

# 1990 Census of Population and Housing Summary File 4 (Tape): Puerto Rico Technical Documentation

D1-D90-S400-14-TECHP

**Note:** This technical documentation was issued at same time as the corresponding data file and does not necessarily reflect changes to the data file that may have been made later. We offer it as a service to our customers who have purchased the file, but we do not in general offer technical support for past data files. Note that although the documentation may refer to data on tape, the U.S. Census Bureau no longer releases data on magnetic tape; customers purchasing files previously released on tape will receive the file in ASCII on CD-ROM. For information about this and other technical documentation, please contact the Customer Services Center at 301-763-INFO (4636).

Additionally, Census Bureau organization, telephone numbers, and staff cited in this technical documentation are not current. For updated information, see our Telephone Contacts site at <http://www.census.gov/contacts/www/contacts.html> or Staff Search at <http://www.census.gov/cgi-bin/main/email.cgi>.

## CITATION

*Census of Population and Housing, 1990: Summary Tape File 4 (Puerto Rico) [machine-readable data files] / prepared by the Bureau of the Census. —Washington: The Bureau [producer and distributor], 1993.*

## TYPE OF FILE

Summary statistics.

## UNIVERSE DESCRIPTION

All persons and housing units in Puerto Rico.

## SUBJECT MATTER DESCRIPTION

Summary Tape File 4 (STF 4) for Puerto Rico contains sample data weighted to represent the total population. In addition, the file contains 100-percent counts and unweighted sample counts for total persons and total housing units. Other population and housing items are listed below. Please see the List of Tables chapter for a complete listing.

Population items include:

Ability to read and write	Farm and nonfarm
Ability to speak Spanish	population
and English	Group quarters
Age	Hours worked
Children ever born	Household type and
Citizenship	relationship
Class of worker	Income in 1989
Educational attainment	Industry
Employment status	Length of last stay in U.S.
Family type	Marital status

Means of transportation  
to work  
Mobility limitation  
status  
Occupation  
Parents' place of birth  
Place of birth  
Place of work  
Poverty status in 1989  
Private vehicle  
occupancy  
Residence in 1985  
School enrollment  
Self-care limitation  
status

Housing items include:

Age of householder  
Air conditioning  
Bathrooms  
Bedrooms  
Condition of housing unit  
Condominium status  
Cooking fuel  
Housing units  
Kitchen facilities  
Mortgage status  
Occupancy status  
Plumbing facilities  
Rent  
Rooms  
Selected monthly owner  
cost

Sex  
Subfamily type  
Travel time to work  
Urban and rural  
population  
Veteran/military status  
Vocational training  
Work disability status  
Work status in 1989  
Workers in family in  
1989  
Year of arrival or return  
to Puerto Rico  
Year of entry

Sewage disposal  
Source of water  
Telephone availability  
Tenure  
Toilet facilities  
Type of construction  
Type of water heater  
Units in structure  
Urban and rural  
housing  
Vacancy status  
Value of housing unit  
Vehicles available  
Year householder  
moved into unit  
Year structure built

Selected aggregates and medians also are provided. Data are presented in 255 population tables (matrices) and 155 housing tables (matrices).

## GEOGRAPHIC COVERAGE

Summary Tape File 4 for Puerto Rico is released as two files—4A and 4B. The record layout is identical for both files, but the geographic coverage differs.

This abstract lists the most frequently accessed geographic levels. The Summary Level Sequence Charts chapter outlines the hierarchical and inventory summaries in their entirety.

STF 4A for Puerto Rico provides data for Puerto Rico and its subareas in hierarchical sequence down to the census tract/block numbering level. This hierarchy is shown below:

State<sup>1</sup>

- Metropolitan Statistical Area/Consolidated  
Metropolitan Statistical Area (or MSA/CMSA part)  
County<sup>2</sup>
  - Place<sup>5</sup> [10,000 or more persons] (or place part)
- Census Tract/Block Numbering Area (BNA)
  - Block group

STF 4B for Puerto Rico has inventory (complete) summaries for the following geographic areas:

- County<sup>2</sup>
- County Subdivision<sup>3</sup>
- Subbarrio<sup>4</sup>
- Place<sup>5</sup>
- Metropolitan Statistical Area/Consolidated  
Metropolitan Statistical Area
- Urbanized Area

## RELATED PRINTED REPORTS

Listed below are the 1990 census printed reports for Puerto Rico containing sample data. These reports will be available from Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402. An order form follows this abstract.

1990 CPH-3-53, *Population and Housing Characteristics for Census Tracts and Block Numbering Areas*. Shows data for most of the population and housing subjects included in the 1990 census. Some tables will be based on the 100-percent tabulations, others on the sample tabulations. One report will be published for each metropolitan statistical area (MSA) and primary metropolitan statistical area (PMSA), and one for the nonmetropolitan balance of Puerto Rico. Statistics will be presented in a geographic hierarchy of municipio—place of 10,000 or more inhabitants—census tract/block numbering area (BNA). Scheduled for release in 1993.

1990 CPH-5-53, *Summary Social, Economic, and Housing Characteristics*. Provides sample population and housing data for Puerto Rico; its municipios; barrios-pueblo and barrios, subbarrios, and places. Stock No. 003-024-08155-5. Price: \$41.

1990 CP-2-53, *Social and Economic Characteristics*. Focuses on the population subjects collected on a sample basis in 1990. Data will be shown for Puerto Rico; its municipios; MA's; UA's; barrios-pueblo and

barrios, subbarrios, and places of 2,500 or more inhabitants; and summary geographic areas. Scheduled for release in 1993.

1990 CH-2-53, *Detailed Housing Characteristics*. Focuses on the housing subjects collected on a sample basis in 1990. Data will be shown for Puerto Rico; its municipios; MA's; UA's; barrios-pueblo and barrios, subbarrios, and places of 2,500 or more inhabitants; and summary geographic areas. Scheduled for release in 1993.

## RELATED REFERENCE MATERIALS

1990 *Census of Population and Housing Tabulation and Publication Program for Puerto Rico*. This booklet provides descriptions of the data products available from the 1990 census. Available without charge from Customer Services, Data User Services Division, Bureau of the Census, Washington, DC 20233. Phone: 301-763-4100. FAX: 301-763-4794.

*Census '90 Basics*. This booklet provides a general overview of the census activity and detailed information on census content, geographic areas, and products. Available without charge from Customer Services (see above).

*Census ABC's—Applications in Business and Community*. This booklet highlights key information about the 1990 census and illustrates a variety of ways the data can be used. Available without charge from Customer Services (see above).

1990 CPH-R-A1, *1990 Census of Population and Housing Guide, Part A, Text*. This provides detailed information about all aspects of the census. Available from the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402. Stock No. 003-024-08574-7. Price: \$11.

1990 CPH-R-1B, *1990 Census of Population and Housing Guide, Part B, Glossary*. This is available from the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402. GPO S/N 003-024-08679-4. Price: \$5.50. Part C, Index, provides an index of Summary Tape Files 1-4 and will be available in the fall of 1993.

## TECHNICAL DESCRIPTION

STF 4 (Puerto Rico) data file has a record size of 96,372 characters divided into twelve segments of 8,031 characters each. The first 300 characters of each segment contain geographic information.

## FILE AVAILABILITY

Summary Tape File 4 (Puerto Rico) is available as 4A and 4B. Pricing information is available from Customer Services, Data User Services Division, Bureau of the Census, Washington, DC 20233. (See page 1-2 for phone and FAX information.) A machine-readable data

<sup>1</sup>Puerto Rico

<sup>2</sup>Municipio in Puerto Rico

<sup>3</sup>Barrio-pueblo or barrio in Puerto Rico

<sup>4</sup>In Puerto Rico, some subdivisions (barrios-pueblo and barrios) are divided into sub-minor civil divisions (subbarrios).

<sup>5</sup>Zona urbana or comunidad in Puerto Rico

dictionary is included on the tape without charge. Options include 6250 or 1600 bpi, ASCII or EBCDIC, labeled or unlabeled. The file also is available on IBM

3480 compatible tape cartridge for the same price. When ordering, please use the order form at the end of this chapter.

# HOW TO USE THIS FILE

## CONTENTS

Introduction .....	2-1
Using the File .....	2-2

## INTRODUCTION

This chapter serves as a guide for data users to both the tape and the technical documentation. Novice users trying to understand how to use the documentation and the file should read this chapter first.

### Documentation Chapters

The Abstract chapter in this documentation provides a quick overview of the file, including the formal title, geographic coverage, subject coverage, and file availability. Also shown are citations for related reference materials and printed reports. Their titles and geography are included in this section, along with purchasing information.

The Subject Locator is an aid to finding which tables provide the information needed. The List of Tables (Matrices) and the Table (Matrix) Outlines provide two types of presentations for the tables available in the file. The List of Tables (Matrices) has the table titles and universes.

The Table (Matrix) Outlines offer a detailed presentation of the tables. When reviewing the tables, remember that a colon (:) following an entry indicates the entry is a heading, not a data cell.

### User Notes

Information about file or documentation changes sometimes becomes available after the documentation has been printed. User notes inform the user community about these changes. These are issued in a numbered series. If there are technical documentation changes, revised pages usually accompany them. The revised pages should be inserted in their proper location, but the user note cover sheet should be filed in the User Notes chapter. Technical notes, which contain file errata, are also issued by the Census Bureau. We suggest filing these following appendix I.

### Data Dictionary

The data dictionary describes the file and provides character locations for each variable and each table. It

has two elements, the identification section and the table (matrix) section.

In the identification section, the components include the field name; the data dictionary reference name, a short mnemonic for use with software packages; field size; starting position; and data type (alphabetic, numeric, or alphanumeric). Some of the field and reference names in the identification section are not applicable to the Puerto Rico data; these usually are filled with 9's or 0's, as appropriate.

The identification section of the data dictionary is identical for all summary tape files. It provides a list of the geographic codes or refers the user to the appropriate source. Review the footnotes carefully; they provide explanations for various terms. These footnotes are listed at the end of the identification section of the data dictionary.

The table (matrix) section provides information on the table (matrix) number; table (matrix) description; number of implied decimals in each cell (if not 0); starting position within the record, within the segment, and for all cells within the first-level variable; and cell coordinates.

There also is a machine-readable data dictionary file on the data tape. This dictionary is designed to be converted for use with various software packages.

## Appendixes

Detailed information on geographic areas is in appendix A followed by subject-matter definitions in appendix B. Appendix C provides detailed statistical information about the data while appendix D outlines the data collection and processing procedures. A facsimile of the 1990 census questionnaire for Puerto Rico is in appendix E.

Appendix F furnishes detailed information on the 1990 census data products for Puerto Rico, as well as suggested sources of information and assistance. Map information is included in appendix G. The record layout for the machine-readable data dictionary file that accompanies each tape order is in appendix H.

Appendix I contains the code lists used in processing the data. These codes are used in conjunction with the table (matrix) outlines and data dictionary chapters. In the file presentation included in those chapters, some cell entries are followed by numeric codes in parentheses. These are the codes included in that cell.

## Count Corrections

The Census Bureau issues population count corrections on an occasional basis. Count corrections for geography at the place level and above are available from Customer Services, Data User Services Division, Bureau of the Census, Washington, DC 20233. Count corrections for geography at the census tract/BNA level or below are available from Population Division, Bureau of the Census, Washington, DC 20233. When requesting these corrections, please include the desired municipio, census tract/BNA, block group, or block numbers.

## USING THE FILE

### Internal File Labels

**System Labels**—Tape orders which specify labeled tapes will have a standard American National Standards Institute (ANSI) label. The system label consists of 17 characters, but only the first 12 are active. The remaining five characters will be 'X' filled. The 1990 STF 4 Puerto Rico file has a Data Set Name (DSN) of STF4tXPR.Fnnxxxxx where "t" is A or B, depending on the file; and, "nn" is a two-digit number with leading zeroes identifying the tape volume sequence. (The "X", "F", and "x" in the DSN remain constant.)

**User Labels**—Each user tape will have six user header labels and six user trailer labels. These labels combine information from the system label and the identification portion of the first and last record. These labels enable the user to quickly identify the beginning and ending records on each tape.

**User Header Labels**—The user header labels are designated UHL1 through UHL6. UHL1 and UHL2 repeat information from the system label in HDR1 and HDR2. UHL3 and UHL4 contain information from the identification portion of the first record on the tape. UHL5 through UHL6 contain a statement regarding the data.

**User Trailer Labels**—The user trailer labels are designated UTL1 through UTL6. UTL1 and UTL2 contain information from the system trailer label. UTL3 and subsequent user trailer labels contain identification information from the last record on the tape. The unused portion of UTL6 is blank filled.

### Specific File Information

Specific file information for Puerto Rico, such as record counts, is not provided in the technical documentation. However, each tape order is accompanied by a tape creation sheet. This sheet provides the file name, file label (HDR1), the third user header label (UHL3), record size, block size, and record count. The third user header label for each reel identifies the geog

raphy for the first record on the reel. For example, the UHL3 at the beginning of each reel of a three-reel file for a State provides the geography for the first record. If the geography needed is on reel three, only reel three needs to be processed.

The tape creation sheet received with the tape should be filed in the technical documentation notebook or with other tape information maintained by the user.

## Record Segmentation

Logical records are divided into segments, each containing identification information and parts of specific tables. A logical record is one geographic entity such as a State, a county, or subbarrio. Every logical record has a sequence number that is repeated in each segment. This is the logical record number (LOGRECNU). There is a unique LOGRECNU for every separate geographical entity on a specific tape. The LOGRECNU appears in position 19 of each segment.

Following this, beginning in position 25 is the logical record part number (LOGRECPN). The LOGRECPN indicates the segment number for a block of data within a record. See Chart 1, Segmentation of STF 4A Puerto Rico Records, for a list of segments for this file. The total number of parts, or segments, in a record (PARTREC) are shown in position 29. For the STF 4 Puerto Rico File the PARTREC will indicate 3.

It is important to check the LOGRECPN to be assured the correct segment or segments of a logical record have been accessed.

Each logical record has a record size of 96,372 characters. The record is divided into 12 segments of 8,031 characters with each segment having 300 characters of identification information followed by tables (matrices). The geographic information layout for each segment is identical to the identification information described for starting positions 1-300 of the data dictionary. The segmentation scheme is illustrated as follows:

Chart 1. Segmentation of STF 4A Puerto Rico Records

Segment 1	
Geographic Identification Information	P1 through P37—7 data cells 8,031 characters
Segment 2	
Geographic Identification Information	P37—32 data cells through P61—54 data cells 8,031 characters
Segment 3	
Geographic Identification Information	P61—66 data cells through P78—153 data cells 8,031 characters

Chart 1. Segmentation of STF 4A Puerto Rico Records—Con.

<b>Segment 4</b>	
Geographic Identification Information	P78—35 data cells through P106—8 data cells  8,031 characters
<b>Segment 5</b>	
Geographic Identification Information	P106—192 data cells through P120—1 data cell  8,031 characters
<b>Segment 6</b>	
Geographic Identification Information	P120—29 data cells through P189—12 data cells  8,031 characters including 6 characters filler
<b>Segment 7</b>	
Geographic Identification Information	P189—14 data cells through H27—24 data cells  8,031 characters including 3 characters filler
<b>Segment 8</b>	
Geographic Identification Information	H27—96 data cells through H36—103 data cells  8,031 characters
<b>Segment 9</b>	
Geographic Identification Information	H36—17 data cells through H61—37 data cells  8,031 characters including 6 characters filler
<b>Segment 10</b>	
Geographic Identification Information	H61—59 data cells through H96—130 data cells  8,031 characters including 3 characters filler
<b>Segment 11</b>	
Geographic Identification Information	H96—10 data cells through H102—95 data cells  8,031 characters
<b>Segment 12</b>	
Geographic Identification Information	H102—205 data cells through H139  8,031 characters including 144 characters filler

## Record Identification

Each record on a summary tape file is uniquely identified by a combination of geographic (for example, State, county, and county subdivision), summary level, and geographic component codes. For example, if you have the Puerto Rico STF 4B file and want to look at the summary record for Ponce Municipio, three identification fields must be checked: the summary level code for municipio records (050), the total record for geographic components (00), and the municipio code for

Ponce Municipio. If all three fields are not checked, multiple records will be found. See the Summary Level Sequence Chart and Geographic Area Component Codes section below for information on identifying summary level and geographic component codes.

## Summary Level Sequence Chart and Geographic Area Component Codes

The Summary Level Sequence Chart chapter and the geographic area component codes provide important information for using the 1990 census summary tape files. Remember that, for purposes of data presentation, the Census Bureau treats Puerto Rico as the statistical equivalent of a State and municipios as the statistical equivalent of counties. Barrios-pueblo and barrios are the statistical equivalent of county subdivisions. Some subdivisions (barrios pueblo or barrios) are divided into sub-minor civil divisions called subbarrios.

The Summary Level Sequence Chart chapter for STF 4 files identifies the geographic levels for which data are provided. It is easy to determine this if you remember that the last geographic area type listed in the sequence identifies the geography of the summary level; the prior codes simply define the hierarchy.

For example, in summary level 141, the hierarchy listed is State—Metropolitan Statistical Area/Consolidated Metropolitan Statistical Area/Remainder—Primary Metropolitan Statistical Area/Remainder—County—Census Tract/Block Numbering Area (BNA). The record actually contains data for a census tract/BNA within a given municipio, metropolitan area, and State equivalent.

When reading the Summary Level Sequence Chart chapter, it is important to recognize that dashes (—) separate the individual hierarchies while slashes (/) separate different types of geography within the same hierarchy.

After identifying the summary level code, turn to chart 2 at the end of this chapter to determine the geographic area codes and area characteristics provided on the tape for this summary level. Remember that an asterisk (\*) indicates a code in that field. The code may be one of the standard codes described below.

The Summary Level Sequence Chart chapter also provides geographic component code information. This code identifies the various geographic components for which the record is repeated within the summary level. These component codes are provided in the data dictionary beginning in position 14. For example, the Summary Level Sequence Chart for STF 4A (Puerto Rico) indicates that the summary level for the State equivalent records (040) has geographic component codes 00, 20, and 30. By turning to the geographic component variable in the data dictionary, you can determine that the tables for summary level 040 (Puerto Rico) are available for total geography (Puerto Rico)

(geographic component=00), portion in Metropolitan Statistical Area/Consolidated Metropolitan Statistical Area (geographic component=20), and portion not in metropolitan statistical area/consolidated metropolitan statistical area (geographic component=30).

In short, always check the geographic codes, the summary level (beginning in position 11 of the data dictionary), and the geographic component code (beginning in position 14 of the data dictionary) for complete identification of an STF 4 record.

### Special Area Codes

Special area codes appear in the geographic area codes portion of the data dictionary (positions 142-171) on all STF's. The codes represented may vary across STF's. In STF 4 for Puerto Rico, special area code (8) and special area code (9) are used. Special area code (8) is used in summary level 067 only; it contains the Census Bureau's subbarrio code. Special area code (9) is used in all summary levels on the STF 4 file. The nine codes for special area code (9) are described below.

Special area code (8)—Census Bureau subbarrio code

Special area code (9)—Land/water area

- |   |  |
|---|--|
| 1 | Significant land, significant (0.0005 or more square kilometers) water |
| 2 | Significant land, minimal (less than 0.0005 square kilometer) water    |
| 3 | Significant land, zero (0) water                                       |
| 4 | Minimal land, significant water  |
| 5 | Minimal land, minimal water  |
| 6 | Minimal land, zero water   |
| 7 | Zero land, significant water   |
| 8 | Zero land, minimal water   |
| 9 | Zero land, zero water  |

Special area code (10) appears in summary level 141 (census tract/block numbering area) records. This code indicates whether the census tract/BNB is split.

#### Special area code (10)—Split tract

- |   |   |
|---|---|
| 1 | Census/tract is split between places [10,000 or more persons] or is inside and outside a place [10,000 or more persons] |
| 2 | Census/tract is not split by places(s) [10,000 or more persons]   |

### Standard Codes

In the Identification section of all STF's, there are standard codes, undefined in the data dictionary, that have identical meaning regardless of the field. The codes are the same size as the field; that is, a three-character field will have three symbols. These standard codes are listed below.

- |       |  |
|-------|--|
| !     | Not available—The code would be shown except it had not been determined when the files were prepared (for example, metropolitan area code on a county summary level (050) on STF 1A).  |
| 9     | Not in—This indicates a "remainder of" an area, such as a place code in the portion of a county subdivision not in a place, or the summary level is not part of any area to which the code field applies, such as a summary level which is not in an Alaska Native Regional Corporation. |
| Blank | Not applicable—This indicates that the code is not applicable to the summary level.  |

Where these codes are specifically defined in the data dictionary, the defined code should be used. For example, in the division code description on the data dictionary (position 89), the code for the Pacific Division is indicated as "9." This "9" should be interpreted as the division code, not as "not in," the standard code for "9."

# SUBJECT LOCATOR

## CONTENTS

Index ..... 3-1

This index is designed to quickly identify the STF 4 tables for Puerto Rico needed. Each table variable is listed alphabetically. Both the type of entry being tabulated (universe), which is shown in *italics*, and the relevant table numbers appear under the variable heading. If the entry variable is cross tabulated by another variable, the variable of cross tabulation is indicated beneath the universe and is preceded by the word "by." The index entries for each variable are arranged alphabetically by universe, then by variable of cross tabulation, if any. For example, if you are looking for a table tabulating age by sex for all persons, check the index under either of the variables. Checking under age, you find an entry for one table with a universe of persons. Checking the entry, you can see that age is cross tabulated by sex in table P8.

## INDEX

\$25,000 to \$49,999  
\$50,000 or more

## P111. FAMILY TYPE, AGE OF HOUSEHOLDER, AND FAMILY INCOME IN 1989(216)—Con.

Householder 75 years and over:

Less than \$1,000

\$1,000 to \$2,499

\$2,500 to \$4,999

\$5,000 to \$7,499

\$7,500 to \$9,999

\$10,000 to \$14,999

\$15,000 to \$24,999

\$25,000 to \$49,999

\$50,000 or more

## P112. AGGREGATE FAMILY INCOME IN 1989(1) BY FAMILY TYPE AND AGE OF HOUSEHOLDER(24) ..... 24

Universe: *Families*

Total:

Married-couple family:

Householder 15 to 24 years

Householder 25 to 34 years

Householder 35 to 44 years

Householder 45 to 54 years

Householder 55 to 59 years

Householder 60 to 64 years

Householder 65 to 74 years

Householder 75 years and over

Other family:

Male householder, no wife present:

Householder 15 to 24 years

Householder 25 to 34 years

Householder 35 to 44 years

Householder 45 to 54 years

Householder 55 to 59 years

Householder 60 to 64 years

Householder 65 to 74 years

Householder 75 years and over

Female householder, no husband present:

Householder 15 to 24 years

Householder 25 to 34 years

Householder 35 to 44 years

Householder 45 to 54 years

Householder 55 to 59 years

Householder 60 to 64 years

Householder 65 to 74 years

Householder 75 years and over

## P113. AGE(3) BY HOUSEHOLD TYPE AND INCOME IN 1989(13) ..... 39

Universe: *Persons 60 years and over*

60 to 64 years:

In households:

Living alone:

No income

With income:

\$1 to \$999 or loss

\$1,000 to \$2,499

\$2,500 to \$4,999

\$5,000 to \$7,499

\$7,500 to \$9,999

\$10,000 to \$14,999

\$15,000 to \$24,999

\$25,000 or more

Not living alone:

With income

No income
