained by dividing the income of a family or unrelated individual by the corresponding poverty threshold.

Income deficit.—The income deficit is the difference between the total income of families and unrelated individuals below the poverty level and their respective poverty thresholds. In computing the income deficit, families reporting a net income loss are assigned zero dollars, and for such cases the income deficit is equal to the poverty threshold. The aggregate income deficit provides an estimate of the amount of money which would be required to raise the incomes of all poor families and unrelated individuals to their respective thresholds at the poverty levels.

Median income deficit.—The median income deficit is the amount which divides the distribution into two equal parts, one having an income deficit above the median and the other having an income deficit below the median.

Mean income deficit.—The mean income deficit is the amount obtained by dividing the aggregate income deficit of a group below the poverty level by the number of families or unrelated individuals (as appropriate) in that group.

Limitations of the Data

Since the reporting of income is frequently based on memory rather than on records, there is a tendency to underreport or fail to report some elements of income. This is especially pronounced for income sources that are not derived from earnings, such as Social Security payments, public assistance, interest and dividends, etc. For example, it has been determined that income earned from wages or salary in the Current Population Survey (CPS) tends to be much better reported than other sources of income and is nearly equal to independently derived benchmark estimates. By contrast, income data collected annually in the CPS on Social Security and public assistance income payments to beneficiaries have in recent years averaged approximately 80 and 75 percent, respectively, of their benchmark estimates. In the census, the underreporting of these specified types of income and the number of recipients of such income compared with administrative information reflects, for the most part, the failure of some respondents to report them accurately, rather than the failure to enumerate persons receiving them. For estimates of income underreporting in the 1970 census by type of income and State, see "Preliminary Evaluation of 1969 Money Income Data Collected in the 1970 Census of Population and Housing," by Mitsuo Ono, in **American Statistical Association, Proceedings of the Social Statistics Section, 1972.** In addition, there are errors of reporting due to misunderstanding of the income questions. One such error is the reporting of gross instead of net dollar amounts for the two questions on net self-employment income, which results in the overestimation of these items. Another common error is the reporting of identical dollar amounts in two of the six income items where a respondent with only one source of income assumed that the second

amount should be entered to represent total income. Telephone callback procedures were instituted in the coding operation to reduce some of these reporting errors and to improve the accuracy of income data. Moreover, many reporting errors were rectified through the coding and the computer editing procedures, with the result that consistency of reported income items with work experience, occupation, and class-of-worker information was improved. For example, if a person reported that he was a self-employed worker on his own farm, not incorporated, but had reported wage and salary earnings only, the latter amount was shifted to net farm self-employment income. Another type of problem involved nonreporting of income data. Where income information was not reported, editing and allocation procedures were devised to impute appropriate values (either "none" or positive or negative dollar amounts) for the missing entries on the basis of amounts reported by other persons whose relevant characteristics were similar.

The income tables for families and unrelated individuals include those that were classified as having no 1969 income as defined in the census. Many of these were living on income "in kind," savings, or gifts; were newly created families; or were families in which the sole breadwinner had recently died or left the household. However, many of the families and unrelated individuals who reported no income probably had some money income which was not recorded in the census.

The income data in this report cover money income only. The fact that many farm families receive an important part of their income in the form of "free" housing and goods produced and consumed on the farm rather than in money should be taken into consideration in comparing the income of farm and nonfarm residents. Nonmoney income is also received by some nonfarm residents. Such income often takes the form of business expense accounts, use of business transportation and facilities, or partial compensation by business for medical and educational expenses. Some families also receive income "in kind" from public welfare programs.

Comparability With the Current Population Survey

Statistics on income and poverty status in 1969 collected in the Current Population Survey of March 1970 differ from data for that year from the decennial census despite the fact that the same basic income and poverty status concepts were used in both instances. One source of difference between the census and CPS figures is the treatment of residence of unmarried college students. In the census, college students were enumerated as residents of the area in which they were living while attending college, whereas in the CPS college students are generally enumerated as part of their parents' household. Another source of difference is the fact that CPS poverty data for years preceding March 1972 utilized 1960 census-based population controls and metropolitan residence definition. Also, the method of enumeration was different in the census and the CPS. Approximately 60 percent of the households were self-enumerated in the 1970 census, whereas in the CPS direct enumeration was used exclusively. The small group of CPS enumerators was more experienced and had more intensive training and supervision than the large number of temporary census enumerators. Income data in the CPS are based on responses to separate questions on eight types of income; in the census six questions were used.

In general, the number of persons and families below the poverty level reported in the census is higher than that reported in the Current Population Survey. The number of poor persons in the 1970 census was 26.9 million compared to 24.1 million derived from the March 1970 Current Population Survey. The comparable figures for low-income families were 5.5 million and 5.0 million, respectively.

Table 1. Type of Residence of Persons by Poverty Status in 1969, Family Status, and Sex, Race, and Spanish Origin of Head: 1970

[Excludes inmates of institutions, members of the Armed Forces living in barracks, college students living in dormitories, and unrelated individuals under 14 years. Data based on 5-percent sample, see text. For minimum base for derived figures (percent, median, etc.) and meaning of symbols, see text]

Table 11. **Families by Size, Number of Related Children Under 18 Years Old, Poverty Status in 1969 and Sex and Race of Head and Unrelated Individuals by Poverty Status in 1969, Sex, and Age: 1970**—Continued

(Excludes inmates of institutions, members of the Armed Forces living in barracks, college students living in dormitories, and unrelated individuals under 14 years. Data based on 5-percent sample, see text. For minimum base for derived figures (percent, median, etc.) and meaning of symbols, see text)

Table 11. **Families by Size, Number of Related Children Under 18 Years Old, Poverty Status in 1969 and Sex and Race of Head and Unrelated Individuals by Poverty Status in 1969, Sex, and Age: 1970**—Continued

[Excludes inmates of institutions, members of the Armed Forces living in barracks, college students living in dormitories, and unrelated individuals under 14 years. Data based on 5-percent sample, see text. For minimum base for derived figures (percent, median, etc.) and meaning of symbols, see text]

Table 11. **Families by Size, Number of Related Children Under 18 Years Old, Poverty Status in 1969 and Sex and Race of Head and Unrelated Individuals by Poverty Status in 1969, Sex, and Age: 1970**—Continued

[Excludes inmates of institutions, members of the Armed Forces living in barracks, college students living in dormitories, and unrelated individuals under 14 years. Data based on 5-percent sample, see text. For minimum base for derived figures (percent, median, etc.) and meaning of symbols, see text]

[1]For families and subfamilies, marital status, race, and sex of family or subfamily head; for family members 65 years old and over and unrelated individuals, their own marital status, race, and sex. [2]"Poor by own income" means that these subfamilies would be poor if they did not share the income of other family members not in their subfamily. [3]Other than head or wife of family or subfamily. [4]These lines are computed by applying the poverty threshold for an unrelated individual 65 years old and over to the income of each of these family members.

Table 12. Marital Status and Sex of Family and Subfamily Heads and Unrelated Individuals by Presence and Age of Own Children, Poverty Status in 1969, Race, and Spanish Origin: 1970—Continued

[Excludes inmates of institutions, members of the Armed Forces living in barracks, college students living in dormitories, and unrelated individuals under 14 years. Data based on 5-percent sample, see text. For minimum base for derived figures (percent, median, etc.) and meaning of symbols, see text]

[1]For families and subfamilies, marital status, race, and sex of family or subfamily head; for family members 65 years old and over and unrelated individuals, their own marital status, race, and sex. [2]"Poor by own income" means that these subfamilies would be poor if they did not share the income of other family members not in their subfamily. [3]Other than head or wife of family or subfamily. [4]These lines are computed by applying the poverty threshold for an unrelated individual 65 years old and over to the income of each of these family members.

Table 12. Marital Status and Sex of Family and Subfamily Heads and Unrelated Individuals by Presence and Age of Own Children, Poverty Status in 1969, Race, and Spanish Origin: 1970—Continued

[Excludes inmates of institutions, members of the Armed Forces living in barracks, college students living in dormitories, and unrelated individuals under 14 years. Data based on 5-percent sample, see text. For minimum base for derived figures (percent, median, etc.) and meaning of symbols, see text]

[1]For families and subfamilies, marital status, race, and sex of family or subfamily head; for family members 65 years old and over and unrelated individuals, their own marital status, race, and sex. [2]"Poor by own income" means that these subfamilies would be poor if they did not share the income of other family members not in their subfamily. [3]Other than head or wife of family or subfamily. [4]These lines are computed by applying the poverty threshold for an unrelated individual 65 years old and over to the income of each of these family members.
