

# 1990 Census of Population and Housing Special Tabulation on Aging: U.S. Virgin Islands Technical Documentation

D1-D90-ST02-14-TECHV

**Note:** This technical documentation was issued at same time as the corresponding data file and does not necessarily reflect changes to the data file that may have been made later. We offer it as a service to our customers who have purchased the file, but we do not in general offer technical support for past data files. Note that although the documentation may refer to data on tape, the U.S. Census Bureau no longer releases data on magnetic tape; customers purchasing files previously released on tape will receive the file in ASCII on CD-ROM. For information about this and other technical documentation, please contact the Customer Services Center at 301-763-INFO (4636).

Additionally, Census Bureau organization, telephone numbers, and staff cited in this technical documentation are not current. For updated information, see our Telephone Contacts site at <http://www.census.gov/contacts/www/contacts.html> or Staff Search at <http://www.census.gov/cgi-bin/main/email.cgi>.

# ACKNOWLEDGMENTS

The Decennial Planning Division, Susan M. Miskura, Chief, coordinated and directed all census operations. Patricia A. Berman, Assistant Division Chief for Content and Data Products, and Lourdes N. Flaim, Chief, Puerto Rico and Outlying Areas Branch, developed, directed, and coordinated the 1990 Census of the Virgin Islands of the United States (Virgin Islands). Other assistant division chiefs were Robert R. Bair, Rachel F. Brown, James L. Dinwiddle, Allan A. Stephenson, and Edwin B. Wagner, Jr. The following other branch chiefs made significant contributions: Cheryl R. Landman, Adolfo L. Paez, A. Edward Pike, and William A. Starr. Other important contributors were Judy G. Belton, Kimberly K. Giesbrecht, Paulette Lichtman-Panzer, and Gloria J. Porter.

Data Collection and associated field operations were carried out by the government of the Virgin Islands through a special agreement between the Census Bureau and Governor Alexander A. Farrelly. Dr. Frank L. Milla was appointed Census Manager by the Governor and was assisted by Gerard Emanuel. The Census Bureau designated one of its employees, Leon D. Martin, as Census Advisor to provide technical advice and oversee the data collection activities.

The Decennial Operations Division, Arnold A. Jackson, Chief, was responsible for processing and tabulating census data. Assistant division chiefs were: Donald R. Dalzell, Kenneth A. Riccini, Billy E. Stark, and James E. Steed. Processing offices were managed by Alfred Cruz, Jr., Earle B. Knapp, Jr., Judith N. Petty, Mark M. Taylor, Russell L. Valentine, Jr., Carol A. Van Horn, and C. Kemble Worley. The following branch chiefs made significant contributions: Jonathan G. Ankers, Sharron S. Baucom, Catharine W. Burt, Vickie L. Cotton, Robert J. Hemmig, George H. McLaughlin, Carol M. Miller, Lorraine D. Neese, Peggy S. Payne, William L. Peil, Cotty A. Smith, Dennis W. Stoudt, and Richard R. Warren. Other important contributors were Roy D. Ashley, Jr., Eleanor I. Banks, Miriam R. Barton, Danny L. Burkhead, J. Kenneth Butler, Jr., Albert A. Coelker, Donald H. Danbury, Judith A. Dawson, Donald R. Dwyer, Beverly B. Fransen, Katherine H. Gilbert, Lynn A. Hollabaugh, Ellen B. Katzoff, Jeong S. Kim, Randy M. Klear, Frank J. Korpusik, Norman W. Larsen, Peter J. Long, Sue Love, Patricia O. Madson, Mark J. Matesko, John R. Murphy, Dan E. Philipp, Antoinette J. Ralston, Maria E. Reed, Willie T. Robertson, Barbara A. Rosen, Sharon A. Schoch, Imelda B. Severdia, Emmett F. Splers, and Jess D. Thompson.

The Housing and Household Economic Statistics Division, Daniel H. Weinberg, Chief, developed the questionnaire content, designed the data tabulations, and reviewed the data for the economic and housing characteristics. Gordon W. Green, Jr., Assistant Division Chief for Economic Characteristics, and Leonard J. Norry, Assistant Division Chief for Housing Characteristics, directed the development of this work. The following branch chiefs made significant contributions: William A. Downs, Peter J. Franczek, Patricia A. Johnson, Enrique J. Lamas, Charles T. Nelson, and Thomas S. Scoop. Other important contributors were Eleanor F. Baugher, Jeanne C. Benetti, Robert L. Bennefield, Robert W. Bonnette, Ester A. Buckles, Higinio Feliciano, Cynthia J. Harpina, Selwyn Jones, Leatha H. Lamson, Gordon H. Lester, Mark S. Littman, Wilfred T. Masumura, John M. McNeil, Diane C. Murphy, Mary L. Naifeh, George F. Patterson, Thomas J. Palumbo, Kirby G. Posey, John Priebe, and Carmina F. Young.

The Population Division, Paula J. Schnelder, Chief, developed the questionnaire content, designed the data tabulations, and reviewed the data for the demographic and social characteristics of the population. Philip N. Fulton, Assistant Division Chief for Census Programs, directed the development of this work. Other assistant division chiefs were Nampoo R. McKenney and Arthur J. Norton. The following branch and staff chiefs made significant contributions: Jorge H. del Pinal, Campbell J. Gibson, Roderick J. Harrison, Donald J. Hernandez, Jane H. Ingold, Martin T. O'Connell, Marie Pees, J. Gregory Robinson, Phillip A. Salopek, Paul M. Siegel, Robert C. Speaker, Gregory K. Spencer, and Cynthia M. Taeuber. Other important contributors were Celia G. Boertlein, Rosalind R. Bruno, Janice A. Costanzo, Rosemarie C. Cowan, Arthur R. Cresce, Larry G. Curran, Carmen DeNavas, Robert O. Grymes, Kristin A. Hansen, Mary C. Hawkins, Rodger V. Johnson, Michael J. Levin, Edna L. Paisano, Sherry B. Pollock, Stanley J. Rolark, A. Dianne Schmidley, Denise I. Smith, and Nancy L. Sweet.

The Data User Services Division, Marshall L. Turner, Jr., Chief, directed the development of data product dissemination and information to increase awareness, understanding, and use of census data. Marle G. Argana, Assistant Chief for Data User Services, directed preparation of electronic data products and their dissemination. Alfonso E. Mirabal, Assistant Chief for Group Information and Advisory Services, directed activities related to the National Services Program, State Data Centers, and preparation of training materials. The following branch chiefs made significant contributions: Deborah D. Barrett, Frederick G. Bohme, Larry W. Carbaugh, James P. Curry, Samuel H. Johnson, John C. Kavalunas, and Forrest B. Williams. Other important contributors were Molly Abramowitz, Barbara J. Aldrich, Delores A. Baldwin, Ramala Basu, Geneva A. Burns, Carmen D. Campbell, James R. Clark, Virginia L. Collins, George H. Dailey, Jr., Barbara L. Hatch, Paul T. Manka, John D. McCall, Jo Ann Norris, David M. Pemberton, Charles J. Wade, Joyce J. Ware, and Gary M. Young.

The Geography Division, Robert W. Marx, Chief, directed and coordinated the census mapping and geographic activities. Jack R. George, Assistant Division Chief for Geoprocessing, directed the planning and development of the TIGER System and related software. Robert A. LaMacchia, Assistant Division Chief for Planning, directed the planning and implementation of processes for defining 1990 census geographic areas. Silla G. Tomasi, Assistant Division Chief for Operations, managed the planning and implementation of 1990 census mapping applications using the TIGER System. The following branch chiefs made significant contributions: Frederick R. Broome, Linda M. Franz, David E. Galdi, Dan N. Harding, Donald I. Hirschfeld, Peter Rosenzon, Joel Sobel, and Brian Swanhart. Other important contributors were Gerard Boudrlait, Desmond J. Carron, Anthony W. Costanzo, Paul W. Daisey, Beverly A. Davis, Carl S. Hantman, Christine J. Kinnear, Terence D. McDowell, Wendell McManus, Linda M. Pike, Rose J. A. Quarato, Lourdes Ramirez, Janemary G. Rosenzon, Daniel L. Sweeney, Timothy F. Trainor, and Phyllis S. Willette.

The Statistical Support Division, John H. Thompson, Chief, directed the application of mathematical statistical techniques in the design and conduct of the census. John S. Linebarger, Assistant Division Chief for Quality Assurance, directed the development and implementation of operational and software quality assurance. Henry F. Wolfman, Assistant Division Chief for Census Design, directed the development and implementation of sample design, disclosure avoidance, weighting, and variance estimation procedures. Howard Hogan, Assistant Chief for Coverage Measurement, and David V. Bateman, Chief, Coverage Studies and Evaluation Staff, were contributing assistant division chiefs. The following branch chiefs made significant contributions: Deborah H. Griffin, Richard A. Griffin, Michael L. Mersch, and Jimmie B. Scott. Other important contributors were Maribel Aponte, James E. Hartman, Alfredo Navarro, and Amy L. Tillman.

The Administrative and Publications Services Division, Walter C. Odom, Chief, provided direction for the census administrative services, publications, printing, and graphics functions. Michael G. Garland was a contributing assistant division chief. The following branch and staff chiefs made significant contributions: Bernard E. Baymler, Albert W. Coener, Gary L. Lauffer, Gerald A. Mann, Clement H. Nettles, Russell Price, and Barbara J. Stanard. Other important contributors were Barbara M. Abbott, Robert J. Brown, David M. Coontz, and John T. Overby.

The Data Preparation Division, Joseph S. Harris, Chief, provided management of a multi-operational facility including kit preparation, procurement, warehousing and supply, and census processing activities. Plummer Alston, Jr., and Patricia M. Clark were assistant division chiefs.

The Field Division, Stanley D. Matchett, Chief, directed the census data collection and associated field operations. Richard L. Blitzer, Richard F. Blass, Karl K. Kindel, and John W. Marshall were assistant division chiefs. Sheila H. Grimm was the director of the New York Regional Office with responsibility for the Virgin Islands.

The Personnel Division, David P. Warner, Chief, provided management direction and guidance to the staffing, planning pay systems, and employee relations programs for the census. Colleen A. Woodard was the assistant chief.

## CITATION

*Census of Population and Housing, 1990: Special Tabulation Program (STP) 14, Special Tabulation on Aging Tape File (Virgin Islands of the United States) [machine-readable data files] / prepared by the Bureau of the Census. —Washington: The Bureau [producer and distributor], 1996.*

## TYPE OF FILE

Summary statistics.

## UNIVERSE DESCRIPTION

All persons and housing units in the U.S. Virgin Islands.

## SUBJECT MATTER DESCRIPTION

STP 14 for the Virgin Islands contains population and housing tables that present data for all persons and housing units. Although data were collected on a 100-percent basis in the Virgin Islands, the content of this file is comparable to the Stateside version of STP 14 which is based on sample data. Below is a list of population and housing items included in this file for the Virgin Islands. Please see the List of Tables chapter for a complete listing.

Population items include:

Age	Employment status
Earnings in 1989	Family type
Educational attainment	Hispanic origin

Housing items include:

Age of persons in unit	Plumbing facilities
Condominium status	Poverty status in 1989
Gross rent	Race of householder
Hispanic origin of householder	Ratio of income in 1989 to poverty level in 1989
Household type and relationship	Selected monthly owner costs
Housing units	Telephone in housing unit
Kitchen facilities	Tenure
Meals included in rent	Units in structure
Mobility or self-care limitation status of persons in unit	Value
Mortgage status	Vehicles available
Persons in unit	Year householder moved into unit
	Year structure built

Selected aggregates and medians also are provided. Data are presented in 483 population tables (matrices) and 228 housing tables (matrices).

## GEOGRAPHIC COVERAGE

STP 14 is released as a single file. This abstract lists only the most frequently accessed geographic levels. The Summary Level Sequence Chart chapter outlines the summaries in their entirety.

<sup>1</sup>See appendix I for a definition of low-income status

The file provides data for the Virgin Islands and its component areas down to the census tract/block numbering area level. The file structure is shown below:

State  
County<sup>2</sup>  
Census Tract/Block Numbering Area  
Place with 2,500 or more persons  
Planning and Service Area

#### RELATED PRINTED REPORTS

1990 CP-3, *Population Subject Reports*. Several reports were prepared covering population subjects and subgroups. Geographic areas generally include the United States; some reports include data for highly populated areas, such as States, metropolitan areas (MA's), counties, and large places. All reports are available.

1990 CH-3, *Housing Subject Reports*. Housing subject reports are planned covering 1990 census items. Geographic areas generally include the United States, regions, and divisions. All reports are available.

Listed below are other 1990 census printed reports containing sample data from Summary Tape File (STF) 3 and STF 4. These reports are available from the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402. An order form follows this abstract.

1990 CPH-3, *Population and Housing Characteristics for Census Tracts and Block Numbering Areas*. One report is published for each MA and one for the non-metropolitan balance of each State, Puerto Rico and the U.S. Virgin Islands showing data for most of the population and housing subjects included in the 1990 census. Some tables are based on the 100-percent tabulations, others on the sample tabulations. All reports are available.

1990 CPH-4, *Population and Housing Characteristics for Congressional Districts of the 103rd Congress*. A report for each State and the District of Columbia provides both 100-percent and sample data for States, congressional districts and, within congressional districts, counties, places of 10,000 or more inhabitants, county subdivisions of 10,000 or more inhabitants in 12 States, and American Indian and Alaska Native areas. All reports are available.

1990 CPH-5, *Summary Social, Economic, and Housing Characteristics*. These reports, issued for the United States, States, District of Columbia, Puerto Rico, and the U.S. Virgin Islands, provide sample population and housing data for States and local governmental units (i.e., counties, places, towns, and townships), other county subdivisions, and American Indian and Alaska Native areas. All reports are available.

1990 CP-2, *Social and Economic Characteristics*. These reports are issued for the United States, States, District of Columbia, Puerto Rico, and the U.S. Virgin Islands. They focus on the population subjects collected on a sample basis in 1990. Data are shown for States (including summaries such as urban and rural), counties, places of 2,500 or more inhabitants, county subdivisions of 2,500 or more inhabitants in selected States, Alaska Native areas, and each State portion of American Indian areas. All reports are available.

1990 CP-2-1A, *Social and Economic Characteristics for American Indian and Alaska Native Areas*. Data are shown for American Indian and Alaska Native areas. S/N 003-024-07509-1. Price: \$44.

1990 CP-2-1B, *Social and Economic Characteristics for Metropolitan Areas*. Data are shown for MA's. S/N 003-024-07510-5. Price: \$66.

1990 CP-2-1C, *Social and Economic Characteristics for Urbanized Areas*. Data are shown for urbanized areas (UA's). S/N 003-024-07511-3. Price: \$66.

1990 CH-2, *Detailed Housing Characteristics*. These reports, issued for the United States, States, District of Columbia, Puerto Rico, and the U.S. Virgin Islands, focus on the housing subjects collected on a sample basis in 1990. Data are shown for States (including summaries such as urban and rural), counties, places of 2,500 or more inhabitants, county subdivisions of 2,500 or more inhabitants in selected States, Alaska Native areas and the State portion of American Indian areas. All reports are available.

1990 CH-2-1A, *Detailed Housing Characteristics for American Indian and Alaska Native Areas*. Data are shown for American Indian and Alaska Native areas. S/N 003-024-07623-3. Price \$44.

1990 CH-2-1B, *Detailed Housing Characteristics for Metropolitan Areas*. Data are shown for MA's. S/N 003-024-07624-1. Price: \$66.

1990 CH-2-1C, *Detailed Housing Characteristics for Urbanized Areas*. Data are shown for UA's. S/N 003-024-07625-0. Price \$61.

#### RELATED REFERENCE MATERIALS

1990 *Census of Population and Housing Tabulation and Publication Program*. This booklet provides descriptions of the data products available from the 1990 census. Available without charge from Customer Services, Administrative and Customer Services Division, Bureau of the Census, Washington, DC 20233. Phone: 301-457-4100. FAX: 301-457-4714.

*Census '90 Basics*. This booklet provides a general overview of the census activity and detailed information on census content, geographic areas, and products. Available without charge from Customer Services (see above).

<sup>2</sup>Island

*Census ABC's—Applications in Business and Community.* This booklet highlights key information about the 1990 census and illustrates a variety of ways the data can be used. Available without charge from Customer Services (see above).

1990 CPH-R-1A, *1990 Census of Population and Housing Guide, Part A. Text.* This provides detailed information about all aspects of the census. Available from the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402. GPO S/N 003-024-08574-7. Price \$11.

1990 CPH-R-1B, *1990 Census of Population and Housing Guide, Part B. Glossary.* This is available from the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402. GPO S/N 003-024-08679-4. Price: \$5.50.

#### TECHNICAL DESCRIPTION

The records on the STP 14 file for the Virgin Islands have 114,646 characters divided into 14 segments of 8,189 characters each. The first 300 characters of each segment contain geographic information.

#### FILE AVAILABILITY

STP 14 file is available as a single file for the Virgin Islands. A machine-readable data dictionary is included on the tape. Options include 6250 bpl, ASCII or EBCDIC, and standard ANSI labeling. The file also can be made available on IBM 3480 compatible tape cartridge or CD-R (compact disc-recordable). When ordering, please use the order form at the end of this chapter. Pricing information is available from Customer Services, Administrative and Customer Services Division, Bureau of the Census, Washington, DC 20233. Phone: 301-457-4100. FAX: 301-457-4714.

For additional information about the subject content of STP 14, contact: Donald G. Fowles, Administration on Aging, U.S. Department of Health and Human Services, 330 Independence Avenue, SW, Washington, DC 20201. Phone: 202-619-2614. FAX: 202-260-1019.

# HOW TO USE THIS FILE

## CONTENTS

Introduction .....	2-1
Using the File .....	2-2

## INTRODUCTION

This chapter serves as a guide for data users to both the tape and the technical documentation. Novice users trying to understand how to use the documentation and the file should read this chapter first.

### Documentation Chapters

The Abstract chapter in this documentation provides a quick overview of the file, including the formal title, geographic coverage, subject coverage, and file availability. Also shown are citations for related reference materials and printed reports. Their titles and geography are included in this section, along with purchasing information.

The Subject Locator is an aid to finding which tables provide the information needed. The List of Tables (Matrices) and the Table (Matrix) Outlines provide two types of presentations for the tables available in the file. The List of Tables has the table titles and universes. The Table Outlines offer a detailed presentation of the tables. When reviewing the tables, remember that a colon(:) following an entry indicates the entry is a heading, not a data cell.

### User Notes

Information about file or documentation changes sometimes becomes available after the documentation has been printed. User notes inform the user community about these changes. These are issued in a numbered series. If there are technical documentation changes, revised pages usually accompany them. The revised pages should be inserted in their proper location, but the user note cover sheet should be filed in the User Notes chapter. Technical notes, which contain file errata, are also issued by the Census Bureau. We suggest filing these following appendix I.

### Data Dictionary

The data dictionary describes the file and provides character locations for each variable and each table. It has two elements, the identification section and the table (matrix) section.

In the identification section, the components include the field name; the data dictionary reference name, a short mnemonic for use with software packages; field size; starting position; and data type (alphabetic, numeric, or alphanumeric). Some of the field and reference names in the identification section are not applicable to the Virgin Islands data; these usually are filled with 9's or 0's, as appropriate.

The identification section of the data dictionary provides a list of the geographic codes or refers the user to the appropriate source. Review the footnotes carefully; they provide explanations for various terms. These footnotes are listed at the end of the identification section of the data dictionary.

The table (matrix) section provides information on the table (matrix) number; number of implied decimals in each cell (if not 0); starting position within the record, within the segment, and for all cells within the first-level variable; number of data cells in each table; number of data cells within each segment when tables are split across segments; and cell coordinates.

There also is a machine-readable data dictionary file on the data tape. This dictionary is designed to be converted for use with various software packages.

### Appendixes

Detailed information on geographic areas is in appendix A followed by subject-matter definitions in appendix B. Appendix C provides detailed statistical information about the data while appendix D outlines the data collection and procedures. A facsimile of the 1990 census questionnaire for the Virgin Islands is in appendix E.

Appendix F furnishes detailed information on the census data products for the Virgin Islands, as well as suggested sources of information and assistance. The record layout for the machine-readable data dictionary file that accompanies each tape order is in appendix G.

Appendix H contains the code lists used in processing the data. These codes are used in conjunction with the table (matrix) outlines and data dictionary chapters.

Appendix I contains additional codes and definitions specific to the STP 14 file.

### Count Corrections

The Census Bureau issues population count corrections on an occasional basis. For count corrections for geography at the place level and above, request CPH-L-157 from the Statistical Information Office, Population

Division, Bureau of the Census, Washington, DC 20233.  
Phone: 301-457-2422.

Count corrections for geography at the census tract/BNA level or below are available from the Population and Housing Programs Branch, Population Division, Bureau of the Census, Washington, DC 20233. Phone: 301-457-2381. When requesting these corrections, please include the desired census tract/BNA, block group, or block numbers.

## USING THE FILE

### Internal File Labels

**System Labels**—Tape orders which specify labeled tapes will have a standard American National Standards Institute (ANSI) label. The system label consists of 17 characters, 12 characters are used and the last 5 are "x" filled. The 1990 STP 14 file for the Virgin Islands has a Data Set Name (DSN) of SP14AXVI.Fnnxxxx, where VI is the United States Postal Service (USPS) abbreviation for the Virgin Islands. The "nn" is a two-digit number with leading zeros identifying the tape volume sequence. The "A", "X", "F", and "x" in the DSN remain constant.

**User Labels**—Each user tape will have six user header labels and six user trailer labels. These labels combine information from the system label and the identification portion of the first and last record. These labels enable the user to quickly identify the beginning and ending records on each tape.

**User Header Labels**—The user header labels are designated UHL1 through UHL6. UHL1 and UHL2 repeat information from the system label in HDR1 and HDR2. (See the File Information section.) UHL3 and UHL4 contain information from the identification portion of the first record on the tape. UHL5 and UHL6 contain a statement regarding the data limitations.

**User Trailer Labels**—The user trailer labels are designated UTL1 through UTL6. UTL1 and UTL2 contain information from the system trailer label. UTL3 and subsequent user trailer labels contain identification information from the last record on the tape. The unused portion of UTL6 is blank filled.

### File Information

File information, such as record counts, is not provided in the technical documentation. However, each tape order is accompanied by a tape creation sheet. This sheet provides the file name, file label (HDR1), the third user header label (UHL3), record size, block size, and record count. The third user header label for each reel identifies the geography for the first record on the reel. For example, the UHL3 at the beginning of each reel of a three-reel file provides the geography for the first record. If the geography needed is on reel three, only reel three needs to be processed.

The tape creation sheet received with the tape should be filed in the technical documentation notebook or with other tape information maintained by the user.

### Summary Level Sequence Chart and Geographic Area Component Codes

The Summary Level Sequence Chart chapter and the geographic area component codes provide important information for using the 1990 census summary tape files. The Summary Level Sequence Chart chapter for the STP 14 file identifies the geographic levels for which data are provided.

After identifying the summary level code, turn to chart 2 at the end of this chapter to determine the geographic area codes and area characteristics provided on the tape for this summary level. Remember that an asterisk (\*) indicates a code in that field. The code may be one of the standard codes described below.

The Summary Level Sequence Chart chapter also provides geographic component code information. This code identifies the various geographic components for which the record is repeated within the summary level. These component codes are provided in the identification section of the data dictionary beginning in position 14. For example the Summary Level Sequence Chart indicates that the summary level for island records (050) has geographic component codes 00 and 08. By turning to the geographic component variable in the data dictionary, you can determine that the tables are available for total geography (geographic component=00) and rural (geographic component=08). Refer to the data dictionary for a definition of components.

In short, always check the geographic code, the summary level (beginning in position 11 of the data dictionary), and the geographic component code (beginning in position 14 of the data dictionary), for complete identification of an STP 14 record.

### Record Identification

Each record on the file is uniquely identified by a combination of specific geographic codes (for example, State abbreviation), summary level and geographic component code.

For example, if you have the Virgin Islands STP 14 file and want to know the population for Planning and Service Area (3), table P1 (Persons) provides this data. The record containing this data is retrieved by specifying the summary level code for Planning and Service Area records (911), the total record for geographic components (00), the State abbreviation for the Virgin Islands (VI), and Planning and Service Area code (3). This code is located in Special Area Code (6) of the data dictionary beginning in position 163.

Remember in this example, you must check all four fields—the summary level code, the geographic compo-

nent, the State abbreviation, and Special Area Code (6) or you will find multiple records.

In addition, a table may extend across segments. Please refer to the Record Segmentation section below for information on selecting the correct segment of data.

## Record Segmentation

Logical records are divided into segments, each containing identification information and specific tables. The logical record has a record sequence number which is repeated in each segment. This is the logical record number (LOGRECNU) which appears in position 19 of each segment. Following this, in position 25, is the logical record part number (LOGRECPN). The LOGRECPN indicates the segment number for a block of data within a record. See Chart 1, Segmentation of the STP 14 Records, for a list of segments in the STP 14 file. The total number of parts, or segments, in a record (PARTREC) are shown in position 29.

The STP 14 records for the Virgin Islands have 114,646 characters divided into 14 segments of 8,189 characters each. All of the segments include 300 characters of geographic identification information followed by tables (matrices). Tables split across segments are indicated in Chart 1 below. The geographic identification information layout for each segment is identical to the identification section described in positions 1-300 of the data dictionary. Filler characters appear in the record to complete a record segment.

The machine-readable data dictionary, which accompanies the STP 14 file, provides information on these table (matrix) splits across segments.

**Chart 1. Segmentation of STP 14 (Virgin Islands) Records**

<b>Segment 1</b> Geographic Identification Information	P1 through P68—26 data cells  8,189 characters including 5 characters filler
<b>Segment 2</b> Geographic Identification Information	P68—10 data cells through P89—47 data cells  8,189 characters including 5 characters filler
<b>Segment 3</b> Geographic Identification Information	P89— 8 data cells through P119—11 data cells  8,189 characters including 5 characters filler
<b>Segment 4</b> Geographic Identification Information	P119—41 data cells through P159—35 data cells  8,189 characters including 5 characters filler

**Chart 1. Segmentation of STP 14 (Virgin Islands) Records—Con.**

<b>Segment 5</b> Geographic Identification Information	P159—117 data cells through P195—2 data cells  8,189 characters including 8 characters filler
<b>Segment 6</b> Geographic Identification Information	P195—4 data cells through P324—8 data cells  8,189 characters including 5 characters filler
<b>Segment 7</b> Geographic Identification Information	P324—8 data cells through P396—8 data cells  8,189 characters including 8 characters filler
<b>Segment 8</b> Geographic Identification Information	P396—12 data cells through H47—8 data cells  8,189 characters including 5 characters filler
<b>Segment 9</b> Geographic Identification Information	H47—4 data cells through H100—44 data cells  8,189 characters including 5 characters filler
<b>Segment 10</b> Geographic Identification Information	H100—16 data cells through H133—2 data cells  8,189 characters including 5 characters filler
<b>Segment 11</b> Geographic Identification Information	H133—3 data cells through H147—31 data cells  8,189 characters including 5 characters filler
<b>Segment 12</b> Geographic Identification Information	H147—17 data cells through H156—151 data cells  8,189 characters including 5 characters filler
<b>Segment 13</b> Geographic Identification Information	H156—65 data cells through H174—75 data cells  8,189 characters including 5 characters filler
<b>Segment 14</b> Geographic Identification Information	H174—6 data cells through H202  8,189 characters including 122 characters filler

## Special Area Codes

Special area codes appear in the geographic area codes portion of the data dictionary (positions 142-171). In STP 14 (Virgin Islands), special area code (6) and special area code (9) are used. Special area code (6) contains the Planning and Service Area codes. (See appendix I for a description and listing of these codes.) The Planning and Service Area code will be entered as a three-character mixed numeric/alphabetic code, left justified. The characters will be blank filled, for example:

PSA 1A9 will be coded as "1A9"  
PSA 19A will be coded as "19A"  
PSA 19 will be coded as "19blank"  
PSA 9 will be coded as "9blankblank"  
PSA A will be coded as "Ablankblank"

Special area code (9) is used in all summary levels on the STP 14 file. The nine codes for special area code (9) are described below.

### Special area code (6)—Planning and Service Areas Code

#### Special area code (9)—Land/water area

- |   |  |
|---|--|
| 1 | Significant land, significant (0.0005 or more square kilometers) water |
| 2 | Significant land, minimal (less than 0.0005 square kilometer) water    |
| 3 | Significant land, zero (0) water                                       |
| 4 | Minimal land, significant water  |
| 5 | Minimal land, minimal water  |
| 6 | Minimal land, zero water   |
| 7 | Zero land, significant water   |
| 8 | Zero land, minimal water   |
| 9 | Zero land, zero water  |

## Standard Codes

In the identification section of all summary tape files, there are standard codes, undefined in the data dictionary, that have identical meaning regardless of the field. The codes are the same size as the field; that is, a three-character field will have three symbols. These standard codes are listed below.

1 Not available—The codes would be shown except it had not been determined when the files were prepared (for example, metropolitan area code on a county summary level (050) on STF 1A).

9 Not in—This indicates a "remainder of" an area, such as a place code in the portion of

a county subdivision not in a place, or the summary level is not part of any area to which the code field applies, such as a summary level which is not in an Alaska Native Regional Corporation.

Blank Not applicable—This indicates that the code is not applicable to the summary level.

Where these codes are specifically defined in the data dictionary, the defined code should be used. For example, in the division code description on the data dictionary (position 89), the code for the Pacific Division is indicated as "9." This "9" should be interpreted as the division code, not as "not in," the standard code for "9."

## CONTENTS

Index..... 3-1

This index is designed to identify quickly the variables in the STP 14 tables for the Virgin Islands. Each variable in a table is listed alphabetically in bold type. Both the universes and the relevant table numbers appear under the variable heading. If the index variable is cross tabulated by other variables, the cross tabulation variables are indicated beneath the universe and are preceded by the word "by."

The universe, that is the type of entry being tabulated, is shown in *italics*. While each tabulation applies to only one universe, the index variables may have references to more than one universe. Check all universes under each index variable.

## USER NOTES

User notes supply file purchasers with additional or corrected information which becomes available after the technical documentation or files are prepared. They are issued in a numbered series and automatically mailed to all users who purchase files or technical documentation from the Census Bureau.

Each user note has a cover sheet which should be filed following this page. Technical documentation replacement pages will follow the cover sheet. These pages need to be filed in their proper location and the original pages destroyed. Replacement pages can be readily identified, since they have the user note date on the lower outside portion of each page.

**CENSUS OF POPULATION AND HOUSING, 1990:  
SPECIAL TABULATION PROGRAM (STP) 14,  
SPECIAL TABULATION ON AGING TAPE FILE  
(VIRGIN ISLANDS)**

**USER NOTE 1**

**Age Reporting**—Review of detailed 1990 information indicated that respondents tended to provide their age as of the date of completion of the questionnaire, not their age as of April 1, 1990. In addition, there may have been a tendency for respondents to round up their age if they were close to having a birthday. It is likely that approximately 10 percent of persons in most age groups are actually 1 year younger. For most single years of age, the misstatements are largely offsetting. The problem is most pronounced at age 0 because persons lost to age 1 may not have been fully offset by the inclusion of babies born after April 1, 1990 and because

there may have been more rounding up to age 1 to avoid reporting age as 0 years. (Age in completed months was not collected for infants under age 1.)

The reporting of age 1 year older than age on April 1, 1990 is likely to have been greater in areas where the census data were collected later in 1990. The magnitude of this problem was much less in the three previous censuses where age was typically derived from respondent data on year of birth and quarter of birth. (For more information on the design of the age question, see the discussion on comparability under "Age" in appendix B.)

March 1995

**CENSUS OF POPULATION AND HOUSING, 1990:  
SPECIAL TABULATION PROGRAM (STP) 14,  
SPECIAL TABULATION ON AGING TAPE FILE  
(VIRGIN ISLANDS)**

**USER NOTE 2**

**Poverty Status in 1989**—A minor error has been detected in the determination of poverty status for persons and families in the 1990 census. For families with a householder or spouse under the age of 18, an incorrect poverty threshold was used to determine

poverty status. This resulted in the misclassification of 720 families in the United States and 6 families in both Puerto Rico and the U.S. Virgin Islands as either poor or not poor. Due to the small number of families affected, no correction has been applied. Weighted estimates of affected cases are listed below by State.

Families misclassified as:	Poor	Not Poor	Net difference in number poor
United States, excluding Puerto Rico and the Virgin Islands	388	332	-56
Alabama	11	2	-9

**USER NOTE 3**

**Hispanic Origin Code List**—The three-digit numerical codes used during processing to identify FOSD/C circles for the categories of Hispanic origin in questionnaire item 7 differ slightly from those codes shown in the code lists appendix of the technical documentation for Summary Tape Files 3 and 4 and various Subject Summary Tape Files. The data presented for Hispanic origin were unaffected by this difference. The codes

used during processing of the Hispanic origin categories are shown.

- C1 Incorporated place that is governmentally active, is not related to an Alaska Native village statistical area (ANVSA), and does not serve as a minor civil division (MCD) equivalent
- C2 Incorporated place that also serves as a minor civil division (MCD) equivalent because, although the place is coextensive with an MCD, the Census Bureau, in agreement with State officials, does not recognize that MCD for presenting census data because the MCD cannot provide governmental services (Iowa and Ohio only)
- C5 Incorporated place that also serves as an MCD equivalent because it is not part of an MCD
- C6 Incorporated place that coincides with or approximates an ANVSA
- C7 Incorporated place that also serves as a county equivalent; generally referred to as an "independent city"
- C8 The portion ("remainder") of a consolidated city that excludes the incorporated place(s) within that jurisdiction
- C9 Incorporated place whose government is operationally inactive and is not included in any other C subclass
- M2 Military or Coast Guard installation (or part of an installation) that serves as a census designated place (CDP)
- U1 CDP with a name that is commonly recognized for the populated area
- U2 CDP with a name that is not commonly recognized for the populated area (e.g., a combination of the names of two or three commonly recognized communities, or a name that identifies the location of the CDP in relation to an adjacent incorporated place)
- U9 CDP that coincides with or approximates an ANVSA.

Note: In Ohio, a multi-county place that has a different MCD relationship in each county is assigned only a single class code of C1, C2, or C5.

Place Description Code .....	PLACEDC	1	123	A/N
------------------------------	---------	---	-----	-----

- 1 Incorporated central city of a metropolitan statistical area/primary metropolitan statistical area (MSA/PMSA), but not a central place of an urbanized area (UA)
- 2 Incorporated central place of an urbanized area (UA), but not a central city of a metropolitan statistical area/primary metropolitan statistical area (MSA/PMSA)
- 3 Incorporated central city of a metropolitan statistical area/primary metropolitan statistical area (MSA/PMSA) and a central place of an urbanized area (UA)
- 4 Consolidated city or an incorporated place that is not a central city of a metropolitan statistical area/primary metropolitan statistical area (MSA/PMSA) and not a central place of an urbanized area (UA)
- 5 Incorporated place, which is the central place of an urbanized area (UA), but only part of which is the central city of a metropolitan statistical area/primary metropolitan statistical area (MSA/PMSA)
- 6 Incorporated place, which is not a central place of an urbanized area (UA), but part of which is the central city of a metropolitan statistical area/primary metropolitan statistical area (MSA/PMSA)

DATA DICTIONARY

# IDENTIFICATION SECTION—Con.

Field name	Data dictionary reference name	Field size	Starting position	Data type
Functional Status Code.....	FUNCSTAT	1	258	A/N

- A Active governmental unit, except American Indian reservations and Alaska Native village statistical areas. — An active governmental unit has the legal capacity to have officers, to raise revenue, and to conduct governmental activities under State laws, and currently is doing so.
- B Functioning governmental unit providing no substantive governmental services. — These areas may be coextensive with and administered by officials of another governmental unit (such as towns in Connecticut that are coextensive with cities), or the number of officials and/or the functions they perform are so minimal and/or vestigial that the Census Bureau does not recognize them as governmental units for census purposes (such as townships in Iowa).
- F False entity. — In order to maintain complete coverage of every State at the county level and of every county at the county subdivision level, we create false entities at these levels for any place that is independent of a county or independent of a minor civil division (MCD). This code also is used for place records that represent the remainder of a consolidated city or the remainder of a county subdivision.
- I Inactive governmental unit. — An inactive governmental unit has the legal capacity to be active, but currently has no legal officers, raises no revenues, and conducts no activities.
- N Nonfunctioning governmental unit. — A nonfunctioning governmental unit has legally established boundaries, but has no legal capacity to conduct governmental activity.
- R An American Indian reservation, an American Indian tribe whose name is associated with trust lands, or an Alaska Native village statistical area.
- S Statistical entity, except Alaska Native village statistical areas and tribal jurisdiction statistical areas. — A statistical entity has no governmental status and is defined by or in cooperation with the Census Bureau or other Federal agency. This category includes census regions, census divisions, census county divisions (CCDs), census designated places (CDPs), metropolitan areas (MSA/CMSA/PMSAs), urbanized areas (UAs), unorganized territories (UTs), tribal designated statistical areas (TDSAs), census areas and census subareas in Alaska, and comunidades and zonas urbanas in Puerto Rico.
- T Tribal jurisdiction statistical area. — A tribal jurisdiction statistical area (TJSA) is not a legally defined governmental unit, but is recognized as a statistical area for the 1990 census. These areas exist only in the State of Oklahoma and were not recognized separately in 1980.

45	Township minor civil division (MCD) in Kansas, Nebraska, and North Carolina; no status is appended to the name of the entity in census publications and related data products.			
46	Unorganized territory minor civil division (MCD) in 9 States; "unorg." is appended to the name of the entity in census publications and related data products.			
47	Village minor civil division (MCD) equivalent in New Jersey, Ohio, South Dakota, and Wisconsin; "village" is appended to the name of the entity in census publications and related data products.			
48	State minor civil division (MCD) in Palau; "state" is appended to the name of the entity in census publications and related data products.			
49	Charter township minor civil division (MCD) in Michigan; "charter township" is appended to the name of the entity in Census Bureau publications and other data products.			
51	Subbarrio sub-minor civil division (sub-MCD) in Puerto Rico; "subbarrio" is appended to the name of the entity in census publications and related data products.			
55	Comunidad place (census designated place) in Puerto Rico; "comunidad" is appended to the name of the entity in census publications and related data products.			
56	Borough place in Connecticut, New Jersey, and Pennsylvania; "borough" is appended to the name of the entity in census publications and related data products.			
57	Census designated place place; "CDP" is appended to the name of the entity in census publications and related data products.			
58	City place; "city" is appended to the name of the entity in census publications and related data products.			
59	City place; used for some cities that have a unique description, no description, or a description included with their name, as follows: Anaconda-Deer Lodge County (Montana): incorporated municipality; Butte-Silver Bow (remainder) (Montana): (none); Carson City, Nevada: (none); Columbus city (remainder) (Georgia): (none); Indianapolis city (remainder) (Indiana): (none); Jacksonville city (remainder) (Florida): (none); Lexington-Fayette (Kentucky): Urban County Government; Lynchburg-Moore County (Tennessee): (none); Milford city (remainder) (Connecticut): (none); Nashville-Davidson (remainder) (Tennessee): "Metropolitan Government of Nashville and Davidson County"; No status is appended to the name of the entity in census publications and related data products.			
60	Town place; place in 30 States and the Virgin Islands of the United States; "town" is appended to the name of the entity in census publications and related data products.			
61	Village place; place in 19 States; "village" is appended to the name of the entity in census publications and related data products.			
62	Zona urbana place (census designated place) in Puerto Rico; "zona urbana" is appended to the name of the entity in census publications and related data products.			
65	Consolidated city in Connecticut, Florida, Georgia, and Indiana "city" is appended to the name of the entity in census publications and related data products.			
66	Consolidated city used for some consolidated cities that have unique descriptions or no descriptions, as follows: Butte-Silver Bow (Montana): (none); Nashville-Davidson (Tennessee): "Metropolitan Government of Nashville and Davidson County"; No status is appended to the name of the entity in census publications and related data products.			
68	Census region no status is appended to the name of the entity in census publications and related data products.			
69	Census division no status is appended to the name of the entity in census publications and related data products.			
71	Consolidated metropolitan statistical area (CMSA) "CMSA" is appended to the name of the entity in census publications and related data products.			

NOTE: See footnotes at the end of this section.

## Footnotes

1. A unique identifier for each file series. Dress rehearsal files have a "D" in the character following the last character in the file identification code for the equivalent 1990 decennial census file; for example, PL94171D is the identifier for the dress rehearsal file for the P.L. 94-171 data. File identification code for the P.L. 94-171 file is PL94171. File identification codes for summary tape files are STFnn where nn = file number; for example, STF1A is the identification for Summary Tape File 1A. File identification codes for subject summary tape files are SSTFnn where nn = the number of the subject report. File identification codes for special project files are identified by SPmmm where mmm = a three digit special project number. See How to Use This File for further information.
2. Identifies the geographic level for which the data matrices on the summary tape file have been summarized. The summary level sequence chart describes the hierarchical arrangement of the specified geographic areas with other geographic areas, if any. The summary level must be used in combination with the geographic area codes to identify a specific geographic area (for example, summary level 050 and a specific county code must be used together to locate the data for a particular county). See How to Use This File for further information.
3. Indicates an iteration (repetition), for the specified summary level, of the data matrices on the summary tape file for the geographic components listed in the Geographic Component field. See How To Use This File for further information.

## IDENTIFICATION SECTION—Con.

4. Indicates an iteration (repetition), for the specified summary level, of the data matrices on the summary tape file for a population or housing characteristic. Only matrices containing a "B" in the prefix have characteristic iterations. See *How to Use This File* for further information.
5. The logical record is the complete record [identification and set of tables (matrices)] for a geographic entity defined by the summary level, but exclusive of the characteristic iteration. A logical record may have one or more parts (or segments). Each logical record has an assigned sequential integer number within the file. See *How to Use This File* for further information.
6. Within the logical record, each part is identified uniquely in terms of its sequence. See *How to Use This File* for further information.
7. This field identifies how many parts (or segments) comprise the entire logical record. See *How to Use This File* for further information.
8. See Appendix A, *Area Classifications*, for definition of this field if it is applicable to this file.
9. See the publication, *Geographic Identification Code Scheme*, for codes in this field and related terminology if it is applicable to this file. See Appendix A, *Area Classifications*, for definition of this field if it is applicable to this file.
10. See the publication, *Geographic Identification Code Scheme*, for FIPS 55 codes in this field and related terminology if it is applicable to this file. See Appendix A, *Area Classifications*, for definition of this field if it is applicable to this file.
11. Codes in unspecified arrangement for Census Bureau use.
12. Land area measurement in thousandths (.001) of a square kilometer. The accuracy of the area measurement is limited by the inaccuracy inherent in 1) the mapping of the various boundary features in the TIGER File and 2) rounding affecting the last digit in all operations that compute and/or sum the area measurements. Land area includes intermittent water and glaciers, which appear on census maps and in the TIGER File as hydrographic features. An area of .0005 square kilometer is rounded to .001; an area smaller than .0005 is rounded to .000. The decimal point is implied on the file. Square miles can be derived by dividing square kilometers by 2.59. See Appendix A, *Area Classifications*, for definition of this field if it is applicable to this file.
13. Water area measurement in thousandths (.001) of a square kilometer. Water area is excluded from census blocks by definition, so the water area for a block always will be zero. The accuracy of the area measurement is limited by the inaccuracy inherent in 1) the mapping of the various boundary features in the TIGER File and 2) rounding affecting the last digit in all operations that compute and/or sum the area measurements. Water area excludes intermittent water and glaciers, which are treated as land even though they appear on census maps and in the TIGER File as hydrographic features. An area of .0005 square kilometer is rounded to .001; an area smaller than .0005 is rounded to .000. The decimal point is implied on the file. Square miles can be derived by dividing square kilometers by 2.59. See Appendix A, *Area Classifications*, for definition of this field if it is applicable to this file.
14. Name of the lowest-level entity represented by the summary level. In addition to the name of the entity, the name field contains the political/statistical area description (PSAD) when appropriate, and sometimes contains the State abbreviation.

For legal entities, the name is the one reported to the Bureau of the Census in the Boundary and Annexation Survey and by other appropriate sources; for statistical entities, the name is determined by the Office of Management and Budget for metropolitan areas and, for other areas, the name is determined by the Bureau of the Census, usually in cooperation with local officials.

When the summary level represents only part of the area specified in the name, the name usually will have "(pt.)" appended to the name/code terminology to designate that this entry for the entity represents only a part of the total entity.

## **IDENTIFICATION SECTION—Con.**

15. The total number of housing units enumerated in the specified summary level as determined in the 100-percent processing.
16. Latitude in degrees, to six decimal places, of a point within the geographic area represented by the summary level. The decimal point is implied on the file. The character immediately preceding the first digit of the latitude of an internal point identifies the direction (hemisphere): a plus sign (+) indicates the Northern Hemisphere; a minus sign (-) indicates the Southern Hemisphere. See Appendix A, Area Classifications, for definition of this field if it is applicable to this file.
17. Longitude in degrees, to six decimal places, of a point with the geographic area represented by the summary level. The decimal point is implied on the file. The character immediately preceding the first digit of the longitude of an internal point identifies the direction (hemisphere): a plus sign (+) indicates the Eastern Hemisphere; a minus sign (-) indicates the Western Hemisphere. A point on the 180th meridian is assigned to the Western Hemisphere (-180000000). See Appendix A, Area Classifications, for definition of this field if it is applicable to this file.
18. The total number of persons enumerated in the specified summary level as determined in the 100-percent processing.
