

# 103rd Congressional District Geographic Entity File Technical Documentation

D1-D90-CDGE-14-TECH

**Note:** This technical documentation was issued at same time as the corresponding data file and does not necessarily reflect changes to the data file that may have been made later. We offer it as a service to our customers who have purchased the file, but we do not in general offer technical support for past data files. Note that although the documentation may refer to data on tape, the U.S. Census Bureau no longer releases data on magnetic tape; customers purchasing files previously released on tape will receive the file in ASCII on CD-ROM. For information about this and other technical documentation, please contact the Customer Services Center at 301-763-INFO (4636).

Additionally, Census Bureau organization, telephone numbers, and staff cited in this technical documentation are not current. For updated information, see our Telephone Contacts site at <http://www.census.gov/contacts/www/contacts.html> or Staff Search at <http://www.census.gov/cgi-bin/main/email.cgi>.

### ACKNOWLEDGEMENTS

This technical documentation was prepared by the Data User Services Division, Data Access and Use Staff, Deborah Barrett, Chief, and Patricia O. Fuellhart, Chief of its Technical Information Section. Barbara Selinske was the coordinator for this file. Clerical support was provided by Virginia Collins and Barbara Shugart. Programming for this file was done by the Maintenance Software Branch of the Geography Division, David Galdi, Chief. Joel Sobel, Chief, Cathy McCully, Section Chief, David Aultman, and Lee Bush of the Geographic Areas Branch, Geography Division provided assistance in the development of the documentation and prepared the specifications for the file.

The file should be cited as follows:

# ABSTRACT

*103rd Congressional District Geographic Entity file, 1990 / developed by the Bureau of the Census. —Washington: The Bureau [producer and distributor], 1993.*

## Type of File

The Census Bureau is releasing the 103rd Congressional District Geographic Entity file to enable data users to ascertain the geographic relationships of 103rd congressional districts to selected governmental and statistical geographic entities. The Census Bureau produced this file by extracting selected geographic entity relationship information from the Census Bureau's TIGER™ (Topologically Integrated Geographic Encoding and Referencing) data base. These geographic entities are identified by Census Bureau and Federal Information Processing Standards (FIPS) geographic codes. The file does not include the geographic names referenced by these geographic codes. The 103rd Congressional District Geographic Entity file is a "flat" file in ASCII fixed field format. The 1990 103rd Congressional District Geographic Entity File has a Data Set Name of CEN103XX.F01xxxx where XX is the United States Postal Service State abbreviation.

## Subject-Matter Description and Geographic Coverage

This product presents the 103rd congressional districts furnished and certified by the appropriate agency or official in each State. The related geographic entity boundaries are for those governmental and statistical entities in effect on January 1, 1990.

The file includes the entire United States, American Samoa, Guam, Puerto Rico, and the Virgin Islands of the United States. Each record consists of a unique set of geographic relationships. In "at large" States and State-equivalent areas with non-voting delegates, the selected geographic references are linked to congressional district 00.

Each record represents a census geographic tabulation unit (GTUB), a unique combination of geographic codes. For example, to determine the total population of persons living in Congressional District 1 in County 003 and Place 0015, you must calculate the sum of population for all records that share those geographic code values. The 103rd Congressional District Geographic Entity file provides the following geographic entity relationships:

- State (or statistically equivalent entity)
- Congressional district
- County (or statistically equivalent entity)
- County subdivision (minor civil division, census county division, or unorganized territory)
- Place (incorporated place and census designated place - CDP)
- American Indian/Alaska Native area (reservation, trustland, tribal jurisdiction statistical area (TJSA), tribal designated statistical area (TDSA), Alaska Native village statistical area (ANVSA))
- Urbanized area (UA)
- Urban/rural descriptor
- Metropolitan statistical area/primary metropolitan statistical area (MSA/PMSA)

In addition, the file also includes the 1990 census total population and housing counts, and total land area associated with each record.

## File Size and Sort Sequence

The ASCII file is 4.79 megabytes in size. Each record consists of 19 fixed fields, plus carriage return and line feed. Blank fields and character positions are filled with blanks. The records are sorted according to geographic code and field position, left to right (State, congressional district, county, county subdivision, place, and so forth).

## File Availability

The 103rd Congressional District Geographic Entity file is available on 3-1/2 inch diskette, magnetic tape and tape cartridge (IBM 3480 compatible). Tape options include 6250 or 1600 bpi, ASCII or EBCDIC, labeled or unlabeled. The minimum price for a computer tape is \$175. Standard pricing for diskettes is \$60 for the first disk and \$12 for each additional disk. For ordering information, contact Customer Services, Data User Services Division, Washington, DC 20233. Phone: (301) 763-4100 or FAX: (301) 763-4794. Each order includes a copy of the technical documentation. Additional copies are \$10. An order form follows this chapter.

## **Related Computer Files and Publications**

*Geographic Reference File-Names (1990 Census Version).* This file provides the bridge between the geographic area codes found in the 103rd Congressional District Geographic Entity file and their English language names. The file is available on magnetic tape and tape cartridge from Customer Services (see address above). The price is \$275.

*103rd Congressional District Census Block Equivalency file.* This file provides specific boundary information at the census block level for 103rd congressional districts. (The majority of

congressional district boundaries follow 1990 census tabulation block boundaries.) This file is available on magnetic tape and tape cartridge from Customer Services (see address above). The minimum price is \$175.

*Federal Information Processing Standards (FIPS) Publications No. 5, 6, 9, and 55.* These publications identify the entities related to FIPS codes for the entities contained in the file. These publications are available through the National Technical Information Service, U.S. Department of Commerce, Springfield, Virginia 22161.

# OVERVIEW

## 103rd Congressional District Geographic Entity File

### Data Sources:

The Census Bureau obtained the 103rd congressional district boundary information from the appropriate agency or official in each State, usually from the Secretary of State's Office. The majority of States submitted equivalency files or listings to the Census Bureau, coding congressional districts to one or more geographic entities, such as census tract/block numbering area and census block, voting district, county, and so forth). A few states chose to annotate their congressional district boundaries on base maps furnished by the Census Bureau. This information then was inserted into the Census Bureau's TIGER data base. Each congressional district was edited for contiguity, and Census Bureau counts were matched to State totals. Any differences were resolved by contacting the appropriate State agencies.

Following insertion and editing of the congressional district information, the Census Bureau sent maps covering counties with two or more congressional districts to the respective States for certification by the submitting agency.

### Information Limitations:

The 103rd Congressional District Geographic Entity file reflects boundaries of legal areas as reported to the Census Bureau to be legally in effect on January 1, 1990, statistical areas as delineated for the 1990 decennial census, and the final 1990 census tabulation geographic area codes for the selected entities. The file also reflects the boundaries of those entities used to insert the 103rd congressional districts into the TIGER data base.

In a few instances, geographic entities are listed as partly within a congressional district only because the congressional district boundary included a water block within the geographic entity; water blocks have zero population and land area. Please refer to the User Notes for a listing of these instances.

Where the boundary of a congressional district of the 103rd Congress splits a 1990 census block, the Census Bureau's maps depict its location correctly, but for data tabulation purposes, that block is allocated in its entirety to only one congressional district, as specified by the State or assigned by the Census Bureau. Appendix A lists all 1990 census blocks split by a 103rd congressional district boundary and shows the congressional district to which each is assigned.

# DATA DICTIONARY

## 103rd Congressional District Geographic Entity File

The Congressional District Geographic Entity file consists of a single fixed-field record type. This data dictionary lists all fields in the record.

Name	Type	Data Size	Character Position		Description
			Beg	End

# DEFINITIONS

## 103rd Congressional District Geographic Entity File

### Legal Administrative Entities

**United States**—The 50 States and the District of Columbia

**States and Statistically Equivalent Areas**—The 50 States; in addition, the Census Bureau treats the District of Columbia, Puerto Rico, and the outlying areas - American Samoa, Guam, and the Virgin Islands of the United States - as statistical equivalents to States for presentation of congressional district data. The remaining outlying areas under U.S. jurisdiction do not have delegates or representatives in the Congress. (Total entities for 1990 is 57.)

**Counties, Parishes, Statistically Equivalent Areas**—The first-order divisions of each State, the District of Columbia, Puerto Rico, and the outlying areas: counties for 48 states; parishes for Louisiana; boroughs and census areas for Alaska; plus independent cities in Maryland, Missouri, Nevada, and Virginia; Yellowstone National Park in Montana, "District of Columbia" for the District of Columbia, municipios in Puerto Rico; other entities in the outlying areas. County and county-equivalent areas cover the entire U. S. and its territories, with the exception of all or part of some water bodies that are not assigned to any county or county-equivalent area. (Total entities for 1990 is 3,286.)

**Minor Civil Divisions (MCD's)**—Legally defined subcounty areas such as towns and townships. For the 1990 census, these are found in 28 states, Puerto Rico, and the outlying areas. In 20 of these states, MCD's have functioning governments. (Total entities for 1990 is 30,537.)

**Incorporated Places**—Legal units incorporated as a city, town (excluding the New England States, New York and Wisconsin), borough (excluding Alaska and New York), or village. (Total entities for 1990 is 19,375.)

**Consolidated Cities**—A consolidated government is a unit of local government for which the functions of an incorporated place and its county or MCD have merged. Where one or more other incorporated places within the consolidated

government continue to function as separate governmental units, the primary incorporated place is referred to as a consolidated city. The data presentations for places include the semi-independent place and the consolidated city (remainder), that is, the portion of the consolidated city not in one of those places, as well as separate data for the consolidated city as a whole. This entity is not differentiated from other place-level entities in the Congressional District Geographic Entity file. (Total entities for 1990 is 6.)

**American Indian Reservations**—American Indian areas with boundaries established by treaty, statute, and/or executive or court order. (Total entities for 1990 is 310.)

**American Indian Trustlands**—American Indian off-reservation tribal or individual properties held in trust by the Federal Government and thought to be inhabited. (Total American Indian entities with trustlands for 1990 is 52.)

**Alaska Native Regional Corporations (ANRC's)**—Corporate entities established by the Alaska Native Claims Settlement Act (P.L. 92-203) to carry out the business and non-profit operations established by and for Native Alaskans under the Act. Twelve ANRC's have specific boundaries that cover the State of Alaska in its entirety, except for the Annette Islands Reserve. This entity is not included in the 103rd Congressional District Geographic Entity file. (Total entities for 1990 is 12.)

**ZIP Codes**—Administrative units established by the United States Postal Service (USPS) for the distribution of mail. ZIP Codes generally do not respect the boundaries of legal or statistical entities. Rather, ZIP Codes are associated with specific addresses to ensure the most efficient delivery of mail by the USPS and cannot be represented by clearly identifiable boundaries. This entity is not included in the 103rd Congressional District Geographic Entity file. (Total entities tabulated by the Census Bureau, (not the USPS total) for 1990 is 36,932.)

**Congressional Districts**—Legal areas from which members are elected to the U.S. House of Representatives based on the apportionment of the

population among the States following each decennial census. (Total entities for 1990 is 440, including 4 non-voting delegates and one non-voting resident commissioner.)

**School Districts**—Areas identified by State officials so that the Census Bureau can prepare special tabulations for the U.S. Department of Education. They comprise four levels of districts: elementary, intermediate, secondary, and unified districts. These areas have virtually no relationship to other areas and may even split 1990 census blocks. In tabulating data, the Census Bureau apportioned population for census blocks according to the proportion of the land area within each district within the block. This entity is not included in the 103rd Congressional District Geographic Entity file. (Total entities for 1990 is 14,422.)

## Statistical Entities

**Alaska Native Village Statistical Areas (ANVSA's)**—1990 census statistical areas that delineate the settled area of each Alaska Native village (ANV). Officials of the ANRC's and other appropriate State officials delineated the ANVSA's for the Census Bureau for the sole purpose of presenting 1990 census data. (Total entities for 1990 is 217.)

**Tribal Designated Statistical Areas (TDSA's)**—Geographic areas delineated for 1990 census data tabulation purposes by tribal officials of Federally and State-recognized tribes outside of Oklahoma that do not have a legally defined reservation. (Total entities for 1990 is 19.)

**Tribal Jurisdiction Statistical Areas (TJSA's)**—Geographic areas delineated for 1990 census data tabulation purposes by tribal officials in Oklahoma for Federally recognized tribes that do not have a legally defined reservation. (Total entities for 1990 is 17.)

**Census County Divisions (CCD's)**—Areas delineated by the Census Bureau in cooperation with State and local officials in States where MCD's are not adequate for reporting subcounty statistics. (Total entities for 1990 is 5,581.)

**Unorganized Territories (UT's)**—Areas delineated by the Census Bureau for those portions of a State with MCD's where MCD's do not exist or are not adequate for reporting subcounty statistics. (Total entities for 1990 is 282.)

**Census Subareas**—Statistical entities delineated cooperatively by the Census Bureau and the State of Alaska to present data at the sub-county level in Alaska. (Total entities for 1990 is 40.)

**Census Designated Places (CDP's)**—Densely settled population centers without legally defined corporation limits or corporate powers, defined in cooperation with State officials and local data users. (Total entities for 1990 is 4,423.)

**Census Tracts**—Small, locally delineated statistical areas within selected counties, generally having stable boundaries and, when first established by local committees, designed to have relatively homogeneous demographic characteristics. The 103rd Congressional District Geographic Entity file does not include this entity. (Total entities for 1990 is 50,690.)

**Block Numbering Areas (BNA's)**—Areas delineated by State governments or the Census Bureau for the purpose of grouping and numbering census blocks in counties without census tracts. The 103rd Congressional District Geographic Entity file does not include this entity. (Total entities for 1990 is 11,586.)

**Block Groups (BG's)**—Statistical areas composed of blocks that are numbered within the same hundred series within a census tract or BNA. The 103rd Congressional District Geographic Entity file does not include this entity. (Total entities for 1990 is 229,192.)

**Census Blocks**—Small, usually compact areas, generally bounded by streets and other prominent physical features as well as boundaries of legal areas for which the Census Bureau tabulates data. Census blocks do not cross county, census tract, or BNA boundaries. The 103rd Congressional District Geographic Entity file does not include this entity. (Total entities, including zero population blocks, for 1990 is 7,017,425.)

## USER NOTES

User Notes supply file purchasers with additional or corrected information which becomes available after the technical documentation or files are prepared. They are issued in a numbered series and automatically mailed to all users who purchase technical documentation from the Census Bureau. Other users may obtain them by subscribing to the User Note series. Contact Customer Services (301-763-4100) for subscription information.

Each User Note has a cover sheet which should be filed following this page. Technical documentation replacement pages will follow the cover sheet. These pages need to be filed in their proper location and the original pages destroyed. Replacement pages can be readily identified, since they have the User Note date on the lower outside portion of each page.

## **USER NOTE ORDERING INFORMATION**

Additional information concerning this file may be available at a later date. If you receive this technical documentation (with or without tape purchase) from the Census Bureau and wish to receive these User Notes, please complete the coupon below and return it to:

Data User Services Division  
Customer Services Branch  
Bureau of the Census  
Washington, DC 20233
