1980 Census of Population and Housing Summary Tape File 2. Technical Documentation

Note: This technical documentation was issued at same time as the corresponding data file and does not necessarily reflect changes to the data file that may have been made later. We offer it as a service to our customers who have purchased the file, but we do not in general offer technical support for past data files. Note that although the documentation may refer to data on tape, the U.S. Census Bureau no longer releases data on magnetic tape; customers purchasing files previously released on tape will receive the file in ASCII on CD-ROM. For information about this and other technical documentation, please contact the Customer Services Center at 301-763-INFO (4636).

Additionally, Census Bureau organization, telephone numbers, and staff cited in this technical documentation are not current. For updated information, see our Telephone Contacts site at http://www.census.gov/contacts/www/contacts.html or Staff Search at http://www.census.gov/cgi-bin/main/email.cgi.

ACKNOWLEDGMENTS

This documentation was prepared within the Data Access and Use Staff, under the direction of James P. Curry, Chief, and Barbara J. Aldrich, Chief of its Technical Information Section. Annette Ralston was the coordinator for this file assisted by Joann Sutton. It was partially adapted from materials prepared by Ray Dennis and David Silver of Decennial Census Division, and Cathy Talbert and other staff members of Data User Services Division. Support was provided through content review by staff members from Decennial Census Division, Geography Division, Housing Division, Population Division, and Statistical Methods Division.

Census of Population and Housing, 1980:

Summary Tape File 2

User Note No. 1

Subject: Tracts Split by Standard Metropolitan Statistical Areas (SMSA's)

There are currently two instances in New England in which a tract is split by an SMSA because some of its minor civil divisions (MCD's) are inside an SMSA and some are not. This occurs because it was not known at the time the tracts were established which MCD's would be included within new SMSA's. The two instances are listed below.

Maine - Tract 0090 in Penobscot County (019) has two MCD's which are in the Bangor SMSA and one which is outside the SMSA.

Vermont - Tract 0035 in Chittenden County (007) has three MCD's which are in the Burlington SMSA and two which are outside the SMSA. PART I

Part I contains information specific to Summary Tape File 2.

ABSTRACT

Census of Population and Housing, 1980: Summary Tape File 2 [machine-readable data file] / conducted by the U.S. Bureau of the Census. -- Washington: The Bureau [producer and distributor], 1982.

TYPE OF FILE:

Summary statistics.

UNIVERSE DESCRIPTION:

All persons and housing units in the United States.

SUBJECT-MATTER DESCRIPTION:

contains complete-count data. Population items This file tabulated include age in single years, race (provisional data), sex, marital status, Spanish origin (provisional data), household type, and household relationship. Housing items tabulated include occupancy/vacancy status, tenure, contract rent, value, condominium status, number of rooms, and plumbing facilities. Selected aggregates, means, and medians are provided also. The file comprises two record types. The first, record A, is presented once for each geographic area. Characteristics data in record A are subject to suppression to insure confidentiality. The second record type, record B, is presented for the total population and repeated for each race and Spanish origin group in the geographic area that meets suppression criteria. Record B is present for a maximum of six race and Spanish origin categories in 2A and for a maximum of 26 race and Spanish origin categories in 2B.

STF's 2A and 2B, have identical tables. STF 2C contains the same tables plus 27 additional allocation tables. The files differ in geographic coverage.

GEOGRAPHIC COVERAGE:

This abstract provides general information concerning the geographic coverage of STF 2. For detailed information about hierarchy and splits across higher levels of geography, see the section "Geographic Coverage".

File A provides summaries for standard metropolitan statistical areas (SMSA's) and for the following SMSA components: counties or county equivalents, places of 10,000 or more inhabitants, census tracts, and totals for census tracts split by county components. A summary is also provided for the tracted area outside of SMSA's within each State.

3

File B provides summaries for the State or State equivalent, State components, standard consolidated statistical areas (SCSA's) and the urban and rural portions of the SCSA, standard metropolitan statistical areas (SMSA's) and the urban and rural portions of the SMSA, urbanized areas, counties or county equivalents and the rural portion of the county, minor civil divisions (MCD's) or census county divisions (CCD's), places of 1,000 or more inhabitants and the urban portion of any places that have been split into urban and rural components, American Indian reservations and their county portions, and Alaska Native villages.

File C is also referred to as the National file. It has summaries for the following geographic levels and their components: United States, census regions, census divisions, and standard States. Summaries are provided for consolidated statistical areas (SCSA's) and the urban and rural portions of the SCSA, standard metropolitan statistical areas (SMSA's) and the urban and rural portions of the SMSA, and urbanized areas (UA's). SCSA's, SMSA's, and UA's which cross State lines also have a record for the SCSA, SMSA, or UA portion within each State. Summaries are included for counties and the rural portion of each county, places of 10,000 or more inhabitants and the urban portion of any places that have been split into urban and rural components, minor civil divisions (MCD's) of 10,000 or more inhabitants in eleven selected States, American Indian reservations and their county portions, and Alaska Native villages.

TECHNICAL DESCRIPTION:

FILE SIZE:

STF's 2A and 2B each comprise one file per State. The logical record size for STF 2A and STF 2B is 11,736 characters with six record segments of 1,956 characters each.

STF 2C is a single file for the Nation. The logical record size for STF 2C--Record A is 15,648 characters and for STF 2C--Record B, 11,736 characters. Record A is divided into eight segments of 1,956 characters each, and Record B is divided into six segments of 1,956 characters each.

A printout listing the number of logical records and the block size will accompany each file.

FILE SORT SEQUENCE:

The file is sorted by level of geographic hierarchy. For a complete explanation, see the "Geographic Coverage" section.

File B provides summaries for the State or State equivalent, State components, standard consolidated statistical areas (SCSA's) and the urban and rural portions of the SCSA, standard metropolitan statistical areas (SMSA's) and the urban and rural portions of the SMSA, urbanized areas, counties or county equivalents and the rural portion of the county, minor civil divisions (MCD's) or census county divisions (CCD's), places of 1,000 or more inhabitants and the urban portion of any places that have been split into urban and rural components, American Indian reservations and their county portions, and Alaska Native villages.

File C is also referred to as the National file. It has summaries for the following geographic levels and their components: United States, census regions, census divisions, and Summaries are provided for standard States. consolidated statistical areas (SCSA's) and the urban and rural portions of the SCSA, standard metropolitan statistical areas (SMSA's) and the urban and rural portions of the SMSA, and urbanized areas (UA's). SCSA's, SMSA's, and UA's which cross State lines also have a record for the SCSA, SMSA, or UA portion within each State. Summaries are included for counties and the rural portion of each county, places of 10,000 or more inhabitants and the urban portion of any places that have been split into urban and rural components, minor civil divisions (MCD's) of 10,000 or more States, inhabitants in eleven selected American Indian reservations and their county portions, and Alaska Native villages.

FILE SORT SEQUENCE:

The file is sorted by level of geographic hierarchy. For a complete explanation, see the "Geographic Coverage" section.

REFERENCE MATERIALS:

U.S. Bureau of the Census. "Census of Population and Housing, 1980: Summary Tape File 2 Technical Documentation" (this document). The documentation includes this abstract, additional information about the file, and a data dictionary. One copy accompanies each file order. When ordered separately, it is available for \$5 from Data User Services Division, Customer Services (Tapes), Bureau of the Census, Washington, D.C. 20233.

<u>Metropolitan</u> <u>Map Series/Vicinity Map Series (MMS/VMS)</u>. This map series provides coverage of densely settled areas of selected counties and county equivalents. These maps are referred to as the Metropolitan Map Series (MMS) when the maps cover SMSA areas and as the Vicinity Map Series (VMS) when the maps cover areas not in an SMSA. For a more detailed discussion of the MMS/VMS, see the section, "1980 Census Maps."

<u>County</u> <u>Maps</u>. The maps cover all counties and county equivalents except where the Metropolitan Map Series/Vicinity Map Series (MMS/VMS) sheets cover an entire county. Most county maps are based on maps supplied by State transportation or highway departments on which the Bureau has superimposed boundaries and identifiers for most areas for which data are tabulated. There are inserts to county maps for some counties that contain American Indian reservations. For a more detailed discussion on county maps, and American Indian reservation maps, see the section, "1980 Census Maps."

<u>Place Maps.</u> Place maps are used for places not shown on MMS/VMS and show map features within the corporate limits of a municipality or within boundaries established for a census designated place (CDP). If census boundaries and identifiers for an area adjacent to a place are shown, the map is referred to as a place-and-vicinity map. For a more detailed discussion on place maps and place-and-vicinity maps, see the section, "1980 Census Maps."

For information about the availability of the above maps, write or call Data User Services Division, Customer Services (Maps), Bureau of the Census, Washington, D.C. 20233. Phone: (301) 763-4100.

<u>1980</u> <u>Census Users'</u> <u>Guide.</u> This publication is a comprehensive guide to 1980 census data. It covers 1980 census subject content, procedures, geography, and statistical products. Appendices include a glossary, summaries of the contents of specific tape files, and a variety of reference lists. The <u>Users'</u> <u>Guide</u> will be available in early 1982 from the Government <u>Printing</u> Office. Price has not yet been determined as of January 1982. <u>Monthly</u> <u>Product Announcement (MPA)</u>. New Census Bureau products released each month are listed in the MPA. These products include publications, technical documentation, data files, published maps, and microfiche. To be added to the mailing list, contact Data User Services Division, Customer Services (Publications), Bureau of the Census, Washington, D.C. 20233.

RELATED PRINTED REPORTS AND MICROFICHE:

Listed below are some of the products which are currently available or will be released. For a complete listing, see the <u>1980 Census Users' Guide</u>.

<u>PHC80(V)</u> Advance Reports. These reports contain population and housing unit counts from the 1970 and 1980 censuses and provisional 1980 race and Spanish/Hispanic origin counts. The set consists of 56 reports including a U.S. Summary and one report for each State, the District of Columbia, Puerto Rico, Guam, Virgin Islands, and American Samoa.

The reports show 1970 and 1980 population and housing unit counts and 1980 provisional counts for five racial categories and Spanish/Hispanic origin for the following areas or their equivalents: State, counties, county subdivisions, incorporated places, and congressional districts delineated for the 96th Congress. The U.S. Summary report presents the same data for the United States, its regions, divisions, States, and congressional districts for the 96th Congress. The 1980 census figures presented in STF 1 and STF 2 may differ from those shown in the Advance Reports, PHC80-V. The changes reflect corrections of errors found after the PHC80-V reports were prepared. The changes may affect any geographic area in this file. The reports are available from Data User Services Division, Customer Services (Publications), Bureau of the Census, Washington, D.C. 20233. Prices of reports vary.

PHC80-1 Block Statistics. (Microfiche report). Data are derived from STF 1 and include final population and housing counts (totals) and statistics on selected characteristics based on responses to complete-count (100-percent) questions. Data are shown for individual blocks in the blocked portion of each standard metropolitan statistical area (SMSA), places of 10,000 or more inhabitants outside of SMSA's, and for areas which contracted with the Census Bureau to provide block statistics. There is one title for each SMSA for block-numbered areas within the SMSA, and one title for each State with block-numbered areas outside of SMSA's. Maps corresponding to the block statistics reports will be available on paper stock and on microfiche. Block reports and maps will be available from the U.S. Government Printing Office, Washington, D.C. 20402.

PHC80-2 Census Tracts. Data for selected population and housing subjects derived from STF 2 and STF 4 are shown by census tracts

Monthly Product Announcement (MPA). New Census Bureau products released each month are listed in the MPA. These products include publications, technical documentation, data files, published maps, and microfiche. To be added to the mailing list, contact Data User Services Division, Customer Services (Publications), Bureau of the Census, Washington, D.C. 20233.

RELATED PRINTED REPORTS AND MICROFICHE:

491

Listed below are some of the products which are currently available or will be released. For a complete listing, see the <u>1980 Census Users' Guide</u>.

<u>PHC80(V)</u> Advance Reports. These reports contain population and housing unit counts from the 1970 and 1980 censuses and provisional 1980 race and Spanish/Hispanic origin counts. The set consists of 56 reports including a U.S. Summary and one report for each State, the District of Columbia, Puerto Rico, Guam, Virgin Islands, and American Samoa.

The reports show 1970 and 1980 population and housing unit counts and 1980 provisional counts for five racial categories and Spanish/Hispanic origin for the following areas or their equivalents: State, counties, county subdivisions, incorporated places, and congressional districts delineated for the 96th Congress. The U.S. Summary report presents the same data for the United States, its regions, divisions, States, and congressional districts for the 96th Congress. The 1980 census figures presented in STF 1 and STF 2 may differ from those shown in the Advance Reports, PHC80-V. The changes reflect corrections of errors found after the PHC80-V reports were prepared. The changes may affect any geographic area in this file. The reports are available from Data User Services Division, Customer Services (Publications), Bureau of the Census, Washington, D.C. 20233. Prices of reports vary.

PHC80-1 Block Statistics. (Microfiche report). Data are derived from STF 1 and include final population and housing counts (totals) and statistics on selected characteristics based on responses to complete-count (100-percent) questions. Data are shown for individual blocks in the blocked portion of each standard metropolitan statistical area (SMSA), places of 10,000 or more inhabitants outside of SMSA's, and for areas which contracted with the Census Bureau to provide block statistics. There is one title for each SMSA for block-numbered areas within the SMSA, and one title for each State with block-numbered areas outside of SMSA's. Maps corresponding to the block statistics reports will be available on paper stock and on microfiche. Block reports and maps will be available from the U.S. Government Printing Office, Washington, D.C. 20402.

PHC80-2 Census Tracts. Data for selected population and housing subjects derived from STF 2 and STF 4 are shown by census tracts

for standard metropolitan statistical areas (SMSA's), central cities, component SMSA counties, selected nonSMSA counties, places of 10,000 or more inhabitants within SMSA's and selected counties. Some tables are based on 100-percent or complete-count tabulations while others are based on sample tabulations. There is one report for each SMSA and one for the tracted balance of each State. Maps are provided with the tract reports. Tract reports will be available from the U.S. Government Printing Office, Washington, D.C. 20402.

PHC80-3 Summary Characteristics for Governmental Units. This publication series is derived from STF 1 and STF 3 and shows selected population and housing statistics based on complete count and sample estimate data for States, SMSA's, counties, functioning minor civil divisions (20 specified States), and incorporated places. There is one report for each State, the District of Columbia, and Puerto Rico. The publication will be available from the U.S. Government Printing Office, Washington, D.C. 20402.

<u>PC80-1-A</u> Number of Inhabitants. These reports are largely derived from STF 1 and contain final 1980 population counts and historic counts from previous censuses for States, standard consolidated statistical areas (SCSA's), standard metropolitan statistical areas (SMSA's), urbanized areas (UA's), urban and rural residence, counties, county subdivisions, incorporated places, and census designated places. Reports are issued separately for the United States, each State, the District of Columbia, Puerto Rico, Guam, Virgin Islands, American Samoa, the Trust Territory of the Pacific Islands, and the Northern Mariana Islands. These reports will be available from the U.S. Government Printing Office, Washington, D.C. 20402.

<u>PC80-1-B</u> <u>General</u> <u>Population</u> <u>Characteristics</u>. Data are derived from STF 2 and include statistics on household relationship, age, sex, marital status, race and Spanish origin for the following areas or their equivalents; States, standard consolidated statistical areas (SCSA's), standard metropolitan statistical areas (SMSA's), urbanized areas, counties, county subdivisions, places of 1,000 or more inhabitants, American Indian reservations, and Alaska Native villages. These reports are issued separately for the United States, each State, the District of Columbia, Puerto Rico, Guam, Virgin Islands, American Samoa, a the Trust Territory of the Pacific Islands, and the Northern Mariana Islands. These reports will be available from the U.S. Government Printing Office, Washington, D.C. 20402.

HC80-1-A General Housing Characteristics. Statistics derived from STF 2 provide data on housing unit totals, tenure, number of rooms, persons per room, units in structure, mobile home, value, contract rent and vacancy status. Data are shown for the following areas or their equivalents: States, standard consolidated statistical areas (SCSA's), standard metropolitan statistical areas (SMSA's), urbanized areas, county subdivisions, places of 1,000 or more inhabitants, American Indian reservations, and Alaska Native villages. Reports are issued separately for the United States, each State, the District of Columbia, Puerto Rico, Guam, Virgin Islands, American Samoa, the Trust Territory of the Pacific Islands, and the Northern Mariana Islands. These reports will be available from the U.S. Government Printing Office, Washington, D.C. 20402.

PC80-S1 Supplementary Reports. These reports will be released on a flow basis. The following reports have been issued as of December 1981: "Age, Sex, Race, and Spanish Origin of the Population by Regions, Divisions, and States: 1980" (GPO Stock No. 003-024-03129-9. Price--\$1.50); 'Population and Households by States and Counties: 1980" (GPO Stock No. 003-024-03130-2. Price--\$2.00); "Race of the Population by States: 1980" (GPO Stock No. 003-024-03147-7. Price--\$1.75); "Population and Households for Census Designated Places: 1980" (GPO Stock No. 003-024-03519-7. Price--\$3.25); and "Standard Metropolitan Statistical Areas and Standard Consolidated Statistical Areas: 1980" (GPO Stock No. 003-024-03550-2. Price--\$4.50). These reports may be ordered from the U.S. Government Printing Office, Washington, D.C. 20402.

<u>HC80-S1</u> <u>Supplementary</u> <u>Report.</u> "Selected Housing Characteristics by States and Counties: 1980" (GPO Stock No. 003-024-03551-1. Price--\$2.75). This report is available from the U.S. Government Printing Office, Washington, D.C. 20402.

RELATED MACHINE-READABLE FILES AND MICROFICHE:

Listed below are some other 1980 census data files which have been or will be released.

Summary Tape Files (STF's) 1 and 3-5. STF 1 has data collected on a 100-percent basis. STF's 3 through 5 present sample data inflated to represent the total population. Files vary in terms of geographic summary levels and amount of detail. STF 1 files for individual States are being released as of September 1981. STF's 3,4, and 5 are tentatively scheduled to be released as follows: STF 3--early 1982 through mid 1982, STF 4--mid 1982 through late 1982, STF 5--1983.

<u>Census of Population</u> and <u>Housing</u>, <u>1980-- Master Area Reference</u> <u>File (MARF)</u>. This file contains numeric codes and names (where appropriate) of geographic areas plus selected complete-count population and housing data. Individual State files are being released as of September 1981. This file is an extract of STF 1A.

Census of Population and Housing, 1980--P.L. 94-171 Population Counts. (Released February/March 1981) The file, organized by State, provides counts for total population, and provisional statistical areas (SMSA's), urbanized areas, county subdivisions, places of 1,000 or more inhabitants, American Indian reservations, and Alaska Native villages. Reports are issued separately for the United States, each State, the District of Columbia, Puerto Rico, Guam, Virgin Islands, American Samoa, the Trust Territory of the Pacific Islands, and the Northern Mariana Islands. These reports will be available from the U.S. Government Printing Office, Washington, D.C. 20402.

PC80-S1 Supplementary Reports. These reports will be released on a flow basis. The following reports have been issued as of "Age, Sex, Race, and Spanish Origin of the December 1981: Population by Regions, Divisions, and States: 1980" (GPO Stock No. 003-024-03129-9. Price--\$1.50); "Population and Households by States and Counties: 1980" (GPO Stock No. 003-024-03130-2. Price--\$2.00); "Race of the Population by States: 1980" (GPO Stock No. 003-024-03147-7. Price--\$1.75); "Population and Households for Census Designated Places: 1980" (GPO Stock No. and Price--\$3.25); and "Standard 003-024-03519-7. Metropolitan Statistical Areas and Standard Consolidated Statistical Areas: 1980" (GPO Stock No. 003-024-03550-2. Price--\$4.50). These reports may be ordered from the U.S. Government Printing Office, Washington, D.C. 20402.

HC80-S1 Supplementary Report. "Selected Housing Characteristics by States and Counties: 1980" (GPO Stock No. 003-024-03551-1. Price--\$2.75). This report is available from the U.S. Government Printing Office, Washington, D.C. 20402.

RELATED MACHINE-READABLE FILES AND MICROFICHE:

Listed below are some other 1980 census data files which have been or will be released.

Summary Tape Files (STF's) 1 and 3-5. STF 1 has data collected on a 100-percent basis. STF's 3 through 5 present sample data inflated to represent the total population. Files vary in terms of geographic summary levels and amount of detail. STF 1 files for individual States are being released as of September 1981. Census of Population and Housing, 1980-- Master Area Reference \overline{File} (MARF). This file contains numeric codes and names (where appropriate) of geographic areas plus selected complete-count population and housing data. Individual State files are being released as of September 1981. This file is an extract of STF 1A.

Census of Population and Housing, 1980--P.L. 94-171 Population Counts. (Released February/March 1981) The file, organized by State, provides counts for total population, and provisional

counts for five racial categories and Spanish/Hispanic origin. Summaries are provided for the State, counties, minor civil (MCD's) or census county divisions (CCD's), divisions places or place segments within MCD's/CCD's, incorporated remainders of MCD's/CCD's, election precincts in certain States or portions of certain States, census tracts or block numbering areas, block groups and blocks or, for areas that are not block numbered, enumeration districts (ED's). The figures presented in P.L. 94-171 may differ from those shown in STF 1. The changes reflect corrections of errors found after P.L. 94-171 was prepared. Microfiche (and paper photo copy of microfiche) of the P.L. 94-171 Population Counts file is also available.

FILE AVAILABILITY:

STF's are arranged so that tapes for individual States can be purchased separately. Tapes are available at 1600 bpi or 6250 bpi, 9-track, at a cost of \$110 (\$140 after March 1, 1982) per reel. If data for more than one State are on a single reel, the cost is \$135 (\$165 after March 1, 1982) per reel. For information on the number of reels and release date for each State, subscribe to the Monthly Product Announcement (MPA). The MPA is available without charge and may be ordered using the Census Publications order form on the following page.

STF 2 can be ordered using the Customer Services order form. When ordering, please refer to file number Cu SUM 80 002A for STF 2A, Cu SUM 002B for STF 2B, and Cu SUM 80 002C for STF 2C. Please indicate the name of the State(s) when ordering STF 2A and STF 2B.

"PRECEDING PAGE BLANK - NOT FILMED"

STF 2 FILE DESCRIPTION

Summary Tape File 2 (STF 2) is a summary file from the 1980 census containing complete-count or 100% data. STF 2A focuses primarily on metropolitan areas and their components; STF 2B focuses primarily on States and State components; STF 2C is a National file. STF 2A and STF 2B will be released on a State-by-State basis while STF 2C will be issued after all State STF 2A and STF 2B files have been released.

A and B Records on STF 2

STF 2 data are presented in two types of records, each record containing different tables. Record A summarizes data for the total population while record B summarizes data for the total population and for a maximum of 26 race and Spanish origin groups. On STF 2A, record B presents data for the total population and for 1 to 6 specified race and/or Spanish origin categories. On STF 2B, record B summarizes data for the total population and for a maximum of 26 race and/or Spanish origin categories for places and minor civil divisions (MCD's)/census county divisions (CCD's) with more than 2,500 persons. However, for places of 1,000 to 2,500 population and MCD's/CCD's with fewer than 2,500 persons, only the total population and six categories shown on STF 2A are present. STF 2C contains B records for the total population and for a maximum of 26 race and/or Spanish origin categories for a structure of the total population and six categories for all geographic areas.

STF 2 includes B records for the total and race and Spanish origin groups with 15 or more persons or 5 or more households, and which meet other suppression criteria. Therefore, the number of B records will vary from one geographic area to another depending on population size and race and Spanish origin composition. A series of flags on the A record (positions 211-237) indicate the presence of B records for each race and/or Spanish origin group. In addition, a code in the B record (positions 16-17) identifies the group for which the data are summarized. The following figure illustrates the maximum number of B records for geographic areas on STF 2 files:

	File	Geography	Maximum Number of Race/Spanish Origin Records for Record B
STF	2A	A11	*7
STF	28	Places and MCD's CCD's with more 2,500 persons	
	2B	Places of 1,000- population and M CCD's with fewer	ICD's/ than
		2,500 persons	*7
STF	2C	A11	**27

Figure 2. Maximum Number of Race/Spanish Origin Records for Record B

*Categories include: Total; White; Black; American Indian, Eskimo and Aleut; Asian and Pacific Islander; Other; and Spanishorigin Total.

**Categories include Total and all Race/Spanish origin groups listed in positions 16-17 in the Data Dictionary.

STF 2 File Segmentation

Because of its large census logical record size, STF 2 is divided into record segments to conform with ASCII standards. Each record segment is 1,956 characters in length. The census logical record size for STF 2A, STF 2B, and record B on STF 2C is 11,736 characters; each census logical record is divided into six segments. The census logical record size for record A on STF 2C is 15,648 characters; each census logical record is made up of eight segments.

The first segment for each census logical record begins with 252 characters of geographic information, suppression flags, and record B indicators while each subsequent segment in the census logical record begins with 102 characters of geographic information.

The record segments have been arranged so that individual tables do not cross segment boundaries. Because of this, each segment has some padding at the end. The following charts illustrate the tables on each segment in record A and record B.

	File	Geography	Maximum Number of Race/Spanish Origin Records for Record B
STF	2A	A11	*7
STF	28	Places and MCD's/ CCD's with more than 2,500 persons	**27
	2B	Places of 1,000-2,50 population and MCD's CCD's with fewer tha	s/ m
		2,500 persons	*7

Geographic Coverage

STF 2A

STF 2A, which will be released on a State-by-State basis, provides data for census tracts within SMSA's or SMSA portions in a State, as well as the non-SMSA tracted remainder. The chart below indicates the geographic hierarchy of the file.

Figure 5. Geographic Hierarchy of STF 2A

SMSA

County or county equivalent Place of 10,000+ Census Tract Totals for split census tracts

The standard metropolitan statistical area (SMSA) record (summary level 08) contains a summary for each SMSA or portion of an SMSA within a State in FIPS SMSA code sequence. For the tracted area outside of SMSA's, a "tracted remainder of State" record is summarized with a pseudo SMSA code of 9999.

The county record (summary level 17) contains a summary for each county or county equivalent (or portion in New England), including independent cities, which is within the SMSA or "tracted remainder of State." These summaries are in FIPS county code sequence. The tracted remainder of State has a pseudo SMSA code of 9999.

The place record (summary level 23) contains a summary for each "place" or portion of a place (if the place crosses county boundaries) within each component county. In this summary, "places" are defined as 1) all central cities of SMSA's, 2) places of 10,000 or more inhabitants, and/or 3) remainder of county. The places are in census place code sequence. The "remainder of county" record for the "tracted remainder of State" will have a pseudo place code of 9999.

The census tract record (summary level 24) contains a summary for each tract or portion of a tract within the place, place segment, or remainder of the tracted county. These summaries are in census tract code sequence. If a portion of the SMSA is not tracted, the summary will have a pseudo tract code of 999999.

The split census tract total record (summary level 32) contains a summary for each tract which is split by one or more places of 10,000 or more inhabitants. If the tract is not split, no summary for the tract will appear.

Geographic Coverage

STF 2A

STF 2A, which will be released on a State-by-State basis, provides data for census tracts within SMSA's or SMSA portions in a State, as well as the non-SMSA tracted remainder. The chart below indicates the geographic hierarchy of the file.

Figure 5. Geographic Hierarchy of STF 2A

SMSA

County or county equivalent Place of 10,000+ Census Tract Totals for split census tracts

The standard metropolitan statistical area (SMSA) record (summary level 08) contains a summary for each SMSA or portion of an SMSA within a State in FIPS SMSA code sequence. For the tracted area outside of SMSA's, a "tracted remainder of State" record is summarized with a pseudo SMSA code of 9999.

The county record (summary level 17) contains a summary for each county or county equivalent (or portion in New England), including independent cities, which is within the SMSA or "tracted remainder of State." These summaries are in FIPS county code sequence. The tracted remainder of State has a pseudo SMSA code of 9999.

The place record (summary level 23) contains a summary for each "place" or portion of a place (if the place crosses county boundaries) within each component county. In this summary, "places" are defined as 1) all central cities of SMSA's, 2) places of 10,000 or more inhabitants, and/or 3) remainder of county. The places are in census place code sequence. The "remainder of county" record for the "tracted remainder of State" will have a pseudo place code of 9999.

The census tract record (summary level 24) contains a summary for each tract or portion of a tract within the place, place segment, or remainder of the tracted county. These summaries are in census tract code sequence. If a portion of the SMSA is not tracted, the summary will have a pseudo tract code of 999999.

The split census tract total record (summary level 32) contains a summary for each tract which is split by one or more places of 10,000 or more inhabitants. If the tract is not split, no summary for the tract will appear.

STF 2B

STF 2B will be issued on a State-by-State basis. This file presents data for the State as well as smaller geographic levels including American Indian reservations and Alaska Native villages. The chart below indicates geographic summary levels of this file.

Figure 6. Geographic Hierarchy of STF 2B State or State equivalent State components (See State record description below.) SCSA SCSA (urban portion) SCSA (rural portion) SMSA SMSA (urban portion) SMSA (rural portion) Urbanized area County or county equivalent County (rural portion) MCD/CCD Places of 1,000+ Places of 1,000+ (urban portion for extended cities) American Indian reservation/Alaska Native village (ANV) County components (American Indian Reservation)

The State record (summary level 04) contains a summary for the State. It is followed by a summary for each of the component parts of the State listed below. If there are no data for a specific component, the summary contains zeroes in the data cells. These components are further identified by the urban/rural code (positions 12-13) or the SMSA component code (positions 14-15).

Urban/Rural Components Urban Inside urbanized areas Central cities Urban fringe Outside urbanized areas Places of 10,000 or more Places of 2,500 to 10,000 Rural Places of 1,000 to 2,500 Other rural Inside and Outside SMSA Components

Inside SMSA's Urban Central cities Not in central cities Rural Outside SMSA's

17

The standard consolidated statistical area (SCSA)/State record (summary level 06) contains a summary for each SCSA or the portion of each SCSA in the State. These are in FIPS SCSA code sequence. When this summary is present, there will also be a summary for the urban part of the SCSA or SCSA portion followed by a summary for the rural part of the SCSA or SCSA portion.

The standard metropolitan statistical area (SMSA)/State record (summary level 08) contains a summary for each SMSA or the portion of each SMSA in the State. These summaries are in FIPS SMSA code sequence. When this summary is present, there will also be a summary for the urban part of the SMSA or SMSA portion followed by a summary for the rural part of the SMSA or SMSA portion.

The urbanized area (UA)/State record (summary level 10) contains a summary for each UA or portion of a UA in the State. These summaries are in census UA code sequence.

The county record (summary level 11) contains a summary for each county or county equivalent, including independent cities, in FIPS county code sequence. This is followed by a summary for the rural portion of the county.

The MCD/CCD record (summary level 12) contains a summary for each MCD/CCD within the county in census MCD/CCD code sequence.

The State/place record (summary level 27) contains a summary for each place of 1,000 or more persons in census place code sequence. Each summary is followed by a summary for the urban portion of each place of 1,000 or more persons if the place is an "extended city."

The American Indian reservation/Alaska Native village (ANV)/State record (summary level 30) contains a summary for each Indian reservation within the State. These are summarized by ascending reservation code within the State. In Alaska, ANV's are also summarized by ascending ANV code following the reservation.

The American Indian reservation/Alaska Native village (ANV) county record (summary level 31) contains a summary for each county portion of an Indian reservation. These are in FIPS county code sequence. No county portions are shown for Alaska Native villages.

18

The standard consolidated statistical area (SCSA)/State record (summary level 06) contains a summary for each SCSA or the portion of each SCSA in the State. These are in FIPS SCSA code sequence. When this summary is present, there will also be a summary for the urban part of the SCSA or SCSA portion followed by a summary for the rural part of the SCSA or SCSA portion.

The standard metropolitan statistical area (SMSA)/State record (summary level 08) contains a summary for each SMSA or the portion of each SMSA in the State. These summaries are in FIPS SMSA code sequence. When this summary is present, there will also be a summary for the urban part of the SMSA or SMSA portion followed by a summary for the rural part of the SMSA or SMSA portion.

The urbanized area (UA)/State record (summary level 10) contains a summary for each UA or portion of a UA in the State. These summaries are in census UA code sequence.

The county record (summary level 11) contains a summary for each county or county equivalent, including independent cities, in FIPS county code sequence. This is followed by a summary for the rural portion of the county.

The MCD/CCD record (summary level 12) contains a summary for each MCD/CCD within the county in census MCD/CCD code sequence.

The State/place record (summary level 27) contains a summary for each place of 1,000 or more persons in census place code sequence. Each summary is followed by a summary for the urban portion of each place of 1,000 or more persons if the place is an "extended city."

The American Indian reservation/Alaska Native village (ANV)/State record (summary level 30) contains a summary for each Indian reservation within the State. These are summarized by ascending reservation code within the State. In Alaska, ANV's are also summarized by ascending ANV code following the reservation.

The American Indian reservation/Alaska Native village (ANV) county record (summary level 31) contains a summary for each county portion of an Indian reservation. These are in FIPS county code sequence. No county portions are shown for Alaska Native villages.

STF 2C

STF 2C is a National file which will be released following the release of STF's 2A and 2B for all States. The chart below shows the geographic summary levels of this file.

Figure 7. Geographic Hierarchy of STF 2C United States United States components* Region Region components* Division Division components* State State components* SCSA Urban/Rural State Urban/Rural SMSA Urban/Rural State Urban/Rural Urbanized Area State State-County State-County (Rural portion) State-Places of 10,000+ State-Places of 10,000+ (Urban portion for extended cities) State-Minor Civil Divisions (MCD's) of 10,000+ (11 States only) American Indian reservation/Alaska Native village (ANV) State County components

*See the United States record description on the following page for the list of components.

19

The United States record (summary level 01) contains a summary for the United States. It is followed by a summary for each of the component parts of the U.S. as listed below:

Urban Inside urbanized areas Central cities Urban fringe Outside urbanized areas Places of 10,000 or more Places of 2,500 to 10,000 Rural Places of 1,000 to 2,500 Other rural Inside SMSA's Urban Central cities Not in central cities Rural Outside SMSA's Urban Rural

The region record (summary level 02) contains a summary for each of the four census regions in the U.S. in census region code sequence. Following each region summary, a summary for each of the component parts of the region is presented (see list of components in the United States record description above).

The division record (summary level 03) contains a summary for each of the nine census divisions in the U.S. in census division code sequence. Following each division summary, a summary for each of the component parts of the division is presented (see list of components in the United States record description above).

The State record (summary level 04) contains a summary for each State in FIPS State code sequence. Following each State summary, a summary for each of the component parts of the State is presented (see list of components in the United States record description above).

The standard consolidated statistical area (SCSA) record (summary level 05) contains a summary for each SCSA in the United States in FIPS SCSA code sequence. Following each SCSA summary, summaries are presented for the urban and rural parts of the SCSA.

The SCSA/State record (summary level 06) contains a summary for the portion of the SCSA located in each State. These are in FIPS State code sequence. When this summary is present, there will also be a summary for the urban part of the SCSA portion followed by a summary for the rural part of the SCSA portion.

The standard metropolitan statistical area (SMSA) record (summary level 07) contains a summary for each SMSA in the U.S. in FIPS SMSA

The United States record (summary level 01) contains a summary for the United States. It is followed by a summary for each of the component parts of the U.S. as listed below:

Urban Inside urbanized areas Central cities Urban fringe Outside urbanized areas Places of 10,000 or more Places of 2,500 to 10,000 Rural Places of 1,000 to 2,500 Other rural Inside SMSA's Urban Central cities Not in central cities Rural Outside SMSA's Urban Rural

The region record (summary level 02) contains a summary for each of the four census regions in the U.S. in census region code sequence. Following each region summary, a summary for each of the component parts of the region is presented (see list of components in the United States record description above).

The division record (summary level 03) contains a summary for each of the nine census divisions in the U.S. in census division code sequence. Following each division summary, a summary for each of the component parts of the division is presented (see list of components in the United States record description above).

The State record (summary level 04) contains a summary for each State in FIPS State code sequence. Following each State summary, a summary for each of the component parts of the State is presented (see list of components in the United States record description above).

The standard consolidated statistical area (SCSA) record (summary level 05) contains a summary for each SCSA in the United States in FIPS SCSA code sequence. Following each SCSA summary, summaries are presented for the urban and rural parts of the SCSA.

The SCSA/State record (summary level 06) contains a summary for the portion of the SCSA located in each State. These are in FIPS State code sequence. When this summary is present, there will also be a summary for the urban part of the SCSA portion followed by a summary for the rural part of the SCSA portion.

The standard metropolitan statistical area (SMSA) record (summary level 07) contains a summary for each SMSA in the U.S. in FIPS SMSA

code sequence. Following each SMSA summary, summaries are presented for the urban and rural parts of the SMSA.

The SMSA/State record (summary level 08) contains a summary for the portion of the SMSA in each State in which the SMSA is present in FIPS State code sequence. Following each SMSA portion, summaries are presented for the urban and rural parts of the SMSA portion.

The urbanized area (UA) record (summary level 09) contains a summary for each UA in the United States in UA code sequence.

The UA/State record (summary level 10) contains a summary for the portion of the UA in each State in which the UA is located in FIPS State code sequence.

The State/county record (summary level 11) contains a summary for each county in the United States in FIPS State code by FIPS county code sequence. Each county summary is followed by a summary for the rural portion of the county.

The State/place record (summary level 27) contains a summary for each place of 10,000 or more persons within the U.S. These are in FIPS State code by census place code sequence. Each place record is followed by a summary for the urban portion of each place of 10,000 or more persons if the place is an "extended city."

The State/minor civil division (MCD) record (summary level 28) contains a summary for MCD's of 10,000 or more population in eleven selected States. These are in FIPS State code sequence by census MCD sequence number. The 4-digit MCD sequence number differs from the 3-digit MCD code by identifying MCD's in alphabetic order within State rather than in alphabetic order within county. The eleven States are as follows:

Connecticut	New Hampshire	Rhode Island
Maine	New Jersey	Vermont
Massachusetts	New York	Wisconsin
Michigan	Pennsylvania	

The American Indian reservation/Alaska Native village (ANV) record (summary level 29) contains a summary for each Indian reservation and Alaska Native village. These are sequenced by American Indian reservation code within the United States and by ANV code within Alaska.

The American Indian reservation/Alaska Native village (ANV)/State record (summary level 30) contains a summary for each State portion of an Indian reservation. These follow the complete American Indian reservation summary and are sequenced by FIPS State code. Summaries are also present for each Alaska Native village in ascending ANV code following the reservations.

The American Indian reservation/Alaska Native village (ANV)/county record (summary level 31) contains a summary for each county portion of an Indian reservation. These follow each State portion reservation summaries and are sequenced by FIPS county code. No county portions are shown for Alaska Native villages.

Computation of Medians in STF 2

A minimum and maximum value has been determined for each computed median. Any computed median falling outside these ranges will be set to that value. Listed below are the ranges for each of the types of medians.

Median Age by Sex (1 implied decimal)

Value

Description

00000009

Median age has been determined to be .9 or less. The value has been set to .9.

000001101

Median age has been determined to be 110.1 or more. The value has been set to 110.1.

Median Rooms by Tenure (1 implied decimal)

Value

00000010

Median number of rooms has been determined to be 1.0.

00000086

Median number of rooms has been determined to be 8.6 or more. The value has been set to 8.6.

Median Persons per Unit by Tenure (2 implied decimals)

Value

00000100

00000851

(2 implied decimals)

Description

Description

Median number of persons per unit has been determined to be 1.00.

Median number of persons per unit has been determined to be 8.51 or more. The value has been set to 8.51.

Median Value

Value

000009900

Description

Median value has been determined to be \$9,900 or less. The value has been set to \$9,900. reservation summaries and are sequenced by FIPS county code. No county portions are shown for Alaska Native villages.

Computation of Medians in STF 2

A minimum and maximum value has been determined for each computed median. Any computed median falling outside these ranges will be set to that value. Listed below are the ranges for each of the types of medians.

Median Age by Sex (1 implied decimal)

Value

Description

Description

determined to be 1.0.

00000009

Median age has been determined to be .9 or less. The value has been set to .9.

000001101

Median age has been determined to be 110.1 or more. The value has been set to 110.1.

Median Rooms by Tenure (1 implied decimal)

Value

00000010

00000086

Median number of rooms has been determined to be 8.6 or more. The value has been set to 8.6.

Median number of rooms has been

Median Persons per Unit by Tenure (2 implied decimals)

Value

00000100

000000851

Description Median number of persons per unit has been determined to be 1.00.

Median number of persons per unit has been determined to be 8.51 or The value has been set to more. 8.51.

Median Value

Value

000009900

Description

Median value has been determined to be \$9,900 or less. The value has been set to \$9,900.

000200100

Median value has been determined to be \$200,100 or more. The value has been set to \$200,100.

NOTE: The last two digits of the above median will always contain 0's. Median is computed and rounded to the nearest hundred dollars.

Median Contract Rent

Value

Description

00000049

Median rent has been determined to be \$49 or less and has been set to \$49.

00000501

Median rent has been determined to be \$501 or more and has been set to that value.

"PRECEDING PAGE PLANK - NOT FILMED" SUPPRESSION

To maintain the confidentiality promised respondents and required by law, the Census Bureau takes precautions to make sure that its public data, in print or on tape, do not disclose information about particular individuals or housing units; therefore, the Bureau suppresses tabulations of characteristics for very small groups of people or housing units. On summary tapes, zeroes are entered in suppressed cells. Flag fields which indicate suppression are shown on each record. However, a zero in a cell does not automatically mean suppression. Only by checking the suppression flag can it be determined if the zero in a specific table is suppressed data or an actual count of zero.

This discussion outlines the rules for suppression, how its occurrence can be identified by the user, and how to handle it.

No Suppression

The following counts will never be suppressed:

Total population Total housing units Seasonal/migratory housing units Year-round housing units Occupied housing units Vacant year-round housing units Count of persons and households in each race and Spanish origin group

Primary Suppression

Suppression of Population Characteristics. Characteristics of persons other than race or Spanish origin (e.g., age, relationship) are shown only if there are 15 or more persons in the geographic area. For example, on a record for a census tract with a population of 1 to 14 persons, population characteristics such as age and relationship are suppressed. Only counts for total population and the number of persons within specific race or Spanish origin groups are provided.

However, when the geographic area being summarized has 15 or more persons, no suppression of population characteristics will occur-except possibly when tables are cross-classified by race or Spanish origin. The rules for this type of suppression are outlined below in Suppression of Tables Cross-Classified by Race or Spanish Origin.

Suppression of Year-round Housing Characteristics. Characteristics of year round housing units which are not classified by occupancy status (e.g., number of rooms, plumbing facilities, etc.) are suppressed only when there are fewer than five year-round housing units in the geographic area being tabulated regardless of the number of <u>occupied</u> housing units or the number of persons. Suppression of Family, Household, or Occupied Housing Characteristics. Characteristics of families, households, or occupied housing units are shown if there are at least five occupied housing units within the geographic area tabulated.

<u>Suppression of Owner or Rental Characteristics</u>. Distributions of data for owners or renters are shown only when the number of owners is at least five and the number of renters is also at least five.

Suppression of Tables Cross-Classified by Race or Spanish Origin. Population and housing characteristics cross-classified by race or Spanish origin are subject to an additional level of scrutiny. On this level the 15 person or five household criteria stated above are also applied to each race or Spanish origin category.

Individual cells of data for specific race or Spanish origin groups are not suppressed when there are 15 or more persons of that group in a geographic area.

The population and housing suppression criteria are applied independently of one another. For example, if there are 16 Spanish origin persons but only four households with Spanish origin householders, the person characteristics will be shown but the family, household, and housing characteristics will be suppressed.

Complementary Suppression

In some cases complementary suppression is applied to prevent the derivation of suppressed data by subtraction. For instance, when a table shows the number of persons in unit for all households and also for renters, there must be at least five owners and five renters for the renter data to be shown; otherwise the characteristics of the owners could be derived by subtracting renter data from data for all households.

Examples of Suppression--A Record

The following example shows two A record tables from the STF 2 Data Dictionary. The first Table (A13) is never suppressed since it is a basic count. The second table (A22) will only be suppressed if there are fewer than 5 year-round housing units in the geographic area tabulated.

Example:

Table A13. SPANISH ORIGIN (2) BY RACE (5)

This table has no suppression

Universe: Persons

<u>Suppression</u> of <u>Family</u>, <u>Household</u>, <u>or</u> <u>Occupied</u> <u>Housing</u> <u>Characteristics</u>. Characteristics of families, households, or occupied housing units are shown if there are at least five occupied housing units within the geographic area tabulated.

<u>Suppression</u> of <u>Owner</u> or <u>Rental</u> <u>Characteristics</u>. Distributions of data for owners or renters are shown only when the number of owners is at least five and the number of renters is also at least five.

<u>Suppression</u> of <u>Tables</u> <u>Cross-Classified</u> by <u>Race</u> or <u>Spanish</u> <u>Origin</u>. Population and housing characteristics cross-classified by race or Spanish origin are subject to an additional level of scrutiny. On this level the 15 person or five household criteria stated above are also applied to each race or Spanish origin category.

Individual cells of data for specific race or Spanish origin groups are not suppressed when there are 15 or more persons of that group in a geographic area.

The population and housing suppression criteria are applied independently of one another. For example, if there are 16 Spanish origin persons but only four households with Spanish origin householders, the person characteristics will be shown but the family, household, and housing characteristics will be suppressed.

Complementary Suppression

1.32

In some cases complementary suppression is applied to prevent the derivation of suppressed data by subtraction. For instance, when a table shows the number of persons in unit for all households and also for renters, there must be at least five owners and five renters for the renter data to be shown; otherwise the characteristics of the owners could be derived by subtracting renter data from data for all households.

Examples of Suppression--A Record

The following example shows two A record tables from the STF 2 Data Dictionary. The first Table (A13) is never suppressed since it is a basic count. The second table (A22) will only be suppressed if there are fewer than 5 year-round housing units in the geographic area tabulated.

Example:

Table A13. SPANISH ORIGIN (2) BY RACE (5)

This table has no suppression

Universe: Persons

This table has no suppression because a count of persons by race is never suppressed.

Spanish	origin:			
White				
Black				
Americ	can Indian,	Eskimo,	and	Aleut
Asian	and Pacifi	ic Island	er	
Other				

Not of Spanish origin: White Black American Indian, Eskimo, and Aleut Asian and Pacific Islander Other

Table A22. ROOMS (6)

SUPFLG02 applies to all cells

Universe: Condominium Housing Units

This table will be suppressed when there are 1-4 year-round housing units in the area. 1 room 2 rooms 3 rooms 4 rooms 5 rooms 6 or more rooms

Examples of Suppression--B Record

The following examples show two B record tables from the STF 2 Data Dictionary. The first table (B8) will be suppressed if there are fewer than 15 persons of a particular race or Spanish origin category in the geographic area being summarized. The second table (B28) will have one portion of the table suppressed if there are fewer than five occupied housing units of a particular race or Spanish origin category in the geographic area, and the other portion suppressed if there are fewer than 5 owner and/or renter housing units of the same race or Spanish origin category in the geographic area.

Example:

Table B8. SEX (2) BY AGE (103)

SUPFLGB1 applies to all cells

TENURE (2) BY UNITS AT ADDRESS (6)

<u>SUPFLGB3</u> <u>applies</u> to <u>cells</u> <u>1-6</u> <u>SUPFLGB4</u> <u>applies</u> to <u>cells</u> <u>7-12</u> Universe: Occupied Housing Units

The portion of this table indicating total will be suppressed when there are 1-4 occupied housing units in the area.

The portion of this table indicating renter occupied will be supTotal: 1 2 3 and 4 5 to 9 10 or more Mobile home or trailer

Renter occupied: 1 2 pressed if there are 1-4 owner and/or renter occupied housing units in the area. 3 and 4 5 to 9 10 or more Mobile home or trailer

<u>How Suppression Affects the B Record in STF 2</u>--Total suppression of the B record for a specified race or Spanish origin category occurs if the population in that particular category is less than 15 and the number of occupied housing units is less than 5.

B records may be partially suppressed because population and housing suppression criteria are applied independently of each other. For example, in the Asian and Pacific Islander category, if there are 16 persons but only 4 housing units for an area, the person characteristics will be shown but the family, household, and housing characteristics will be suppressed.

Programming with Suppression

Suppressed data cells contain zeroes. To distinguish between zeroes as suppression and zeroes as valid data, occurrences of suppression are identified by a series of flag fields in the geographic identification portion of each logical record. Programmers developing software should include procedures to check these fields for the presence of suppression and, if necessary, to flag the output of any cumulation which includes one or more suppressed fields.

In reviewing the data dictionary, the programmer can determine which suppression flags indicate suppression for particular tables by checking either the table description or the flag description. An example of each follows.

> Example: The boxed illustration below is the table description as it appears in the data dictionary. The next portion illustrates the suppression flag to which the table description refers.

TABLE A32 CONTRACT RENT (26)

Evaluating the Effect of Suppression

In most cases, suppressed data values are small (fewer than 5 or 15) except where a large population is affected by complementary suppression. Therefore, in certain noncritical applications, users may simplify programming operations by ignoring suppression and treating suppressed cells as zero cells. However, when geographic entities are being summed to higher levels or new geographic areas are being created, suppression will usually result in a downward bias in the totals.

B45. HOUSEHOLDS SUBSTITUTED [1]

FOOTNOTE SECTION

- 01 The count of households in the complete-count tabulations by definition equals the number of occupied housing units. For this documentation the term "Household" is used unless the matrix is stratified by a housing item such as tenure, plumbing facilities, etc., in which case, the term "Occupied housing unit" is used.
- 02 "Meian and Pacific Islander" in 100-percent tabulations, includes "Japanese," "Chinese," "Filipino," "Korean," "Maian Indian," "Vietnamese," "Hawaiian," 'Guamanian," and 'Bamcan." "Maian and Pacific Islander," in eample tabulations, includes the groups listed above and those persons who have a write-in entry of an Asian and Pacific Islander group in the 'Other" category.
- 03 For data tabulated on a 100percent basis, includes all persons in the category "Other." For data tabulated from the sample, excludes those persons who have a write-in entry of an Asian and Pacific Islander group in the "Other" category.
- 04 Vacant seasonal/migratory units are excluded from all matrices except as noted specifically in the documentation.
- 05 This matrix can be used to derive data based on the 1970 'household head" concept. 1980 householders differ from 1970 household heads primarily where the wife in a married-couple family was listed as the 'person in column 1" on the questionnaire. In 1970 the husband was automatically assumed to be the 'head" of such a family. Therefore, to compute 'age of head" for married-couple families add the distribution of male householders to the distribution of male spouses.
- 06 Tabulations of "Persons in household" based on 100-percent data by definition are the same as tabulations of "Persons in Unit." The phrase "Persons in household" is used unless the matrix is stratified by a housing item such as tenure, plumbing facilities, etc., in which case the phrase "Persons in unit" is used. Tabulations of "Persons in households" and "Persons in nuit" based on sample data are not necessarily the same

because of differences in the procedures used to inflate sample population and housing data.

07 Lacking complete plumbing (facilities) for exclusive use includes: Complete plumbing (facilities) but used by another household, some but not all plumbing facilities, or no plumbing facilities.

- O8 This aggregate, along with the relevant count, will parmit the computation of a mean. For example, the aggregate value for specified owner-occupied noncondominium units will yield the mean value when divided by the count of specified owneroccupied noncondominium units, and the aggregate rooms for occupied and vacant year-round units divided by the count of occupied and vacant year-round units yields mean rooms. (See footnote 13 prior to computing mean value or price adxed.)
- 09 Households may be counted more than once in this tabulation.
- 10 "Nonrelatives" include the questionnaire categories: "Roomer, boarder," "Partner, roommate," "Paid employee," and "Other nonrelative." Tabulations of "Nonrelatives" include all categories now shown separately in the matrix.
- 11 Value and price asked are tabulated separately for noncondominium and condominium units.

The noncondominium value distribution is restricted to certain kinds of "owner-cocupied" units; the noncondominum price asked distribution is restricted to certain kinds of "wacnt-for-sale-only" units. The following are excluded from the tabulations on value and price asked for noncondominum units:

- a. Units at an address with two or more units
- b. Units on 10 or more acres c. Units with a connercial establishment or medical office
- on the property d. Mobile homes or trailers

The condominium value distribution is tabulated for all "owneroccupied" condominium units; the condominium price asked distribution is tabulated for all "wacantfor-male-only" condominium units.

12 Contract rent is tabulated for all "renter occupied" units except onefamily houses on a property of 10 or more acres. Rent asked is tabulated for all "wacant-for-rent" units except one-family houses on a property of 10 or more acres. Units tabulated in the "No Cash Rent" category are all occupied housing units reported as "No Cash Rent" except one-family houses on 10 or more acres.

- 13 Multiply the aggregate value and price asked by \$250 to obtain the true value or price asked. The tabulation was scaled by a factor of \$250 for tally purposes.
- 14 Vacant housing units include the questionnaire categories: "For rent," "For sale only," "Rented or sold, not occupied," "Held for occasional use," and "Other wacant." Tabulations of "Other wacants" include all categories not shown separately in the matrix.
- 15 A "Child of householder" includes any son, daughter, stepchild, or adopted child of the householder. An "Own child of householder" is a never-married child under 18 years of age who is a son, daughter, stepchild, or adopted child of the householder. "Related children" include not only own children but also other family members, regardless of marital status, who are under 18 years old, except the householder or spouse. Roster children are included in the "Nonrelative" category.
- 16 Relatives include householder, sponse and the questionnaire categories: "Son/daughter," "Brother/sister," "Rather/ mother," and "Other relative." Tabulations of "Other relatives" include all categories not shown separately in the matrix.
- 17 Householders and spouses mist be 15 years old or over.
- 18 Family households must be 2 or more persons; the category of "1 person" in family households will always contain a zero.
- 19 In this matrix, persons are classified by the race and Spanish origin of the householder.
- 20 Allocations of marital status for persons under 15 years old are not included in "Persons with one or more items allocated."
- 21 "Year-round housing units with one or more housing items allocated" include allocations of "Units at address," "Access," "Plumbing facilities," "Boome," "Tenure," "Condominium status," "Acreage of property," "Connercial establish-

ment or medical office," "Value" or "Price asked," "Contract rent" or "Rent asked," "Vacancy indicator," "Vacancy status," "Boarded up status," and "Duration of vacancy."

22 In this matrix, 'With cash rent" and 'No cash rent," are presented for all renter-occupied housing units. Contract rent is tabulated for specified renter-occupied housing units (see footnote 12). tabulated for all "wacant-for-rent" units except one-family houses on a property of 10 or more acres. Units tabulated in the "No Cash Rent" category are all occupied housing units reported as "No Cash Rent" except one-family houses on 10 or more acres.

- 13 Multiply the aggregate value and price asked by \$250 to obtain the true value or price asked. The tabulation was scaled by a factor of \$250 for tally purposes.
- 14 Vacant housing units include the questionnaire categories: "For rent," "For sale only," "Rented or sold, not occupied," "Held for occasional use," and "Other vacant." Tabulations of "Other wacants" include all categories not shown separately in the matrix.
- 15 A "Child of householder" includes any son, daughter, stepchild, or adopted child of the householder. An "Dwn child of householder" is a never-married child under 18 years of age who is a son, daughter, stepchild, or adopted child of the householder. "Related children" include not only own children but also other fumily members, regardiese of marital status, who are under 18 years old, except the householder or spouse. Foster children are included in the "Nonrelative" category.
- 16 Relatives include householder, spouse and the questionnaire categories: "Son/daughter," "Brother/mister," "Pather/ mother," and "Other relative." Tabulations of "Other relatives" include all categories not shown seguritely in the matrix.
- 17 Householders and spouses must be 15 years old or over.
- 18 Family households must be 2 or more persons; the category of "1 person" in family households will always contain a zero.
- 19 In this matrix, persons are classified by the race and Spanish origin of the householder.
- 20 Allocations of marital status for persons under 15 years old are not included in "Persons with one or sore items allocated."
- 21 "Year-round housing units with one or more housing items allocated" include allocations of "Units at address, ""Access," "Plumbing facilities," "Boome," "Tenure," "Condominium status," "Acreage of property," "Commercial establish-

ment or medical office," "Value" or "Price asked," "Contract rent" or "Nent asked," "Vacancy indicator," "Vacancy status," "Boarded up status," and "Duration of vacancy."

22 In this matrix, "With cash rent" and "No cash rent," are presented for all renter-occupied bousing units. Contract rent is tabulated for specified renter-occupied housing units (see footnote 12).

HOW TO USE THE DATA DICTIONARY

The data dictionary contains complete information regarding geographic codes, table information, and a detailed table layout. The following is an outline of information provided in both the geographic and table identification portions of the file.

Geographic Identification.

The first line of each geographic identification variable gives the name, size/scale, begin position, relative begin position, and the variable label. Following those items, on subsequent lines, are any applicable notes and value codes. Each of these items is defined below.

- 1. Name. This is an arbitrarily assigned 8-character identifier. It may be a mnemonic such as "STATE" or "EDNUMBER", or a sequential identifier such as "TAB1", "TAB2", etc.
- 2. <u>Size/Scale</u>. The size of a data item is given in characters. The scale of a data item is given in powers of 10. Implied decimals or multipliers (in powers of ten only) are indicated by a "-" or a "+" followed by a number. For example, 123.45 would appear on the data tape as 12345, and the size/scale value would be 5/-2. A number recorded in thousands (12,345,000 for example) would appear on the data tape as 12345 and the size/scale value would be 5/+3. Scale factors which are not a power of ten are identified in the notes following the description and in the footnotes.
- 3. <u>Begin</u>. This is the location in the data record of the first character of the data item.
- 4. <u>Relative Begin</u>. This value indicates the beginning location of a data item within the segment files with segmented records. For example, STF 1 has a census logical record length of 3276 characters which is segmented into two segments of 1638 characters each. The data item beginning in position 1639 of the census logical record would have a relative begin value of 1.
- 5. <u>Data Type</u>. The data type indicates whether the data item is alphanumeric (A) or numeric (N).
- 6. <u>Description</u>. Following the Data Type is a description of the data item. This heading is not labeled on the data dictionary. This section also provides any relevant notes or footnote references. In addition, any value codes necessary for the data item are listed and labeled here.

Table Identification.

The documentation of tables begins with the name, size/scale, begin position, relative begin position for the table, data type, and the number of cells. This information is followed by the table title, applicable suppression flags, universe definition, applicable footnotes, stratifier identification, and a listing of the cells. These items are defined below.

Table Identification.

The documentation of tables begins with the name, size/scale, begin position, relative begin position for the table, data type, and the number of cells. This information is followed by the table title, applicable suppression flags, universe definition, applicable footnotes, stratifier identification, and a listing of the cells. These items are defined below.

Table Title. The title of the table identifies the stratifiers used in the table, and in parentheses following each stratifier the number of categories for that stratifier. For example, this title indicates that there are two categories of tenure and five categories of race of householder identified in the table.

Suppression Flags. This section of the table documentation identifies by name any applicable suppression flags and the cells to which they apply.

Universe. The universe identifies the unit of observation for the table. For example, the cells in this table are counts of occupied housing units.

Footnotes. This section identifies any footnotes, listed at the end of the data dictionary, which apply to the table.

Stratifiers. This section lists the stratifiers used in the table, in the order that they appear on the data tape. For example, this table begins with the first category of rooms cross classified by the seven value categories. This is followed by the five remaining categories of rooms, each of which is cross classified by the seven categories of value. Headers representing stratifiers are followed by a colon and are not to be counted as cells. TABA28 ROOMS (6) BY VALUE (7)

SUPFLG05 applies to all cells

UNIVERSE: Specified Owner-Occupied Noncondominium Housing Units

See FOOTNOTE 11

The STRATIFIERS ARE:

ROOMS BY VALUE

- 1 To 3 Rooms: Less Than \$10,000 \$10,000 To \$29,999 \$30,000 To \$49,999 \$50,000 To \$79,999 \$80,000 To \$99,999 \$100,000 To \$149,999 \$150,000 Or More 4 Rooms: Repeat Value (7)
- 5 Rooms: Repeat Value (7) 6 Rooms:
- Repeat Value (7) 7 Rooms:
- Repeat Value (7) 8 Or More Rooms:
 - Repeat Value (7)

<u>Calculating the Location of Cells in STF 2</u>

The location of the beginning character position for the first cell in each table is indicated in the "Begin" column. The begin position for succeeding cells can be calculated by the following method.

Begin position of first cell +	Size of each cell	x Number of previous cells in table	Begin position of desired cell

Example 1. Location of Begin Position for Condominium

NAME	SIZE/ SCALE	BEGIN	RELATIVE BEGIN	DATA TYPE	NUMBER OF CELLS
TABLE A43 (TABA43)	10	8485	661	N	2

AGGREGATE PRICE ASKED BY CONDOMINIUM (2) THIS TABLE HAS NO SUPPRESSION UNIVERSE: SPECIFIED VACANT-FOR-SALE ONLY HOUSING UNITS

SEE FOOTNOTE 8 11 13

NONCONDOMINIUM (cell 1) CONDOMINIUM (cell 2)

(848	5) +		x (1)] ·	. (8495)	
Example 2.	househo	n of begi lder with g faciliti	no husband	or renter occu present, wi	pied, female th complete
NAME	SIZE/ SCALE	BEGIN	RELATIVE BEGIN	DATA Type	NUMBER OF CELLS

FOOTNOTE SECTION

2

THE COUNT OF HOUSEHOLDS IN THE COMPLETE COUNT TABULATIONS BY DEFINITION EQUALS THE NUMBER OF OCCUPTED HOUSING UNITS. FOR THIS DOCUMENTATION THE TERM "HOUSE-HOLD" IS USED UNLESS THE MATRIX IS STRATIFIED BY A HOUSING ITEM SUCH AS TENURE, PLUMBING FACILITIES, ETC., IN WHICH CASE, THE TERM "OCCUPTED HOUSING UNIT" IS USED.

"ASIAN AND PACIFIC ISLANDER," IN 100-PERCENT TABULATIONS, INCLUDES "JAPA-NESE," "CHINESE," "FILIPINO," "KOREAN," "ASIAN INDIAN," "VIETNAMESE," "HAMAITAN," "GUAMANIAN," AND "SAMOAN." ASIAN AND PACIFIC ISLANDER," IN SAMPLE TABULATONS, INCLUDES THE GROUPS LISTEE ABOVE AND THOSE PERSONS WHO HAVE A WRITE-IN ENTRY OF AN ASIAN AND PACIFIC ISLANDER GROUP IN THE "OTHER" CATEGORY.

02

FOR DATA TABULATED ON A 100-PERCENT BASIS, INCLUDES ALL PERSONS IN THE Category "Other." For Data Tabulated From The Sample, Excludes Those Person Who have a Write-IN" Entry of an Asian And Pacific Islander Group in The "Other" Category.

30

VACANT SEASONAL/MIGRATORY UNITS ARE EX-Cluded From All Matrices except as Noted specifically in the documentation

Š

00

- THIS MATRIX CAN BE USED TO DERIVE DATA BASED ON THE 1970 "HOUSEHOLD HEAD" CONCEPT. 1980 HOUSEHOLD HEADS PRIMARLY THE 1970 HOUSEHOLD HEADS PRIMARLY WHERE THE WIFE IN A MARRIED-COUPLE FAMILY WAS LISTED AS THE "PERSON IN COLUMN 1" ON THE QUESTIONNAIRE. IN 1970 THE HUSBAND WAS AUTOMATICALLY ASSUMED TO BE THE "HEAD" OF SUCH A FAMILY. THEREFORE, TO COMPUTE "AGE OF HEAD" FOR MARRIED-COUPLE FAMILLS, ADD THE DISTRIBUTION OF MALE HOUSE-HOLDERS TO THE DISTRIBUTION OF MALE SPOUSES.
- TABULATIONS OF "PERSONS IN HOUSEHOLD" Based on 100-percent data by definition are the same as tabulations of "Persons

98

STF2 DATA DICTIONARY 01/18/82 IN UNIT." THE PHRASE "PERSONS IN HOUSE-HOLD" IS USED UNLESS THE MATRIX IS STRATIFIED BY A HOUSING ITEM SUCH AS TENURE, PLUMBING FACILLITIES, ETC., IN WHICH CASE THE PHRASE "PERSONS IN UNIT" IS USED. TABULATIONS OF "PERSONS IN UNIT" HOUSEHOLDS" AND "PERSONS IN UNIT" BASED ON SAMPLE DATA ARE NOT NECESSARILY THE SAME BECAUSE OF DIFFERENCES IN THE PROCEDURES USED TO INFLATE SAMPLE POPULATION AND HOUSING DATA.

LACKING COMPLETE PLUMBING (FACILITIE FOR EXCLUSIVE USE INCLUDES: COMPLET PLUMBING (FACILITIES) BUT USED BY ANOTHER HOUSEHOLD, SOME BUT NOT ALL PLUMBING FACILITIES, OR NO PLUMBING FACILITIES.

5

80

THIS AGGREGATE, ALONG WITH THE RELEVANT COUNT, WILL PERMIT THE COMPUTATION OF A MEAN. FOR EXAMPLE, THE AGGREGATE VALUE FOR SPECIFIED OWNER-OCCUPIED NON-CONDOMINIUM UNITS WILL YIELD THE MEAN VALUE WHEN DIVIDED BY THE COUNT OF SPECIFIED OWNER-OCCUPIED NONCONDOMINIUM UNITS, AND THE AGGREGATE ROOMS FOR OCCUPIED AND VACANT YEAR-ROUND UNITS DIVIDED BY THE COUNT OF OCCUPIED AND VACANT YEAR-ROUND UNITS YIELDS MEAN VACANT YEAR-ROUND UNITS YIELDS MEAN ROOMS. (SEE FOOTNOTE 13 PRIOR TO COMPUTING MEAN VALUE OR PRICE ASKED).

HOUSEHOLDS MAY BE COUNTED MORE THAN ONCE In this tabulation.

> 6 0

10

"NONRELATIVES" INCLUDE THE QUESTIONNAIRE Categories: "Roomer, Boarder," "Parther, Roommate," "Paid Employee," and "Other Nonrelative." Tabulations of "Nonrelatives" include all categories Not shown separately in the Matrix.

VALUE AND PRICE ASKED ARE TABULATED Separately for noncondominium and Condominium units.

11

THE NONCONDOMINIUM VALUE DISTRIBUTION IS RESTRICTED TO CERTAIN KINDS OF "OWNER-Occupted" UNITS: THE NONCONDOMINIUM PRICE ASKED DISTRIBUTION IS RESTRICTED TO CERTAIN KINDS OF "VACANT-FOR-SALE-ONLY" UNITS. THE FOLLOWING ARE EXCLUDED FROM THE TABULATIONS ON VALUE AND PRICE ASKED FOR NONCONDOMINIUM UNITS:

- AN ADDRESS WITH TWO 1 L **STIRU** ż
 - 21 I N I
 - 10 OR MORE ACRE ທຸທ
- C. UNITS WITH A COMMERICAL ESTA LISHMENT OR MEDICAL OFFICE ON THE PROPERTY D. MOBILE HOMES OR TRAILERS

CONDOMINIUM VALUE DISTRIBUTION JLATED FOR ALL "OWNER-OCCUPTED" DOMINIUM UNITS; THE CONDOMINIUM ED DISTRIBUTION IS TABULATED FOF CANT-FOR-SALE-ONLY" CONDOMINIUM TABULATED FOR ALL "00 CONDOMINIUM UNITS; TH ASKED DISTRIBUTION IS "VACANT-FOR-SALE-ONLY H

12

WRENTER OCCUPTED" UNITS EXCEPT ONE-FAMILY HOUSES ON A PROPERTY OF 10 OR MORE ACRES. ON A PROPERTY OF 10 OR MORE ACRES. RENT ASKED IS TABULATED FOR ALL "VACANT-FOR-RENT" UNITS EXCEPT ONE-FAMILY HOUSES ON A PROPERTY OF 10 OR MORE ACRES. UNITS TABULATED IN T "NO CASH RENT" CATEGORY ARE ALL OCCUPTED HOUSING UNITS REPORTED AS "NO CASH RENT" EXCEPT ONE-FAMILY HOUSES ON 10 OR MORE ACRES. CONTRACT RENT IS TABULATED FOR

ш

- PRICE Value MULTIPLY THE AGGREGATE VALUE AND PRIC Asked by \$250 to obtain the true valu or price Asked. The tabulation was scaled by a factor of \$250 for tally PURPOSES.
- **QUES** ACANT HOUSING UNATES: "FOK KENT, OT FIONNNAIRE CATEGORIES: "FOK KENT, NOT "FOR SALE ONLY," "RENTED OR SOLD, NOT "FOR SALE ONLY," "RENTED OR SOLD, NOT "ACTINITED," "HELD FOR OCCASIONAL USE," "ACTINITED," "HELD FOR OCCASIONAL USE," AND "OTHER VACANT." TABULATIONS OF "OTHER VACANTS" INCLUDE ALL CATEGORI NOT SHOWN SEPARATELY IN THE MATRIX.
- CHILD SON, DAUGHTER, STEPCHILD, OR ADOPTED CHILD OF THE HOUSEHOLDER. AN "OWN CHIL OF HOUSEHOLDER" IS A NEVER-MARRIED CHILD UNDER 13 YEARS OF AGE WHO IS A SON, DAUGHTER, STEPCHILD, OR ADOPTED CHILDRENT INCLUDE NOT ONLY OWN CHILDREN BUT ALSO ALL OTHER FAMILY MEMBERS, RE-ANY "NOHRELATIVE" CATEGO F MARITAL STATUS, WHO ARE Ears old, except the House INCLUDES STER CHILDR HOUSEHOLDER Ē SPOUSE. 50 NCLUDED I 2 "CHILD UNDER 18 Holder or **GARDLES**

5

5

STF2 DATA DICTIONARY 01/18/82 Relatives include HouseHolder, Spouse and the questionnaire categories: "Son/Daughter," "Brother/Sister," "Father/Mother," and "Other relative." Tabulations of "Other relatives" include all categories Not Shown Sepaately in the Matrix.

16

HOUSEHOLDERS AND SPOUSES MUST BE 15 Years old or over.

17

13

- FAMILY HOUSEHOLDS MUST HAVE 2 OR MORE Persons; The Category of "I Person" IN FAMILY HOUSEHOLDS WILL ALWAYS CON-TAIN A ZERO.
- IN THIS MATRIX, PERSONS ARE Classified by the race and Spanish origin of the householder.

19

20

ALLOCATIONS OF MARITAL STATUS For Persons under 15 years old Are not included in "Persons With one or more items Allocated." "YEAR-ROUND HOUSING UNITS WITH ONE OR MORE HOUSING ITEMS ALLOCATED" INCLUDES ALLOCATIONS OF "UNITS AT ADDRESS," "ACCESS," "TEUNBING FACILITIES," "ROOMS," "TENURE," "CONDOMINIUN STATUS," "ACREAGE OF PROPERTY," "COMMERCIAL ESTABLISH-MENT OR MEDICAL OFFICE," "VALUE" OR "PRICE ASKED," "VACANCY INDICATOR," "VACANCY STATUS," "BOARDED UP STATUS," AND "DURATION OF VACANCY."

IN THIS MATRIX, "WITH CASH RENT" AND "NO CASH RENT," ARE PRESENTED FOR ALL RENTER-OCCUPIED HOUSING UNITS. CONTRACT RENT IS TABULA-TED FOR SPECIFIED RENTER-OCCUPIED HOUSING UNITS (SEE FOOTNOTE 12).

"PRECEDING PAGE BLANK - NOT FILMED"

PART II

Information Applicable to Summary Tape Files 1-5

"PRECEDING PAGE BLANK - NOT FILMED"

OVERVIEW

1980 Census Summary Tape Program

Computer-readable data from the 1980 census include both summary data and microdata. Summary data include Summary Tape Files (STF's) 1 to 5, which are generally comparable to the First Count through Sixth Count files from the 1970 census. In addition to the files in the STF series, other summary data released by the Bureau include a P.L. 94-171 Population Counts file for use in reapportionment/redistricting (released in February/March, 1981) and the Master Area Reference File which provides geographic items from STF 1 and selected population and housing items (individual State files being released as of September 1981). All of these files contain data summarized to various levels of geography. Microdata files, on the other hand, contain disclosurefree household and person records from the census. These files are similar to the 1970 Public Use Sample files and will be available some time after the release of STF 4.

Content and Geographic Coverage of Summary Tape Files

Summary Tape Files vary by summary level of geography, detail of information, and whether they include 100-percent or sample data. STF's 1 and 2 provide data based on the set of census questions asked of all persons and housing units. These data are 100-percent data. STF's 3, 4, and 5 are based on sample data. These data are estimates based on the responses of a sample of the population and housing units and contain more extensive housing and population information. In 1980, the sampling rate was 1 in 2 in governmental units estimated to have less than 2,500 inhabitants and 1 in 6 elsewhere. Overall the sampling rate was approximately 1 in 5. The Bureau's 1977 population estimates were used to determine the sampling rate for a given area.

The geographic detail of STF 1 is the maximum possible detail available from the census: data for individual blocks in blocknumbered areas and for enumeration districts outside block-numbered areas. The lowest level of geography provided by STF 2 is census tract, or minor civil division/census county division (MCD/CCD) and places of 1,000 or more inhabitants in nontracted areas. The lowest level for STF 3 is the block group or enumeration district, while the smallest geographic unit for STF 4 is census tract, or MCD/CCD and places of 2,500 or more inhabitants in nontracted areas. STF 5's lowest geographic level is the standard metropolitan statistical area (SMSA), central city(ies), other places of 50,000 or more inhabitants, and counties of 50,000 or more inhabitants. Figure 11 on the following page details the geographic levels in each Summary Tape File.

STF's 1 to 4 each consist of multiple files labelled A, B, and C. Each file features specific levels of geography. Figure 11 details the geographic levels on each STF, except for STF's 3B, 1D, and 3D which are described in footnotes 4 and 5 for figure 11.

For comparison purposes, STF 1 is similar in subject matter and geographic detail to the First and Third Count files for 1970. STF's

FDOTNOTE SECTION

10

STF2

THE COUNT OF HOUSEHDLDS IN THE COMPLETE-COUNT TABULATIONS BY DEFINITION EQUALS THE NUMBER OF OCCUPTED HOUSING UNITS. FOR THIS DOCUMENTATION THE TERM "HOUSE-HOLD" IS USED UNLESS THE MATRIX IS STRATIFIED BY A HOUSING ITEM SUCH AS TENURE, PLUMBING FACILITIES, ETC., IN WHICH CASE, THE TERM "OCCUPIED HOUSING UNIT" IS USED. "ASIAN AND PACIFIC ISLANDER," IN 100-PERCENT TABULATIONS, INCLUDES "JAPA-NESE," "CHINESE," "FILIPINO," "KOREAN," "ASIAN INDIAH," "VIETNAMESE," " "HAWAITAN," "GUAMANIAN," AND "SAMOAN." ASIAN AND PACIFIC ISLANDER," IN SAMPLE TABULATIONS, INCLUDES THE GROUPS LISTED ABOVE AND THOSE PERSONS WHO HAVE A WRITE-IN ENTRY OF AN ASIAM AND PACIFIC ISLANDER GROUP IN THE "OTHER" CATEGORY.

00

FOR DATA TABULATED DN A 100-PERCENT BASIS, INCLUDES ALL PERSONS IN THE Category "Other." For data tabulated From the sample, excludes those persons WHO have a write-in entry of an asian and pacific islander group in the "Other" category.

20

VACANT SEASOMAL/MIGRATORY UNITS ARE EX-Cluded From All Matrices except as Noted Specifically in the Documentation.

50

02

- THIS MATRIX CAN BE USED TO DERIVE DATA BASED ON THE 1970 "HOUSEHOLD HEAD" CONCEPT. 1980 HOUSEHOLD ERS DIFFER FROM THE 1970 HOUSEHOLD HEADS PRIMARILY WHERE THE WIFE IN A MARRIED-COUPLE FAMILY WAS LISTED AS THE "PERSON IN COLUMN 1" ON THE QUESTIONNAIRE. IN 1970 THE HUSBAND WAS AUTOMATICALY ASSUMED TO BE THE "HEAD" OF SUCH A FAMILY. THEREFORE, TO COMPUTE "AGE OF HEAD" FOR MARRIED-COUPLE FAMILIES, ADD THE DISTRIBUTION OF MALE HOUSE-HOLDERS TO THE DISTRIBUTION OF MALE SPOUSES.
- TABULATIONS OF "PERSONS IN HOUSEHOLD" BASED DN 100-PERCENT DATA BY DEFINITION Are the same as tabulations of "Persons

## FOOTNOTE SECTION

10

THE COUNT OF HOUSEHOLDS IN THE COMPLETE-COUNT TABULATIONS BY DEFINITION EQUALS THE NUMBER OF OCCUPIED HOUSING UNITS. For THIS DOCUMENTATION THE TERM "HOUSE-HOLD" IS USED UNLESS THE MATRIX IS STRATIFIED BY A HOUSING ITEM SUCH AS TENURE, PLUMBING FACILITIES, ETC., IN WHICH CASE, THE TERM "OCCUPIED HOUSING UNIT" IS USED.

"ASIAN AND PACIFIC ISLANDER," IN 100-PERCENT TABULATIONS, INCLUDES "JAPA-NESE," "CHINESE," "FILIPINO," "KOREAN," "ASIAN INDIAN," "VIETNAMESE," "KOREAN," "HAWAIIAN," "GUAMANIAN," AND "SAMDAN." ASIAN AND PACIFIC ISLANDER," IN SAMPLE TABULATIONS, INCLUDES THE GROUPS LISTED ABOUE AND THOSE PERSONS WHO HAVE A WRITE-IN ENTRY OF AN ASIAN AND PACIFIC ISLANDER GROUP IN THE "OTHER" CATEGORY.

20

FOR DATA TABULATED ON A 100-PERCENT BASIS, INCLUDES ALL PERSONS IN THE Category "Other." For Data tabulated From the sample, excludes those persons Who have a write-in entry of an Asian And Pacific Islander group in the "Other" category.

5

VACANT SEASONAL/MIGRATORY UNITS ARE EX-Cluded From All Matrices except as Noted specifically in the documentation

5

50

THIS MATRIX CAN BE USED TO DERIVE DATA BASED ON THE 1970 "HOUSEHOLD HEAD" CONCEPT. 1980 HOUSEHOLDERS DIFFER FRON THE 1970 HOUSEHOLD HEADS PRIMARILY WHERE THE WIFE IN A MARRIED-COUPLE FAMILY WAS LISTED AS THE "PERSON IN COLUMN 1" ON THE QUESTIONNAIRE. IN 1970 THE HUSBAND WAS AUTOMAILALY ASSUMED TO BE THE "HEAD" OF SUCH A FAMILY OR FILE "HEAD" OF SUCH A FAMILY THEREFORE. TO COMPUTE "AGE OF HEAD" FOR MARRIED-COUPLE FAMILIES, ADD THE DISTRIBUTION OF MALE HOUDERS TO THE DISTRIBUTION OF MALE SPOUSES.

TABULATIONS OF "PERSONS IN HOUSEHOLD" Based on 100-percent data by definition are the same as tabulations of "Persons

90

STF2 DATA DICTIONARY 01/18/82 IN UNIT." THE PHRASE "PERSONS IN HOUSE-HOLD" IS USED UNLESS THE MATRIX IS STRATIFIED BY A HOUSING ITEM SUCH AS TENURE, PLUMBING FACILITIES, ETC. IN WHICH CASE THE PHRASE "PERSONS IN UNIT" IS USED. TABULATIONS OF "PERSONS IN UNIT" HOUSEHOLDS" AND "PERSONS IN UNIT" BASED ON SAMPLE DATA ARE NOT NECESSARILY THE SAME BECAUSE OF DIFFERENCES IN THE PROCEDURES USED TO INFLATE SAMPLE

LACKING COMPLETE PLUMBING (FACILITIES) FOR EXCLUSIVE USE INCLUDES: COMPLETE PLUMBING (FACILITIES) BUT USED BY ANOTHER HOUSEHOLD, SOME BUT NOT ALL PLUMBING FACILITIES, OR NO PLUMBING FACILITIES.

50

80

THIS AGGREGATE, ALONG WITH THE RELEVANT COUNT, WILL PERMIT THE COMPUTATION OF A MEAN. FOR EXAMPLE, THE AGGREGATE VALUE FOR SPECIFIED OWNER-OCCUPIED NON-CONDOMINIUM UNITS WILL YIELD THE MEAN VALUE WHEN DIVIDED BY THE COUNT OF SPECIFIED OWNER-OCCUPIED NONCONDOMINIUM UNITS, AND THE AGGREGATE ROUND OM UNITS, AND THE AGGREGATE ROUND UNITS FOR OCCUPIED AND VACANT YEAR-ROUND UNITS DIVIDED BY THE COUNT OF OCCUPIED AND VACANT YEAR-ROUND UNITS YIELDS MEAN ROOMS. (SEE FOOTNOTE 13 FRIOR TO COMPUTING MEAN VALUE OR PRICE ASKED).

HOUSEHOLDS MAY BE COUNTED MORE THAN ONCE In this tabulation.

60

2

"NONRELATIVES" INCLUDE THE QUESTIONNAIRE CATEGORIES: "ROOMER, BUARDER," "PARINER, ROOMMATE," "PAID EMPLOYEE," and "Other Nonrelative." Tabulations of "Nonrelatives" include all categories Not shown separately in the Matrix.

VALUE AND PRICE ASKED ARE TABULATED Separately for noncondominium and condominium units.

1

THE NONCONDOMINIUM VALUE DISTRIBUTION IS RESTRICTED TO CERTAIN KINDS OF "DUNER-Occupted" UNITS; THE NONCONDOMINIUM PRICE ASKED DISTRIBUTION IS RESTRICTED TO CERTAIN KINDS OF "VACANT-FOR-SALE-ONLY" UNITS. THE FOLLOWING ARE EXCLUDED FROM THE TABULATIONS ON VALUE AND PRICE ASKED FOR NONCONDOMINIUM UNITS:

PAGE 109

"PRECEDING PAGE BLANK - NOT FILMED"

PART II

Information Applicable to Summary Tape Files 1-5

.

# "PRECEDING PAGE BLANK - NOT FILMED"

#### OVERVIEW

#### 1980 Census Summary Tape Program

Computer-readable data from the 1980 census include both summary data and microdata. Summary data include Summary Tape Files (STF's) 1 to 5, which are generally comparable to the First Count through Sixth Count files from the 1970 census. In addition to the files in the STF series, other summary data released by the Bureau include a P.L. 94-171 Population Counts file for use in reapportionment/redistricting (released in February/March, 1981) and the Master Area Reference File which provides geographic items from STF 1 and selected population and housing items (individual State files being released as of September 1981). All of these files contain data summarized to various levels of geography. Microdata files, on the other hand, contain disclosurefree household and person records from the census. These files are similar to the 1970 Public Use Sample files and will be available some time after the release of STF 4.

# Content and Geographic Coverage of Summary Tape Files

Summary Tape Files vary by summary level of geography, detail of information, and whether they include 100-percent or sample data. STF's 1 and 2 provide data based on the set of census questions asked of all persons and housing units. These data are 100-percent data. STF's 3, 4, and 5 are based on sample data. These data are estimates based on the responses of a sample of the population and housing units and contain more extensive housing and population information. In 1980, the sampling rate was 1 in 2 in governmental units estimated to have less than 2,500 inhabitants and 1 in 6 elsewhere. Overall the sampling rate was approximately 1 in 5. The Bureau's 1977 population estimates were used to determine the sampling rate for a given area.

The geographic detail of STF 1 is the maximum possible detail data for individual blocks in blockavailable from the census: numbered areas and for enumeration districts outside block-numbered areas. The lowest level of geography provided by STF 2 is census tract, or minor civil division/census county division (MCD/CCD) and places of 1,000 or more inhabitants in nontracted areas. The lowest level for STF 3 is the block group or enumeration district, while the smallest geographic unit for STF 4 is census tract, or MCD/CCD and places of 2,500 or more inhabitants in nontracted areas. STF 5's lowest geographic level is the standard metropolitan statistical area (SMSA), central city(ies), other places of 50,000 or more inhabitants, and counties of 50,000 or more inhabitants. Figure 11 on the following page details the geographic levels in each Summary Tape File.

STF's 1 to 4 each consist of multiple files labelled A, B, and C. Each file features specific levels of geography. Figure 11 details the geographic levels on each STF, except for STF's 3B, 1D, and 3D which are described in footnotes 4 and 5 for figure 11.

For comparison purposes, STF 1 is similar in subject matter and geographic detail to the First and Third Count files for 1970. STF's

3/ Multiple summary level codes for a Summary Area indicate a series of very similar summary levels which are presented in identical STF files. A specific listing is shown below of summary levels which are grouped together from the chart. (A slash mark "/" is used to indicate "within.")

- Grouping 13, 14, 15, and 16: 13. Place/MCD (CCD)/County/State 14. Tract (BNA)/Place/MCD (CCD)/County/State 15. BG/Tract (BNA)/Place/MCD (CCD)/County/State

  - 16. ED/Tract/Place/MCD (CCD)/County/State

# Grouping 18, 19, 20, 21, and 22: 18. MCD (CCD)/County/SMSA/State

- Place/MCD (CCD)/County/SMSA/State
   Tract (BNA)/Place/MCD (CCD)/County/SMSA/State
   Block/Tract (BNA)/Place/MCD (CCD)/County/SMSA/State
- 22. ED/Tract/Place/MCD (CCD)/County/SMSA/State

- Grouping 23 and 24: 23. Place/County/SMSA/State 23.
  - 24. Tract (BNA)/Place/County/SMSA/State

Grouping 25 and 26: 25. Block/Tract (BNA)/Place/County/SMSA/State 26. ED/Tract/Place/County/SMSA/State

- Grouping 30 and 31: 30. Indian Reservations and Alaska Native villages by State 31. Indian Reservations and Alaska Native villages by County within State
- 4/ STF's 1D and 3D feature districts of the 98th Congress (i.e., reflecting post-1980 redistricting), counties, and places of 10,000 or more inhabitants (or the parts thereof) within congressional district.
- 5/ STF 3B will feature records for 5-digit ZIP code areas and for ZIP parts within county or SMSA if the ZIP crosses those boundaries. This file will be sold by a private consortium which is funding its creation. (During the first 18 months after its release, anyone wishing to purchase the file directly from the Census Bureau would be required to pay a pro-rata share of the original production costs, which in turn would be refunded to the consortium. After the 18-month cost recovery period, these files will be available for the cost of reproduction.)

2 and 4 are roughly comparable to the 1970 Second and Fourth Counts, respectively. STF 3 is comparable to the 1970 Fifth Count, while STF 5 corresponds to the 1970 Sixth Count. To summarize, STF 1 contains more detailed geography but less subject matter detail than STF 2. Similarly, STF 3 contains more detailed geography but less subject matter detail than STF 4. STF's 1 and 2 contain complete count data, while STF's 3 and 4 contain sample estimates. Finally, STF 5 contains sample estimates aggregated to a higher level of geography than the other files, but which are presented in the most subject matter detail.

#### 1980 Census Maps

Users may need certain types of maps for the geographic area(s) they are extracting from the file(s). To determine which maps best define the geographic area(s), compare the geographic coverage of each file (see Appendix B) with the description of each type of 1980 census map (see below).

The maps used in conjunction with the above summary tape files consist of five*basic types: county maps, place maps, place-andvicinity maps, Indian Reservation maps, and Metropolitan Map Series (MMS) or Vicinity Map Series (VMS). Ordering information for these maps may be obtained from Data User Services Division, Customer Services (Maps), Bureau of the Census, Washington, D.C. 20233.

All five map types have several characteristics in common:

- --To improve legibility, most 1980 maps are at a larger scale than were the comparable 1970 maps.
- --Symbols used for the various boundaries are consistent for all five types of maps.
- --Names, identifying numbers, and boundaries are shown where appropriate on all maps for counties and equivalent entities, minor civil divisions (MCD's) or census county divisions (CCD's), places, American Indian reservations and Alaska Native villages, census tracts or block numbering areas (BNA's) where present, enumeration districts (ED's) (in those areas which are not block numbered), and blocks.

--All maps show metric, feet, and mile scales.

--All maps containing block-numbered areas will be available from the U.S. Government Printing Office.

The following paragraphs present a brief description of each type of map. The inclusion of the maps with various 1980 census products reflect the Bureau's plans as of December 1981.

<u>County Maps</u>. County maps are the backbone of the Bureau's map coverage. Theoretically, with a complete set of these maps the overall picture of the census geographic framework for the entire United States and its possessions is shown. Most maps in the county series are at a scale of 1 inch:1 mile. Most county maps are created 2 and 4 are roughly comparable to the 1970 Second and Fourth Counts, respectively. STF 3 is comparable to the 1970 Fifth Count, while STF 5 corresponds to the 1970 Sixth Count. To summarize, STF 1 contains more detailed geography but less subject matter detail than STF 2. Similarly, STF 3 contains more detailed geography but less subject matter detail than STF 4. STF's 1 and 2 contain complete count data, while STF's 3 and 4 contain sample estimates. Finally, STF 5 contains sample estimates aggregated to a higher level of geography than the other files, but which are presented in the most subject matter detail.

#### 1980 Census Maps

Users may need certain types of maps for the geographic area(s) they are extracting from the file(s). To determine which maps best define the geographic area(s), compare the geographic coverage of each file (see Appendix B) with the description of each type of 1980 census map (see below).

The maps used in conjunction with the above summary tape files consist of five basic types: county waps, place maps, place-andvicinity maps, Indian Reservation maps, and Metropolitan Map Series (MMS) or Vicinity Map Series (VMS). Ordering information for these maps may be obtained from Data User Services Division, Customer Services (Maps), Bureau of the Census, Washington, D.C. 20233.

All five map types have several characteristics in common:

- --To improve legibility, most 1980 maps are at a larger scale than were the comparable 1970 maps.
- --Symbols used for the various boundaries are consistent for all five types of maps.
- --Names, identifying numbers, and boundaries are shown where appropriate on all maps for counties and equivalent entities, minor civil divisions (MCD's) or census county divisions (CCD's), places, American Indian reservations and Alaska Native villages, census tracts or block numbering areas (BNA's) where present, enumeration districts (ED's) (in those areas which are not block numbered), and blocks.

--All maps show metric, feet, and mile scales.

--All maps containing block-numbered areas will be available from the U.S. Government Printing Office.

The following paragraphs present a brief description of each type of map. The inclusion of the maps with various 1980 census products reflect the Bureau's plans as of December 1981.

<u>County Maps</u>. County maps are the backbone of the Bureau's map coverage. Theoretically, with a complete set of these maps the overall picture of the census geographic framework for the entire United States and its possessions is shown. Most maps in the county series are at a scale of 1 inch:1 mile. Most county maps are created

by superimposing boundaries for most areas for which data are tabulated on base maps supplied by State transportation or highway departments. There are approximately 5,500 county map sheets for The following geographic area boundaries are defined on county 1980. maps where appropriate: State, county, minor civil divisions (MCD's) or census county divisions (CCD's), places, American Indian reservations, census tracts or block numbering areas (BNA's), and In addition, the enumeration districts (ED's) or numbered blocks. locations of Alaska Native villages are indicated. Counties which are totally covered by Metropolitan Map Sheets (MMS) do not have separate county maps.

Place Maps. For places not covered on MMS or VMS sheets where most of the development is contained within the corporate limits of a municipality or within the boundaries established for a census designated place (CDP), the Bureau uses place maps. The scale of the place maps varies from place to place. As with the county maps, most are created by superimposing boundaries for most areas for which data are tabulated on base maps supplied by local or State governments. On the county map, shading is added to indicate the area covered by the place map; i.e., the place map is regarded as an inset to the county There are about 12,300 place map sheets for 1980. The map. geographic area boundaries defined on place maps are the same as for county maps.

Place-and-Vicinity Maps. For places not covered on MMS or VMS sheets which have areas of development outside the corporate limits of 8 municipality or outside the boundaries established for a CDP, the Bureau uses place-and-vicinity maps. Also included in this category are maps of places which have parcels of land that are not part of the city but are completely surrounded by the city and where two or more places appear on the same map sheet. In all other respects, placeand-vicinity maps have the same characteristics as place maps. As with the place maps, all area covered by the place-and-vicinity map is shaded on the county map and the place-and-vicinity map is considered to be an inset to the county map. There are about 3,300 place-andvicinity map sheets for 1980. The geographic area boundaries defined on place-and-vicinity maps are the same as those specified for county maps.

Indian Reservation Maps. The Census Bureau developed separate maps for 18 American Indian reservations which could not be depicted adequately on county maps; these maps are very similar in format to county maps. There are approximately 75 American Indian reservation maps and these maps are special insets to the county maps. The geographic area boundaries defined on these maps are the same as those specified for the county maps.

<u>Metropolitan</u> <u>Map</u> <u>Series/Vicinity</u> <u>Map</u> <u>Series</u> (<u>MMS/VMS</u>). For the Nation's major built-up areas, the Bureau has developed its own maps to provide uniform coverage of the densely settled portions of the counties involved. These maps are referred to as the Metropolitan Map Series (MMS) when the maps cover SMSA counties and as the Vicinity Map Series (VMS) when the maps cover areas which are not in an SMSA. The predominant scale for the MMS and VMS is 1 inch:1,600 feet. In selected areas with very dense development, some sheets are at 1 inch:800 feet; conversely, some sparsely settled areas are mapped at 1 inch:3,200 feet. The MMS and VMS are considered to be insets to the county maps and the areas covered by MMS and VMS are shaded on county maps. There are about 10,400 MMS and VMS sheets for 1980. (In a few instances, these map sheets entirely cover a county, in which case no separate county map exists.) The geographic area boundaries defined on the MMS are the same as those specified for county maps, but also include urbanized areas.

In addition to the five types of maps described above, there are a number of "outline" maps (maps that do not show any data, only the areas to which data can be related) that are prepared and published as part of the various report series. As was the case with the maps previously described, the maps included in the printed reports share common characteristics. Both metric and mile scales are shown. Map scale and content are similar to 1970 except where noted below; however, presentation has been improved to make the maps more readable and consistent from series to series.

The County Subdivision Map Series consists of at least one map page for each State showing the names and boundaries for the State, each component county or equivalent entity, minor civil divisions (MCD's) or census county divisions (CCD's), and all places, both incorporated and census designated. For most States, the scale of the maps requires that they be presented in sections. For 1980, the boundaries and (not just the locations) of places with fewer than 2,500 inhabitants are shown for the first time. In addition, the name(s) of adjoining State(s) are shown along with a mark to indicate where the State boundaries intersect. These maps, which are based on the State base maps of the U.S. Geological Survey (USGS) National Mapping Program appear in PC80-1-A. Single-sheet versions of the county subdivision map series will be published at the USGS scale of 1:500,000 (1 inch equals about 8 miles) for all States except Alaska and the outlying areas, and may be fitted together to form multi-State maps. For those States in which American Indian reservations or Alaska Native villages are located, a special version of the county subdivision map showing these entities appears in PC80-1-B and HC80-1-A.

The Urbanized Area Outline Map Series consists of one or more map sheets for each urbanized area (UA) defined on the basis of the 1980 census results. The names and boundaries of all States, counties, MCD's/CCD's, and places on each map are shown, plus the extent of territory defined as "urbanized." These maps appear in PC80-1-A and HC80-1-A. In 1980, the report for each State containing part of a multi-State UA will include the map for the entire UA.

The State SCSA/SMSA Map Series shows county names and boundaries, names and locations of all places with a population of 25,000 or more or designated as the central city of an SMSA, and names and boundaries of standard consolidated statistical areas (SCSA's) and standard metropolitan statistical areas (SMSA's) in the State. For 1980, the name of the capital of the State is underlined. These maps appear in PC80-1-A, B, C, D; HC80-1-A, B; and HC80-2.

The <u>Census Tract</u> <u>Outline Map Series</u> covers each of the areas for which tracts have been defined in 1980. These maps show the boundaries and

inch:800 feet; conversely, some sparsely settled areas are mapped at 1 inch:3,200 feet. The MMS and VMS are considered to be insets to the county maps and the areas covered by MMS and VMS are shaded on county maps. There are about 10,400 MMS and VMS sheets for 1980. (In a few instances, these map sheets entirely cover a county, in which case no separate county map exists.) The geographic area boundaries defined on the MMS are the same as those specified for county maps, but also include urbanized areas.

In addition to the five types of maps described above, there are a number of "outline" maps (maps that do not show any data, only the areas to which data can be related) that are prepared and published as part of the various report series. As was the case with the maps previously described, the maps included in the printed reports share common characteristics. Both metric and mile scales are shown. Map scale and content are similar to 1970 except where noted below; however, presentation has been improved to make the maps more readable and consistent from series to series.

The County Subdivision Map Series consists of at least one map page for each State showing the names and boundaries for the State, each component county or equivalent entity, minor civil divisions (MCD's) or census county divisions (CCD's), and all places, both incorporated For most States, the scale of the maps and census designated. requires that they be presented in sections. For 1980, the boundaries (not just the locations) of places with fewer than 2,500 inhabitants are shown for the first time. In addition, the name(s) of adjoining State(s) are shown along with a mark to indicate where the State These maps, which are based on the State base boundaries intersect. maps of the U.S. Geological Survey (USGS) National Mapping Program Single-sheet versions of the county subdivision appear in PC80-1-A. map series will be published at the USGS scale of 1:500,000 (1 inch equals about 8 miles) for all States except Alaska and the outlying areas, and may be fitted together to form multi-State maps. For those States in which American Indian reservations or Alaska Native villages are located, a special version of the county subdivision map showing these entities appears in PC80-1-B and HC80-1-A.

The Urbanized Area Outline Map Series consists of one or more map sheets for each urbanized area (UA) defined on the basis of the 1980 census results. The names and boundaries of all States, counties, MCD's/CCD's, and places on each map are shown, plus the extent of territory defined as "urbanized." These maps appear in PC80-1-A and HC80-1-A. In 1980, the report for each State containing part of a multi-State UA will include the map for the entire UA.

The State SCSA/SMSA Map Series shows county names and boundaries, names and locations of all places with a population of 25,000 or more or designated as the central city of an SMSA, and names and boundaries of standard consolidated statistical areas (SCSA's) and standard metropolitan statistical areas (SMSA's) in the State. For 1980, the name of the capital of the State is underlined. These maps appear in PC80-1-A, B, C, D; HC80-1-A, B; and HC80-2.

The <u>Census Tract</u> <u>Outline</u> <u>Map Series</u> covers each of the areas for which tracts have been defined in 1980. These maps show the boundaries and

code identification numbers for each tract; the names of streets or other features used as census tract boundaries; and the names and boundaries for counties, MCD/CCD's, and all places (not just those over 25,000 as in 1970). Street detail within the tracts is not shown. Separate insets of larger scale than the base maps are included for densely developed areas; however, fewer insets are used than in 1970. Scale varies from map to map. For 1980, tract outline maps will be prepared for tracted counties outside SMSA's. These maps appear in PHC80-2 and also are available separately.

Map sets will be printed for all block-numbered areas, grouped by SMSA and the nonSMSA remainder of each State. In addition to printed copies of the county, place, place-and-vicinity, and Metropolitan Map Series/Vicinity Map Series (MMS/VMS) sheets having block-numbered there will be an index map depicting the extent of the blockareas, The SMSA Index to Block numbered area for the SMSA and State. Numbered Areas Maps will show the extent of the SMSA; county, MCD/CCD, and place names and boundaries; and the extent of blocknumbered area within the SMSA shown by means of shading. The State Index to Block-Numbered Areas Maps were prepared by superimposing the extent of all block-numbered areas in the State over the county This index map will also show the boundaries of the subdivision map. SMSA(s) in the State so that the reader can determine whether the data for any block-numbered area in the State are available with the SMSA tabulations or the remainder-of-State tabulations.

## Relevant Articles and Publications

The following is a list of reference materials available presently or expected to be available shortly which will provide additional information concerning the 1980 census.

<u>Census</u> '80 <u>Introduction to Products and Services</u>. This 13 page publication provides a general outline of information and data available from the 1980 census. Limited free copies are available from Data User Services Division, Customer Services (Publications), Bureau of the Census, Washington, D.C. 20233.

<u>1980</u> <u>Census</u> <u>Users'</u> <u>Guide</u>. This comprehensive guide to the 1980 census data will be available in 1982 through the Government Printing Office. The price has not yet been determined as of February 1982.

<u>1980</u> Census Update. This publication was issued quarterly from January, 1977 to July, 1981. The updates were intended to keep the data user current on the 1980 Census planning and preparatory activities. Back copies are available free of charge from Data User Services Division, Customer Services (Publications), Bureau of the Census, Washington, D.C. 20233.

Data User News. This monthly newsletter provides continuous reporting on Census Bureau programs and products. A subscription is available from the Government Printing Office for \$19 a year.

<u>Monthly</u> <u>Product</u> <u>Announcement</u>. This free announcement lists new products released each month from the Census Bureau. These products include publications, technical documentation, data files, published maps, and microfiche. To be added to the mailing list, contact Data User Services Division, Customer Services (Publications), Bureau of the Census, Washington, D.C. 20233. maps, and microfiche. ## TECHNICAL INFORMATION

#### Nonsampling Errors

Since 1980 population counts shown in this file were tabulated from the entries for persons on all questionnaires, these counts are not subject to sampling error. In any large-scale statistical operation such as a decennial census, human and mechanical errors do occur. These errors are commonly referred to as nonsampling errors. Such errors include failure to enumerate every household or person in the population, not obtaining all required information from respondents, obtaining incorrect or inconsistent information, and recording information incorrectly. Errors can also occur during the field review of the enumerators' work, the clerical handling of the census questionnaires, or the electronic processing of the questionnaires.

In an attempt to reduce various types of nonsampling errors in the 1980 census, a number of techniques were introduced on the basis of experience in previous censuses and in tests conducted prior to the census. These quality control and review measures were utilized throughout the data collection and processing phases of the census to minimize undercoverage of the population and housing units and to keep the errors at a minimum. As was done after the 1950, 1960, and 1970 censuses, there were programs at the conclusion of the 1980 census to measure various aspects of the quality achieved in the census. Reports on many aspects of the 1980 census evaluation program will be published as soon as the appropriate data are accumulated and analyzed.

A major component of the evaluation work is to ascertain, insofar as possible, the degree of completeness of the count of persons and housing units. The Census Bureau has estimates that the 1970 census did not count 2.5 percent of the population. For 1980, the Census Bureau's extensive evaluation program will encompass a number of different approaches to the task of estimating the coverage of the census. Although these studies have not been completed at the time of this file's release, preliminary estimates indicate that the rate of undercoverage in the 1980 census was reduced from 1970 census levels.

#### Editing and Allocation of Data Items

The objective of the processing operation is to produce a set of statistics that describes the population as accurately and clearly as possible. To meet this objective, certain unacceptable entries were edited.

Editing. In the field, questionnaires were reviewed for omissions and certain inconsistencies by a census clerk or an enumerator and, if necessary, a followup was made for missing information. In addition, a similar review of questionnaires was done in the central processing offices. As a rule, however, editing was performed by hand only when it could not be done effectively by machine.

As one of the first steps in editing, the configuration of marks on the questionnaire column was scanned electronically to determine whether it contained information for a person or merely spurious marks. If the column contained entries for at least two of the basic characteristics (relationship, sex, race, age, marital status, Spanish origin), the inference was made that the marks represented a person. In cases in which two or more basic characteristics were available for only a portion of the people in the unit, other information on the questionnaire provided by an enumerator was used to determine the total number of persons. Names were not used as a criterion of the presence of a person because the electronic scanning was unable to distinguish between a name and any other entry in the name space.

<u>Allocation</u>. Allocations, or assignments of acceptable codes in place of unacceptable entries, are needed most often when an entry for a given item is lacking or when the information reported for a person or housing unit on that item is inconsistent with other information for the person or housing unit. The usefulness of the data is considered to be enhanced through the assignment of acceptable codes in place of blanks or unacceptable entries.

For housing data, the assignment is based on related information reported for the housing unit or on information reported for a similar unit in the immediate neighborhood. For example, if tenure for an occupied unit is omitted but a rental amount is reported for that unit, the computer edits tenure to "rented for cash rent." On the other hand, if the unit is reported as rented but the amount of rent is missing, the computer assigns the rent from the preceding renter-occupied unit that had a rental amount reported.

The general procedure for changing unacceptable population entries is to assign an entry for a person that is consistent with entries for other persons with similar characteristics. Thus, a person who is reported as a 20-year old son of the householder but for whom marital status is not reported, is assigned the same marital status as that of the last son processed in the same age group. The allocation technique may be illustrated by the procedure used in the assignment for unknown age. The process is carried out in the following steps:

- 1. The computer stores reported ages of persons by selected characteristics, including sex, relationship, marital status, and characteristics of other household members.
- 2. Each stored age is retained in the computer only until a person having the same set of characteristics and with age reported is processed through the computer in the edit operation. Then the age of this succeeding person is substituted for the age previously stored.

processing offices. As a rule, however, editing was performed by hand only when it could not be done effectively by machine.

As one of the first steps in editing, the configuration of marks on the questionnaire column was scanned electronically to determine whether it contained information for a person or merely spurious marks. If the column contained entries for at least two of the basic characteristics (relationship, sex, race, age, marital status, Spanish origin), the inference was made that the marks represented a person. In cases in which two or more basic characteristics were available for only a portion of the people in the unit, other information on the questionnaire provided by an enumerator was used to determine the total number of persons. Names were not used as a criterion of the presence of a person because the electronic scanning was unable to distinguish between a name and any other entry in the name space.

<u>Allocation</u>. Allocations, or assignments of acceptable codes in place of unacceptable entries, are needed most often when an entry for a given item is lacking or when the information reported for a person or housing unit on that item is inconsistent with other information for the person or housing unit. The usefulness of the data is considered to be enhanced through the assignment of acceptable codes in place of blanks or unacceptable entries.

For housing data, the assignment is based on related information reported for the housing unit or on information reported for a similar unit in the immediate neighborhood. For example, if tenure for an occupied unit is omitted but a rental amount is reported for that unit, the computer edits tenure to "rented for cash rent." On the other hand, if the unit is reported as rented but the amount of rent is missing, the computer assigns the rent from the preceding renter-occupied unit that had a rental amount reported.

The general procedure for changing unacceptable population entries is to assign an entry for a person that is consistent with entries for other persons with similar characteristics. Thus, a person who is reported as a 20-year old son of the householder but for whom marital status is not reported, is assigned the same marital status as that of the last son processed in the same age group. The allocation technique may be illustrated by the procedure used in the assignment for unknown age. The process is carried out in the following steps:

- 1. The computer stores reported ages of persons by selected characteristics, including sex, relationship, marital status, and characteristics of other household members.
- 2. Each stored age is retained in the computer only until a person having the same set of characteristics and with age reported is processed through the computer in the edit operation. Then the age of this succeeding person is substituted for the age previously stored.

3. When a person processed has no report of age, or the entry is unacceptable, the age assigned to him or her is then obtained from the last person who has the same set of characteristics.

<u>Substitution</u>. The editing process also includes another type of correction, namely the assignment of a full set of characteristics for a person or a housing unit. The assignment of the full set of housing characteristics occurs when there is no housing information available. If the housing unit is determined to be occupied, the housing characteristics are assigned from the previously processed occupied unit. If the housing unit is vacant, the housing characteristics are assigned from the previously processed vacant unit.

The assignment of a full set of characteristics for a person in a household containing no information for all or most of the people, although persons were known to be present, is done in the following manner. A previously processed household of the same size is selected as a substitute and the full set of population characteristics for each substituted person is duplicated. These duplications fall into two classes: (1) "persons substituted due to noninterview," e.g., a housing unit indicated as occupied but the occupants are not listed on the questionnaire, and (2) "persons substituted due to mechanical failure," e.g., where the questionnaire page on which persons are listed was not properly microfilmed.

The editing process ensures that the distribution of characteristics for persons and housing units assigned by the computer corresponds closely to the distribution of characteristics for persons and housing units actually reported in the census. Before the advent of the computer, this type of process was not feasible and the distribution of characteristics to be used for assignment purposes was drawn from the preceding census or another source.

Specific tolerances are established for the number of computer allocations and substitutions that are permitted. If the number of corrections is beyond tolerance, the questionnaires in which the errors occurred are clerically reviewed. If it is found that the resulted from damaged questionnaires, from improper errors microfilming, from faulty reading by FOSDIC 1/ of undamaged from other types of machine failure, the questionnaires, or questionnaires are reprocessed.

1/ Film Optical Sensing Device for Input to Computers.

# "PRECEDING PAGE BLANK - NOT FILMED" GLOSSARY

### Complete Count Concept Definitions

The following definitions were taken from the <u>1980 Census Users'</u> <u>Guide.</u> Since the items described here are only those which appear in STF 2, there may be references to other terms which are not defined in this glossary. A complete glossary will be available in the <u>Users'</u> <u>Guide</u>, scheduled to be published in early 1982.

AGE. Age at last birthday, i.e., number of completed years from birth to April 1, 1980, based on replies to a question on month and year of birth. This item was asked on a complete-count basis.

Because of the central importance of the data on age, the question contains redundancies. The age entry on the basic tape record is derived from the FOSDIC entries of quarter and year of birth. For those persons who do not provide this information but who do provide "age at last birthday," the census enumerator or clerk uses an equivalency table to mark the appropriate FOSDIC circles. The item "age at last birthday" is used only secondarily because of the tendency of some people, in reporting their ages, to round off to "0" or "5" (and to report even rather than odd numbers). The write-in entries of month and year of birth are requested because some people have difficulty with (and therefore skip) the FOSDIC marking system in this question.

Age is tabulated by single years of age and by many different groupings, such as five-year age groups. Basic records identify single years (and quarter years on sample basic records) to 112.

<u>Median</u> age. Calculated as the value which divides the age distribution into two equal parts, one-half of the cases falling below this value, one-half above. Median age is computed from the age intervals or groupings shown in the particular tabulation, and thus a median based on a less detailed distribution may differ slightly from a corresponding median for the same population based on a more detailed distribution. If the median falls in the terminal category, e.g., 75 years and over, the median is shown as the initial age of the category with a plus sign, e.g., 75+.

Limitations: In previous censuses, undercoverage of the population has been associated with age. Young adults, especially Black males, were missed at a higher rate than other segments of the population.

<u>Historical</u> comparability: Age data have been collected in each census since 1790. Counts in 1970 for persons 100 years old and over were substantially overstated.

See also: AGE OF HOUSEHOLDER

AGE OF HOUSEHOLDER. Derived from the age responses for the householders. (See the definition of householder under Household Relationship). Age and household relationship were determined on a complete-count basis.

The most frequent applications of age of householder in 1980 tabulations involve only two categories: under 65 years old, and 65 years and over. More detailed categories appear among the housing tabulations, for example: less than 25 years, 25 to 29, 30 to 34, 35 to 44, 45 to 59, 60 to 64, and 65 years and over. Age of householder is also derivable from age tabulations cross-classified by household relationship (STF 2). Age of householder is derivable from basic records in single years 15 to 112.

Historical comparability: In 1970 and previous censuses, age of head was tabulated instead of age of householder (See Household Relationship).

ALASKA NATIVE VILLAGES. Alaska Native villages constitute tribes, bands, clans, groups, villages, communities, or associations in Alaska which were listed in sections 11 and 16 of the Alaska Native Claims Settlement Act, Public Law 92-203, or which met the requirements of the Act and which the Secretary of Interior determined were, on the 1970 census enumeration date (April 1), composed of 25 or more Alaska Natives. This list was reviewed and updated for the Census Bureau by the State of Alaska prior to the 1980 census, to specifically identify only those entities that were legally recognized as Alaska Native villages.

Data summaries for Alaska Native villages are included in STF's 2B, 2C, 4B, and 4C, and reports PC80-1-B and -C and HC80-1-A and -B. Population and housing counts for Alaska Native villages are scheduled to be included in a supplementary report (PC80-S1 series). In addition, a population subject report (PC80-2 series), featuring additional data on Alaska Native villages is also planned. Data for each Alaska Native village can be derived from MARF, STF 1A, and STF 3A by identifying the component ED(s), and summarizing the data should multiple ED's be involved. (NOTE: Eklutna Native Village is in a blocked area; therefore, data can be derived from block group (BG) summaries for the village.) Each Alaska Native village has been assigned a unique 3-digit code by the Bureau which appears in the reservation code field.

Alaska Native villages are identified on the Alaska subdivision maps in the PC80-1-B and HC80-1-A reports. Alaska Native villages are also shown on Metropolitan Map Series, place, and county maps. It should be noted that Alaska Native villages do not have boundaries that are defined by legal descriptions, and therefore the boundaries shown on the census maps are only indicative of the approximate extent of a village; for those that correspond to a city or census designated place, the limits of such a place are construed to coincide with the extent of the Alaska Native village. AGE OF HOUSEHOLDER. Derived from the age responses for the householders. (See the definition of householder under Household Relationship). Age and household relationship were determined on a complete-count basis.

The most frequent applications of age of householder in 1980 tabulations involve only two categories: under 65 years old, and 65 years and over. More detailed categories appear among the housing tabulations, for example: less than 25 years, 25 to 29, 30 to 34, 35 to 44, 45 to 59, 60 to 64, and 65 years and over. Age of householder is also derivable from age tabulations cross-classified by household relationship (STF 2). Age of householder is derivable from basic records in single years 15 to 112.

Historical comparability: In 1970 and previous censuses, age of head was tabulated instead of age of householder (See Household Relationship).

ALASKA NATIVE VILLAGES. Alaska Native villages constitute tribes, bands, clans, groups, villages, communities, or associations in Alaska which were listed in sections 11 and 16 of the Alaska Native Claims Settlement Act, Public Law 92-203, or which met the requirements of the Act and which the Secretary of Interior determined were, on the 1970 census enumeration date (April 1), composed of 25 or more Alaska Natives. This list was reviewed and updated for the Census Bureau by the State of Alaska prior to the 1980 census, to specifically identify only those entities that were legally recognized as Alaska Native villages.

Data summaries for Alaska Native villages are included in STF's 2B, 2C, 4B, and 4C, and reports PC80-1-B and -C and HC80-1-A and -B. Population and housing counts for Alaska Native villages are scheduled to be included in a supplementary report (PC80-S1 series). In addition, a population subject report (PC80-2 series), featuring additional data on Alaska Native villages is also planned. Data for each Alaska Native village can be derived from MARF, STF 1A, and STF 3A by identifying the component ED(s), and summarizing the data should multiple ED's be involved. (NOTE: Eklutna Native Village is in a blocked area; therefore, data can be derived from block group (BG) summaries for the village.) Each Alaska Native village has been assigned a unique 3-digit code by the Bureau which appears in the reservation code field.

Alaska Native villages are identified on the Alaska subdivision maps in the PC80-1-B and HC80-1-A reports. Alaska Native villages are also shown on Metropolitan Map Series, place, and county maps. It should be noted that Alaska Native villages do not have boundaries that are defined by legal descriptions, and therefore the boundaries shown on the census maps are only indicative of the approximate extent of a village; for those that correspond to a city or census designated place, the limits of such a place are construed to coincide with the extent of the Alaska Native village. Historical comparability: Data are not available from previous censuses for Alaska Native villages. Some cities and "unincorporated places" (referred to as "census designated places" in 1980) which were identified in the 1970 census may correspond to 1980 Alaska Native villages.

### ALEUT POPULATION. See RACE

# AMERICAN INDIAN POPULATION. See RACE

AMERICAN INDIAN RESERVATIONS. American Indian reservations are areas with boundaries established by treaty, statute, and/or executive or court order. The reservations and their boundaries were identified for the 1980 census by the Bureau of Indian Affairs (BIA) and State governments. Federal and State reservations are located in 33 States and may cross State, county, minor civil division/census county division, and place boundaries. In tabulations for reservations, tribal trust lands outside the boundaries of reservations (offreservation) are not included as part of the reservations (see below).

Preliminary evaluation of the 1980 census data suggest that counts for a few reservations may be subject to certain limitations or nonsampling errors. Although the various field and computer operations undergo a number of quality control checks to ensure accuracy of the data, available evidence indicates that nonsampling errors are substantial for a small number of reservations. For example, a few reservations have a relatively high substitution rate. These reservations have a "1" in position 23 on the tape which indicates that 20 percent or more of the persons or housing units on (For a fuller discussion of the reservations were substituted. "Technical Information" section in the nonsampling errors see the technical documentation. Additional evaluation of the counts for reservations will be done when more information is available and a fuller explanation will be presented in 1980 census special reports on the American Indian population.

Each American Indian reservation was assigned a unique 3-digit code by the Bureau. Enumeration districts (ED's) and block groups (BG's) and/or portions of BG's which are inside boundaries of reservations are designated with an "N" in the ED prefix field in tape files.

Data summaries for American Indian reservations are included in STF's 2B, 2C, 4B, and 4C, and reports PC80-1-B and -C and HC80-1-A and -B. Population and housing counts for reservations are scheduled to be included in a supplementary report (PC80-S1-1 series). Also, a population subject report (PC80-2 series) featuring additional data on American Indian reservations is planned. Summaries on tape and in PC80-1-B and HC80-1-A show data not only for the reservation totals, but also for parts of reservations that cross State or county boundaries. Reservation data can also be derived from MARF, STF 1A, and STF 3A by the addition of component ED or BG summaries. Maps outlining reservation boundaries are included in the PC80-1-B and

HC80-1-A reports. Reservation boundaries are also shown on detailed Metropolitan Map Series, place, and county maps.

Historical comparability: Data on 115 American Indian reservations were published in the 1970 census subject report, <u>American</u> <u>Indians</u>, PC(2)-1F. However, 1980 data may not be comparable to 1970 information because of boundary changes, improvements in geographic identification, new enumeration techniques, and other procedural changes made for the 1980 census.

AMERICAN INDIAN SUBRESERVATION AREAS. Entities known as "areas," "chapters," "districts," "segments," or "communities" are associated with some American Indian reservations and were identified for the 1980 census by tribal governments or the Bureau of Indian Affairs. In a few cases, such subreservation areas extend beyond reservation boundaries or are located entirely outside the reservation (offreservation). American Indian subreservations recognized for the 1980 census are identified by a unique 3-digit code.

Data for subreservations are not summarized in regular census tabulations; however, subreservation data can be obtained from the Census Bureau on a cost reimbursable basis from a special tabulation. (For further information regarding subreservation areas, please write Population Division, Racial Statistics Branch, Bureau of the Census, Washington, D.C. 20233.)

<u>Historical</u> comparability: American Indian subreservation areas were not identified separately in previous censuses.

AMERICAN INDIAN TRIBAL TRUST LANDS. Some American Indian reservations have tribal trust lands in the vicinity of the reservation. These were identified for the 1980 census by the Bureau of Indian Affairs. Tribal trust lands are located outside the reservation boundary (off-reservation) and are associated with a specific reservation.

Population and housing counts for tribal trust lands are scheduled to be included in a supplementary report (PC80-S1 series). Additional information for these areas may be included in special reports or unpublished tabulations. Also, such data can be obtained from the Census Bureau on a cost reimbursable basis from special tabulations. (For further information regarding the geography for tribal trust lands, please write Population Division, Racial Statistics Branch, Bureau of the Census, Washington, D.C. 20233.)

Historical comparability: Tribal trust lands (off-reservation) were not identified in previous censuses.

(For further information regarding the geography for tribal trust lands, please write Population Division, Racial Statistics Branch, Bureau of the Census, Washington, D.C. 20233.)

<u>Historical</u> comparability: Tribal trust lands (off-reservation) were not identified in previous censuses.

ASIAN POPULATION. See RACE

BARRIO. See PUERTO RICO

BLACK POPULATION. See RACE

<u>BLOCK</u> <u>NUMBERING</u> <u>AREA</u> (<u>BNA</u>). An area defined for the purpose of grouping and numbering blocks in block-numbered areas where census tracts have not been defined--typically, in nonSMSA places of 10,000 or more population and in contract block areas. BNA's do not cross county boundaries. They are identified by census tract-type numbers ranging from 9901.00 to 9989.99 which are unique within a county. While BNA numbers are similar to census tract numbers, BNA's are not census tracts and are not included in STF's 2 or 4.

BNA's may be split by the boundaries of places and MCD's/CCD's. Statistical summaries appear in STF 1B and PHC80-1 <u>Block Statistics</u> microfiche series for the component parts of BNA's created when BNA's are split by the boundaries of places and, in 20 States, MCD's. (See figure 12, column 3.) Such component summaries appear in STF 1A and 3A when BNA's are split by the boundaries of CCD's in 20 States (see figure 12, column 1), and MCD's in 10 other States and Puerto Rico.

Historical comparability: While BNA's were also used in previous censuses, any historical comparability is generally coincidental.

BOARDED-UP STATUS. Determined for vacant units intended for yearround use. Boarded-up units have windows and doors covered by wood, metal, or similar materials to protect the interior and prevent entry. A single unit structure or a unit(s) in a multi-unit structure may be boarded-up in this way.

Historical comparability: This item is new for 1980.

BOROUGH (IN ALASKA). See COUNTY

CENSUS AREA (IN ALASKA). See COUNTY

<u>CENSUS COUNTY DIVISION (CCD)</u>. A statistical subdivision of a county, roughly comparable to a minor civil division (MCD). CCD's are defined in 20 States (see figure 12, column 1) which do not have MCD's suitable for reporting census statistics (i.e., the MCD's have lost their original significance, are very small in population, have frequent boundary changes, and/or have indefinite boundaries). CCD's are established cooperatively by the Census Bureau and both State and local government authorities. They are generally defined by boundary features that seldom change and can be easily located, such as roads, rivers, and powerlines.

CCD boundaries are represented on detailed census maps, such as MMS/VMS sheets and county maps. In addition, CCD outlines appear at a small scale on maps published in several 1980 reports. CCD's, in alphabetic sequence, are assigned unique, incremental 3-digit numeric codes within counties.

Statistics for about 5,500 CCD's appear in STF's 1A, 2B, 3A, and (under tentative plans) 4B, and in PC80-1-A and -B and HC80-1-A reports.

3/Subdivisions of Alaska's "census areas" and boroughs (county equivalents) are called "census subareas." They take the place of MCD's or CCD's.

194

Historical comparability: In 1980, CCD's are defined in one fewer State than in 1970--North Dakota returned to the use of its MCD's (townships). In the past, cities with 10,000 or more inhabitants generally were defined as separate CCD's. When these cities annexed territory, CCD boundaries also had to be adjusted. For 1980, many of these CCD boundaries were revised to conform with census tract boundaries where tracts exist, and permanent physical features elsewhere, in an attempt to minimize future CCD boundary adjustments. CCD's which changed boundaries between 1970 and 1980 are noted in footnotes to table 4 of the PC80-1-A reports for States with CCD's.

<u>CENSUS</u> <u>SUBAREA</u>. A statistical subdivision of a "census area" or borough (county equivalent) in Alaska. Census subareas take the place of minor civil divisions (MCD's) or census county divisions (CCD's).

Historical comparability: In 1970, Alaska county equivalents were called "divisions," and some were subdivided further. Some of the census subareas used in the 1980 census approximate the 1970 divisions or their subdivisions.

CENSUS TRACT. A small statistical subdivision of a county. Tracts generally have stable boundaries. When census tracts are established, they are designed to be relatively homogeneous areas with respect to population characteristics, economic status, and living conditions. Tracts generally have between 2,500 and 8,000 residents. All standard metropolitan statistical areas (SMSA's) recognized for the 1980 census have census tracts. Most of these SMSA's are completely tracted, but seven SMSA's newly created as a result of the 1980 census include outlying counties which are not In addition, an estimated 3,000 census tracts have been tracted. established in 220 counties outside SMSA's. Five States and the District of Columbia are entirely tracted: Connecticut, Delaware, Hawaii, New Jersey, and Rhode Island. In all, there are over 43,300 census tracts for the 1980 census (including 465 in Puerto Rico).

Census tract boundaries are established cooperatively by local Census Statistical Areas Committees and the Census Bureau in accordance with guidelines that impose limitations on population size and specify the need for visible boundaries. Geographic shape and areal size of tracts are of relatively minor importance. Tract boundaries are established with the intention of being maintained over a long time so that statistical comparisons can be made from census to census. Census tracts observe county lines and cover all of the territory within each tracted county. Within a county, tract boundaries may be split by other geographic boundaries.

Tract numbers are always unique within a county, and, except for the New York SMSA, are also unique within an SMSA. All valid census tract numbers are in the range 0001 to 9899.99; a number between 9901 and 9989.99 denotes a block numbering area (BNA).

Census tract boundaries are shown on all detailed census maps, such as place maps and county maps. In addition, census tract outline

maps are being created for each SMSA and each tracted county outside SMSA's. Tract outline maps show only those streets and physical features which serve as census tract boundaries. In addition, the boundaries of places, MCD's/CCD's, counties, and States appear on tract outline maps.

Census tract data are presented in STF's 1A, 1B, 2A, 3A, and 4A, and in PHC80-2 Census Tracts reports. In STF 1A and 3A, tract data are presented in hierarchical sequence within place within MCD/CCD. In a case where a tract is split by place or MCD/CCD boundaries, the tape files will have summaries for each of its parts. To get data for the whole tract, it will be necessary to add up the components. In STF 1B, the situation is similar except that MCD boundaries are observed in only 20 States and Puerto Rico. (See figure 12, column 3.) MCD boundaries in the other 10 States with MCD's and CCD boundaries in the remaining 20 States are ignored. In the major summaries for census tracts--those in STF 2A and 4A and in PHC80-2 Census Tracts series--tract summaries observe the boundaries of places of 10,000 or more population. Separate summaries provide totals for split tracts.

<u>Historical comparability</u>: Census tracts are defined with an overall goal of census-to-census comparability. Some 1970 tracts have been subdivided due to increased population, but the new tracts can be recombined by the user for comparison with 1970 tracts. This affects about 8 percent of all 1970 tracts. Other changes have included combinations of two or more small 1970 tracts (less than 1 percent of all 1970 tracts) and adjustments to tract boundaries where old boundary features have disappeared or better boundaries (e.g., freeways) have come into being. In a few areas, local Census Statistical Areas Committees undertook extensive redefinition of census tracts.

Both the number of tracted counties and the number of census tracts increased by over 20 percent between 1970 and 1980. The reporting of data for split tracts has also increased. Whereas 1970 Census Tracts reports gave data for tract parts created when tracts were split by the boundaries of only those places with 25,000 or more population, 1980 reports observe boundaries of places as small as 10,000. 1980 STF's 2 and 4 present data for the components of split tracts, as well as for whole tracts, whereas their 1970 counterparts did not provide separate summaries for the components of split tracts.

<u>CENTRAL</u> <u>BUSINESS</u> <u>DISTRICT (CBD)</u>. An area of very high land valuation characterized by a high concentration of retail businesses, service businesses, offices, theaters, and hotels, and by a high traffic flow. A CBD follows census tract boundaries, i.e., it consists of one or more whole census tracts. CBD's are identified only in central cities of SMSA's and other cities with a population of 50,000 or more, and are designated by local Census Statistical Areas Committees in consultation with the Census Bureau. However, some eligible cities have chosen not to participate in the CBD delineation program. CBD's generally do not extend beyond the boundaries of the city. maps are being created for each SMSA and each tracted county outside SMSA's. Tract outline maps show only those streets and physical features which serve as census tract boundaries. In addition, the boundaries of places, MCD's/CCD's, counties, and States appear on tract outline maps.

Census tract data are presented in STF's 1A 1B, 2A, 3A, and 4A, and in PHC80-2 <u>Census Tracts</u> reports. In STF 1A and 3A, tract data are presented in hierarchical sequence within place within MCD/CCD. In a case where a tract is split by place or MCD/UCD boundaries, the tape files will have summaries for each of its parts. To get data for the whole tract, it will be necessary to add up the components. In STF 1B, the situation is similar except that MCD boundaries are observed in only 20 States and Puerto Rico. (See figure 12, column 3.) MCD boundaries in the other 10 States with MCD's and CCD boundaries in the remaining 20 States are ignored. In the major summaries for census tracts-those in STF 2A and 4A and in PHC80-2 <u>Census Tracts</u> series-tract summaries observe the boundaries of places of 10,000 or more population. Separate summaries provide totals for split tracts.

Historical comparability: Census tracts are defined with an overall goal of census-to-census comparability. Some 1970 tracts have been subdivided due to increased population, but the new tracts can be recombined by the user for comparison with 1970 tracts. This affects about 8 percent of all 1970 tracts. Other changes have included combinations of two or more small 1970 tracts (less than 1 percent of all 1970 tracts) and adjustments to tract boundaries where old boundary features have disappeared or better boundaries (e.g., freeways) have come into being. In a few areas, local Census Statistical Areas Committees undertook extensive redefinition of census tracts.

Both the number of tracted counties and the number of census tracts increased by over 20 percent between 1970 and 1980. The reporting of data for split tracts has also increased. Whereas 1970 Census Tracts reports gave data for tract parts created when tracts were split by the boundaries of only those places with 25,000 or more population, 1980 reports observe boundaries of places as small as 10,000. 1980 STF's 2 and 4 present data for the components of split tracts, as well as for whole tracts, whereas their 1970 counterparts did not provide separate summaries for the components of split tracts.

<u>CENTRAL BUSINESS</u> <u>DISTRICT (CBD)</u>. An area of very high land valuation characterized by <u>a high concentration</u> of retail businesses, service businesses, offices, theaters, and hotels, and by a high traffic flow. A CBD follows census tract boundaries, i.e., it consists of one or more whole census tracts. CBD's are identified only in central cities of SMSA's and other cities with a population of 50,000 or more, and are designated by local Census Statistical Areas Committees in consultation with the Census Bureau. However, some eligible cities have chosen not to participate in the CBD delineation program. CBD's generally do not extend beyond the boundaries of the city. The CBD's now recognized were delineated for the 1977 Economic Censuses. The Bureau does not plan to prepare 1980 statistics for CBD's, but users may derive data by aggregating data for component census tracts or smaller areas. Records for such areas in the <u>Geographic Identification Code Scheme</u> report and on machine-readable 1980 files include a CBD code when the area is in a CBD.

Historical comparability: At the time of the 1970 census, CBD's were defined only in cites of 100,000 or more persons.

<u>CENTRAL</u> <u>CITY</u>. See STANDARD METROPOLITAN STATISTICAL AREA; URBANIZED AREA

CHILDREN. See HOUSEHOLD RELATIONSHIP

CONDOMINIUM STATUS. A type of ownership of an apartment in a building-or a house in a development--where ownership of common areas is shared.

<u>Condominium</u>. Ownership in which the owner has an individual deed (and likely also an individual mortgage) on the unit, and also holds a common or joint ownership in all common areas, such as grounds, lobbies, and elevators. A condominium unit need not be occupied by the owner to be counted.

<u>Noncondominium</u>. All other types of ownership, including cooperatives where a share in a corporation with title to a multi-unit property entitles the owner to occupy a specific unit.

Limitations: In test survey taken before the census, an overstatement of condominiums was noted.

Historical comparability: In 1970, owner-occupied cooperative and condominium housing units were identified together. In 1980, only condominium units are identified, since cooperative units were extensively misreported in test surveys before the census. The 1980 item also includes vacant and renter-occupied units, not just owneroccupied units as in 1970.

COUNTY. The primary political and administrative subdivision of a State. In Louisiana, such divisions are called parishes. In Alaska 23 boroughs and "census areas" are treated as county equivalents for census purposes. Several cities (Baltimore, Maryland; St. Louis, Missouri; Carson City, Nevada; and 41 Virginia cities) are independent of any county organization, and thereby constitute primary divisions of their States and are treated the same as counties in census tabulations.

County boundaries are shown on most census maps. A 3-digit Federal Information Processing Standards (FIPS) county code identifies each county uniquely within State. Counties are numbered in alphabetic sequence, with independent cities numbered separately at the end of the list. There are 3,215 counties and county equivalents (including 78 in Puerto Rico) recognized for the 1980 census. Tabulations for all counties appear in STF's 1 through 4, and in PC80-1-A, -B, and -C; HC80-1-A and -B; and PHC80-3 reports. Tabulations for counties of 50,000 or more inhabitants appear in STF 5.

<u>Historical comparability</u>: A number of changes have occurred to county boundaries since 1970. A new set of county equivalents (boroughs and census areas) has been defined for Alaska, and in some cases these county equivalents differ considerably from the census divisions recognized for 1970. In addition, there are minor changes in counties for South Dakota and Hawaii. In Virginia, county boundaries have changed as a result of the creation of new independent cities and annexations by independent cities. Most other changes represent minor adjustments of the boundaries between counties. Those counties which changed boundaries between 1970 and 1980 are noted in footnotes at the end of table 4 of the PC80-1-A report for each State.

COUNTY SUBDIVISION. See CENSUS COUNTY DIVISION; CENSUS SUBAREA; MINOR CIVIL DIVISION

DIVISION. (CENSUS GEOGRAPHIC). A census geographic division is one of the nine groups of States which are subdivisions of the four census geographic regions of the United States. (See figure 13.) Census geographic divisions are identified by a 1-digit code which is also the first digit of the 2-digit census geographic code for each State in the division.

<u>Historical</u> comparability: Census divisions have remained unchanged since the 1910 census, except for the expansion of the Pacific Division to include Alaska and Hawaii.

ECONOMIC SUBREGION (ESR). A grouping of State Economic Areas (SEA's) which brings together those SEA's which are most closely related in terms of their economic and social characteristics. The areas were first defined following the 1950 census and updated after the 1960 census. In order to achieve such homogeneity, State boundaries are frequently crossed. The 510 SEA's are grouped into 121 ESR's. A 3digit numeric code is assigned to each ESR. No data summaries will be prepared for ESR's, although the ESR code appears on the geographic records of the summary tape files.

Historical comparability: ESR boundaries have remained the same since 1970.

ESKIMO POPULATION. See RACE

EXTENDED CITY. See URBANIZED AREA

FAMILY. Two or more persons, including the householder, who are related by birth, marriage, or adoption and who live together as one

Figure 13. Geographic Regions and Divisions of the United States

household; all such persons are considered as members of one family. (Persons not in families and not inmates of institutions are classified as unrelated individuals.) Families are defined using responses to the complete-count household relationship question.

If the son/daughter of the person or couple who maintains the household and the son's or daughter's spouse and/or children are members of the household, they are treated as part of the householder's family. A roomer/boarder and his/her spouse who are not related to the person or persons who maintain the household, or a resident employee and his/her spouse living in, are not counted as a family, but as individuals unrelated to the householder. Thus, a household can contain only one family for purposes of census tabulations.

A person maintaining a household alone, or with unrelated persons only, is regarded as a household but not as a family. Thus, some households do not contain a family.

(In certain Census Bureau surveys before 1980, families as defined here are referred to as "primary families." The term "secondary family" refers to a resident family unrelated to the householder, such as a roomer and his/her spouse. Tabulations of families from such surveys include secondary families.)

Historical comparability: The 1970 definition for family was similar to that used in 1980. In 1960, secondary families were separately identified.

FAMILY TYPE. Families are classified by type according to sex of the householder and the presence of relatives, based on questions on sex and household relationship asked on a complete-count basis.

Married-couple family. A family in which the householder and his/her spouse are enumerated as members of the same household.

Other family.

Male householder, no wife present. A family with a male householder and no spouse of householder present.

Female householder, no husband present. Family with a female householder and no spouse of householder present.

Historical comparability: The terminology for the family-type categories is new for 1980. The categories are reasonably compatible with the 1970 categories, "husband-wife families," "families with other male head," and "families with female head."

See also: FAMILY; HOUSEHOLD TYPE

GROUP QUARTERS, PERSONS IN. Persons in living arrangements, such as nursing homes or rooming houses, which are not households. Group quarters status was determined on a complete-count basis. household; all such persons are considered as members of one family. (Persons not in families and not inmates of institutions are classified as unrelated individuals.) Families are defined using responses to the complete-count household relationship question.

If the son/daughter of the person or couple who maintains the household and the son's or daughter's spouse and/or children are members of the household, they are treated as part of the householder's family. A roomer/boarder and his/her spouse who are not related to the person or persons who maintain the household, or a resident employee and his/her spouse living in, are not counted as a family, but as individuals unrelated to the householder. Thus, a household can contain only one family for purposes of census tabulations.

A person maintaining a household alone, or with unrelated persons only, is regarded as a household but not as a family. Thus, some households do not contain a family.

(In certain Census Bureau surveys before 1980, families as defined here are referred to as "primary families." The term "secondary family" refers to a resident family unrelated to the householder, such as a roomer and his/her spouse. Tabulations of families from such surveys include secondary families.)

Historical comparability: The 1970 definition for family was similar to that used in 1980. In 1960, secondary families were separately identified.

FAMILY TYPE. Families are classified by type according to sex of the householder and the presence of relatives, based on questions on sex and household relationship asked on a complete-count basis.

<u>Married-couple</u> family. A family in which the householder and his/her spouse are enumerated as members of the same household.

Other family.

<u>Male householder</u>, no wife present. A family with a male householder and no spouse of householder present.

Female householder, no husband present. Family with a female householder and no spouse of householder present.

Historical comparability: The terminology for the family-type categories is new for 1980. The categories are reasonably compatible with the 1970 categories, "husband-wife families," "families with other male head," and "families with female head."

See also: FAMILY; HOUSEHOLD TYPE

<u>GROUP</u> QUARTERS, <u>PERSONS</u> IN. Persons in living arrangements, such as nursing homes or rooming houses, which are not households. Group quarters status was determined on a complete-count basis. Two general categories of persons in group quarters are recognized.

A person under care or custody at the Inmate of institution. time of enumeration. Inmates are persons in such facilities as homes, schools, hospitals, or wards for the physically or mentally handicapped; persons in hospitals or wards for mental, tubercular, or chronic diseases; persons in homes for unmarried mothers or in nursing (convalescent and rest) homes for the aged and dependent, persons in orphanages; and persons in correctional These persons are enumerated as residents of an institutions. institution--regardless of their length of stay in the particular Some tabulations include data by major ty pes of place. institutions (home for the aged, mental hospital, correctional institution, and other institutions).

Other persons in group quarters. A person living in noninstitutional group quarters. Noninstitutional group quarters have nine or more persons unrelated to the person in column 1 of the questionnaire, or ten or more unrelated persons, and include such living quarters as rooming and boarding houses, communes, workers' dormitories, and convents or monasteries.

Persons residing in certain other types of living arrangements are classified as living in noninstitutional group quarters, regardless of the number or relationship of people in the unit. These include persons residing in military barracks, on ships, in college dormitories or in sorority and fraternity houses; patients in short-term medical, maternity and surgical wards of hospitals who have no usual home elsewhere; live-in staff members of institutions and other group quarters, provided that their living arrangements do not meet the housing unit definition; and persons staying in missions, flophouses, Salvation Army shelters, railroad stations, etc.

Historical comparability: In 1970, the "other person in group quarters" was defined as a person in noninstitutional quarters with five or more persons unrelated to the head (rather than nine or more unrelated to the householder in 1980) or six or more unrelated persons altogether (as compared to ten or more in 1980).

HISTORIC AREAS OF OKLAHOMA (EXCLUDING URBANIZED AREAS). The historic areas of Oklahoma consist of the former reservations which had legally established boundaries during the period 1900-1907. These reservations were dissolved during the two- to three-year period preceding the statehood of Oklahoma in 1907. The former reservation boundaries are used for planning purposes by tribes and the Federal government. In the census, the entire area encompassing the former reservations was identified (excluding urbanized areas 1/); individual former reservations were not identified separately.

1/ The parts inside urbanized areas were approximated in preparation for the 1980 census. The historic areas of Oklahoma (excluding urbanized areas) were assigned a unique 3-digit code by the Bureau which appears in the reservation code field. Enumeration districts (ED's), block groups (BG's), and/or portions of BG's which comprise the historic areas (excluding urbanized areas) are designated with an "A" in the ED prefix field in tape files for Oklahoma.

Data summaries for the historic areas of Oklahoma (excluding urbanized areas) can be prepared by the addition of component ED and/or BG summaries from MARF, STF 1A, or STF 3A. Population and housing counts for the historic areas (excluding urbanized areas) are scheduled to be included in a supplementary report (PC80-S1 series). Also, a population subject report (PC80-2 series) featuring additional data on the historic areas (excluding urbanized areas) is planned.

Historical comparability: Historic areas of Oklahoma (excluding urbanized areas) were not identified in previous censuses.

HOMEOWNER VACANCY RATE. The number of year-round vacant units "for sale only" as a percent of the total homeowner inventory, i.e., all owner-occupied units and all year-round vacant units for sale only. Vacant units that are seasonal or held off the market are excluded.

### See also: VACANCY STATUS

HOUSEHOLD. The person or persons occupying a housing unit. Counts of households, householders, and occupied-housing units are always identical in complete-count tabulations. In sample tables, the numbers may not always be the same because of differences in weighting sample data.

# See also: HOUSEHOLD RELATIONSHIP; HOUSEHOLD TYPE; HOUSING UNIT

HOUSEHOLD, PERSONS IN. The number of persons living in the housing unit. All occupants are counted--not just those related to the householder, but also any lodgers, roomers, boarders, partners, wards, foster children, and resident employees who share the living quarters.

Figures for "persons in households" match those for "persons in units" in tabulations based on complete-count data. In sample tabulations, they may differ because of the weighting process. The phrase "persons in household" is used for population tabulations, "persons in unit" for housing items. "One-person households" and "persons living alone" are synonymous.

#### See also: FAMILY

HOUSEHOLD RELATIONSHIP. Relationship to the person in column 1 of the census questionnaire, ascertained from replies to a completecount question. The historic areas of Oklahoma (excluding urbanized areas) were assigned a unique 3-digit code by the Bureau which appears in the reservation code field. Enumeration districts (ED's), block groups (BG's), and/or portions of BG's which comprise the historic areas (excluding urbanized areas) are designated with an "A" in the ED prefix field in tape files for Oklahoma.

Data summaries for the historic areas of Oklahoma (excluding urbanized areas) can be prepared by the addition of component ED and/or BG summaries from MARF, STF 1A, or STF 3A. Population and housing counts for the historic areas (excluding urbanized areas) are scheduled to be included in a supplementary report (PC80-S1 series). Also, a population subject report (PC80-2 series) featuring additional data on the historic areas (excluding urbanized areas) is planned.

Historical comparability: Historic areas of Oklahoma (excluding urbanized areas) were not identified in previous censuses.

HOMEOWNER VACANCY RATE. The number of year-round vacant units "for sale only" as a percent of the total homeowner inventory, i.e., all owner-occupied units and all year-round vacant units for sale only. Vacant units that are seasonal or held off the market are excluded.

See also: VACANCY STATUS

HOUSEHOLD. The person or persons occupying a housing unit. Counts of households, householders, and occupied-housing units are always identical in complete-count tabulations. In sample tables, the numbers may not always be the same because of differences in weighting sample data.

See also: HOUSEHOLD RELATIONSHIP; HOUSEHOLD TYPE; HOUSING UNIT

HOUSEHOLD, PERSONS IN. The number of persons living in the housing unit. All occupants are counted--not just those related to the householder, but also any lodgers, roomers, boarders, partners, wards, foster children, and resident employees who share the living quarters.

Figures for "persons in households" match those for "persons in units" in tabulations based on complete-count data. In sample tabulations, they may differ because of the weighting process. The phrase "persons in household" is used for population tabulations, "persons in unit" for housing items. "One-person households" and "persons living alone" are synonymous.

#### See also: FAMILY

HOUSEHOLD RELATIONSHIP. Relationship to the person in column 1 of the census questionnaire, ascertained from replies to a completecount question.

### In household. Persons in the household include:

Householder. The person who was reported in column 1 on the questionnaire. This was to be the person or one of the persons in whose name the home was owned or rented. If there was no such person, any adult household member at least 15 years old who was not a roomer, boarder, or paid employee was to be reported in column 1. In complete-count tabulations, the number of householders is the same as the number of households or occupied housing units. In sample tabulations, the numbers may not always be the same because of differences in weighting sample data.

Family householder. A householder living with one or more persons related to him or her by birth, marriage, or adoption.

Nonfamily householder. A householder living alone or only with persons not related to him or her.

For most tabulations, "spouse" is defined as the Spouse. husband or wife of the householder, living with the This category may include persons in commonhouseholder. law marriages as well as persons in formal marriages; it does not include a partner or roommate of the opposite sex. In complete-count tabulations, the number of spouses is the same as the number of married-couple families or marriedcouple family households. The number of spouses, however, is generally less than half of the number of "married persons with spouse present" in sample tabulations, since only spouses of householders are specifically identified as "spouse." Sample tabulations of the number of married persons with spouse present include subfamilies as well as married-couple families.

<u>Child.</u> A son, daughter, stepchild, or adopted child of the householder, regardless of the child's age or marital status. The category excludes sons-in-law, daughters-in-law, and foster children.

Own child. A never-married child under 18 years who is a son, daughter, stepchild, or adopted child of the householder. In certain tabulations, own children are further classified as living with two parents or with one parent only. Own children of the householder living with two parents are by definition found only in married-couple families.

<u>Related</u> child. An "own child" or any other family member (regardless of marital status) who is under 18 years, except the householder or spouse. Foster children are not included since they are not related to the householder. Other relative. A household member related to the householder by birth, marriage, or adoption, but not included specifically in another relationship category. The scope of this category may differ from table to table, depending on what other relationship categories are included. In detailed tabulations (STF 2, STF 5, or PC80-1-D) the following categories may also be shown:

Parent. In complete-count tabulations, the father or mother of the householder, including a stepparent or adoptive parent. On sample basic records and microdata files, fathers- and mothers-in-law constitute a separate category coded from write-in responses under "other relative" on the questionnaire. One STF 5 and PC80-1-D tabulation includes both parents and parentsin-law in the same category.

Brother or sister. In complete-count tabulations, the brother or sister of the householder, including stepbrothers, stepsisters, and brothers and sisters by adoption. On sample basic records and microdata files, brothers- and sisters-in-law constitute a separate category coded from write-in responses. One STF 5 and PC80-1-D tabulation includes brothers- and sisters-inlaw along with brothers and sisters in the same category.

Son- or daughter-in-law. Spouse of a son or daughter of the householder, coded from write-in responses.

Grandchild. Grandchild of the householder, coded from write-in responses.

Other. The following categories are separately coded in sample basic records and microdata files only: nephew/niece, grandparent, uncle/aunt, cousin, and "other."

Nonrelative. Any household member, including foster children, not related to the householder by birth, marriage, or adoption. The following categories are presented in certain more detailed tabulations.

Partner or Roommate. Nonrelative who lives together and shares expenses with the householder.

Roomer or boarder. Roomer, boarder, lodger, or relative of such; foster child or ward of the householder.

Paid employee. Nonrelative who is paid to provide household services, such as a maid, housekeeper or gardener. Other relative. A household member related to the householder by birth, marriage, or adoption, but not included specifically in another relationship category. The scope of this category may differ from table to table, depending on what other relationship categories are included. In detailed tabulations (STF 2, STF 5, or PC80-1-D) the following categories may also be shown:

Parent. In complete-count tabulations, the father or mother of the householder, including a stepparent or adoptive parent. On sample basic records and microdata files, fathers- and mothers-in-law constitute a separate category coded from write-in responses under "other relative" on the questionnaire. One STF 5 and PC80-1-D tabulation includes both parents and parentsin-law in the same category.

Brother or sister. In complete-count tabulations, the brother or sister of the householder, including stepbrothers, stepsisters, and brothers and sisters by adoption. On sample basic records and microdata files, brothers- and sisters-in-law constitute a separate category coded from write-in responses. One STF 5 and PC80-1-D tabulation includes brothers- and sisters-inlaw along with brothers and sisters in the same category.

Son- or daughter-in-law. Spouse of a son or daughter of the householder, coded from write-in responses.

Grandchild. Grandchild of the householder, coded from write-in responses.

<u>Other</u>. The following categories are separately coded in sample basic records and microdata files only: nephew/niece, grandparent, uncle/aunt, cousin, and "other."

Nonrelative. Any household member, including foster children, not related to the householder by birth, marriage, or adoption. The following categories are presented in certain more detailed tabulations.

Partner or Roommate. Nonrelative who lives together and shares expenses with the householder.

<u>Roomer</u> or <u>boarder</u>. Roomer, boarder, lodger, or relative of such; foster child or ward of the householder.

Paid employee. Nonrelative who is paid to provide household services, such as a maid, housekeeper or gardener. Other nonrelative. Nonrelative who cannot be described by the above categories, including a person who is related to a partner or roommate or to a paid employee.

Inmate of institution and other person in group quarters. (Treated as categories of household relationship for purposes of tabulation. For definitions, see Group Quarters, Persons In.) Persons in group quarters are excluded from counts of "persons in household" or "persons in unit."

Responses to the household relationship item were also used in defining families (see Family; Family Type; Household Type). Tabulations frequently report relationship for persons in family households separately from persons in nonfamily households.

<u>Historical</u> comparability: The question was revised from 1970 to replace the "head of household" category with a format using a reference person, i.e., the "person in column 1." The 1980 householders differ from 1970 household heads primarily where the wife in a married-couple family is listed as the "person in column 1." In 1970, the husband always was designated the "head" of such a family. In 1980 tabulations, the substitution of one spouse for the other as the reference person may affect certain of the classifications, such as "parent" or "brother or sister," within the "other relative" grouping. The person in whose name the house or apartment is owned or rented may in a few cases differ from the person considered by other household members as the "head," but this is expected to affect relatively few households.

The 1970 questionnaire category "other relative of head" was replaced by three categories, "brother/sister," "father/mother," and "other relative." Since the category "patient or inmate" is marked only by census enumerators, it was moved to the bottom of the form in a space reserved "for census use only." New nonrelative categories include "partner, roommate" and "paid employee." The former question asking relationship to head of family or household was asked from 1880 to 1970.

<u>See also</u>: GROUP QUARTERS, PERSONS IN; FAMILY; FAMILY TYPE; HOUSEHOLD TYPE

HOUSEHOLD TYPE. Households are classified by type according to sex of the householder and the presence of relatives, based on questions asked on sex and household relationship.

This item was determined on a complete-count basis.

Family household. A household including a family. (See Family.) A family household may also include nonrelatives living with the family. The following subcategories are frequently provided: married-couple family; family with male householder, no wife present; and family with female householder, no husband present. (See Family Type.)

Nonfamily household. A household consisting of a person living alone or of a householder living with persons not related to him or her.

Historical comparability: In 1970, nonfamily households were termed primary individual households; a primary individual being a person living alone or the head of a household in which no relatives of the head were present.

# See also: FAMILY; FAMILY TYPE; UNRELATED INDIVIDUAL

HOUSING UNIT. A house, apartment, mobile home or trailer, group of rooms, or single room occupied or intended for occupancy as a separate living quarters. Separate living quarters are those in which the occupants do not live and eat with any other person in the structure and which have direct access from the outside of the building or through a common hall.

The occupants of a housing unit may be a single family, one person living alone, two or more families living together, or any other group of related or unrelated persons who share living arrangements (except as described in the definition for Persons In Group Quarters). For vacant units, enumerators apply the criteria of separateness and direct access wherever possible to the likely use by intended occupants, or otherwise to the use by previous occupants. Both occupied and vacant housing units are included in the housing inventory, except that recreational vehicles, tents, caves, boats, railroad cars, and the like are included only if they are occupied as someone's usual place of residence.

<u>Historical</u> comparability: The first Census of Housing in 1940 established the "dwelling unit" concept. Although the term became "housing unit" and the definition has been modified slightly in each succeeding census, the 1980 definition is essentially comparable to previous censuses. In 1970, the definition of a housing unit stipulated that the occupants live and eat separately and have either direct access or complete kitchen facilities. For 1980, direct access is required; the alternative of complete kitchen facilities has been dropped. Excluded in 1970, vacant mobile homes are included in the 1980 housing inventory if intended for occupancy where they stand. Also in 1970, units with six or more unrelated persons living together were classified as group quarters; for 1980 that requirement was raised to ten or more unrelated persons.

See also: OCCUPANCY STATUS; TENURE; UNITS AT ADDRESS; YEAR-ROUND ROUND HOUSING UNITS; HOUSING UNITS

INMATE OF INSTITUTION. See GROUP QUARTERS, PERSONS IN

MARITAL STATUS. All persons were asked whether they were "now married." "widowed," "divorced," "separated," or "never married." Marital status data are tabulated only for persons 15 years old and over. This item was asked on a complete-count basis.

Couples who live together (unmarried persons, persons in common-law marriages, etc.) were allowed to report the marital status they considered the most appropriate.

Single. All persons who have never been married, including persons whose only marriage was annulled.

Historical comparability: In 1970, nonfamily households were termed primary individual households; a primary individual being a person living alone or the head of a household in which no relatives of the head were present.

### See also: FAMILY; FAMILY TYPE; UNRELATED INDIVIDUAL

HOUSING UNIT. A house, apartment, mobile home or trailer, group of rooms, or single room occupied or intended for occupancy as a separate living quarters. Separate living quarters are those in which the occupants do not live and eat with any other person in the structure and which have direct access from the outside of the building or through a common hall.

The occupants of a housing unit may be a single family, one person living alone, two or more families living together, or any other group of related or unrelated persons who share living arrangements (except as described in the definition for Persons In Group Quarters). For vacant units, enumerators apply the criteria of separateness and direct access wherever possible to the likely use by intended occupants, or otherwise to the use by previous occupants. Both occupied and vacant housing units are included in the housing inventory, except that recreational vehicles, tents, caves, boats, railroad cars, and the like are included only if they are occupied as someone's usual place of residence.

<u>Historical</u> comparability: The first Census of Housing in 1940 established the "dwelling unit" concept. Although the term became "housing unit" and the definition has been modified slightly in each succeeding census, the 1980 definition is essentially comparable to previous censuses. In 1970, the definition of a housing unit stipulated that the occupants live and eat separately and have either direct access or complete kitchen facilities. For 1980, direct access is required; the alternative of complete kitchen facilities has been dropped. Excluded in 1970, vacant mobile homes are included in the 1980 housing inventory if intended for occupancy where they stand. Also in 1970, units with six or more unrelated persons living together were classified as group quarters; for 1980 that requirement was raised to ten or more unrelated persons.

INMATE OF INSTITUTION. See GROUP QUARTERS, PERSONS IN

MARITAL STATUS. All persons were asked whether they were "now married." "widowed," "divorced," "separated," or "never married." Marital status data are tabulated only for persons 15 years old and over. This item was asked on a complete-count basis.

Couples who live together (unmarried persons, persons in common-law marriages, etc.) were allowed to report the marital status they considered the most appropriate.

<u>Single</u>. All persons who have never been married, including persons whose only marriage was annulled.

Ever married. Persons married at the time of enumeration, including those separated, plus widowed or divorced persons.

<u>Now Married</u>, <u>except</u> <u>separated</u>. Persons whose current marriage has not ended through widowhood, divorce, or separation (regardless of previous marital history). The category may also include couples who live together or persons in common-law marriages if they consider this category the most appropriate. In certain tabulations based on sample data, currently married persons are further classified as "spouse present" or "spouse absent." See below.

<u>Separated</u>. Persons legally separated or otherwise absent from their spouse because of marital discord. Included are persons who have been deserted or who have parted because they no longer want to live together but who have not obtained a divorce. Separated includes persons with a limited divorce.

Widowed. Widows and widowers who have not remarried.

Divorced. Includes persons who are legally divorced and who have not remarried.

In selected sample tabulations, data for married and separated persons are reorganized and combined with information on the presence of the spouse in the same household:

Now Married. All persons whose current marriage has not ended by widowhood or divorce. Includes persons categorized as separated above.

<u>Spouse</u> present. Married persons whose wife or husband was enumerated as a member of the same household, including those whose spouse may have been temporarily absent for such reasons as travel or hospitalization.

Spouse absent. Married persons whose wife or husband was not enumerated as a member of the same household, and all married persons living in group quarters.

Separated. Defined above.

Spouse absent, other. Married persons whose spouse was not enumerated as a member of the same household, excluding separated. Included are those whose spouse was employed and living away from home, absent in the Armed Forces, or an inmate of an institution.

Differences between the number of married males and the number of married females arise from the fact that some husbands and wives have their usual residences in different areas, and, in sample tabulations, from different weights applied to the data. Any differences between "now married, spouse present" males and females are due solely to sample weighting; by definition the numbers should be the same.

<u>Historical comparability</u>: The 1980 definition of "now married" is comparable to the definition of the term "married" as used in publications of data from prior censuses. For 1980, marital status is tabulated for persons 15 years old and over, a change from the period 1950-1970 when marital status was tabulated for persons 14 years old and over. A marital status question has been asked in every census since 1880.

MINOR CIVIL DIVISION (MCD). A primary political and administrative subdivision of a county. MCD's are most frequently known as townships, but in some States they include towns, magisterial districts, and similar areas. A few counties have some territory not organized into MCD's; such "unorganized territory" is treated as one or more MCD's for census purposes.

MCD's are used for census purposes in 29 States (see figure 12, column 2). In 20 of the remaining States, CCD's are used in lieu of MCD's, and in Alaska, census subareas are used. In the District of Columbia, quadrants are used. In Puerto Rico, ciudades, pueblos, and barrios are used.

The Census Bureau has assigned each MCD, alphabetically sequenced within county, an incremental, unique 3-digit numeric code. In addition, MCD's in 11 States have a 4-digit "MCD sequence number" which allows MCD's to be sorted into alphabetical sequence within a State.

MCD boundaries are represented on all detailed census maps. In addition, MCD outlines appear on small-scale maps published in PC80-1-A and -B and HC80-1-A reports and in conjunction with the PHC80-2 series. There are about 26,000 MCD's defined for the 1980 census.

Statistics for all MCD's appear in STF's 1A, 2B, 3A, and (under tentative plans) 4B, and in PC80-1-A and -B, and HC80-1-A reports. In 20 States (specified in column 3 of figure 12), many MCD's serve as functioning general-purpose governments, and these active MCD's are included in PHC80-3 Summary Statistics for Governmental Units. All MCD's in block numbered areas of these States are included in PHC80-1 Block Statistics microfiche series and STF 1B. Finally, in 11 States (all 9 States in the Northeast region, plus Michigan and Wisconsin), MCD data are published in a manner parallel to that of places of the same population size in tables of PC80-1-B and -C, and HC80-1-A and -B. (See figure 12, column 4.)

Historical comparability: CCD's were used in North Dakota in 1970, but for 1980 that State returned to the use of its townships. A number of MCD's in other States have changed boundaries. Changes have resulted from municipal annexations, mergers or dissolutions of MCD's, and other causes. There are seven States where MCD boundaries have changed substantially: Arkansas, Louisiana, Maryland, differences between "now married, spouse present" males and females are due solely to sample weighting; by definition the numbers should be the same.

<u>Historical</u> comparability: The 1980 definition of "now married" is comparable to the definition of the term "married" as used in publications of data from prior censuses. For 1980, marital status is tabulated for persons 15 years old and over, a change from the period 1950-1970 when marital status was tabulated for persons 14 years old and over. A marital status question has been asked in every census since 1880.

MINOR CIVIL DIVISION (MCD). A primary political and administrative subdivision of a county. MCD's are most frequently known as townships, but in some States they include towns, magisterial districts, and similar areas. A few counties have some territory not organized into MCD's; such 'unorganized territory" is treated as one or more MCD's for census purposes.

MCD's are used for census purposes in 29 States (see figure 12, column 2). In 20 of the remaining States, CCD's are used in lieu of MCD's, and in Alaska, census subareas are used. In the District of Columbia, quadrants are used. In Puerto Rico, ciudades, pueblos, and barrios are used.

The Census Bureau has assigned each MCD, alphabetically sequenced within county, an incremental, unique 3-digit numeric code. In addition, MCD's in 11 States have a 4-digit "MCD sequence number" which allows MCD's to be sorted into alphabetical sequence within a State.

MCD boundaries are represented on all detailed census maps. In addition, MCD outlines appear on small-scale maps published in PC80-1-A and -B and HC80-1-A reports and in conjunction with the PHC80-2 series. There are about 26,000 MCD's defined for the 1980 census.

Statistics for all MCD's appear in STF's 1A, 2B, 3A, and (under tentative plans) 4B, and in PC80-1-A and -B, and HC80-1-A reports. In 20 States (specified in column 3 of figure 12), many MCD's serve as functioning general-purpose governments, and these active MCD's are included in PHC80-3 Summary Statistics for Governmental Units. All MCD's in block numbered areas of these States are included in PHC80-1 Block Statistics microfiche series and STF 1B. Finally, in 11 States (all 9 States in the Northeast region, plus Michigan and Wisconsin), MCD data are published in a manner parallel to that of places of the same population size in tables of PC80-1-B and -C, and HC80-1-A and -B. (See figure 12, column 4.)

Historical comparability: CCD's were used in North Dakota in 1970, but for 1980 that State returned to the use of its townships. A number of MCD's in other States have changed boundaries. Changes have resulted from municipal annexations, mergers or dissolutions of MCD's, and other causes. There are seven States where MCD boundaries have changed substantially: Arkansas, Louisiana, Maryland, Mississippi, Nebraska, Virginia, and West Virginia. MCD's which changed boundaries between 1970 and 1980 are noted in footnotes to table 4 of the PC80-1-A reports for States with MCD's.

MUNICIPIO. See PUERTO RICO AND OUTLYING AREAS

OCCUPANCY STATUS. The classification of all housing units as either occupied or vacant.

Occupied. The classification of a housing unit with a person or persons living in it as a usual residence when enumerated--or only temporarily absent, for example, on vacation. A household consists of all the persons who occupy a housing unit. If all the persons staying in the unit have their usual place of residence elsewhere, the unit is classified as vacant. Therefore, counts of households and occupied housing units should match--although complete counts may differ slightly from sample data.

Vacant. The classification of a housing unit with no one living in it at the time of enumeration, unless its occupants are only temporarily absent. If, at the time of enumeration, the unit is temporarily occupied entirely by persons who have a usual residence elsewhere, it is also classified as vacant.

Historical comparability: Similar data have been collected since 1940.

See also: VACANCY STATUS

OTHER RACES. See RACE

OUTLYING AREA. See PUERTO RICO AND OUTLYING AREAS

PACIFIC ISLANDER POPULATION. See RACE

PARISH (IN LOUISIANA). See COUNTY

PERSON IN COLUMN 1. See HOUSEHOLD RELATIONSHIP: HOUSEHOLDER

<u>PERSONS</u> <u>PER ROOM</u>. A derived measure obtained by dividing the number of persons in each occupied housing unit by the number of rooms in the unit. The figures shown refer, therefore, to the number of housing units having the specified ratio of persons per room. For example, the number of units with 1.01 or more persons per room is the number of units occupied by more persons than there are separate rooms.

### See also: ROOMS

PLACE. A concentration of population which may or may not have legally prescribed limits, powers, or functions. Most of the places identified in the 1980 census are incorporated as cities, towns, villages, or boroughs. In addition, census designated places (called "unincorporated places" in earlier censuses) are delineated for 1980 census tabulations. There are about 23,000 places recorded in the 1980 census. Places do not cross State boundaries.

Incorporated place. A political unit incorporated as a city, borough (excluding Alaska and New York), village, or town (excluding the New England States, New York, and Wisconsin). In most States, incorporated places are subdivisions of the MCD or CCD in which they are located; for example, a village located within and legally part of a township. In some States, incorporated places are independent of surrounding townships or towns and therefore are also treated as MCD's. In a few States, the pattern is mixed. Almost 4,000 incorporated places cross MCD/CCD and/or county boundaries.

There are about 20,000 incorporated places recognized in the 1980 census.

Census designated place (CDP). A densely settled population center without legally defined corporate limits or corporate powers or functions. Each CDP has a definite residential nucleus with a dense, city-type street pattern, and ideally should have an overall population density of at least 1,000 persons per square mile. In addition, a CDP is a community that can be identified locally by place name. Boundaries of CDP's are drawn by the Census Bureau, in cooperation with State and local agencies, to include, insofar as possible, all the closely settled area. In the 1980 census, statistics are tabulated for located in an each CDP with 5,000 inhabitants or more if urbanized area (UA) with a central city of 50,000 or more and for each CDP of 1,000 inhabitants or more if in a UA with no central city of 50,000 or more. Some CDP's--notably in the Northeast-coincide with MCD's. On STF's these are treated as both places and MCD's, but in printed reports they are shown only in MCD tables to avoid duplication. Outside of UA's, statistics are tabulated in 48 States and Puerto Rico for CDP's of 1,000 or more, in Hawaii for CDP's of 300 or more, and in Alaska for CDP's of 25 or more.

There are approximately 3,400 CDP's recognized in the 1980 census.

Incorporated place and CDP boundaries are shown on all detailed census maps. For tracted areas, boundaries of all places are shown on census tract outline maps. County subdivision maps, at still smaller scale, also show boundaries for all places.

A 4-digit numeric code is assigned by the Census Bureau to each place in alphabetic sequence within State. "Place description" codes will also generally accompany place records. These codes indicate whether a place is incorporated, as well as represent certain other information about the place. "unincorporated places" in earlier censuses) are delineated for 1980 census tabulations. There are about 23,000 places recorded in the 1980 census. Places do not cross State boundaries.

1

Incorporated place. A political unit incorporated as a city, borough (excluding Alaska and New York), village, or town (excluding the New England States, New York, and Wisconsin). In most States, incorporated places are subdivisions of the MCD or CCD in which they are located; for example, a village located within and legally part of a township. In some States, incorporated places are independent of surrounding townships or towns and therefore are also treated as MCD's. In a few States, the pattern is mixed. Almost 4,000 incorporated places cross MCD/CCD and/or county boundaries.

There are about 20,000 incorporated places recognized in the 1980 census.

Census designated place (CDP). A densely settled population center without legally defined corporate limits or corporate powers or functions. Each CDP has a definite residential nucleus with a dense, city-type street pattern, and ideally should have an overall population density of at least 1,000 persons per square mile. In addition, a CDP is a community that can be identified locally by place name. Boundaries of CDP's are drawn by the Census Bureau, in cooperation with State and local agencies, to include, insofar as possible, all the closely settled area. In the 1980 census, statistics are tabulated for each CDP with 5,000 inhabitants or more if located in an urbanized area (UA) with a central city of 50,000 or more and for each CDP of 1,000 inhabitants or more if in a UA with no central city of 50,000 or more. Some CDP's--notably in the Northeast-coincide with MCD's. On STF's these are treated as both places and MCD's, but in printed reports they are shown only in MCD tables to avoid duplication. Outside of UA's, statistics are tabulated in 48 States and Puerto Rico for CDP's of 1,000 or more, in Hawaii for CDP's of 300 or more, and in Alaska for CDP's of 25 or more.

There are approximately 3,400 CDP's recognized in the 1980 census.

Incorporated place and CDP boundaries are shown on all detailed census maps. For tracted areas, boundaries of all places are shown on census tract outline maps. County subdivision maps, at still smaller scale, also show boundaries for all places.

A 4-digit numeric code is assigned by the Census Bureau to each place in alphabetic sequence within State. "Place description" codes will also generally accompany place records. These codes indicate whether a place is incorporated, as well as represent certain other information about the place. Data are summarized for all places in STF's 1A and 3A and PC80-1-A reports. For places with 1,000 or more inhabitants, data are summarized in STF 2B, and PC80-1-B and HC80-1-B reports. For places with 2,500 or more, data are summarized in STF 4B, PC80-1-C, and HC80-1-B reports. In PHC80-3 reports, data are given for all incorporated places. In PHC80-2 Census Tracts reports and STF's 2A and 4A, summaries are presented only for places with 10,000 or more inhabitants located in tracted areas. Very detailed data are presented for all places which are central cities of SMSA's in PC80-1-D reports, and places with 50,000 or more inhabitants in HC80-2 reports. STF 5 also provides detailed data for places of 50,000 or more.

The files and reports which sequence geographic units in hierarchical fashion must account for the fact that places may cross the boundaries of counties and MCD's/CCD's. Such reports and tapes, therefore, provide summaries for the various parts of places created when places are split by the boundaries of higher-level areas recognized in the hierarchy. Specifically, place parts within county and MCD/CCD are presented in STF 1A and 3A, and PC80-1-A. Place parts within county and MCD are presented for 20 specified States and Puerto Rico in STF 1B and PHC80-1 Block Statistics reports, but the PHC80-1 reports include only places which have data collected for blocks. In the remaining 30 States and the District of Columbia, STF 1B and PHC80-1 reports subdivide places when split by county boundaries, but do not observe MCD or CCD boundaries.

Historical comparability: Sixty-eight percent of all incorporated places of 2,500 or more made changes in their boundaries between 1970 and January 1, 1980, which is the reference date for boundaries in the 1980 census. In the 1970 census, ED boundaries were drawn so as to allow a user to aggregate 1970 data for each city of 2,000 or more inhabitants according to 1960 boundaries. There will not be a corresponding capability in the 1980 census.

In the 1970 and earlier censuses, CDP's were referred to as "unincorporated places." The name was changed to make it more explicit that such places are defined for census purposes, and to avoid confusion in States where many "unincorporated places" are located within legally "incorporated" towns or townships. Many CDP's have been redefined since 1970. Incorporated places which were newly incorporated or which changed boundaries between 1970 and 1980 are listed in footnotes to table 4 of PC80-1-A.

PLUMBING FACILITIES. Presence of toilet facilities, bathing facilities, and piped water, ascertained for occupied and vacant housing units.

Complete plumbing for exclusive use. Piped hot and cold water, a flush toilet, and a bathtub or shower for exclusive use by household members. All facilities must be in the living quarters, but need not be in the same room. Hot water need not be available continuously. A privy or chemical toilet is not counted as a flush toilet. A bathtub or shower is counted only if it is connected to piped running water.

## Lacking complete plumbing for exclusive use.

Complete plumbing facilities, but also used by another household. All facilities present, but with some or all of the plumbing facilities also regularly used by someone who is not a member of the household. This category also applies if the future occupants of living quarters now vacant would be expected to share the facilities.

Some but not all plumbing facilities. Units with one or two but not all three of these: hot and cold piped water, flush toilet, and bathtub or shower.

No plumbing facilities.

Historical comparability. Data on plumbing facilities have been collected since 1940. In 1970, there were separate questions on presence of hot and cold running water, a flush toilet, and a bathtub or shower. The questions were combined in 1980. In 1980 complete facilities must not only be in the building, as in 1970, but also inside the housing unit.

PUERTO RICO AND OUTLYING AREAS. In addition to the United States, the decennial census covers the Commonwealth of Puerto Rico and the outlying areas, including American Samoa, Guam, the Trust Territory of the Pacific Islands (including the Northern Mariana Islands, which was legally part of the Trust Territory in 1980), the Virgin Islands, and certain small islands over which the United States exercises sovereignty or jurisdiction. Questionnaire design and the questions asked were developed for Puerto Rico and each outlying area to accommodate local conditions. In the case of some small or militaryoccupied islands, enumerations were not conducted; only population counts obtained from U.S. Government records are published.

The geographic subareas for which statistics are reported vary. Some of those noted below are defined in this glossary; others will be defined in 1980 census reports for the areas.

American Samoa: villages, district subdivisions, districts, and islands.

Guam: census designated places and election districts.

Puerto Rico: blocks; ED's and BG's; census tracts and block numbering areas; zona urbanas and aldeas; subbarrios; barrios, ciudades, and pueblos; municipios; and SMSA's and SCSA.

Northern Mariana Islands and the remainder of the Trust Territory of the Pacific Islands: census designated places, municipal counted as a flush toilet. A bathtub or shower is counted only if it is connected to piped running water.

## Lacking complete plumbing for exclusive use.

Complete plumbing facilities, but also used by another household. All facilities present, but with some or all of the plumbing facilities also regularly used by someone who is not a member of the household. This category also applies if the future occupants of living quarters now vacant would be expected to share the facilities.

Some but not all plumbing facilities. Units with one or two but not all three of these: hot and cold piped water, flush toilet, and bathtub or shower.

#### No plumbing facilities.

Historical comparability. Data on plumbing facilities have been collected since 1940. In 1970, there were separate questions on presence of hot and cold running water, a flush toilet, and a bathtub or shower. The questions were combined in 1980. In 1980 complete facilities must not only be in the building, as in 1970, but also inside the housing unit.

PUERTO RICO AND OUTLYING AREAS. In addition to the United States, the decennial census covers the Commonwealth of Puerto Rico and the outlying areas, including American Samoa, Guam, the Trust Territory of the Pacific Islands (including the Northern Mariana Islands, which was legally part of the Trust Territory in 1980), the Virgin Islands, and certain small islands over which the United States exercises sovereignty or jurisdiction. Questionnaire design and the questions asked were developed for Puerto Rico and each outlying area to accommodate local conditions. In the case of some small or militaryoccupied islands, enumerations were not conducted; only population counts obtained from U.S. Government records are published.

The geographic subareas for which statistics are reported vary. Some of those noted below are defined in this glossary; others will be defined in 1980 census reports for the areas.

American Samoa: villages, district subdivisions, districts, and islands.

Guam: census designated places and election districts.

Puerto Rico: blocks; ED's and BG's; census tracts and block numbering areas; zona urbanas and aldeas; subbarrios; barrios, ciudades, and pueblos; municipios; and SMSA's and SCSA.

Northern Mariana Islands and the remainder of the Trust Territory of the Pacific Islands: census designated places, municipal districts, municipalities and islands, one unorganized territory, and administrative districts.

Virgin Islands: places, census subdistricts, and islands.

Other islands: no subdivisions.

Data for Puerto Rico and its subdivisions will appear in reports and tapes in generally the same pattern as for States and their subdivisions. Data for outlying areas will appear in 1980 Census of Population, Volume 1, and Census of Housing, Volume 1 reports. Data will be available on computer tape only by special arrangement.

Historical comparability: The Canal Zone was not included in the 1980 census because it was no longer under U.S. jurisdiction.

RACE. All persons were asked to identify themselves according to the following race categories on the 1980 questionnaire: White, Black or Negro, American Indian, Eskimo, Aleut, Japanese, Chinese, Filipino, Korean, Asian Indian, Vietnamese, Hawaiian, Guamanian, Samoan, and "other." The "other" category includes Malayan, Polynesian, Thai, and other groups not included in the specific categories listed on the questionnaire.

Counts of the population by race in complete-count tabulations are provisional. Final counts for race will be determined after the sample data have been processed. The sample counts will first appear on tape in STF 3 and in print in <u>Characteristics of the Population</u>, <u>General Social and Economic Characteristics</u>, PC80-1-C reports.

The concept of race as used by the Census Bureau reflects selfidentification by respondents; it does not denote any clear-cut scientific definition of biological stock. Since the 1980 census obtained information on race through self-enumeration, the data represent self-classification by people according to the race with which they identify themselves. For persons with parents of different races who could not provide a single response to the race question, the race of the person's mother was used; however, if a single response could not be provided for the person's mother, the first race reported by the person was used.

edit and review operations were performed during the Limited complete-count operations; write-in responses were reviewed in an attempt to classify entries to specific categories, where appropriate. For instance, if the "other" circle was marked with a write-in entry "Caucasian," then the response was recoded as White. (Additional examples are noted below.) However, all such cases were not identified in the complete-count processing. During the processing of sample questionnaires, a more thorough review and additional editing will be done to resolve inconsistent or incomplete responses. Also, during the processing of sampling questionnaires, write-in entries for the "Other" category will be assigned specific codes, which is included on the basic person's record in the census detailed tape files.

Asian and Pacific Islander write-in entries, such as Indo-Chinese, Cambodian, or Polynesian, included in the "Other" category during 100-percent processing, are collectively tabulated and shown as "Other Asian and Pacific Islander" in the census sample tabulations; this group, "Other Asian and Pacific Islanders," will be included in the broader Asian and Pacific Islander category in all sample tabulations by race. This shift of "Other Asian and Pacific Islander" entries out of the "Other" races category in sample tabulations and the recoding of write-in entries in the "Other" category to specific categories where appropriate will affect the comparability between complete-count and sample data for some groups.

White. Persons who indicated their race as White, as well as persons who did not classify themselves in one of the specific race categories listed on the questionnaire but entered a response such as Canadian, German, Italian, Lebanese, or Polish. (Persons who did not classify themselves in one of the specified race categories but wrote in entries such as Cuban, Puerto Rican, Mexican, or Dominican were included in the "other" race category; in the 1970 census most of these persons were included in the "White" category.)

Black. Persons who indicated their race as Black or Negro, as well as persons who did not classify themselves in one of the specific race categories, but reported entries such as African, Black Puerto Rican, Creole, Jamaican, Nigerian, Trinidadian, or West Indian.

### American Indian, Eskimo, and Aleut:

American Indian. Persons who indicated their race as "Indian (American)" or who did not indicate a specific race category but reported the name of an Indian tribe.

Eskimo. Persons who indicated their race as "Eskimo."

Aleut. Persons who indicated their race as "Aleut."

Asian and Pacific Islander. In complete-count tabulations, includes all of the groups listed below except "Other Asian and Pacific Islander." In sample tabulations, it includes all of the groups listed below.

Japanese. Persons who indicated their race as Japanese, as well as persons who did not classify themselves in one of the specific race categories, but entered a response such as Nipponese or Japanese American.

Chinese. Persons who indicated their race as Chinese, as well as persons who did not classify themselves in one of the specific race categories, but reported entries such as Cantonese, Formosan, Taiwanese, or Tibetan. Asian and Pacific Islander write-in entries, such as Indo-Chinese, Cambodian, or Polynesian, included in the "Other" category during 100-percent processing, are collectively tabulated and shown as "Other Asian and Pacific Islander" in the census sample tabulations; this group, "Other Asian and Pacific Islanders," will be included in the broader Asian and Pacific Islander category in all sample tabulations by race. This shift of "Other Asian and Pacific Islander" entries out of the "Other" races category in sample tabulations and the recoding of write-in entries in the "Other" category to specific categories where appropriate will affect the comparability between complete-count and sample data for some groups.

White. Persons who indicated their race as White, as well as persons who did not classify themselves in one of the specific race categories listed on the questionnaire but entered a response such as Canadian, German, Italian, Lebanese, or Polish. (Persons who did not classify themselves in one of the specified race categories but wrote in entries such as Cuban, Puerto Rican, Mexican, or Dominican were included in the "other" race category; in the 1970 census most of these persons were included in the "White" category.)

Black. Persons who indicated their race as Black or Negro, as well as persons who did not classify themselves in one of the specific race categories, but reported entries such as African, Black Puerto Rican, Creole, Jamaican, Nigerian, Trinidadian, or West Indian.

## American Indian, Eskimo, and Aleut:

American Indian. Persons who indicated their race as "Indian (American)" or who did not indicate a specific race category but reported the name of an Indian tribe.

Eskimo. Persons who indicated their race as "Eskimo."

Aleut. Persons who indicated their race as "Aleut."

Asian and Pacific Islander. In complete-count tabulations, includes all of the groups listed below except "Other Asian and Pacific Islander." In sample tabulations, it includes all of the groups listed below.

Japanese. Persons who indicated their race as Japanese, as well as persons who did not classify themselves in one of the specific race categories, but entered a response such as Nipponese or Japanese American.

Chinese. Persons who indicated their race as Chinese, as well as persons who did not classify themselves in one of the specific race categories, but reported entries such as Cantonese, Formosan, Taiwanese, or Tibetan. Filipino. Persons who indicated their race as Filipino, as well as persons who did not classify themselves in one of the specific race categories, but entered a response such as Filipino American or Philippine.

Korean. Persons who indicated their race as Korean, as well as persons who did not classify themselves in one of the specific race categories, but reported a response such as Korean American.

Asian Indian. Persons who indicated their race as Asian Indian, as well as persons who did not classify themselves in one of the specific race categories, but reported entries such as Bengali, Bharati, Dravidian, East Indian, Goanese, Hindu Indic, Kashmiri, or South Asian.

Vietnamese. Persons who indicated their race as Vietnamese, as well as persons who did not classify themselves in one of the specific race categories, but reported a response such as Vietnam.

Hawaiian. Persons who indicated their race as Hawaiian. In the State of Hawaii, all persons who reported "Part-Hawaiian" were included in this category.

Guamanian. Persons who indicated their race as Guamanian, as well as persons who did not classify themselves in one of the race categories, but reported an entry such as Chamorro or Guam.

Samoan. Persons who indicated their race as Samoan, as well as persons who did not classify themselves in one of the specific race categories, but entered a response such as American Samoan or Western Samoan.

Other Asian and Pacific Islander. In sample tabulations only, persons who reported Burmese, Cambodian, Hmong, Indo-Chinese, Laotian, Micronesian, Okinawan, Pakistani, Polynesian, Siamese, Tahitian, Thai, or similar responses. In complete-count tabulations, this group is part of the "other races" category below.

Other races. Includes Asian and Pacific Islander groups not identified separately (e.g., Cambodian, Indo-Chinese, Pakistani, Indonesian, Fiji Islander) and other races not included in the specific categories listed on the questionnaire. (Asian and Pacific Islander groups in the "other" category in 100-percent tabulations are included in the category "Asian and Pacific Islander" in sample tabulations. Persons who did not report a specific race but wrote in entries such as "Mexican," "Cuban," "South American," "Chicano," or "La Raza" remained in the "other" races category for both complete-count and sample tabulations.) In a few tables in which data for American Indian, Eskimo, Aleut, and Asian and Pacific Islander are not presented separately, the "other" category encompasses all race categories not shown separately.

In some tabulations, the "other" category is omitted to save space; data for this category are derivable by subtracting the sum of the specified race categories from the total.

In certain printed tables, data for persons of Spanish origin are presented alongside data for as many as four major race groups. In such situations, users should not be misled by the proximity of these two types of data. Spanish origin is not a race category, and persons of Spanish origin may be of any race. Tabulations in a number of sources present data separately for race categories (e.g., White, Black, and "other") for persons not of Spanish origin. In addition, the number of Spanish-origin persons is given by race.

Limitations: In previous censuses, undercoverage of the population has been associated with race. The 1970 census missed Blacks at a much higher rate than Whites. The Bureau has not prepared undercoverage rates for races other than White or Black, because vital records and other sources of relevant statistics do not consistently distinguish among other races.

Historical comparability: Questions on "race" or "color" have been asked in each census since 1790. In 1970, when persons with parents of different races were in doubt as to their classification, the race of the father was used. In 1980, the race of the mother was used for persons who could not provide a single response. The 1970 category "Negro or Black" was retitled "Black or Negro." Individual categories for Vietnamese, Asian Indian, Guamanian, and Samoan were added. In 1970, the categories Eskimo and Aleut appeared only on questionnaires used in Alaska; they were replaced by Hawaiian and Korean in all other States. In 1980, all four categories appeared on the questionnaire.

As a result of the additions, the 1980 questionnaire had 14 specific race categories instead of 8 as in 1970. In 1970, persons who did not report a specific race but wrote in Hispanic categories such as "Mexican," "Puerto Rican," or "Cuban" in the race question were assigned to White; for 1980 these persons remain in the "other" race category.

#### See also: RACE OF HOUSEHOLDER; SPANISH ORIGIN

RACE OF HOUSEHOLDER. In all cases where occupied housing units, households, or families are classified by race, the race of the householder, i.e., the person listed in column 1, is used (see Household Relationship for the definition of Householder). This item was determined on a complete-count basis. In a few tables in which data for American Indian, Eskimo, Aleut, and Asian and Pacific Islander are not presented separately, the "other" category encompasses all race categories not shown separately.

In some tabulations, the "other" category is omitted to save space; data for this category are derivable by subtracting the sum of the specified race categories from the total.

In certain printed tables, data for persons of Spanish origin are presented alongside data for as many as four major race groups. In such situations, users should not be misled by the proximity of these two types of data. Spanish origin is not a race category, and persons of Spanish origin may be of any race. Tabulations in a number of sources present data separately for race categories (e.g., White, Black, and "other") for persons not of Spanish origin. In addition, the number of Spanish-origin persons is given by race.

Limitations: In previous censuses, undercoverage of the population has been associated with race. The 1970 census missed Blacks at a much higher rate than Whites. The Bureau has not prepared undercoverage rates for races other than White or Black, because vital records and other sources of relevant statistics do not consistently distinguish among other races.

<u>Historical comparability</u>: Questions on "race" or "color" have been asked in each census since 1790. In 1970, when persons with parents of different races were in doubt as to their classification, the race of the father was used. In 1980, the race of the mother was used for persons who could not provide a single response. The 1970 category "Negro or Black" was retitled "Black or Negro." Individual categories for Vietnamese, Asian Indian, Guamanian, and Samoan were added. In 1970, the categories Eskimo and Aleut appeared only on questionnaires used in Alaska; they were replaced by Hawaiian and Korean in all other States. In 1980, all four categories appeared on the questionnaire.

As a result of the additions, the 1980 questionnaire had 14 specific race categories instead of 8 as in 1970. In 1970, persons who did not report a specific race but wrote in Hispanic categories such as "Mexican," "Puerto Rican," or "Cuban" in the race question were assigned to White; for 1980 these persons remain in the "other" race category.

#### See also: RACE OF HOUSEHOLDER; SPANISH ORIGIN

RACE OF HOUSEHOLDER. In all cases where occupied housing units, households, or families are classified by race, the race of the householder, i.e., the person listed in column 1, is used (see Household Relationship for the definition of Householder). This item was determined on a complete-count basis. Since some households include persons of more than one race, there may be minor differences in counts by race between (1) tabulations of "families by family size" or "households by persons in unit" where all persons regardless of their race are counted according to the race of householder and (2) tabulations of "persons in families" or "persons in households" where all persons are counted according to their own race.

Historical comparability: Prior to 1980, the concept of "race of household head" was used instead of race of householder. This change should not substantively affect the comparability of these data.

REFERENCE PERSON. See HOUSEHOLD RELATIONSHIP: HOUSEHOLDER

<u>REGION</u> (CENSUS GEOGRAPHIC). A large group of States which is a first-order subdivison of the United States for census purposes. The four regions--Northeast, North Central, South, and West--are delineated in figure 12. Regions are identified by a 1-digit code. Statistics for them appear in U.S. Summary reports in almost every publication series, and in STF's 1C, 2C, 3C, and 4C. The census regions have no relationship to the 10 Standard Federal Administrative Regions.

#### RELATED CHILDREN. See HOUSEHOLD RELATIONSHIP

RENT, CONTRACT. The monthly rent agreed to, or contracted for, regardless of any furnishings, utilities, or services that may be included. Rent is shown for occupied units rented for cash and vacant units for rent. For vacant units, rent is the amount asked for the unit at the time of enumeration, and is sometimes labeled "rent asked." Contract rent is tabulated for "specified renteroccupied" units, which excludes one-family houses on 10 acres or more. Respondents are to report rent only for the housing unit enumerated and to exclude any rent paid for additional units or for business premises. The rent amount for the unit is to be reported even if paid for by someone outside the household, or for some reason, not paid. Respondents who do not pay rent monthly are asked to convert the sum to a monthly average. In the computation of aggregate and mean rent, \$35 is taken as the average of the interval "less than \$50," and \$550 is taken as the average of the interval "\$500 or more."

<u>No</u> cash rent. Rental units occupied without payment of cash rent. The unit may be owned by friends or relatives who live elsewhere and who allow occupancy without charge. Rent-free houses or apartments may be provided to compensate caretakers, ministers, tenant farmers, sharecroppers, or others.

Historical comparability: Similar data have been collected since 1930 (although the first full housing census did not occur until 1940). Rent intervals reported have gone to higher dollar figures in recent decades. In 1970 question on rent had a top category of \$300 or more; it also listed fewer rent intervals than the 1980 question. Constant dollar comparisons, 1970 to 1980, are not prepared. RENTAL VACANCY RATE. The number of vacant units for rent as a percent of the total rental inventory--that is, all renter-occupied units and all year-round vacant units for rent. Vacant units that are seasonal or held off the market are excluded.

## See also: VACANCY STATUS

<u>ROOMS</u>. The number of whole rooms intended for living purposes, not only in occupied housing units, but also in vacant units. These rooms include living rooms, dining rooms, kitchens, bedrooms, finished recreation rooms, enclosed porches suitable for year-round use, and lodger's rooms. Excluded are strip or pullman kitchens, bathrooms, open porches, balconies, foyers, halls, half-rooms, utility rooms, unfinished attics or basements, or other space used for storage. A partially divided room, such as a dinette next to a kitchen or living room, is a separate room only if there is a partition from floor to ceiling, but not if the partition consists solely of shelves or cabinets.

In the computation of aggregate and mean rooms, 10 is taken as the average of the interval "9 or more rooms."

<u>Historical</u> comparability: Similar data have been collected since 1940.

See also: PERSONS PER ROOM

SEX. Ascertained on a complete-count basis.

Historical comparability: A question on the sex of individuals has been asked of the total population in every census.

SPANISH ORIGIN. Spanish origin is determined by a complete-count question which asks respondents to self-identify whether they are of Spanish origin or descent. If when interviewed the person reported a multiple origin and could not provide a single origin, the origin of the person's mother was used. If a single response was not provided for the person's mother, the first reported origin of the person was used.

Counts of the population by Spanish origin in complete-count tabulations are provisional. Final counts for Spanish origin will be determined after the sample data have been processed. The smaple counts will first appear on tape in STF 3 and in print in <u>Characteristics</u>, of the <u>Population</u>, <u>General</u> <u>Social</u> <u>and</u> <u>Economic</u> <u>Characteristics</u>, PC80-1-C reports.

Persons marking any one of the four "Spanish" categories, i.e., Mexican, Puerto Rican, Cuban, or other Spanish, are collectively referred to as "persons of Spanish origin."

In certain tabulations, persons of Spanish origin are further classified by type:

RENTAL VACANCY RATE. The number of vacant units for rent as a percent of the total rental inventory--that is, all renter-occupied units and all year-round vacant units for rent. Vacant units that are seasonal or held off the market are excluded.

#### See also: VACANCY STATUS

<u>ROOMS</u>. The number of whole rooms intended for living purposes, not only in occupied housing units, but also in vacant units. These rooms include living rooms, dining rooms, kitchens, bedrooms, finished recreation rooms, enclosed porches suitable for year-round use, and lodger's rooms. Excluded are strip or pullman kitchens, bathrooms, open porches, balconies, foyers, halls, half-rooms, utility rooms, unfinished attics or basements, or other space used for storage. A partially divided room, such as a dinette next to a kitchen or living room, is a separate room only if there is a partition from floor to ceiling, but not if the partition consists solely of shelves or cabinets.

In the computation of aggregate and mean rooms, 10 is taken as the average of the interval "9 or more rooms."

Historical comparability: Similar data have been collected since 1940.

See also: PERSONS PER ROOM

SEX. Ascertained on a complete-count basis.

Historical comparability: A question on the sex of individuals has been asked of the total population in every census.

<u>SPANISH</u> ORIGIN. Spanish origin is determined by a complete-count question which asks respondents to self-identify whether they are of Spanish origin or descent. If when interviewed the person reported a multiple origin and could not provide a single origin, the origin of the person's mother was used. If a single response was not provided for the person's mother, the first reported origin of the person was used.

Counts of the population by Spanish origin in complete-count tabulations are provisional. Final counts for Spanish origin will be determined after the sample data have been processed. The smaple counts will first appear on tape in STF 3 and in print in <u>Characteristics of the Population, General Social and Economic</u> <u>Characteristics, PC80-1-C reports.</u>

Persons marking any one of the four "Spanish" categories, i.e., Mexican, Puerto Rican, Cuban, or other Spanish, are collectively referred to as "persons of Spanish origin."

In certain tabulations, persons of Spanish origin are further classified by type:

Mexican. Persons who indicated "Mexican, Mexican-American, Chicano," or wrote in an entry such as "La Raza."

Puerto Rican. Persons who indicated "Puerto Rican" or wrote in an entry such as "Boricua."

Cuban. Persons who indicated "Cuban."

Other Spanish. Persons who filled the circle for "other Spanish/Hispanic"; persons who write in an origin or descent associated with Spain, the Dominican Republic, or any Central or South America country except Brazil, or a nonspecific Spanish group such as "Spanish surnamed" or "Spanish speaking."

Preliminary evaluations of 1980 census data suggest some limited overreporting of Spanish origin. Available evidence indicates that the overreporting may have occurred only in selected areas with relatively small Spanish-origin populations, such as in some Southern States, but it is not apparent in those areas with the largest concentrations of Spanish-origin persons. For a fuller discussion of the reporting in the Spanish-origin item, see the forthcoming 1980 census Supplementary Report, "Persons of Spanish Origin By State: 1980" (PC80-S1).

Historical comparability: The Spanish-origin question was asked on a 100-percent basis for the first time in 1980. A similar question was asked on the 1970 5-percent sample questionnaire. For 1980, the category "no, not Spanish/Hispanic" appeared first (the corresponding category appeared last in 1970). Also, the terms "Mexican-American" and "Chicano" are added to the term "Mexican." The category "Central or South American," included in 1970, was dropped.

Although a question on Spanish origin was included in 1970, it was not the major identifier used to classify the Hispanic population in the 1970 census as it is in 1980. Depending on the section of the country, 1970 census data for "persons of Spanish heritage" were variously defined as "persons of Puerto Rican birth or parentage" (in New York, New Jersey, and Pennsylvania); as "persons of Spanish language or Spanish surname" (in Arizona, California, Colorado, New Mexico, and Texas); and as "persons of Spanish language" (in the remaining 42 States and the District of Columbia). Spanish language referred to those persons who in 1970 reported Spanish as their mother tongue, as well as persons in families in which the household head or spouse reported Spanish as his or her mother tongue.

#### SPOUSE. See HOUSEHOLD RELATIONSHIP

STANDARD CONSOLIDATED STATISTICAL AREA (SCSA). A large concentration of metropolitan population composed of two or more contiguous standard metropolitan statistical areas (SMSA's) which together meet certain criteria of population size, urban character, social and economic integration, and/or contiguity of urbanized areas. Each SCSA must have a population of one million or more. Thirteen SCSA's defined by the Office of Management and Budget, were in existence at the time of the 1980 census; criteria were published by that office in <u>Standard Metropolitan Statistical Areas: 1975</u>. Four additional SCSA's (including one in Puerto Rico) have been established based on 1980 census results.

SCSA's are identified by a 2-digit numeric code. Summaries for SCSA's appear in many reports, and in STF's 1C, 2B (by State), 2C, 3C, 4B (by State), and 4C. Summaries are generally provided for SCSA totals and for within-State parts of SCSA's.

Historical comparability: The original 13 SCSA's were designated in 1975. For the 1960 and 1970 censuses the Census Bureau recognized two "Standard Consolidated Areas" (SCA's), which were metropolitan complexes around New York and Chicago.

In 1982 or 1983, the SCSA concept will be replaced by the new Consolidated Metropolitan Statistical Area (CMSA) concept, with somewhat more flexible criteria, as spelled out in the Federal Register, January 3, 1980. These changes will not affect publication of 1980 census data for SCSA's.

STANDARD METROPOLITAN STATISTICAL AREA (SMSA). A large population nucleus and nearby communities which have a high degree of economic and social integration with that nucleus. Each SMSA consists of one or more entire counties (or county equivalents) that meet specified standards pertaining to population, commuting ties, and metropolitan character. In New England, towns and cities, rather than counties, are the basic units and should be substituted for "counties" where counties are cited below. SMSA's are designated by the Office of Management and Budget.

Data products from the 1980 census will report on 323 SMSA's: (1) 287 defined before January 1,1980 (including 4 in Puerto Rico); and (2) an additional 36 (including one in Puerto Rico) established as a result of 1980 census population counts. The 36 new SMSA's were designated when 1980 counts showed that they met one of the following criteria:

- 1. Included a city with a population of at least 50,000 within its corporate limits, or
- 2. Included a Census Bureau-defined urbanized area (which must have a population of at least 50,000) and a total SMSA population of at least 100,000 (or, in New England, 75,000).

An SMSA includes a city and, generally its entire UA and the remainder of the county or counties in which the UA is located. An SMSA also includes such additional outlying counties which meet specified criteria relating to metropolitan character and level of commuting of workers into the central city or counties. Specific criteria governing the definition of SMSA's recognized before 1980 are published in Standard Metropolitan Statistical Areas: 1975, issued by the Office of Management and Budget. the time of the 1980 census; criteria were published by that office in <u>Standard Metropolitan Statistical Areas</u>: 1975. Four additional SCSA's (including one in Puerto Rico) have been established based on 1980 census results.

SCSA's are identified by a 2-digit numeric code. Summaries for SCSA's appear in many reports, and in STF's 1C, 2B (by State), 2C, 3C, 4B (by State), and 4C. Summaries are generally provided for SCSA totals and for within-State parts of SCSA's.

Historical comparability: The original 13 SCSA's were designated in 1975. For the 1960 and 1970 censuses the Census Bureau recognized two "Standard Consolidated Areas" (SCA's), which were metropolitan complexes around New York and Chicago.

In 1982 or 1983, the SCSA concept will be replaced by the new Consolidated Metropolitan Statistical Area (CMSA) concept, with somewhat more flexible criteria, as spelled out in the Federal Register, January 3, 1980. These changes will not affect publication of 1980 census data for SCSA's.

STANDARD METROPOLITAN STATISTICAL AREA (SMSA). A large population nucleus and nearby communities which have a high degree of economic and social integration with that nucleus. Each SMSA consists of one or more entire counties (or county equivalents) that meet specified standards pertaining to population, commuting ties, and metropolitan character. In New England, towns and cities, rather than counties, are the basic units and should be substituted for "counties" where counties are cited below. SMSA's are designated by the Office of Management and Budget.

Data products from the 1980 census will report on 323 SMSA's: (1) 287 defined before January 1,1980 (including 4 in Puerto Rico); and (2) an additional 36 (including one in Puerto Rico) established as a result of 1980 census population counts. The 36 new SMSA's were designated when 1980 counts showed that they met one of the following criteria:

- 1. Included a city with a population of at least 50,000 within its corporate limits, or
- 2. Included a Census Bureau-defined urbanized area (which must have a population of at least 50,000) and a total SMSA population of at least 100,000 (or, in New England, 75,000).

An SMSA includes a city and, generally its entire UA and the remainder of the county or counties in which the UA is located. An SMSA also includes such additional outlying counties which meet specified criteria relating to metropolitan character and level of commuting of workers into the central city or counties. Specific criteria governing the definition of SMSA's recognized before 1980 are published in <u>Standard Metropolitan Statistical Areas</u>: 1975, issued by the Office of Management and Budget. With two exceptions, each SMSA has one or more central cities, up to a maximum of three, and the names of these cities comprise the title of the SMSA. The Nassau-Suffolk, NY SMSA has no central city; and the title of the Northeast Pennsylvania SMSA does not contain the names of its three central cities: Scranton, Wilkes-Barre, and Hazleton.

SMSA's are identified by a FIPS 4-digit numeric code, which follows the alphabetic sequence of SMSA names. SMSA's are outlined on smallscale maps in several 1980 report series. SMSA data appear in most 1980 census publications and summary tape files. Many SMSA's cross State boundaries, and reports in several series provide summaries for the State parts of multi-State SMSA's, as well as SMSA totals. Summary tape files present data only for State parts of SMSA's, except for the "national" files: STF's 1C, 2C, 3C, and 4C.

Historical comparability: A comparison of 1970 and 1980 census products reveals two types of changes in metropolitan territory. First, 69 new SMSA's were created from previously nonmetropolitan territory: 36 were defined in 1981 based on 1980 population counts and 33 were defined between 1973 and 1979 based on current population estimates. (An additional SMSA--Rapid City, SD--was provisionally recognized based on population estimates, but it did not qualify according to 1980 census data.)

The second component of change to metropolitan territory between 1970 and 1980 was the redefinition of many of the SMSA's which were recognized in 1970 census tabulations. Of the 247 1970 SMSA's, 101 were redefined in 1973 based on 1970 census commuting data, most by the addition of 1 or more counties (or towns and cities in New England). In addition, one SMSA was redefined by the addition of one area and the deletion of another (Wichita Falls, Texas), one was subdivided (Nassau-Suffolk SMSA was created from a part of the New York SMSA), four pairs of SMSA's were combined into single SMSA's (for example, Dallas-Fort Worth, Texas), and four SMSA's lost area that was added to other SMSA's. In addition, the names of several SMSA's were changed in 1973, one in such a way that the SMSA code also changed (San Bernardino-Riverside-Ontario to Riverside-San Bernardino-Ontario, California).

Since SMSA's are always defined in terms of whole counties (towns or cities in New England) for which extensive data are available, users can usually compile figures for comparisons over time.

In 1982 or 1983, SMSA boundaries will be re-evaluated using 1980 census data on commuting, labor force, population density, type of residence, and population growth, according to new criteria spelled out in the Federal Register, January 3, 1980 (vol. 45, no. 2, pt. VI). At that time new outlying counties may be added or existing ones deleted, some area titles will be changed and some new central cities will be designated, some areas may be consolidated and a few new SMSA's may be created. Further, the term "standard metropolitan statistical area" will be shortened to "metropolitan statistical area" (MSA). These changes will not affect publication of 1980 census data for SMSA's.

STATE. A major political unit of the United States. The District of Columbia is treated as a State-equivalent in all 1980 census data series; Puerto Rico, is also, except that it does not appear in P.L. 94-171 Population Counts file. American Samoa, Guam, Northern Mariana Islands, the remainder of the Trust Territory of the Pacific Islands, and the Virgin Islands are treated as State equivalents for the presentation of data in 1980 population and housing volume 1 reports, but data for these areas will be available on computer tape only by special arrangement.

States are identified by a 2-digit FIPS code which follows the alphabetic sequence of State names (including the District of Columbia), and by a 2-digit Census Geographic code, the first digit of which identifies the census division of which the State is a part. Puerto Rico and the outlying areas have FIPS codes numerically following the State codes.

<u>Historical</u> comparability: There have been no significant changes to State boundaries in the last decade. Data for the Northern Mariana Islands are reported separate from the Trust Territory for the 1980 censuses.

See also: PUERTO RICO AND OUTLYING AREAS

STATE ECONOMIC AREA (SEA). A single county or group of counties within a State which is relatively homogeneous with respect to economic and social characteristics. The grouping of the 3,103 counties and county equivalents in 1950 into SEA's was the product of a special study prepared by the Bureau of the Census in cooperation with the Bureau of Agricultural Economics and several State and private agencies. Boundaries were drawn in such a manner that each economic area had certain significant characteristics which distinguished it from adjoining areas. There are 510 SEA's.

SEA's are identified in census tabulations on computer tape by a 2digit numeric code or a 1-digit alphabetic code, assigned sequentially within the State; however, no 1980 data are tabulated for SEA's.

Historical comparability: SEA boundaries have remained largely unchanged since they were defined in 1950. In 1950, 501 areas were defined; in 1960, 509; and in 1970, 510.

See also: ECONOMIC SUBREGION

TENURE. The classification of all occupied units as either owneroccupied or renter-occupied. This item was asked on a complete-count basis.

Owner-occupied. A housing unit is "owner occupied" if the owner or co-owner lives in the unit even if the unit is mortgaged or not fully paid for. The owner or co-owner must live in the unit but need not be the person listed in column 1. area" (MSA). These changes will not affect publication of 1980 census data for SMSA's.

STATE. A major political unit of the United States. The District of Columbia is treated as a State-equivalent in all 1980 census data series; Puerto Rico, is also, except that it does not appear in P.L. 94-171 Population Counts file. American Samoa, Guam, Northern Mariana Islands, the remainder of the Trust Territory of the Pacific Islands, and the Virgin Islands are treated as State equivalents for the presentation of data in 1980 population and housing volume 1 reports, but data for these areas will be available on computer tape only by special arrangement.

States are identified by a 2-digit FIPS code which follows the alphabetic sequence of State names (including the District of Columbia), and by a 2-digit Census Geographic code, the first digit of which identifies the census division of which the State is a part. Puerto Rico and the outlying areas have FIPS codes numerically following the State codes.

<u>Historical comparability</u>: There have been no significant changes to State boundaries in the last decade. Data for the Northern Mariana Islands are reported separate from the Trust Territory for the 1980 censuses.

See also: PUERTO RICO AND OUTLYING AREAS

STATE ECONOMIC AREA (SEA). A single county or group of counties within a State which is relatively homogeneous with respect to economic and social characteristics. The grouping of the 3,103 counties and county equivalents in 1950 into SEA's was the product of a special study prepared by the Bureau of the Census in cooperation with the Bureau of Agricultural Economics and several State and private agencies. Boundaries were drawn in such a manner that each economic area had certain significant characteristics which distinguished it from adjoining areas. There are 510 SEA's.

SEA's are identified in census tabulations on computer tape by a 2digit numeric code or a 1-digit alphabetic code, assigned sequentially within the State; however, no 1980 data are tabulated for SEA's.

<u>Historical comparability:</u> SEA boundaries have remained largely unchanged since they were defined in 1950. In 1950, 501 areas were defined; in 1960, 509; and in 1970, 510.

See also: ECONOMIC SUBREGION

TENURE. The classification of all occupied units as either owneroccupied or renter-occupied. This item was asked on a complete-count basis.

<u>Owner-occupied</u>. A housing unit is "owner occupied" if the owner or co-owner lives in the unit even if the unit is mortgaged or not fully paid for. The owner or co-owner must live in the unit but need not be the person listed in column 1. <u>Renter-occupied</u>. All occupied housing units which are not owneroccupied, regardless of whether or not cash rent is paid by a member of the household. ("No cash rent" units, included here, are separately identified in rent tabulations.)

Historical comparability: Tenure has been collected since 1980. In 1970, the question on tenure also included a category for condominium and cooperative ownership. In 1980, condominiums are identified in a separate question.

See also: CONDOMINIUM STATUS; RENT, CONTRACT; VALUE

TOWN/TOWNSHIP. See MINOR CIVIL DIVISION

TRACT. See CENSUS TRACT

UNITED STATES. This designation includes the 50 States and the District of Columbia. 1980 STF's and most report series (usually in a separate U.S. Summary report) provide data summarized for the United States.

UNITS AT ADDRESS. Number of housing units with a particular house or building address number. This question is asked principally to improve census coverage. If the respondent indicated from 2 to 9 units at the address, census workers checked the number against the number of units for that address on the Bureau's address register. If the respondent's answer was higher than what was shown in the address register, the building was visited to ascertain the correct number of units, thereby assuring enumeration of every unit.

Mobile home or trailer. Included if intended for occupancy where located. Mobile homes or trailers were counted whether mounted or on wheels.

Limitations: Data users sometimes use "units at address" as a proxy for "units in structure," which is published later because it is based on a sample question. The concepts are not interchangeable, though, since some multi-unit buildings have more than one address and there is some variation in respondent interpretation of "units at address."

Historical comparability: Similar data were collected in 1970.

UNRELATED INDIVIDUAL. An unrelated individual may be (1) a householder living alone or only with persons not related to him or her, (2) a roomer, boarder, partner, roommate, or resident employee unrelated to the householder, or (3) a group quarters resident who is not an inmate of an institution. Classification as an unrelated individual derives from the complete-count question on household relationship. Examples of unrelated individuals include a widow who occupies her house alone or with one or more other persons not related to her, a roomer not related to the householder, a maid living as a member of her employer's household, and a resident staff member living in a hospital dormitory. Persons living with one or more relatives in a household where the householder is not related to any of them are classified in the census as unrelated individuals; for example, a husband and wife who rent a room from a householder to whom they are not related.

## Historical comparability: A similar concept was used in 1970.

URBAN AND RURAL (POPULATION). Urban and rural are type-of-area concepts rather than specific areas outlined on maps. As defined by the Census Bureau, the urban population comprises all persons living in urbanized areas (UA's) and in places of 2,500 or more inhabitants outside UA's.

The rural population consists of everyone else. Therefore a rural classification need not imply farm residence or a sparsely settled area, since a small city or town is rural as long as it is outside a UA and has fewer than 2,500 inhabitants.

The terms urban and rural are independent of metropolitan and nonmetropolitan designations; both urban and rural areas occur inside and outside SMSA's.

<u>Historical</u> comparability: Except for the minor relaxation of UA criteria discussed below, urban and rural definitions have been consistent since 1950. Within small counties, measurements of urban and rural populations over time may be significantly affected by the increase or decrease of a place's population across the 2,500 population threshold, e.g., the increase of 1 person to a place of 2,499 results in an increase of 2,500 to the county's urban population.

### URBAN FRINGE. See URBANIZED AREA

URBANIZED AREA (UA). A population concentration of at least 50,000 inhabitants, consisting of a central city (or cities) and the surrounding, closely settled, contiguous territory (suburbs).

The UA criteria define a boundary based primarily on a population density of at least 1,000 persons per square mile, but also include some less densely settled areas and such areas as industrial parks and railroad yards if they are within areas of dense urban developments. The density level of 1,000 persons per square mile corresponds approximately to the continuously built-up area around a city(ies). The "urban fringe" is that part of the UA outside of a central city(ies).

Typically, an entire UA is included within an SMSA. The SMSA is usually much larger in terms of territory covered and includes territory where the population density is less than 1,000. Occasionally, more than one UA is located within an SMSA. In some cases a small part of a UA may extend beyond an SMSA boundary or possibly into an adjacent SMSA. Several 1980 UA's have been defined in areas which do not meet the criteria for SMSA designation. UA's may cross State boundaries. In a few cases a UA does not include all more relatives in a household where the householder is not related to any of them are classified in the census as unrelated individuals; for example, a husband and wife who rent a room from a householder to whom they are not related.

# Historical comparability: A similar concept was used in 1970.

URBAN AND RURAL (POPULATION). Urban and rural are type-of-area concepts rather than specific areas outlined on maps. As defined by the Census Bureau, the urban population comprises all persons living in urbanized areas (UA's) and in places of 2,500 or more inhabitants outside UA's.

The rural population consists of everyone else. Therefore a rural classification need not imply farm residence or a sparsely settled area, since a small city or town is rural as long as it is outside a UA and has fewer than 2,500 inhabitants.

The terms urban and rural are independent of metropolitan and nonmetropolitan designations; both urban and rural areas occur inside and outside SMSA's.

<u>Historical comparability</u>: Except for the minor relaxation of UA criteria discussed below, urban and rural definitions have been consistent since 1950. Within small counties, measurements of urban and rural populations over time may be significantly affected by the increase or decrease of a place's population across the 2,500 population threshold, e.g., the increase of 1 person to a place of 2,499 results in an increase of 2,500 to the county's urban population.

## URBAN FRINGE. See URBANIZED AREA

<u>URBANIZED</u> <u>AREA</u> (UA). A population concentration of at least 50,000 inhabitants, consisting of a central city (or cities) and the surrounding, closely settled, contiguous territory (suburbs).

The UA criteria define a boundary based primarily on a population density of at least 1,000 persons per square mile, but also include some less densely settled areas and such areas as industrial parks and railroad yards if they are within areas of dense urban developments. The density level of 1,000 persons per square mile corresponds approximately to the continuously built-up area around a city(ies). The "urban fringe" is that part of the UA outside of a central city(ies).

Typically, an entire UA is included within an SMSA. The SMSA is usually much larger in terms of territory covered and includes territory where the population density is less than 1,000. Occasionally, more than one UA is located within an SMSA. In some cases a small part of a UA may extend beyond an SMSA boundary or possibly into an adjacent SMSA. Several 1980 UA's have been defined in areas which do not meet the criteria for SMSA designation. UA's may cross State boundaries. In a few cases a UA does not include all

of an "extended city," that is, a place which is determined to have a significant amount of rural territory.

UA's are identified by 4-digit codes, which follow the alphabetic sequence of all UA names. When a UA has the same name as an SMSA the UA code generally is the same as the SMSA code. UA boundaries are shown on final MMS/VMS maps, and at a much smaller scale on UA outline maps in PC80-1-A and HC80-1-A reports.

Historical comparability: Because UA's are defined on the basis of population distribution at the time of a decennial census, their boundaries tend to change following each census to include expanding urban development.

The criteria have been fairly constant since 1950, although in each decade some new refinements have been added. For the 1970 census, in which 252 UA's were recognized, it was necessary for the central city to have a population of 50,000 or more, or for there to be "twin cities" with a combined population of 50,000 and with the smaller city having at least 15,000. In 1974 the criteria were liberalized to allow UA recognition to certain cities between 25,000 and 50,000, and this resulted in 27 new urbanized areas. For 1980, no minimum population size is required for a central city.

• <u>VACANCY</u>, <u>DURATION</u> OF. The period from the departure of the last • <u>occupants</u> <u>until Census</u> Day--not the whole time the unit might stay vacant. For newly constructed units, never occupied, and converted or merged units, the period extends from the date of completion until Census Day.

<u>Historical</u> <u>comparability</u>: Similar data have been collected since 1960.

See also: VACANCY STATUS

VACANCY STATUS. Determined for housing units at the time of enumeration. Vacancy status pertains to year-round vacant units. Vacancy status and other characteristics of vacant units are determined by enumerators questioning landlords, owners, neighbors, rental agents, and others.

Included in the housing inventory are vacant mobile homes or trailers intended to be occupied on the site where they stand. Vacant mobile homes on dealer sales lots or in storage yards are not counted as housing units.

New units not yet occupied are classified as vacant housing units if construction has reached a point where all exterior windows and doors are installed and final usable floors are in place. Vacant units are excluded if open to the elements; that is, if the roof, walls, windows, or doors no longer protect the interior from the elements, or if there is positive evidence (such as a sign on the house or in the block) that the unit is to be demolished or is condemned. Also excluded are quarters being used entirely for nonresidential purposes, such as a store or an office, or quarters used for the storage of business supplies or inventory, machinery, or agricultural products.

Vacant year-round units. Vacant units intended for use, even if only occasionally, throughout the year.

For sale only. Vacant year-round units offered for sale only. The category includes mainly one-family houses, but also two types of vacant units in multi-unit buildings: (1) vacant units (which are for sale only) in a cooperative or condominium and (2) vacant units intended to be occupied by the new building owners in multi-unit buildings that are for sale. Vacant units offered for rent or sale at the same time are classified as "for rent."

For rent. Vacant year-round units offered for rent, and vacant units offered for rent or for sale at the same time, including vacant units for rent in a building for sale.

<u>Rented or sold, awaiting occupancy</u>. Vacant year-round units sold or rented but still unoccupied when enumerated-including units where rent is agreed on but not yet paid.

Held for occasional use. Vacant units for weekend or other occasional use throughout the year.

Other vacant. Vacant units for year-round occupancy not classified above, for example, units held for a janitor or caretaker, settlement of an estate, pending repairs or modernization, or personal reasons of the owner.

Vacant seasonal and migratory units. Vacant units used or intended for use only during certain seasons. Any unit used throughout the year, even if only occasionally, is excluded. Seasonal units include those for summer or winter sports or recreation--beach cottages and hunting cabins, for example. Seasonal units may also include quarters for such workers as herders and loggers. Migratory units include those for farm workers during crop season.

Limitations: Most tables exclude vacant seasonal and migratory units since information on characteristics of such units is difficult to obtain.

Historical comparability: Similar data have been collected since 1940. In 1970, seasonal and migratory vacant units were reported in two separate categories.

See also: BOARDED-UP STATUS; HOMEOWNER VACANCY RATE; OCCUPANCY STATUS; RENTAL VACANCY RATE; VACANCY, DURATION OF

VALUE. For owner-occupied housing units, the respondent's estimate of the current dollar worth of the property. For vacant units, value

purposes, such as a store or an office, or quarters used for the storage of business supplies or inventory, machinery, or agricultural products.

Vacant year-round units. Vacant units intended for use, even if only occasionally, throughout the year.

For sale only. Vacant year-round units offered for sale only. The category includes mainly one-family houses, but also two types of vacant units in multi-unit buildings: (1) vacant units (which are for sale only) in a cooperative or condominium and (2) vacant units intended to be occupied by the new building owners in multi-unit buildings that are for sale. Vacant units offered for rent or sale at the same time are classified as "for rent."

For rent. Vacant year-round units offered for rent, and vacant units offered for rent or for sale at the same time, including vacant units for rent in a building for sale.

Rented or sold, awaiting occupancy. Vacant year-round units sold or rented but still unoccupied when enumerated-including units where rent is agreed on but not yet paid.

Held for occasional use. Vacant units for weekend or other occasional use throughout the year.

Other vacant. Vacant units for year-round occupancy not classified above, for example, units held for a janitor or caretaker, settlement of an estate, pending repairs or modernization, or personal reasons of the owner.

Vacant seasonal and migratory units. Vacant units used or intended for use only during certain seasons. Any unit used throughout the year, even if only occasionally, is excluded. Seasonal units include those for summer or winter sports or recreation-beach cottages and hunting cabins, for example. Seasonal units may also include quarters for such workers as herders and loggers. Migratory units include those for farm workers during crop season.

Limitations: Most tables exclude vacant seasonal and migratory units since information on characteristics of such units is difficult to obtain.

Historical comparability: Similar data have been collected since 1940. In 1970, seasonal and migratory vacant units were reported in two separate categories.

See also: BOARDED-UP STATUS; HOMEOWNER VACANCY RATE; OCCUPANCY STATUS; RENTAL VACANCY RATE; VACANCY, DURATION OF

VALUE. For owner-occupied housing units, the respondent's estimate of the current dollar worth of the property. For vacant units, value

is the price asked for the property. A property is defined as the house and land on which it stands. Respondents estimated the value of house and land even if they only owned the house or owned the property jointly.

Statistics on value are shown only for owner-occupied condominium units and for "specified owner-occupied" units, i.e., one-family houses on less than 10 acres and with no business on the property. Value tabulations exclude renter-occupied units, mobile homes or trailers, houses on 10 or more acres, houses with a commercial establishment or medical office on the property, and noncondominium units in multi-family buildings (e.g., cooperatives).

When value data are presented solely for vacant units for sale only, the term "sale price asked" is substituted. In the computation of aggregate and mean value, \$7,500 is taken as the average of the interval "less than \$10,000," and \$250,000 is taken as the average of the interval "\$200,000 or more."

Limitations. A 1970 census evaluation study found that respondents tended to report a higher value of home in a reinterview survey, with more detailed questions, than in the census. On the other hand, a comparison of 1970 census reports of value with subsequent actual sale prices of a sample of homes sold one to two years later found that the census understated the median market value of those homes by only three percent (compared to the sale prices adjusted for inflation between the census and sale date). This result cannot be generalized to all census value data, however, since the sample was restricted to metropolitan areas, and since census respondents who were about to sell their homes may have been more aware of market values.

Historical comparability: Similar data have been collected since 1930 (and in 1920 for mortgaged nonfarms only), but value for condominiums is new for 1980. For historical comparability, tables will show condominiums and noncondominiums separately. Values for 1980 reflect increased housing prices: the highest category in 1970 was "\$50,000 or more," for 1980, \$200,000 or more. Also, the number of categories increased from 11 in 1970 to 24 in 1980.

#### WHITE POPULATION. See RACE

YEAR-ROUND HOUSING UNITS. All occupied units plus vacant units intended for year-round use. Almost all data on housing characteristics are limited to year-round units. Vacant units held for seasonal use or migratory labor are excluded because it is difficult to obtain reliable information for them. Counts of the total housing inventory include both year-round and seasonal units.

#### QUESTIONNAIRE INFORMATION

### 1980 Census Complete Count Questionnaire Facsimile

Please fill out this **official** Census Form and mail it back on Census Dav. Tuesday, April 1, 1980

# 1980 **Census of the United States**

### Your answers are confidential

By law (title 13, U.S. Code), census employees are subject to fine and/or imprisonment for any disclosure of your answers. Only after 72 years does your information become available to other government agencies or the public. The same law requires that you answer the questions to the best of your knowledge.

### Para personas de habla hispana

(For Spanish-speaking, persons) SI USTED DESEA UN CUESTIONARIO DEL CENSO EN ESPAÑOL llame a la oficina del censo. El número de taléfono se encuentra en el encasillado de la dirección.

O, si prefiere, marque esta casilla 🔲 y devuelva el cuestionario por correo en el sobre que se le incluye.

.5. Department of Com ureau of the Canaus prm D-1 U.S. Departs Bureau of the Form D-1

A message from the Director, Bureau of the Consus . . .

We must, from time to time, take stock of ourselves as a people if our Nation is to meet successfully the many national and local challenges we face. This is the purpose of the 1980 CONSULS.

The essential need for a population census was recognized almost 200 years ago when our Constitution was written. As provided by article I, the first census was conducted in 1790 and one has been taken every 10 years since then.

The law under which the census is taken protects the confidentiality of your answers. For the next 72 years - or until April 1, 2052 - only sworn census workers have access to the individual records, and no one else may see them.

Your answers, when combined with the answers from other people, will provide the statistical figures needed by public and private groups, schools, business and industry, and Federal, State, and local governments across the country. These figures will help all sectors of American society understand how our population and housing are changing. In this way, we can deal more effectively with today's problems and work toward a better future for all of us.

The census is a vitally important national activity. Please do your part by filling out this census form accurately and completely. If you mail it back promptly in the enclosed postage-paid envelope, it will save the expense and inconvenience of a census taker having to visit you.

Thank you for your cooperation.

Ferm Approved: D.M.B. No. 41-578006

Please continue.

## How to fill out your Census Form

See the filled-out example in the yellow instruction guide. This guide, will help with any problems you may have.

If you need more help, call the Census Office. The telephone number of the local office is shown at the bottom of the address box on the front cover.

Use a black pencil to answer the questions. Black pencil is better to use than ballpoint or other pens.

Fill circles "O" completely, like this: ●

When you write in an answer, print or write clearly.

Make sure that answers are provided for everyone here.

See page 4 of the guide if a roomer or someone else in the household does not want to give you all the information for the form.

Answer the questions on pages 1, 2, and 3.

Check your answers. Then write your name, the date, and telephone number on page 4.

Mail back this form on Tuesday. April 1, or as soon afterward as you can. Use the enclosed envelope: no stamp is needed.

Please start by answering Question 1 below.

### **Question 1**

#### List in Question 1

- •Family members living here, including babies still in the hospital
- · Relatives living here.
- . Lodgers or boarders living here.
- •Other persons living here.
- College students who stay here while attending college. even if their parents live elsewhere.
- Persons who usually live here but are temporarily away
   (including children in boarding school below the college
   level)
- Persons with a home elsewhere but who stay here most of the week while working.

#### Do Not List in Question 1

- Any person away from here in the Armed Forces.
- Any college student who stays somewhere else while attending college.
- •Any person who usually stays somewhere else most of the week while working there.
- Any person away from here in an institution such as a home for the aged or mental hospital.
- Any person staying or visiting here who has a usual home elsewhere.

1. What is the name of each person who was living here on Tuesday, April 1, 1980, or who was staying or visiting here and had no other home?

#### Note

. . . . . .

If everyone here is staying only temporarily and has a usual home elsewhere, please mark this box [].

Then please:

answer the questions on pages 2 and 3, and
 enter the address of your usual home on page 4.

Please continue 🦯

### Complete Count Questionnaire Changes -- 1970 to 1980 1/

The content of the 1980 census questionnaires is best viewed as a continuation of the previous decade's experience rather than a radical departure. Many census items have remained unchanged from 1970; others have been slightly modified to clarify the question wording or remove confusing instructions. In some cases, 1970 questions have been replaced with new questions which approach a subject from a different angle. For example, the question on race no longer mentions color or race in the question but instead provides a set of racial groups. With regard to the relationship question, the "head of household" terminology used in 1970 has been replaced by a format using a householder as a means to reconstruct families without implying the notion of dominance implicit in the designation of a household head. A brief item-by-item list of changes made in the census questions between 1970 and 1980 is presented below. The wordings of the 1980 census questions are provided in parentheses for each item. In this presentation, some items are listed as "No change"; this indication may, however, include some minor changes in wording or question format due to changes in basic questionnaire construction or style of presentation. It should also be noted that the phrase "this person" in the wording of census questions refers to the person for whom data are being provided, not necessarily the person filling the form.

### 100-percent Population

- 1. <u>Name</u>. ("What is the name of each person who was living here on Tuesday, April 1, 1980, or who was staying or visiting here and had no other home?"): No change from 1970. The names of persons given in question 1 are listed at the top of the response columns for the 100-percent items and at the beginning of sample pages on the long form.
- 2. <u>Household</u> relationship. ("How is the person related to the person in column 1?") Revised from 1970 to replace the "Head of household" category with a format using a reference person, i.e. the "Person in column 1."

The 1970 category "Other relative of head" has been replaced by three categories, "Brother/sister," "Father/mother," and "Other relative." Since the category "Patient or inmate" is marked only by census enumerators, it has been moved to the bottom of the form in a space reserved for "Census use only." New nonrelative categories include "Partner, roommate" and "Paid employee."

3. Sex. ("Sex"): No change from 1970.

1/ Excerpt from "The 1980 Census Questionnaires." by David E. Silver and Jean E. Foster Statistical Reporter. (July, 1979)

- ("Is this person-"): The specific reference to "color or 4. Race. race" used in the 1970 census question has been replaced with the "Is this person-," and response is expected to indicate phrase, the racial group the person most closely identifies with. Individual categories for Vietnamese, Asian Indian, Guamanian, The use of a specially printed and Samoan have been added. schedule for Alaska in 1970 --wherein the categories Hawaiian and Korean were replaced by Aleut and Eskimo--has been eliminated by including the latter as categories on the standard questionnaire. As a result, the 1980 questionnaire will have 14 specific categories instead of the  $\overline{8}$  in 1970.
- Age. ("Age, and month and year of birth"/ 5a. "Print age at last birthday."/ 5b. "Print month and fill one circle."/ 5c. 5. "Print year in the spaces, and fill one circle below each number."): No change in age and month of birth. The year-ofbirth question format was revised to replace the 1970 response categories with self-coding FOSDIC circles for the last three digits of the year of birth. The first digit is prefilled with a "1."
- No change from 1970. ("Marital status"): Marital Status. ("Marital status"): No change categories include: "Now married," 6. "Widowed," "Divorced," "Separated," and "Never married."
- Spanish/Hispanic origin or descent. ("Is this person of Spanish/Hispanic origin or descent?"): A 5-percent sample 7. question in 1970. Response categories for 1980 include: "No, (not Spanish/Hispanic)"; "Yes, Mexican, Mexican-Amer., Chicano"; "Yes, Puerto Rican"' "Yes, Cuban"; and "Yes, other other Spanish/Hispanic."

#### Coverage

H1

(H1. "Did you leave anyone out of Question 1 because H3. Coverage. you were not sure if the person should be listed-"/H3. "Is anyone visiting here who is not already listed?"): In 1970, these questions were numbered 10-12 and were included in the 100percent population section. Question 9 in 1970 was an inquiry concerning whether the number of persons in the household exceeded eight on the short-form (or seven on the long-form) questionnaire; this question has been replaced by instructions on the questionnaire directing the respondent's action if the number of persons in the household exceeds seven.

#### 100-percent Housing

H4. Number of living quarters at address. ("How many living quarters, occupied and vacant, are at this address?") No change from 1970.

- 4. Race. ("Is this person-"): The specific reference to "color or race" used in the 1970 census question has been replaced with the phrase, "Is this person-," and response is expected to indicate the racial group the person most closely identifies with. Individual categories for Vietnamese, Asian Indian, Guamanian, and Samoan have been added. The use of a specially printed schedule for Alacka in 1970 --wherein the categories Hawaiian and Korean were replaced by Aleut and Eskimo--has been eliminated by including the latter as categories on the standard questionnaire. As a result, the 1980 questionnaire will have 14 specific categories instead of the 8 in 1970.
- 5. Age. ("Age, and month and year of birth"/ 5a. "Print age at last birthday."/ 5b. "Print month and fill one circle."/ 5c. "Print year in the spaces, and fill one circle below each number."): No change in age and month of birth. The year-ofbirth question format was revised to replace the 1970 response categories with self-coding FOSDIC circles for the last three digits of the year of birth. The first digit is prefilled with a "1."
- 6. <u>Marital Status</u>. ("Marital status"): No change from 1970. Response categories include: "Now married," "Widowed," "Divorced," "Separated," and "Never married."
- 7. <u>Spanish/Hispanic</u> origin or descent. ("Is this person of Spanish/Hispanic origin or descent?"): A 5-percent sample question in 1970. Response categories for 1980 include: "No, (not Spanish/Hispanic)"; "Yes, Mexican, Mexican-Amer., Chicano"; "Yes, Puerto Rican"' "Yes, Cuban"; and "Yes, other Spanish/Hispanic."

#### Coverage

H1

H3. Coverage. (H1. "Did you leave anyone out of Question 1 because you were not sure if the person should be listed-"/H3. "Is anyone visiting here who is not already listed?"): In 1970, these questions were numbered 10-12 and were included in the 100percent population section. Question 9 in 1970 was an inquiry concerning whether the number of persons in the household exceeded eight on the short-form (or seven on the long-form) questionnaire; this question has been replaced by instructions on the questionnaire directing the respondent's action if the number of persons in the household exceeds seven.

#### 100-percent Housing

H4. Number of living quarters at address. ("How many living quarters, occupied and vacant, are at this address?") No change from 1970.

- H5. Access to Unit. ("Do you enter your living quarters-") No change from 1970; response categories specify types of access to the unit.
- H6. <u>Complete plumbing facilities.</u> ("Do you have complete plumbing facilities in your living quarters, that is, hot and cold piped water, a flush toilet, and a bathtub or shower?"): Consolidates in the 1970 question on hot and cold piped water, flush toilet, and bathtub or shower into one question.
- <u>H7. Number of rooms.</u> ("How many rooms do you have in your living quarters?"): No change from 1970.
- H8. Tenure. (Are your living quarters-"): This question which differentiates units that are owned, rented or occupied without payment of cash rent has been separated from the single inquiry in 1970 concerning both tenure and condominium or cooperative status.
- <u>H9.</u> Condominium Identification. ("Is this apartment (house) part of a condominium?"): Separated from the single inquiry in 1970 concerning both tenure and condominium or cooperative status. The part of the 1970 inquiry concerning cooperatives has been deleted from the 1980 questionnaire.
- H10. Acreage, and presence of commercial establishment. (H10. "If this is a one-family house-"/ H10a. Is the house on a property of 10 or more acres?"/ Hb. "Is any part of the property used as a commercial establishment or medical office?"): The combined 1970 inquiry about acreage and commercial establishment has been divided into two "yes" or "no" parts. The inquiry about "onefamily house" has been incorporated into the question wording itself. These provide a screener in the tabulation of value and rent.
- H11.Value. ("If you live in a one-family house or a condominium unit which you own or are buying--What is the value of this property, that is, how much do you think this property (house and lot or condominium unit) would sell for if it were for sale?"): Revised from 1970 to explicitly include condominiums in 1980. Based on data from the Annual Housing Survey, the number of categories has been increased from 11 in 1970 to 24 for 1980, and the range of values now goes from "Less than \$10,000" to \$200,000 or more."
- H12.<u>Rent.</u> ("If you pay rent for your living quarters--What is the monthly rent?"): Revised for 1980 to eliminate the write-in space for rent which was provided in 1970 in addition to specific response categories. Based on data from the Annual Housing Survey, the number of categories has been increased from 14 in 1970 to 24 for 1980, and the range of rent intervals now goes from "Less than \$50" to "\$500 or more."
- <u>C1, C2, C3, & D.</u> <u>Vacancy status.</u> These items are filled only by census enumerators for vacant units. In addition to vacancy

status and months vacant which appeared in 1970, the 1980 questionnaires will indicate whether a vacant unit is "boarded up."

status and months vacant which appeared in 1970, the 1980 questionnaires will indicate whether a vacant unit is "boarded up."
