## STF 1H FILE DESCRIPTION

Summary Tape File 1H (STF 1H) is one of a series of summary data files available from the 1980 census. This file contains complete count data and presents statistics on the demographic and housing characteristics of the inhabitants of the 10 States that redistricted for the 99th Congress, congressional districts in these States, and selected geographic areas within the congressional districts. The congressional districts are those in effect for election to the U.S. House of Representatives in November 1984. STF 1H is available on a State-by-State basis.

In the other 40 States, the congressional districts in effect for election to the U.S. House of Representatives in November 1984 (Districts of the 99th Congress) are the same districts that were in effect for the 98th Congress. These same data are summarized for districts of the 98th Congress in STF 1D.

### File Structure and Geographic Coverage

For each geographic area there will be a 3276-character census logical record. The census logical record is divided into two 1638-character record segments to conform with ASCII standards. Each segment is identified in positions 99-100. The first 102 characters on each record segment provide geographic identification (positions 1 through 102 and 1639 through 1740). The next 150 characters (positions 103 through 252) on the first segment provide additional geographic information and the suppression flags. The remaining 1386 characters on the first segment (positions 253 through 1638) and the remaining 1536 characters on the second segment (positions 1741 through 3276) provide the data for the 59 tables on STF 1. For a concise description of the geographic coverage of STF 1H, see Appendix A to the technical documentation for STF 1D.

This file contains summary level data which follow the geographic hierarchy indicated in figure 1 below. Records are shown for the State, a congressional district, then all counties within the congressional district. All county records are followed by records for all places of 10,000+ within the congressional district and then by MCD's of 10,000+ in Maine, New Jersey and New York within the congressional district. When the county is split between two congressional districts, only the portion within the higher level will be shown on the summary. For example, if County 015 is split between Congressional District 1 and Congressional District 2, the summary for the County 015 portion of Congressional District 1 will appear in the hierarchy with the Congressional District 1 summaries, while the summaries for the County 015 portion of Congressional District 2 will appear in the hierarchy with the Congressional District 2 summaries.

Figure 1 below outlines the geographic hierarchy. Following Figure 1 is a discussion of each summary level in the hierarchy.

FIGURE 1. Geographic Hierarchy of STF 1H

State

    Congressional district

        County or county equivalent or portion of county

        Places of 10,000+ or portion of place

        MCD's of 10,000+ or portion of MCD (Maine, New Jersey, New York)

---

The State record (Summary Level 04) contains a summary for the State or State equivalent.

The Congressional District record (Summary Level 33) contains a summary for each congressional district within the State according to the congressional district boundaries established for the 99th Congress.

The County record (Summary Level 37) contains a record for each county or county equivalent, including independent cities, or portion of county, county equivalent, or independent city within each congressional district.

The Place record (Summary Level 38) contains a summary for each place with 10,000 or more inhabitants, or portion of a place, located within the congressional district.

The MCD record (Summary Level 39) contains a summary for each county subdivision (minor civil division) with 10,000 or more inhabitants, or portion of an MCD, located within the congressional district in Maine, New Jersey and New York.
